

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### UBAM - Biodiversity Restoration, a sub-fund of UBAM

**Class: KC GBP (Capitalisation) LU2351028977**

UBAM is managed by UBP Asset Management (Europe) S.A.

### Objectives and investment policy

The Fund seeks to grow capital and generate income primarily by investing in worldwide equities -including Emerging countries- with the primary objective of investing behind solution providers to the Biodiversity crisis and incrementally move towards a nature positive portfolio.

The Fund is actively managed and relatively concentrated (45-55 names) with low turn-over.

The Fund may invest its net assets up to:

- 100% in equities with no restriction on the percentage invested in small and mid-capitalization but investment in companies with a market capitalization below USD 200 million or equivalent is limited to 5%
- 20% in warrants on transferable securities, convertible bonds or bonds with warrants on transferable securities, bonds and other debt securities and money market instruments.

The Fund invests primarily in biodiversity "fixers" (companies which through their revenues are reducing biodiversity loss) and value-chain champion companies (companies which are not necessarily traditional impact companies, but have huge supply chains and are taking this responsibility seriously).

100% of the invested companies are positive contributors to the Fund's biodiversity objectives.

The investment strategy relies on external Environmental, Social and Governance (ESG) ratings, as well as internal analysis.

The construction of the universe is driven by positive inclusion, rather than exclusion. The Investment Manager builds a universe through adherence to the intensity of biodiversity contribution "IMAP" system and positive ESG credentials. The Investment Manager performs a negative screening, based on the exclusion list and ESG profile to filter the investment universe. Impact and ESG credentials are fully integrated into decision making regarding the purchase, sale and position-sizing of underlying holdings. The "IMAP" score in combination with ESG and financial analysis will determine the size of the positions in the portfolio.

The ESG analysis covers at least 90% of the Fund's portfolio.

The Fund uses the MSCI AC World Net Return Index (USD) (the "Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Fund. The Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments, especially in view of the fact that the Benchmark is a standard reference used to frame the Fund's universe but is not aligned with the environmental and/or social characteristics promoted by the Fund.

The Fund's base currency is USD.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is reinvested (capitalisation share class).

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg.

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum 5 years.

### Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk category 6 reflects a very high potential gain and/or loss in the value of the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

**Counterparty risk:** The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail

to honour its contractual obligations. This may result in a financial loss for the Fund.

**Currency risk:** The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

**Emerging countries risk:** The Fund invests in overseas countries which carry a higher risk than investing in larger established countries. Investments in Emerging countries are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in Emerging countries rather than more developed countries may encounter difficulties when buying and selling investments. Emerging countries are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

**ESG and Sustainability risk:** It may result in a material negative impact on the value of an investment and performance of the Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. All or part of said data may come/originate from third parties.

**Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

**Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.**

## Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charges	1.07%
-----------------	-------

### Charges taken from the Fund under certain specific conditions

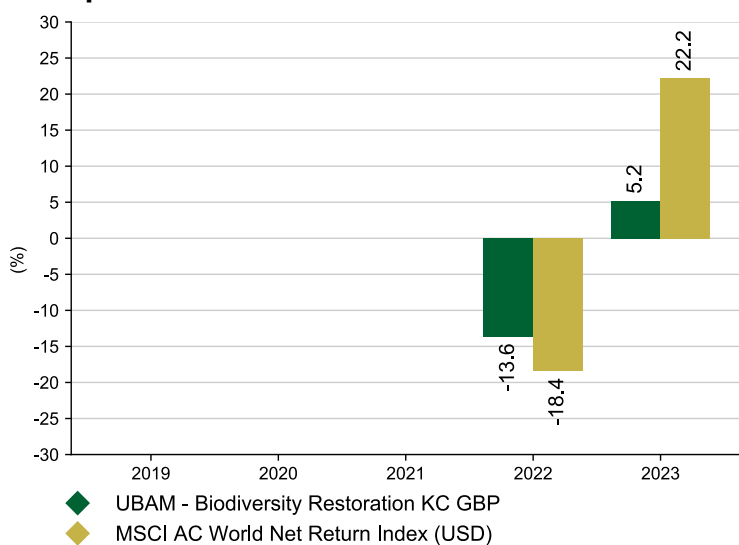

Performance fee	Not applicable
-----------------	----------------

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower. Your financial advisor or distributor can inform you of the associated entry and exit charges.

Ongoing charges are based on the charges for the previous year, ending on 31 December 2023. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another fund.

**For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at [www.ubp.com](http://www.ubp.com).**

## Past performance

**The performance figures shown in the bar chart are not a reliable indication of future performance.**

Annualised performance is calculated after deducting all charges taken from the Fund.

Fund launch date: 29/09/2021

Share class launch date: 05/11/2021

Share class currency: GBP

Please note that the Benchmark currency may differ from the share class currency.
