Canary Wharf  
London, E14 5EY

On 26 March 2024, Ernst & Young LLP were appointed as auditor to this ICVC. Prior to this date the auditors were PricewaterhouseCoopers LLP.

## REPORT OF THE AUTHORISED CORPORATE DIRECTOR

### THE COMPANY

Aviva Investors Investment Funds ICVC (“the Company”) is an Open-Ended Investment Company (“OEIC”) with variable capital incorporated in England and Wales on 9 September 1998. The property of the Company is entrusted to J.P. Morgan Europe Limited (“the Depositary”). The shareholders are not liable for any debts of the Company.

The object of the Company is to invest the scheme property in transferable securities, money market instruments, units in collective investment schemes, deposits and derivatives and forward transactions in accordance with the COLL Sourcebook with the aim of spreading investment risk and giving its shareholders the benefit of the results of the management of that property.

The Company has an umbrella structure and currently has nineteen sub-funds (“Funds”) which are available for investment, each with a different investment objective. In the financial statements you will find an investment review for each Fund which includes details of the investment objectives.

### AUTHORISED STATUS

From 9 September 1998 the Company has been authorised as an Open-Ended Investment Company under Regulation 7 of the Open-Ended Investment Companies Regulations 1996 (superseded by Regulation 12 of the Open-Ended Investment Companies Regulations 2001) (“Regulations”).

The Company is a UCITS Scheme operating under the COLL Sourcebook and is constituted as an “umbrella company” under the Regulations, which means that the Company issues shares in different Funds.

### THE FINANCIAL STATEMENTS

We are pleased to present the interim financial statements of the Company for the six months ended 15 April 2024. As required by the Regulations, information for each of the Funds has been included in these financial statements. On the following pages we review the performance of each of those Funds during the period. We hope that you find our review useful and informative.

### ANNUAL GENERAL MEETINGS

The Company will not be holding Annual General Meetings.

### SIGNIFICANT INFORMATION

#### **CLOSURE OF AVIVA INVESTORS GLOBAL EMERGING MARKETS EQUITY UNCONSTRAINED, AVIVA INVESTORS GLOBAL EQUITY UNCONSTRAINED AND AVIVA INVESTORS SUSTAINABLE INCOME & GROWTH FUNDS**

On 4 April 2022, Aviva Investors UK Fund Services Limited, the authorised fund manager of the Scheme (the “ACD”), commenced the termination of the following sub-funds of the Scheme: the Aviva Investors Global Equity Unconstrained Fund, Aviva Investors Global Emerging Markets Equity Unconstrained Fund and Aviva Investors Sustainable Income & Growth Fund.

#### **CLOSURE OF AVIVA INVESTORS HIGH YIELD BOND FUND**

On 19 July 2022, Aviva Investors UK Fund Services Limited commenced the termination of the Aviva Investors High Yield Bond Fund, a sub-fund of the Aviva Investors Investment Funds ICVC.

#### **CHANGES TO THE PROSPECTUS**

On 2 November 2023, the Australian Securities Exchange was included as an eligible derivatives market for the AI Distribution Fund.

On 21 November 2023, the Valuation Point for Aviva Investors Global Equity Income Fund was changed to 11:59pm.

Following receipt of final termination accounts for each (1) AI Sustainable Income & Growth Fund and (2) AI Global Equity Unconstrained Fund.

The Prospectus and instrument were updated to remove references to these now terminated sub-funds.

On 13 March 2024, E&Y LLP was appointed as auditor to this umbrella. On 27 March 2024, the registered office for Aviva group entities changed to 80 Fenchurch Street, London, EC3M 4AE.

On 2 April 2024, we updated the baseline exclusion policy applicable to the Fund, to reflect the introduction of the negative screen applicable to tobacco companies.

On 5 April, the FMF for each share class of the Aviva Investors UK Smaller Companies Fund was reduced by 20%.

On 24 April, we updated the IOP of the AI UK Equity Dividend Fund following FCA approval.

On 10 May 2024, Aviva Investors UK Fund Services Limited, the authorised fund manager of the Scheme (the “ACD”), commenced the termination of the Aviva Investors UK Smaller Companies Fund.

## MANAGER'S MARKET REVIEW

### EQUITY MARKET REVIEW

Global shares posted strong returns in the six months under review. Confidence was supported by hopes that the main developed economies would avoid material slowdowns in 2024. Fears that the US would slide into recession eased steadily as robust consumer spending was fuelled by stronger-than-expected employment data. Government investment also played a key role in sustaining the momentum of growth. With hopes also high that the US central bank would start to cut interest rates in 2024 amid positive progress in the fight against inflation, the US stock market – boosted by further sharp gains by its large technology companies – pushed on to new highs in the first quarter of the year. While the economic news was much less upbeat in Europe, Japan and the UK, shares nevertheless surfed the wave of optimism to post strong total returns and move into range of new highs. Although the UK and Japan had technically fallen into recession in the final quarter of 2023, data released in the new year indicated that they would rapidly return to growth. Indeed, the return of inflation to the Japanese economy prompted the Bank of Japan to finally end negative interest rates after a decade of ultra-loose monetary policy.

Emerging markets also contributed well, with confidence underpinned by the prospect of lower US interest rates and a higher-than-anticipated global demand for their goods and services. Several emerging markets were also benefiting from already having started to loosen monetary policy.

Volatility was relatively low over the review period considering notable geopolitical uncertainties such as the ongoing war in Ukraine and escalating tensions in the Middle East.

### FIXED INCOME – CORPORATE AND HIGH-YIELD BONDS

Although experiencing heightened volatility amid mixed messages from the main central banks regarding monetary policy, bonds ultimately posted gains in aggregate during the review period. Initially, the sovereign bond markets rallied strongly as softer language from the key policymakers and positive progress in bringing down inflation suggested that interest rate cuts may be delivered much earlier than expected in 2024. However, sovereign bonds gave back some of these gains in the early months of 2024 as hopes for a swift loosening of monetary policy faded following some higher-than-expected inflation data in the US. Investors were also concerned about the prospect of further high levels of sovereign bond issuance given governments' heavy ongoing commitments to public spending.

Corporate bonds posted stronger returns than sovereign bonds, benefiting from the view that the feared sharp slowdown of the global economy in 2024 was not likely to materialise. The credit worthiness of many corporate bond issuers was broadly maintained as many companies appeared to be weathering the impact of high interest rates. Moreover, the market was supported by resilient demand from investors as they looked to lock in attractive yields while they were still available. While there were some tremors in the high-yield market as several European issuers got into difficulties, they were seen as being broadly isolated occurrences and unlikely to trigger a wider collapse in confidence.

June 2024

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested. Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell securities.

## STATEMENT OF CROSS HOLDINGS

As at 15 April 2024, the following sub-fund held investments in other sub-funds within the Company.

**Aviva Investors Distribution Fund**

Fund	Sub-fund Currency	Holding	Market Value	% of net asset value
Aviva Investors Global Equity Income Fund Class 4, Income shares	GBP	3,514,626	6,687,896	4.57

## AVIVA INVESTORS UK INDEX TRACKING FUND

### INVESTMENT OBJECTIVE

The Fund aims to track the performance of the FTSE® All-Share Index (before charges and taxes). Any returns will be a combination of capital growth and income.

### INVESTMENT POLICY

#### Core investment

The Fund will invest directly into shares of companies that make up the FTSE® All-Share Index (the "Index").

#### Other investments

The Fund may also invest in other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner, this type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund will aim to replicate the Index by investing in all the companies that make up the Index, and in the same proportions, with the aim of providing full exposure to the companies within the Index. The Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on the Aviva Investors UK Responsible Investment policy is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is measured against the Index over any given 12-month period, because the Fund intends to replicate the performance of the Index.

The Fund may not hold every company in the Index, and may have some investments in non-benchmark holdings.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa.

The Fund has a yearly tracking error target of 0% (excluding charges). In normal market conditions the anticipated level of tracking error will be within 0.20% (excluding charges) of the Index.

Factors which are likely to affect the ability of the Fund to track the performance of the Index might include transaction costs (from Index and Fund turnover and dividend reinvestment), portfolio weightings not being exactly the same as the Index, residual cash holdings, or other related factors such as efficient portfolio management, illiquid components, and any trading restrictions that may be in place.

The Index represents the performance of all eligible companies listed on the London Stock Exchange, and 98% of the UK's market capitalisation (total market value of a company's outstanding shares).

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors UK Index Tracking Fund delivered a total return of 7.26% (share class 1), net of fees. The Fund's benchmark, the FTSE® All-Share Index, returned 7.50%.

The Fund is passively managed, meaning Fund returns are not expected to vary meaningfully from those of the benchmark.

The tracking error at the period end was 0.02%.

#### Review

UK shares posted attractive gains over the review period but lagged the global average. Sentiment towards the UK remained broadly weak, with the economy reported to have fallen into a technical recession in the second half of 2023. Political uncertainty was high, with a change of government looking highly likely at the general election that was due to take place at some point in 2024 or very early 2025.

In sector terms, the mining sector was a headwind to the market's relative performance against a backdrop of weak commodity/resources prices. Index-heavyweight BP also suffered a sharp downturn in performance in the run-up to the end of the year before concerns around the Middle East led to a recovery.

The start of 2024 nevertheless saw the start of a shift in sentiment towards the UK economy, with improving services and manufacturing data suggesting that recession would be short lived. There was also encouraging progress on inflation, with the consumer rate starting to fall within range of the Bank of England's 2.0% target (3.2% in March). With falling wage growth further boosting the inflation outlook, this led to speculation that the Bank of England would begin to cut interest rates, possibly by mid-year. By the end of the period, the UK market was approaching all-time highs.

At the market capitalisation level, smaller companies were the strongest performers given their greater sensitivity to the improving prospects of the domestic economy.

