Past performance is not a guide to future returns. Ordinary share price performance figures have been calculated using daily closing prices with dividends reinvested.

NAV performance figures have been calculated using daily NAV with dividends reinvested.

The NAV used includes current period revenue and values debt at fair. The MSCI World Index (£) Total Return performance shown is total return (net of withholding tax).

All performance figures are in sterling as at 31 May 2024 except where otherwise stated. Standardised past performance figures are updated on a quarterly basis.

Dividend Policy

The dividend policy is designed to pay an annual income of at least 4% calculated on the unaudited year end NAV. This will be paid quarterly in equal amounts so that shareholders have clarity of the income provided for the year ahead.

¹ The total declared and prospective dividends for the current financial year, expressed as a percentage of the trust's value calculated at the month end close price. Please note that a new dividend policy was introduced in May 2024, which is designed to pay shareholders at least 4% of unaudited NAV at the end of the Financial Year. The yield is indicative only and is not guaranteed.

² In May 2024, a new discount policy was introduced whereby the Company intends to use share buybacks to maintain the discount at less than 10% in normal market conditions.

General information

The ordinary shares of the Company are listed on the London Stock Exchange. On an annual basis, shareholder approval is sought to authorise the buy back and issue of shares. This enables the Company to respond to an excess of supply or demand for the Company's shares in the market.

Continuation vote

The Company intends to put forward a vote at the AGM in 2026 for the continuation of the Company. If the 2026 continuation vote is passed the Company will put forward a continuation vote at the AGM in 2031 and, if passed, at each fifth AGM thereafter.

Investment risks

The value of investments and any income will fluctuate (this may partly be as a result of exchange rate fluctuations) and investors may not get back the full amount invested.

The product uses derivatives for efficient portfolio management which may result in increased volatility in the NAV.

The use of borrowings may increase the volatility of the NAV and may reduce returns when asset values fall.

The product invests in emerging and developing markets, where difficulties in relation to market liquidity, dealing, settlement and custody problems could arise.