#### Outlook

UK equities continue to offer value as investors apply a discount to the market owing to relative economic weakness and political instability in the UK. In our view, the valuation of the market is attractive relative to both its history and overseas peers. UK shares have lagged other global markets but appear to be belatedly catching up. It would not be a surprise if the FTSE® 100 and FTSE® All-Share indices continued to advance having breached all-time highs in April.

Both the UK and global markets have been driven by hopes that interest rates have peaked and are heading lower in 2024. Recent statements from the major western central banks suggest that policymakers have become more comfortable with inflationary trends and can talk more confidently about cutting interest rates from around mid-year. The global economic outlook has brightened a little, although there remains a gulf between the economic performance in the US and elsewhere. Strength in the US economy has encouraged the view that the US can achieve a soft landing, which, if attained, will benefit the whole global economy. While the UK economy fell into a technical recession in the final quarter of 2023, we expect this to be short-lived and forecast some growth in the first quarter of this year.

## AVIVA INVESTORS UK INDEX TRACKING FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Outlook (continued)**

Geopolitical issues (most notably the conflicts in Israel and Ukraine) remain an ongoing and significant risk to equity markets and could easily flare up at any time, causing share prices to fall.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

\*\*\* Up to 15 April 2024.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	0.41%	0.41%
Class 2	0.20%	0.20%
Class 8**	0.01%	0.01%
Class A	0.07%	0.07%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 0.70%. The OCF for share class A is capped at 0.10%. Please see the Prospectus for full details.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS UK LISTED EQUITY INCOME FUND

### INVESTMENT OBJECTIVE

The Fund aims to deliver an income return of 110% of the income return of the FTSE® All-Share Index (the "Index"), annualised over 3-year rolling periods, whilst also aiming to grow your investment and provide an average annual net return greater than the Index over rolling 5-year periods by investing in shares of UK companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of UK companies (incorporated or domiciled in the UK), or non UK companies which are listed in the UK or which have significant trading activities in the UK.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

#### Strategy

The Fund is actively managed, and the Investment Manager will adopt a high conviction approach (a strong belief), with a particular focus on "cash compounding" companies. These are typically mature companies which benefit from high barriers to entry given their competitive position in their industry, which we believe will offer good to high returns, and generate stable cash flows which will either be returned to investors as income or re-invested into the company to generate future dividends. The Investment Manager is also likely to invest in companies with a focus on the potential future cash flow growth they will generate, and their perceived ability to steadily grow their dividends, while showing what we believe to be financial strength and/or low levels of debt, with a strong management capability. In addition, the Investment Manager is likely to identify companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company to increase their future cash flows, and therefore potentially increase their dividends in the future.

#### Environmental, Social & Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's income return target is measured against the Index, before the deduction of charges and taxes, annualised on a rolling three year basis. The Fund's overall performance is also measured against the Index, after charges and taxes, annualised on a rolling five year basis.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency of the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index represents the performance of all eligible companies listed on the London Stock Exchange, and 98% of the UK's market capitalisation (total market value of a company's outstanding shares).

The Index has been selected as a benchmark for the income target and for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate target in relation to the income return and as a comparator for the Fund's overall performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors UK Listed Equity Income Fund delivered a total return of 13.5% (share class 1), net of fees. The Fund's benchmark, the FTSE® All-Share Index, returned 7.50% over the same period.

The tracking error at the period end was 3.92%.

#### Review

UK shares posted attractive gains over the review period but lagged the global average. Sentiment towards the UK was broadly weak, with the economy reported to have fallen into a technical recession in the second half of 2023. Political uncertainty was high, with a change of government looking highly likely at the general election that was due to take place at some point in 2024 or very early 2025. There was, however, an improvement in confidence towards the economic outlook as the period progressed.

The Fund performed strongly in the review period, with returns well ahead of the benchmark. Much of the outperformance was seen in November 2023, with good returns posted by Intermediate Capital Group as the company's management announced strong interim results and increased the share dividend. This saw the asset management firm promoted from the FTSE® 250 Index to the blue-chip FTSE® 100 Index.

Defence-related stocks continued to perform well against a backdrop of heightened geopolitical uncertainty and increased government spending. On this theme, Melrose Industries and BAE Systems, which both have exposure to aerospace, and Babcock International were notable contributors. Elsewhere, having limited exposure to mining stocks was also helpful as ore prices fell.

On the negative side, shares in wealth manager St. James's Place dipped as the company set aside substantial provisions to settle potential refunds to clients. Merchant bank Close Brothers also dragged on performance after announcing it would be scrapping its dividend.

## AVIVA INVESTORS UK LISTED EQUITY INCOME FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Outlook**

UK equities continue to offer value as investors apply a discount to the market owing to relative economic weakness and political instability in the UK. In our view, the valuation of the market is attractive relative to both its history and overseas peers. UK shares have lagged other global markets but appear to be belatedly catching up. It would not be a surprise if the FTSE® 100 and FTSE® All-Share indices continued to advance having breached all-time highs in April.

Both the UK and global markets have been driven by hopes that interest rates have peaked and are heading lower in 2024. Recent statements from the major western central banks suggest that policymakers have become more comfortable with inflationary trends and can talk more confidently about cutting interest rates from around mid-year. The global economic outlook has brightened a little, although there remains a gulf between the economic performance in the US and elsewhere.

In these volatile and challenging times, we believe it is particularly important to maintain a resilient and well-diversified portfolio. We aim to look through market noise for a consistent, income-generative return for investors. The Fund, which is more mid-cap-orientated than its peers, offers the opportunity for income generation, as well as growth in both income and capital, across the whole spectrum of the market, from large to small.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

– This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

– The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

– The level of targeted income is not guaranteed and may not be achieved.

– Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	1.00%	1.00%
Class 2	0.81%	0.81%
Class 4	0.45%	0.45%
Class 8**	0.02%	0.02%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS UK LISTED EQUITY UNCONSTRAINED FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment and provide an average annual net return greater than the FTSE® All-Share Index (the "Index") over a rolling 5 year period by investing in shares of UK companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of UK companies (incorporated or domiciled in the UK), or non-UK companies which are listed in the UK or which have significant trading activities in the UK.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

#### Strategy

The Fund is actively managed with an unconstrained investment style, allowing the Investment Manager the freedom to invest in selected companies of any size, and at any stage of the business cycle. This will include investing in market leading and mature companies with the potential for superior earnings growth and sustainable dividends respectively, as well as identifying companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company's value to increase in the future.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and considered alongside a range of financial metrics and research, but the investment manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on the Aviva investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors' UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes.

The Fund's investment process is not constrained by the Index, so it will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. However, as the Fund is unconstrained by the range, it could operate outside of it and the Investment Manager has discretion on how best to position the Fund in seeking to achieve its outcome. Therefore the Fund's returns could be very similar to or very different from the Index.

The Index represents the performance of all eligible companies listed on the London Stock Exchange, and 98% of the UK's market capitalisation (total market value of a company's outstanding shares).

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors UK Listed Equity Unconstrained Fund delivered a total return of 11.98% (share class 1), net of fees. The Fund's benchmark, the FTSE® All-Share Index, returned 7.50% over the same period.

The tracking error at the period end was 4.50%.

#### Review

UK shares posted attractive gains over the review period but lagged the global average. Sentiment towards the UK remained broadly weak, with the economy reported to have fallen into a technical recession in the second half of 2023. Political uncertainty was high, with a change of government looking highly likely at the general election that was due to take place at some point in 2024 or very early 2025.

The Fund performed well in the review period, with returns comfortably ahead of the benchmark. Much of the outperformance was seen in November 2023, with good returns posted by Intermediate Capital Group as the company's management announced strong interim results and increased the share dividend. This saw the asset management firm promoted from the FTSE® 250 Index to the blue-chip FTSE® 100 Index. Shares in software company Sage Group also contributed well as its shares rallied on positive earnings momentum.

Defence-related stocks continued to perform well against a backdrop of heightened geopolitical uncertainty and increased government spending. On this theme, Melrose Industries, which has exposure to aerospace, Babcock International and Chemring Group were notable contributors.

Hi-tech automotive equipment manufacturer Dowlais Group was one of the main disappointments as the management revealed that light vehicle production and the firm's order book would be weaker than expected in 2024. Shares in wealth manager St. James's Place dipped as the company set aside substantial provisions to settle potential refunds to clients. We subsequently sold the stock.

Regarding Fund activity, we purchased a stake in Shell and began to build a position in London Stock Exchange. Drax Group was sold.

#### Outlook

UK equities continue to offer value as investors apply a discount to the market owing to relative economic weakness and political instability in the UK. In our view, the valuation of the market is attractive relative to both its history and overseas peers. UK shares have lagged other global markets but appear to be belatedly catching up. It would not be a surprise if the FTSE® 100 and FTSE® All-Share indices continued to advance having breached all-time highs in April.

## AVIVA INVESTORS UK LISTED EQUITY UNCONSTRAINED FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Outlook (continued)**

Both the UK and global markets have been driven by hopes that interest rates have peaked and are heading lower in 2024. Recent statements from the major western central banks suggest that policymakers have become more comfortable with inflationary trends and can talk more confidently about cutting interest rates from around mid-year. The global economic outlook has brightened a little, although there remains a gulf between the economic performance in the US and elsewhere. Strength in the US economy has encouraged the view that the US can achieve a soft landing, which, if attained, will benefit the whole global economy. While the UK economy fell into a technical recession in the final quarter of 2023, we expect this to be short-lived and forecast some growth in the first quarter of this year.

Regarding our investment approach, we aim to manage the Fund in an unconstrained way and avoid being restricted by the make-up of the benchmark index. This means we can build significant positions in our best ideas, across all sectors. We look through the short-term market noise and invest based on long-term company fundamentals, with a focus on cash generation.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

– This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

– The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

– Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	1.00%	1.00%
Class 2	0.82%	0.82%
Class 8**	0.02%	0.02%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS UK LISTED SMALL AND MID-CAP FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment and provide an average annual net return greater than the FTSE® 250 ex Investment Trust Index (the "Index") over a rolling 5 year period by investing in shares of small and medium sized UK companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of small and medium-sized UK companies (incorporated or domiciled in the UK), or non-UK small and medium-sized companies which are listed in the UK or which have significant trading activities in the UK.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

#### Strategy

The Fund is actively managed, and the Investment Manager will invest in small and medium sized companies that are deemed to be undervalued by the market, irrespective of style implications. This approach concentrates on companies that are considered to have growth, quality or recovery characteristics. Growth can come from being in a growing sector, gaining market share, or as a result of industry consolidation. Quality can be defined as companies with market leading products or services, with the potential for stable profits and strong cash generation. A company's potential for recovery could be as a result of management change, or a change in strategic direction.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and considered alongside a range of financial metrics and research, but the investment manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it. This may include investing up to 20% of the Fund in companies listed on the Alternative Investment Market (AIM) All-Share Index, whilst no more than 20% of the Fund can be invested in companies listed on the FTSE® 100 Index.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index is currently comprised of approximately 200 medium sized UK companies, as determined by their market capitalisation (total market value of a company's outstanding shares). The companies included on this Index have a market capitalisation between approximately £200 million and £5.5 billion. We define small and medium-sized as having a market capitalisation below £5.5 billion and this includes those listed on the FTSE® 250 Index, the FTSE® Small Cap Index and the AIM All-Share Index.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors UK Listed Small and Mid-Cap Fund delivered a total return of 17.25% (share class 1) net of fees. The Fund's benchmark, the FTSE® 250 ex Investment Trust (the "Index"), returned 15.68% over the same period.

The tracking error at the period end was 3.99%.

#### Review

UK smaller and medium-sized company shares made gains over the period and outperformed the blue chips of the FTSE® 100 Index given their greater sensitivity to improving investor confidence. Even though the UK had fallen into a technical recession, the generally brighter outlook for the economy and the prospect of the Bank of England cutting interest rates in 2024 also supported returns.

In the Fund, retirement plan solutions provider Just Group made a good contribution to returns after posting very strong earnings. Construction company Kier performed well on positive earnings momentum, which led management to reinstate the dividend. Information technology company. Next Fifteen Communications benefited from a favourable response to its capital markets day, in which the chief executive discussed the target of doubling the business over the next five years. Against a backdrop of heightened geopolitical uncertainty, defence company Chemring's share price rallied as the company announced a very strong order book and a jump in full-year revenues and profits. Bovis Homes and 4imprint Group were also positive performers in the Fund.

The Fund's holdings in Spire Healthcare and house builder Persimmon detracted from performance over the period. Shares in Bytes Technology weakened as the company's CEO was forced to resign due to undisclosed share trades. YouGov shares suffered a turbulent ride during the period, with the share price giving back most of the sharp gains seen over the turn of the year on concerns about earnings being able to justify a rich valuation.

We purchased stakes in Johnson Matthey, British Land and Spectris over the period.

## AVIVA INVESTORS UK LISTED SMALL AND MID-CAP FUND (CONTINUED)

### FUND MANAGER’S REPORT (CONTINUED)

#### Outlook

UK equities continue to offer value as investors apply a discount to the market owing to relative economic weakness and political instability in the UK. In our view, the valuation of the market is attractive relative to both its history and overseas peers. UK shares have lagged other global markets but appear to be belatedly catching up. It would not be a surprise if the FTSE® 100 and FTSE® All-Share indices continued to advance having breached all-time highs in April.

Both the UK and global markets have been driven by hopes that interest rates have peaked and are heading lower in 2024. Recent statements from the major western central banks suggest that policymakers have become more comfortable with inflationary trends and can talk more confidently about cutting interest rates from around mid-year. The global economic outlook has brightened a little, although there remains a gulf between the economic performance in the US and elsewhere.

Faced with ongoing market uncertainty, we believe our aim to seek more stock-specific and defensive investment ideas is appropriate. We remain focused on finding fundamental market mispricings, with an emphasis on companies that are well placed to continue to deliver in a high-inflation, low-growth environment. Overall, we believe small and mid-cap equities offer investors the potential for compelling capital growth, with plentiful opportunities at the stock level.

VIDENDUM	Breedon Group
	Redrow
	4imprint Group
	Marks & Spencer Group

There were only 7 purchases during the period.

### Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean ‘risk free’.
- Further information on the risks applicable to the Fund is detailed in the Fund’s Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

\* Valued at bid market prices.

## Share Price Record – Income Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 8***	2021	417.98	264.17
	2022	393.72	250.22
	2023	310.17	249.55
	2024**	312.06	253.34

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## Share Price Record – Accumulation Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 1	2021	299.40	189.26
	2022	283.92	180.64
	2023	228.01	183.93
	2024**	233.02	189.95
Class 2	2021	456.80	288.35
	2022	433.43	276.12
	2023	348.72	281.15
	2024**	357.07	290.87

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	1.00%	1.00%
Class 2	0.83%	0.83%
Class 8**	0.03%	0.03%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

## Revenue Record – Income Shares

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS UK SMALLER COMPANIES FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment and provide an average annual net return greater than the FTSE® Small Cap ex Investment Trusts Index (the "Index") over a rolling 5 year period by investing in shares of small UK companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of smaller companies domiciled or incorporated in the UK.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

#### Strategy

The Fund is actively managed, and the Investment Manager will have a high conviction approach (a strong belief) to investing in smaller companies. These smaller companies will have a market capitalisation (the total market value of a company's outstanding shares) of the bottom 10% of the FTSE® All-Share Index, excluding investment trusts. The Fund will focus its investments in companies which the Investment Manager believes are, or will become market leaders, which benefit from high barriers to entry due to their competitive position within the industry, and which may offer further opportunities for revenue, earnings and cash flow growth, perhaps driven by new market opportunities. This is balanced by an emphasis on risk management within the Fund, whereby the portfolio will be built from a varied range of companies across different industry sectors.

#### Environmental, Social & Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency of the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index is currently comprised of approximately 150 smaller sized UK companies, as determined by their market capitalisation (total market value of a company's outstanding shares). The companies included on this Index have a market capitalisation between approximately £30 million and £1 billion.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and the Fund will not invest in investment trusts. It is therefore an appropriate comparator for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors UK Smaller Companies Fund delivered a total return of 9.65% (share class 1), net of fees. The Fund's benchmark, the FTSE® UK Small Cap ex Investment Trust Index, returned 11.17% over the same period.

The tracking error at the period end was 7.70%.

#### Review

UK smaller company shares made gains over the period and outperformed the blue chips of the FTSE® 100 Index given their greater sensitivity to improving investor confidence. The generally brighter outlook for the UK economy and the prospect of the Bank of England cutting interest rates in 2024 also supported returns.

The Fund posted an attractive return in the period in review but was slightly behind its benchmark. The underperformance was mostly concentrated in December 2023, with disappointing returns from both software manufacturer Eagle Eye Solutions and international hospitality real estate group PPHE Hotel. However, both stocks recovered well at the start of 2024. Eagle Eye was boosted by further international contract wins and launched its 'EagleAI' tool, which is an artificial intelligence-powered data science solution. PPHE rallied on positive earnings guidance and highlighted the extensive development pipeline coming on stream over the next few years.

Among the leading contributors to Fund returns over the period was Next Fifteen Communications. The information technology company performed strongly owing to a positive management update that included news of two significant client wins in Uber and Asda. Merger and acquisition activity continued in the smaller company market and our holding in enterprise software and services firm Sopheon benefited from a cash takeover offer for the company at a more than 100% premium to the share price ahead of the announcement.

On the negative side, Alpha Financial Markets Consulting detracted from performance as it reported that the global consulting market remained competitive. Shares of Plant Health Care dipped sharply in November 2023 after announcing disappointing earnings projections due to tough operating conditions, particularly in the US.

During the review period, we sold our holdings in Restaurant Group, Gresham House and Instem.

## AVIVA INVESTORS UK SMALLER COMPANIES FUND (CONTINUED)

### FUND MANAGER'S REPORT (CONTINUED)

#### Outlook

UK equities continue to offer value as investors apply a discount to the market owing to relative economic weakness and political instability in the UK. In our view, the valuation of the market is attractive relative to both its history and overseas peers. UK shares have lagged other global markets but appear to be belatedly catching up. It would not be a surprise if the FTSE® 100 and FTSE® All-Share indices continued to advance having breached all-time highs in April.

Both the UK and global markets have been driven by hopes that interest rates have peaked and are heading lower in 2024. Recent statements from the major western central banks suggest that policymakers have become more comfortable with inflationary trends and can talk more confidently about cutting interest rates from around mid-year. The global economic outlook has brightened a little, although there remains a gulf between the economic performance in the US and elsewhere. Strength in the US economy has encouraged the view that the US can achieve a soft landing, which, if attained, will benefit the whole global economy. While the UK economy fell into a technical recession in the final quarter of 2023, we expect this to be short-lived and forecast some growth in the first quarter of this year.

Overall, we believe small-cap equities offer investors the potential for compelling capital growth, with plentiful opportunities at the stock level.

### Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- A significant proportion of the Fund may be invested in securities which are not actively traded, and as a result may experience large daily price changes.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

## INVESTMENT PERFORMANCE

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	1.04%	1.04%
Class 2	0.89%	0.89%
Class 8**	0.04%	0.04%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF includes a synthetic charge of 0.00% (2023: 0.00%) in respect of underlying investments.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

## Revenue Record – Income Shares

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2022.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 8**	2021	8.1739	11.80
	2022	14.3901	20.78
	2023	19.7263	28.48
	2024*	8.5149	12.29

\* Up to 14 June 2024 (the interim distribution payment date).

\*\* Class 3 was renamed Class 8 on 21 November 2022.

## Revenue Record – Accumulation Shares

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	1.0316	2.45
	2022	4.8732	11.56
	2023	7.7643	18.42
	2024*	3.1529	7.48
Class 2	2021	2.9693	4.41
	2022	9.1348	13.58
	2023	13.5354	20.12
	2024*	5.5749	8.29

\* Up to 14 June 2024 (the interim distribution payment date).

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS CLIMATE TRANSITION GLOBAL EQUITY FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment and provide an average annual net return greater than the MSCI® All Country World Index (the "Index") over a rolling 5 year period by investing in shares of global companies responding to climate change by orientating their business models to be resilient in a warmer climate and a lower carbon economy; or providing solutions to mitigate climate change or help communities adapt to the adverse impacts of climate change.

### INVESTMENT POLICY

#### Core investment

At least 90% of the Fund will be invested in shares of Global Companies responding to climate change which meet the Investment Manager's eligibility criteria as described below. "Global Companies" means companies in any country across the globe, including in emerging markets.

#### Other investments

The Fund may also invest in other shares which meet elements of the Investment Manager's eligibility criteria (as described below), funds (including funds managed by Aviva Investors companies), cash, and deposits. Derivatives may be used from time to time to gain market exposure which may be difficult or costly to achieve directly, or to manage the Fund's cash flows in a cost-effective manner, or to reduce risk. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed. The Investment Manager believes that the risks associated with climate change are currently mispriced, and therefore those companies which are responding to climate change and are currently undervalued present an opportunity to benefit from increases in value over the long term.

Companies will be identified as eligible for core investment if they satisfy the "Solutions" or "Transition" criteria and are not excluded on the basis of their fossil fuel activities.

"Solutions" – the Investment Manager identifies themes related to mitigating the risk of climate change or helping communities to adapt to the adverse physical impacts of climate change. Companies will initially be assessed as offering "Solutions" depending on whether they derive at least 20% of their revenue from such themes. Companies meeting this revenue threshold are then assessed using the Investment Manager's proprietary analysis which further examines the revenue sources by business segment to determine whether the business activities satisfy the "Solutions" criteria and the company is eligible for investment.

"Transition" – the Investment Manager identifies companies positively aligning to and orientating their business models to be resilient in a warmer climate and a low carbon economy. Companies will be assessed using the Investment Manager's proprietary Transition Risk model. This model identifies the climate change risk for certain sub-industries' "Transition Risk", ranking the risk as high, medium or low, and combines this with a score which provides a measure of the quality of climate risk management processes in place at individual companies, calculated using ratings provided by external industry recognised bodies (the "Climate Risk Management Score"). The combination of these two elements determines whether a company satisfies the "Transition" criteria. For example, companies operating in high Transition Risk sub-industries will have to attain a higher Climate Risk Management Score to be deemed as eligible for investment.

Fossil fuel exclusions – companies deriving certain levels of revenue from producing, or generating electricity from certain fossil fuels will be excluded from the Fund's core investment.

The above criteria create an eligible pool of core investments from which the Investment Manager will select specific companies.

Core investments may include companies that are high carbon emitters, but which have in place robust Transition Risk plans and climate risk management processes, as assessed under the Investment Manager's Transition Risk model.

Further details on the fossil fuel exclusions, the "Solutions" and "Transitions" criteria, and the ratings provided by external industry recognised bodies for the Climate Risk Management Score, can be found in the Prospectus.

#### Other Environmental, Social & Governance (ESG) factors:

We actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has other limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in this Prospectus.

#### Performance and Risk Measurement:

The Fund's performance is measured against the Index, after charges and taxes. The Fund's investment process is not constrained by the Index, so it will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both 23 developed and 26 emerging markets.

The Index has been selected as a benchmark for performance and risk measurement because it provides a measure of global equity market performance and it is therefore an appropriate measure for the Fund's performance.

To allow assessment of the Fund's climate credentials, the Investment Manager will report on key indicators relevant to the Fund's strategy. Key indicators shall include: "Fossil Fuel" – the proportion of companies in the Fund with fossil fuel exposure; "Solutions" – the proportion of companies in the Fund meeting the "Solutions" revenue threshold; "Transitions" – the proportion of companies in the Fund displaying strong climate governance, which may include but not limited to, the percentage of companies attaining a certain Climate Risk Management Score, and the percentage of companies setting or committing to emission reduction goals which align to Science Based Targets. Such indicators will be shown at Fund level and relative to the Index for comparison purposes and will be published in the Fund fact sheet and refreshed on an annual basis.

## AVIVA INVESTORS CLIMATE TRANSITION GLOBAL EQUITY FUND (CONTINUED)

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024 the Aviva Investors Climate Transition Global Equity Fund delivered a total return of 15.19% (share class 1), net of fees. The Fund's benchmark index returned 12.99% over the same period.

The tracking error at the period end was 4.68%.

#### Review

Global shares posted buoyant returns in the six months under review. Confidence was supported by hopes that the main developed economies would avoid material slowdowns in 2024 and that central banks would start to trim interest rates amid close-to-target inflation in the leading economies.

The Fund generated a strong absolute return over the period and outperformed its benchmark. At the sector level, the lack of exposure to energy companies was helpful given the headwinds facing the sector. The Fund's most favoured market sector was industrials, although the holdings were selected to be defensive in an uncertain economic environment. This positioning nevertheless added to performance.

Among the top stock contributors over the period was Siemens. The company released a strong set of results with momentum on the electrification side of the business remaining very positive. Despite ongoing challenges with their participation in energy transition growth, it is clear that Siemens' core industrial businesses have been performing well. Other companies to add value included electrical product maker Hubbell and equipment hire company United Rentals. This more than offset the drag of being overweight renewable energy company EDP Renovaveis and Canadian automotive solutions provider ATS Corp.

We exited our position in Daikin, a maker of air conditioning equipment for household and commercial use, with additional exposure to chemical, hydraulic and electronic businesses. Our engagements with the company surfaced their exposure to producing white phosphorous, used in smoke ammunitions for the Japanese Ministry of Defence, and we were displeased by their reluctance to cease production. Our due diligence regarding this issue, coupled with gaps in their evolving net-zero strategy and our negative view of the near-to-medium term financial sustainability of the business, led to our decision to sell our holding.

#### Outlook

We are confident that the main developed economies can avoid a material slowdown in 2024. The US economy grew at a healthy annualised rate of 3.3% in the fourth quarter, with significant contributions across the main components of demand. While we expect a slowdown in the first half of 2024, the pace should remain relatively strong.

The combination of resilient growth and inflation continuing to fall to within range of central bank targets creates a positive backdrop for equities, even if valuations are starting to look a little rich following the breaching of new highs in several markets. We should be mindful, however, of the raised potential for unexpected geopolitical events to disrupt sentiment. 2024 is also an election year in several key countries, with the results in many cases too close to call. Negative inflation shocks and the postponement or dilution of monetary policy easing also have the potential to sap confidence.

We continue to position the Fund conservatively, focusing on companies that meet our climate transition mandate and that possess resilient business models.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

\*\*\* Up to 15 April 2024.

\*\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	1.00%	0.63%
Class 2	0.85%	0.48%
Class 4	0.48%	0.48%
Class 5	0.40%	0.40%
Class 8**	0.04%	0.04%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS CONTINENTAL EUROPEAN EQUITY FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment and provide an average annual net return greater than the FTSE® Europe ex UK Total Return Index (GBP) (the "Index") over a rolling 5 year period by investing in shares of European companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of European companies (including those in emerging markets in Europe but excluding companies in the UK).

#### Other investments

The Fund may also invest in other shares (including in the UK), other funds (including funds managed by Aviva Investors companies), money market instruments, cash and deposits.

#### Strategy

The Fund is actively managed with an unconstrained investment style, allowing the Investment Manager the freedom to invest in companies of any size, and at any stage of the business cycle. At times this may lead to the Fund being concentrated in a small number of companies, in a limited number of countries, and/or a particular geographic region. The Investment Manager will select companies it believes to have above average earnings growth potential compared to other companies (growth companies), or companies it believes are undervalued compared to their perceived worth (value companies), or a combination of growth and value companies. The Investment Manager may also consider environmental, social and governance (ESG) factors in its fundamental investment analysis alongside other factors.

#### Environmental, Social & Governance (ESG) factors

The Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on the Aviva Investors UK Responsible Investment policy is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency of the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index represents developed and emerging markets in Europe, excluding the UK, and consists of large and medium sized companies, as defined by their market capitalisation (total market value of a company's outstanding shares).

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Continental European Fund delivered a total return of 11.96% (share class 1), net of fees. The Fund's benchmark, the FTSE® Europe ex UK Index returned 14.93% over the same period.

The tracking error at the period end was 3.44%.

#### Review

In response to the strongest inflationary episode in four decades, global central banks tightened monetary policy significantly during the reporting period, helping reduce price pressures, although more work remains to be done before inflation returns to target. Geopolitical strains remained high amid ongoing conflicts in Ukraine and in the Middle East, while relations between China and the US remained tense as the US sought to restrict the flow of advanced technologies to China and China looked to use its industrial overcapacity to increase exports to developed markets to bolster its slow-growing domestic economy. The conflict in the Middle East has resulted in trade flow disruptions between Asia and Europe as shipping traffic was routed away from the Red Sea.

Although inflation has yet to reach central banks' targets, policymakers have telegraphed their intentions to begin cutting rates in the months ahead. The prospects for easier monetary policy along with resilient global economic growth have been supportive factors for risky assets, such as equities and high-yield bonds. Long-term interest rates moderated during the latter half of the period, although rising government debt levels remained a concern over the medium term. Advancements in artificial intelligence and the adoption of novel weight-loss drugs were two areas of focus for investors during the period.

Stock selection and, to a lesser extent, an overweight position in the health care sector was the largest detractor from performance relative to the FTSE® Europe Ex UK Index. Within this sector, not owning shares of pharmaceutical company Novo Nordisk (Denmark), and overweight holdings of crop science and pharmaceuticals Bayer (Germany) and pharmaceutical and diagnostic company Roche Holding (Switzerland) held back relative results.

Security selection and, to a lesser extent, an underweight position in the financials sector also hindered relative returns led by the Fund's overweight holding of wealth management firm Julius Baer (Switzerland) and not owning a strong-performing payment platform services provider Adyen (Netherlands).

Stock selection within the consumer discretionary sector further weakened relative performance. Here, the Fund's overweight holdings of tourism and travel IT solutions provider Amadeus IT (Spain) and apparel and accessories retailer Kering (France) hurt relative results.

Elsewhere, not owning shares of lithography systems manufacturer for the semiconductor industry ASML (Netherlands) and the Fund's overweight holdings of global food company Nestle (Switzerland) and wine and alcoholic beverage producer Pernod Ricard (France) further detracted from relative performance.

Stock selection and an underweight exposure to the energy sector contributed to relative performance. Within this sector, avoiding poor-performing integrated energy and petroleum company TotalEnergies (France) strengthened relative results.

## AVIVA INVESTORS CONTINENTAL EUROPEAN EQUITY FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

## Review (continued)

Stocks in other sectors that also bolstered relative performance included, overweight positions in enterprise applications company SAP (Germany), electrical distribution equipment manufacturer Schneider Electric (France), consulting services provider Capgemini (France), advertising and marketing services provider Publicis Groupe (France) and eyewear manufacturer EssilorLuxottica (France). Avoiding a poor-performing pharmaceutical products company Sanofi (France) also helped relative results. Additionally, the Fund's holdings of industrial gas supplier Linde (United States) and consultancy, design, engineering and management services provider Arcadis (Netherlands) further benefitted relative performance. Lastly, the timing of the Fund's ownership in shares of online fashion and lifestyle platform Zalando (Germany) helped relative results.

Fortum	Roche Holding
	Novartis
	Linde
	LVMH Moët Hennessy Louis Vuitton

There were only 7 purchases during the period.

## Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

– This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

– The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

– The value of investments will be affected by changes in exchange rates.

– Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	1.00%	1.00%
Class 2	0.85%	0.85%
Class 8**	0.05%	0.05%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF on share class 1 is capped at 1.00%. Please see the Prospectus for full details.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

## Revenue Record – Income Shares

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS CORPORATE BOND FUND

### INVESTMENT OBJECTIVE

The Fund will aim to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is Markit iBoxx® Sterling Non-Gilts Total Return Index.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in high quality bonds, which have been independently rated as "investment grade" with a credit rating of BBB-/Baa3 or above, issued by companies and supranational organisations in Sterling or hedged to Sterling.

#### Other investments

The Fund may also invest in other bonds, including those issued by governments, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk-adjusted returns. The Investment Manager will focus on identifying what they judge to be higher quality corporate bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of investment grade bonds issued by companies and denominated in sterling, with a maturity date exceeding 1 year, but excludes government bonds.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Corporate Bond Fund delivered a total return of 6.04% (share class 1), net of fees. The Fund's benchmark, the Markit iBoxx Sterling Non-Gilts Total Return Index, returned 6.06% over the same period.

The tracking error at the period end was 0.43%.

#### Review

The Fund posted a positive return despite a mixed backdrop for fixed income investments. Initially, the UK gilt market, which is a key influencer on corporate bond returns, rallied strongly as softer language from the main central banks and positive progress in bringing down inflation suggested that interest rate cuts may be delivered much earlier than expected in 2024. However, gilts gave back some of these gains in the early months of 2024 as hopes for a swift loosening of monetary policy faded following some higher-than-expected inflation data in the US. Nevertheless, the performance of corporate bonds benefited from the view that the feared sharp slowdown of the global economy in 2024 was not likely to materialise. The credit worthiness of many corporate bond issuers was broadly maintained as many companies appeared to be weathering the impact of high interest rates. Moreover, the market was supported by strong demand from investors as they looked to lock in attractive yields while they were still available.

There was no meaningful divergence in the Fund's performance versus its benchmark over the course of the review period. Given the uncertainty over the outlook for the UK economy and the path of interest rates – not to mention the rich valuations of corporate bonds – we maintained broadly cautious positioning, looking to raise the Fund's exposure to more defensive market sectors.

During the review period, we maintained a preference for banks. Against an uncertain macroeconomic backdrop, we saw banks as being well positioned for upcoming economic pressures. Their increased revenues thanks to higher interest rates would, in our view, help them meet regulatory capital requirements, build buffers against future expected loan losses and fund payments to investors.

## AVIVA INVESTORS CORPORATE BOND FUND (CONTINUED)

### FUND MANAGER'S REPORT (CONTINUED)

#### Outlook

We believe that the prospect of UK interest rate cuts in 2024 will be an important underpinning for bonds. That said, it is important to highlight that 2024 will be another bumper year for debt issuance via the gilt market. It is an election year and the political parties do not appear to show much desire to rein in their spending plans. This could exert downward pressure on gilt prices, which will in turn feed into corporate bond returns.

We still see the yield generated by high-quality corporate bonds as being attractive versus equity dividends, and with investors seemingly still having capital to deploy in the market, we see positive potential drivers. That said, with corporate bonds looking very expensive and companies still issuing debt at a very high rate, the supply/demand balance is weakening and the rally that we have seen in recent months is becoming more vulnerable. Overall, however, we do not envisage a material downturn in the sterling corporate bond market barring a major macro-economic or geopolitical shock.

#### Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

– This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

– The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

– Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.

– Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

	2024**	105.12	96.35

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

\*\*\* Class 3 was renamed as Class 8 on 21 November 2022.

## Share Price Record – Accumulation Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 8***	2021	208.21	197.44
	2022	204.96	151.11
	2023	175.01	155.81
	2024**	180.55	165.41

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

\*\*\* Class 3 was renamed as Class 8 on 21 November 2022.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	0.70%	0.70%
Class 2	0.50%	0.50%
Class 8**	0.02%	0.02%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 0.80%. Please see the Prospectus for full details.

\*\* Class 3 was renamed as Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Accumulation Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 8**	2021	4.0486	19.99
	2022	3.8807	19.16
	2023	6.1398	30.32
	2024*	3.6131	17.84

\* Up to 14 June 2024 (the interim distribution payment date).

\*\* Class 3 was renamed as Class 8 on 21 November 2022.

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	0.9882	15.30
	2022	0.9644	14.93

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS DISTRIBUTION FUND

### INVESTMENT OBJECTIVE

The Fund aims to deliver an income equivalent to the benchmark income whilst seeking to provide capital growth over the long term (5 years or more).

The benchmark (the "Index") combines 35% of the FTSE® All-Share Index and 65% of a composite index comprising 50% ICE BofA Single-A Sterling Non-Gilt Index and 50% ICE BofA BBB Sterling Non-Gilt Index. The income target is measured over any given 3-year period (before charges and taxes).

### INVESTMENT POLICY

#### Core investment

At least 60% of the Fund will be invested in bonds issued by companies, governments or supranational organisations (including in emerging markets). The Fund will also invest in shares of UK companies (incorporated or domiciled in the UK), or non-UK companies which are listed in the UK or which have significant trading activities in the UK. A minimum of 95% of bond exposures will be in Sterling or hedged to Sterling, and a minimum of 80% of bond holdings will have been independently rated as "investment grade" with a credit rating of BBB-/Baa3 or above. The Fund may invest in core investments directly or indirectly via other funds (including funds managed by Aviva Investors companies). The Fund is expected to be invested in a majority of core investments directly, although there may be times when this is not the case.

#### Other investments

The Fund may also invest in other shares and other funds (including funds managed by Aviva Investors companies) (both including emerging markets), cash, and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a security and sector level, with a view to delivering a sustainable and diversified level of income, whilst basing their investment selection process on a long-term outlook, and with the intention of delivering efficient risk-adjusted returns.

#### Environmental, Social & Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's income return target is measured against the Index, and the Fund's overall performance is also compared against the Index.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index, and may also hold companies that do not form part of it. The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 1.25% and 3.75% when compared to the Index. In certain conditions the Fund may be outside of this range.

As the Index combines 35% of the FTSE® All-Share Index and 65% of a composite index comprising 50% ICE BofA Single-A Sterling Non-Gilt Index and 50% ICE BofA BBB Sterling Non-Gilt Index, it covers a broad range of UK equities and global bonds with different credit ratings.

The Index has therefore been selected as a benchmark for performance and risk measurement because it is representative of the type of bonds and shares in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Distribution Fund delivered a total return of 8.97% (share class 1) net of fees. The Fund's benchmark, which comprises 35% FTSE® All-Share Index and 65% ML Composite (50% ML £ Non-Gilt A, 50% ML £ Non Gilt BBB), returned 7.36% over the same period.

The tracking error at the period end was 1.32%.

#### Review

Fund returns were supported by gains by both UK equities and sterling corporate bonds over the period. Corporate bonds, which make up most of the portfolio, were supported by broadly positive company earnings releases, which help to underpin credit quality. We held a watchful stance in the portfolio given the vulnerability of company earnings to slowing growth brought about by the high and rising interest rate environment. We focused on relatively 'defensive' sectors that would be expected to be more resilient to fragile confidence, such as technology and communications.

UK shares benefited from rising appetite for riskier assets as hopes grew that the central banks, having paused their cycle of interest rate hikes, were poised to cut borrowing costs amid a clear fall in the rate of inflation, both in the UK and across the other major economies.

At the stock selection level, niche asset manager Intermediate Capital performed well as it continued to build funds under management and raised its dividend. Packaging maker DS Smith benefited from takeover speculation, while the aerospace exposure of Melrose Industries and BAE Systems helped drive good performance given increasing defence spending as the Ukraine war showed no sign of easing. Babcock International, another defence contractor, also contributed well.

## AVIVA INVESTORS DISTRIBUTION FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Review (continued)**

Among the main disappointments over the period was merchant bank Close Brothers, whose shares plunged as it scrapped its dividend on concerns about compensation claims following a regulatory review of its auto finance business. Wealth management company St James's Place was hit by concerns many of its clients would be entitled to significant compensation following mischarging of its products.

**Outlook**

With the interest rate hiking cycle over in most major markets, we believe the backdrop for bonds is positive given the income now available and a monetary easing cycle ahead. That said, investors may be too optimistic about the number of rate cuts that may be forthcoming. Regarding sterling corporate bonds, we are moderately positive on the outlook. Despite relatively heavy new issuance and rich valuations, we note ongoing strong investor demand as all-in yields remain attractive.

Despite flirting with new highs, UK equities continue to offer value as investors apply a discount to the market owing to relative economic weakness and domestic political instability. In our view, the valuation of the market is attractive relative to both its history and overseas peers. In these volatile and challenging times, we believe it is particularly important to maintain a resilient and well-diversified portfolio. We aim to look through market noise for a consistent, income-generative return for investors. The Fund offers the opportunity for income generation, as well as growth in both income and capital, across the whole spectrum of the market, from large to small.

	2022	273.82	207.70
	2023	244.10	212.63
	2024**	255.15	226.82

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	0.88%	0.88%
Class 2	0.73%	0.73%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF includes a synthetic charge of 0.02% (2023: 0.02%) in respect of underlying investments.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

## INVESTMENT PERFORMANCE (CONTINUED)

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	6.0205	29.75
	2022	5.8608	28.96
	2023	6.4315	31.78
	2024*	2.7052	13.37
Class 2	2021	6.4705	30.56
	2022	6.2960	29.73
	2023	6.8827	32.50
	2024*	2.9092	13.74

\* Up to 14 June 2024 (the interim distribution payment date).

**Revenue Record – Accumulation Shares**

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	10.9097	30.29
	2022	10.9224	30.32

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS HIGH YIELD BOND FUND

The Fund closed on 22 July 2022, and will be terminated in due course.

The Fund is no longer being actively managed.

### INVESTMENT OBJECTIVE

The Fund will aim to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is Bloomberg® Pan European High Yield Index 2% Issuer Capped (Sterling Hedged).

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in high yield bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3, issued by companies and supranational organisations in Sterling or hedged to Sterling.

Sub-investment grade bonds are typically regarded as being of lower quality and therefore higher risk than "investment grade" bonds, but typically offer a higher yield.

#### Other investments

The Fund may also invest in other bonds, including those issued by governments, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of sub-investment grade bonds issued in Euro, Sterling, Danish krone, Norwegian krone, Swedish krona, and Swiss franc, hedged to Sterling, but caps the exposure to a single issuer (company) at 2%.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

Please note, the Fund closed on 22 July 2022 and is in the process of being terminated. No Fund Manager's report has been included within the interim report and financial statements as no investment activity has taken place during the period under review.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS HIGHER INCOME PLUS FUND

### INVESTMENT OBJECTIVE

The Fund will invest in bonds issued by companies and aims to provide an income of at least 110% of the income return of the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is a composite index, as detailed below.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in bonds (including those issued by governments and supranational organisations) issued in Sterling or hedged to Sterling, including exposure to emerging markets. A maximum of 60% of the Fund may be invested in sub-investment grade bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality than "investment grade" bonds, but typically offer a higher yield.

#### Other investments

The Fund may also invest in other bonds, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed with a flexible investment allocation approach across global bond markets. The Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk-adjusted returns. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's performance is measured against the Index, a composite benchmark of 50% Markit iBoxx® Sterling Non-Gilts Index, 40% Bloomberg® Pan European High Yield Index 2% Issuer Capped (Sterling Hedged) and 10% JPM® Emerging Market Bond Index (Sterling Hedged) after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds (approximately 2,100).

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Higher Income Plus Fund delivered a total return of 6.47% (share class 1) net of fees. The Fund's benchmark, 50% Markit iBoxx Sterling Non-Gilts Index, 40% Bloomberg® Pan European High Yield Index 2% issuer capped and 10% JPM Emerging Market Bond Index, returned 7.26% over the same period.

The tracking error at the period end was 0.71%.

#### Review

The Fund posted an attractive positive return, despite a mixed backdrop for fixed income investments. Initially, the sovereign bond markets, which are a key influencer on corporate bond and emerging market debt returns, rallied strongly as softer language from the main central banks and positive progress in bringing down inflation suggested that interest rate cuts may be delivered much earlier than expected in 2024. However, sovereign bonds gave back some of these gains in the early months of 2024 as hopes for a swift loosening of monetary policy faded following some higher-than-expected inflation data in the US. Nevertheless, the performance of corporate bonds benefited from the view that the feared sharp slowdown of the global economy in 2024 was not likely to materialise. The credit worthiness of many corporate bond issuers was broadly maintained as many companies appeared to be weathering the impact of high interest rates. Moreover, the market was supported by strong demand from investors as they looked to lock in attractive yields while they were still available.

There was no meaningful divergence in the Fund's performance versus its benchmark over the course of the review period. Given the uncertainty over the outlook for the developed economies and the path of interest rates – not to mention the rich valuations of corporate bonds – we maintained broadly cautious positioning, looking to raise the Fund's exposure to more defensive market sectors.

During the review period, we maintained a preference for banks. Against an uncertain macroeconomic backdrop, we saw banks as being well positioned for upcoming economic pressures. Their increased revenues thanks to higher interest rates would, in our view, help them meet regulatory capital requirements, build buffers against future expected loan losses and fund payments to investors.

## AVIVA INVESTORS HIGHER INCOME PLUS FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Review (continued)**

The more risky segments of the portfolio contributed usefully to returns, with high-yield bonds continuing to be boosted by strong investor demand, despite worries about the value on offer after good performance through much of 2023. Emerging market bonds also performed well as they are geared positively into expectations for interest rate cuts in the US. Rate-cutting has also started in several emerging market countries.

**Outlook**

As we move into the mid part of the year, there is an interesting interaction of two themes: the ongoing lagged effect of monetary tightening versus the continued strength of the US economy, which has been buoyed by easier financial conditions and rising real wages. This brings with it uncertainty about inflation which could lead to more sovereign bond volatility. To add to this, 2024 is a year full of political risk.

Overall, with the interest rate hiking cycle over in most major markets, we believe the backdrop for bonds is positive given the income now available and a monetary easing cycle ahead. That said, the major markets risk being too optimistic about rate cuts, which makes the market vulnerable to setbacks if expectations shift. The extent of further easing will be determined not by the need for policy to be made less restrictive but by how much policy will need to be accommodative in the face of a weaker growth outlook.

Regarding corporate bonds, we are moderately positive on the outlook and expect them to continue to outperform sovereign bonds in the short to medium term in the absence of major geopolitical or economic shocks. Despite relatively heavy new issuance and rich valuations, we note ongoing strong investor demand as all-in yields remain attractive.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

	15.04.24	38,203	57,057,976	66.96
Class 8**	15.10.21	40,295	37,365,225	107.84
	15.10.22	28,448	34,048,538	83.55
	15.10.23	27,937	31,347,997	89.12
	15.04.24	27,771	30,313,177	91.61

\* Valued at bid market prices.

\*\* Class 3 was renamed Class 8 on 9 May 2022.

## Share Price Record – Income Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 1	2021	54.22	51.95
	2022	53.13	40.75
	2023	45.96	41.07
	2024**	46.27	42.85
Class 2	2021	81.59	78.19
	2022	79.97	61.32
	2023	69.10	61.83
	2024**	69.50	64.51
Class 8***	2021	111.67	107.01
	2022	109.46	83.94
	2023	94.58	84.61
	2024**	95.14	88.28

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

\*\*\* Class 3 was renamed Class 8 on 9 May 2022.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	0.88%	0.88%
Class 2	0.63%	0.63%
Class 8**	0.03%	0.03%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

\*\* Class 3 was renamed Class 8 on 9 May 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

## Revenue Record – Income Shares

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	1.2842	24.48
	2022	1.4074	26.83
	2023	1.6636	31.72
	2024*	0.7800	14.87
Class 2	2021	2.1322	27.01
	2022	2.2974	29.10
	2023	2.6676	33.79
	2024*	1.4648	18.56
Class 8**	2021	3.2469	30.05
	2022	3.5636	32.98
	2023	4.1936	38.81
	2024*	2.2870	21.17

\* Up to 14 May 2024 (the interim distribution payment date).

\*\* Class 3 was renamed Class 8 on 9 May 2022.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS INTERNATIONAL INDEX TRACKING FUND

### INVESTMENT OBJECTIVE

The Fund aims to track the performance of the FTSE® World (ex UK) Index (before charges and taxes). Any returns will be a combination of capital growth and income.

### INVESTMENT POLICY

#### Core investment

The Fund will invest directly into shares of companies that make up the FTSE® World (ex UK) Index (the "Index").

#### Other investments

The Fund may also invest in other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures may be used from time to time to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund will aim to track the Index by investing in international companies that make up the Index, or a sample of them which are representative of the Index, with the aim of mirroring the performance of the Index. The Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on the Aviva Investors UK Responsible Investment policy is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is measured against the Index over any given 12-month period, because the Fund intends to track the performance of the Index.

The Fund may not hold every company in the Index, and may have some investments in non-benchmark holdings.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa.

The Fund has a yearly tracking error target of 0% per annum (excluding charges). In normal market conditions the anticipated level of tracking error will be within 0.30% (excluding charges) of the Index.

Factors which are likely to affect the ability of the Fund to track the performance of the Index might include transaction costs (from Index and Fund turnover and dividend reinvestment), portfolio weightings not being exactly the same as the Index, residual cash holdings, or other related factors such as efficient portfolio management, illiquid components, and any trading restrictions that may be in place.

The Index comprises large and medium-sized companies of developed and emerging markets excluding the UK, providing a broad coverage of global markets.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors International Index Tracking Fund delivered a total return of 14.89% (share class 1), net of fees. The Fund's benchmark, the FTSE® World ex UK Index, returned 13.83% over the same period.

The tracking error at the period end was 0.09%.

#### Review

Global shares posted strong returns in the six months under review. Confidence was supported by hopes that the main developed economies would avoid material slowdowns in 2024. Fears that the US would slide into recession eased steadily as robust consumer spending was fuelled by stronger-than-expected employment data. Government investment also played a key role in sustaining the momentum of growth. With hopes also high that the US central bank would start to cut interest rates in 2024 amid positive progress in the fight against inflation, the US stock market – boosted by further sharp gains by its large technology companies – pushed on to new highs in the first quarter of the year. While the economic news was much less upbeat in Europe, Japan and the UK, shares nevertheless surfed the wave of optimism to post strong total returns and move into range of new highs. Although the UK and Japan had technically fallen into recession in the final quarter of 2023, data released in the new year indicated that they would rapidly return to growth. Indeed, the return of inflation to the Japanese economy prompted the Bank of Japan to finally end negative interest rates after a decade of ultra-loose monetary policy.

Emerging markets also contributed well, with confidence underpinned by the prospect of lower US interest rates and a higher-than-anticipated global demand for their goods and services. Several emerging markets were also benefiting from already having started to loosen monetary policy.

Volatility was relatively low over the review period considering notable geopolitical uncertainties such as the ongoing war in Ukraine and escalating tensions in the Middle East.

#### Outlook

We are confident that the main developed economies can avoid a sharp slowdown in 2024. The latest estimate for fourth quarter growth in the US saw a small upward revision to an already strong reading. The economy is now estimated to have risen by 3.4% on an annual basis, with significant contributions across the main components of demand. Currently we expect a slowdown for the US in the first quarter, but annualised growth should remain robust at around 1.8%.

## AVIVA INVESTORS INTERNATIONAL INDEX TRACKING FUND (CONTINUED)

## FUND MANAGER'S REPORT

**Outlook (continued)**

The combination of resilient growth and inflation continuing to fall to within range of central bank targets creates a positive backdrop for equities, even if valuations are starting to look a little rich following the breaching of new highs in several markets. We should be mindful, however, of the raised potential for unexpected geopolitical events to disrupt sentiment. 2024 is also an election year in several key countries, with the results in many cases too close to call. Negative inflation shocks and the postponement or dilution of monetary policy easing also have the potential to sap confidence.

## June 2024

Sources: Fund and peer group performance figures – Lipper, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg\*.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- During the six months ended 15 April 2024, the indicator changed from category 6 to category 5.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	0.45%	0.45%
Class 2	0.25%	0.25%
Class 5	0.20%	0.20%
Class 8**	0.05%	0.05%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF for share class 1 is capped at 0.70%. Please see the Prospectus for full details.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 5	2021	1.5655	13.64
	2022	2.1855	19.04
	2023	2.2030	19.19
	2024*	1.1696	10.19

\* Up to 14 June 2024 (the interim distribution payment date).

**Revenue Record – Accumulation Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS GLOBAL EQUITY ENDURANCE FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment and provide an average annual net return greater than the MSCI® All Country World Index (the "Index") over a rolling 5 year period by investing in shares of global companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including investing up to 25% of the Fund in emerging markets.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed, and the Investment Manager invests in a concentrated portfolio, with holdings of typically 20 to 40 global companies that are considered by the Investment Manager to be leaders in their markets, with valuations which are considered to be attractive, and are expected to grow their value over the long term. They may be identified by having one or more of the following features: having a leading and/or growing market share; a history of strong and/or resilient returns on capital; a clear business model that is easy to understand; or being thought capable of maintaining their competitive advantage. The Investment Manager will aim to invest in companies which have a varied range of successful products, and which are active in a variety geographical markets.

#### Environmental, Social & Governance (ESG)

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's performance is compared against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Global Equity Endurance Fund delivered a total return of 7.50% (share class 6), net of fees. The Fund's benchmark, the MSCI® All Country World Index, returned 12.99% over the same period.

The tracking error at the period end was 5.98%.

#### Review

Global shares posted strong returns in the six months under review. Confidence was supported by hopes that the main developed economies would avoid material slowdowns in 2024 and that central banks would start to trim interest rates amid close-to-target inflation in the leading economies.

While the Fund posted positive absolute returns over the period, it lagged its benchmark. Much of the underperformance was concentrated in March, when data analytics company Fair Isaac, which had been one of the Fund's strongest performers in recent months, saw its share price slide following a request for the US Department of Justice to investigate potentially anti-competitive practices considering the special price increases it had been introducing. Pest control firm Rentokil Initial was another disappointment as the integration of its acquired US business, Terminix, proved to be slower than expected and with greater risks. With this translating into lacklustre growth in their key US market, where its competitor Rollins continued to lead, we chose to sell out of our investment. Elsewhere, not holding the stellar-performing US technology giant Nvidia was another headwind to performance.

Among the strongest contributors to Fund returns over the period was US military contractor Booz Allen Hamilton following the publication of strong third quarter earnings and a bullish outlook. It also increased its quarterly dividend by 8%. Despite its setback in early 2024, Fair Isaac still made a solid net contribution to performance, as did Google-owner Alphabet.

Among the new additions to the Fund in the period was Latin American e-commerce business Mercado Libre. We view the company as a potential 'Amazon-of-the-Amazons', which is currently enjoying the 'flywheel' of network formation as buyers and sellers enforce the strength of the leading network. They have been able to establish a significant competitive advantage through their logistics and fulfilment capability. With the company priced to deliver over 20% revenue growth for the next decade, we see a compelling opportunity.

## INVESTMENT PERFORMANCE

## Net Asset Value – Accumulation Shares

Share class	As at	Net asset value* £000	Shares in issue	Pence per share
Class 2	15.10.21	6,975	4,093,594	170.38
	15.10.22	4,957	3,146,777	157.51
	15.10.23	4,732	2,727,109	173.52
	15.04.24	5,473	2,955,617	185.16

	15.10.22	328,974	204,097,140	161.19
	15.10.23	463,734	258,968,012	179.07
	15.04.24	481,898	251,105,898	191.91

\* Valued at bid market prices.

## Share Price Record – Accumulation Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 2	2021	175.60	125.40
	2022	183.06	147.52
	2023	174.20	155.33
	2024**	193.70	163.20
Class 6	2021	174.08	124.49
	2022	181.24	146.09
	2023	172.37	153.68
	2024**	191.39	161.33
Class 8	2021	178.49	126.98
	2022	187.08	150.54
	2023	178.97	159.51
	2024**	200.65	168.49

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 2	0.87%	0.87%
Class 6	1.00%	1.00%
Class 8	0.02%	0.02%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

## Revenue Record – Accumulation Shares

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 3	2021	0.1167	0.88
	2022	–	–
	2023	0.3439	2.60
	2024*	–	–
Class 6	2021	–	–
	2022	–	–
	2023	0.1363	1.04
Class 8	2021	0.7720	5.76
	2022	0.9691	7.23
	2023	1.7978	13.42
	2024*	–	–

\* Up to 15 April 2024 (no interim distribution).

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS GLOBAL EQUITY INCOME FUND

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment through a combination of income and capital growth and provide an average annual net return greater than the MSCI® All Country World Index (GBP) (the "Index") over a rolling 5 year period by investing in shares of global companies.

Within this combined return, the Fund aims to deliver an income equivalent of at least 125% of the income return of the Index, over any given 12-month period.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including with up to 20% of the Fund invested in emerging markets.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed, and the Investment Manager will adopt a high conviction (strong belief) approach aiming to generate the Fund's target income. This will focus on opportunities across what the Investment Manager considers to be mature companies which potentially offer sustainably high dividends, or those which are felt able to steadily grow their dividends while showing financial strength and/or low levels of debt, with a strong management capability. The Fund will also take advantage of businesses in the early stages of development, where high cash generation is driving strong dividend growth. The Investment Manager will aim to invest in companies which have a diversified range of successful products, and which are active in a range of geographical markets.

#### Environmental, Social & Governance (ESG)

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund's income return target is measured against the Index, before the deduction of charges and taxes. The Fund's overall performance is also measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for the income target and performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Global Equity Income Fund delivered a total return of 11.33% (share class 1), net of fees. The Funds benchmark, the MSCI® All Country World Index returned of 12.99% over the same period.

The tracking error at the period end was 5.73%.

#### Review

Global shares posted strong returns in the six months under review. Confidence was supported by hopes that the main developed economies would avoid material slowdowns in 2024 and that central banks would start to trim interest rates amid close-to-target inflation in the leading economies.

The Fund performed well in absolute terms but was slightly behind its benchmark over the period. Amid a broad underweighting of information technology companies, not owning US technology giant Nvidia was a drag on returns as investors continued to clamour for the beneficiaries of artificial intelligence (AI). Reckitt Benckiser was also a disappointment as its shares fell back sharply at the end of February as it missed revenues expectations and general performance was seen to be weak.

With global geopolitical uncertainties intensifying over the period, defence-related companies enjoyed good performance. Here, Booz Allen Hamilton and BAE Systems were two of the key contributors. Elsewhere, enthusiasm for AI drove good performance from microchip manufacturers and the Fund benefited from its holdings in Tawan Semiconductor and Broadcom.

During the period we purchased a new position in UK consumer goods company Unilever. Whilst a new chief executive trying to reinvigorate organic growth is nothing new here, we believe some elements that he is looking to address make sense. Returns on invested capital remain reasonable and a 4% dividend yield is certainly attractive for the Fund.

We increased exposure to Pepsi. Comments from Walmart on spending from consumers on weight loss drugs negatively impacted shares across a range of food & beverage companies. However, we felt it was far too early to extrapolate long-term consumption habits and would point to Pepsi's increasing focus on healthier snacking options as offering some mitigation. We still view the business as highly resilient, offering attractive earnings growth allied to a growing 3% dividend yield.

## AVIVA INVESTORS GLOBAL EQUITY INCOME FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Outlook**

We are confident that the main developed economies can avoid a material slowdown in 2024. The US economy grew at a healthy annualised rate of 3.3% in the fourth quarter, with significant contributions across the main components of demand. While we expect a slowdown in the first half of 2024, the pace should remain relatively strong.

The combination of resilient growth and inflation continuing to fall to within range of central bank targets creates a positive backdrop for equities, even if valuations are starting to look a little rich following the breaching of new highs in several markets. We should be mindful, however, of the raised potential for unexpected geopolitical events to disrupt sentiment. 2024 is also an election year in several key countries, with the results in many cases too close to call. Negative inflation shocks and the postponement or dilution of monetary policy easing also have the potential to sap confidence.

Overall, we view the portfolio as offering attractive resilience characteristics – particularly our focus on free cash flow generation, allied to companies with sustained growth in their dividends. We believe this offers the best protection against the current volatile market backdrop as well as elevated inflationary pressures. We continue to focus on companies with attractive growth prospects, but where we also see resilience in the underlying business and a margin of safety in terms of valuation.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

– This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

– The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

– The value of investments will be affected by changes in exchange rates.

– Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	1.12%	1.12%
Class 2	0.88%	0.87%
Class 4	0.42%	0.42%
Class 8**	0.02%	0.02%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS GLOBAL EMERGING MARKETS EQUITY UNCONSTRAINED FUND

The Fund closed on 6 April 2022, and will be terminated in due course.

The Fund is no longer being actively managed.

### INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of emerging market companies.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in shares of emerging market (EM) companies.

#### Other investments

The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash, and deposits. Derivatives, such as futures, may be used from time to time, to gain market exposure which may be difficult or costly to achieve directly, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which may be hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed with an unconstrained and flexible investment style, allowing the Investment Manager the freedom to invest in selected companies of any size, and at any stage of the business cycle. This will include investing in market leading and mature companies which offer the potential for superior earnings growth and sustainable dividends respectively, as well as identifying companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company's value to increase in the future.

#### Environmental, Social & Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance and Risk Measurement

The Fund's performance is compared against the MSCI® Emerging Market Index\* ("the Index").

The Fund's investment process is not constrained by the Index, so it will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. However, as the Fund is unconstrained by the range, it could operate outside of it and the Investment Manager has discretion on how best to position the Fund in seeking to achieve its outcome. Therefore, the Fund's returns could be very similar to or very different from the Index.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from 26 emerging markets, and the Index is designed to provide a broad measure of global emerging markets equity market performance.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

\* MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This Prospectus is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

### FUND MANAGER'S REPORT

Please note, the Fund closed on 6 April 2022 and is in the process of being terminated. No Fund Manager's report has been included within the interim report and financial statements as no investment activity has taken place during the period under review.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS MANAGED HIGH INCOME FUND

### INVESTMENT OBJECTIVE

The Fund will invest in bonds issued by companies and aims to provide an income of at least 110% of the income return of the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is a composite index, as detailed below.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in bonds (including those issued by governments and supranational organisations) issued in Sterling or hedged to Sterling, including exposure to emerging markets. A maximum of 70% of the Fund may be invested in sub-investment grade bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality than "investment grade" bonds, but typically offer a higher yield.

#### Other investments

The Fund may also invest in other bonds, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed with a flexible investment allocation approach across global bond markets. The Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's performance is measured against the Index, a composite benchmark of 40% Markit iBoxx® Sterling Non-Gilts Index, 50% Bloomberg® Global High Yield Index ex CMBS ex EMG 2% Issuer Capped (Sterling Hedged) and 10% JPM® Emerging Markets Bond Index (Sterling Hedged) after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds (approximately 3,600).

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Managed High Income Fund posted a total return of 7.38% (share class 1) net of fees. The Fund's composite benchmark, 40% Markit iBoxx Sterling Non-Gilts Index, 50% Bloomberg® Global High Yield Index ex CMBS ex EMG 2% issuer capped and 10% JPM Emerging Markets Bond Index, returned 7.30% over the same period.

The tracking error at the period end was 0.60%.

#### Review

The Fund posted an attractive positive return, despite a mixed backdrop for fixed income investments. Initially, the sovereign bond markets, which are a key influencer on corporate bond and emerging market debt returns, rallied strongly as softer language from the main central banks and positive progress in bringing down inflation suggested that interest rate cuts may be delivered much earlier than expected in 2024. However, sovereign bonds gave back some of these gains in the early months of 2024 as hopes for a swift loosening of monetary policy faded following some higher-than-expected inflation data in the US. Nevertheless, the performance of corporate bonds benefited from the view that the feared sharp slowdown of the global economy in 2024 was not likely to materialise. The credit worthiness of many corporate bond issuers was broadly maintained as many companies appeared to be weathering the impact of high interest rates. Moreover, the market was supported by strong demand from investors as they looked to lock in attractive yields while they were still available.

There was no meaningful divergence in the Fund's performance versus its benchmark over the course of the review period. Given the uncertainty over the outlook for the developed economies and the path of interest rates – not to mention the rich valuations of corporate bonds – we maintained broadly cautious positioning, looking to raise the Fund's exposure to more defensive market sectors.

During the review period, we maintained a preference for banks. Against an uncertain macroeconomic backdrop, we saw banks as being well positioned for upcoming economic pressures. Their increased revenues thanks to higher interest rates would, in our view, help them meet regulatory capital requirements, build buffers against future expected loan losses and fund payments to investors.

## AVIVA INVESTORS MANAGED HIGH INCOME FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Review (continued)**

The more risky segments of the portfolio contributed usefully to returns, with high-yield bonds continuing to be boosted by strong investor demand, despite worries about the value on offer after good performance through much of 2023. Emerging market bonds also performed well as they are geared positively into expectations for interest rate cuts in the US. Rate-cutting has also started in several emerging market countries.

**Outlook**

As we move into the mid part of the year, there is an interesting interaction of two themes: the ongoing lagged effect of monetary tightening versus the continued strength of the US economy, which has been buoyed by easier financial conditions and rising real wages. This brings with it uncertainty about inflation which could lead to more sovereign bond volatility. To add to this, 2024 is a year full of political risk.

Overall, with the interest rate hiking cycle over in most major markets, we believe the backdrop for bonds is positive given the income now available and a monetary easing cycle ahead. That said, the major markets risk being too optimistic about rate cuts, which makes the market vulnerable to setbacks if expectations shift. The extent of further easing will be determined not by the need for policy to be made less restrictive but by how much policy will need to be accommodative in the face of a weaker growth outlook.

Regarding corporate bonds, we are moderately positive on the outlook and expect them to continue to outperform sovereign bonds in the short to medium term in the absence of major geopolitical or economic shocks. Despite relatively heavy new issuance and rich valuations, we note ongoing strong investor demand as all-in yields remain attractive.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS MONTHLY INCOME PLUS FUND

### INVESTMENT OBJECTIVE

The Fund will invest in bonds issued by companies and aims to provide an income equivalent to the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is the Markit iBoxx® Sterling Non-Gilts Total Return Index.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in bonds which have been independently rated as "investment grade" with a credit rating of BBB-/Baa3 or above, issued by companies and supranational organisations in Sterling or hedged to Sterling.

#### Other investments

The Fund may also invest in other bonds, including those issued by governments, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

#### Strategy

The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality corporate bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's performance is measured against the Index, after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of investment grade bonds issued by companies and denominated in Sterling, with a date to maturity date exceeding 1 year, but excludes government bonds.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Monthly Income Plus Fund delivered a total return of 6.78% (share class 1) net of fees. The Fund's benchmark, the Markit iBoxx Sterling Non-Gilts Total Return Index, returned 6.06% over the same period.

The tracking error at the period end was 0.63%.

#### Review

The Fund posted a positive return against a mixed backdrop for fixed income investments. Initially, the UK gilt market, which is a key influencer on corporate bond returns, rallied strongly as softer language from the main central banks and positive progress in bringing down inflation suggested that interest rate cuts may be delivered much earlier than expected in 2024. However, gilts gave back some of these gains in the early months of 2024 as hopes for a swift loosening of monetary policy faded following some higher-than-expected inflation data in the US. Nevertheless, the performance of corporate bonds benefited from the view that the feared sharp slowdown of the global economy in 2024 was not likely to materialise. The credit worthiness of many corporate bond issuers was broadly maintained as many companies appeared to be weathering the impact of high interest rates. Moreover, the market was supported by strong demand from investors as they looked to lock in attractive yields while they were still available.

There was no meaningful divergence in the Fund's performance versus its benchmark over the course of the review period. Given the uncertainty over the outlook for the UK economy and the path of interest rates – not to mention the rich valuations of corporate bonds - we maintained broadly cautious positioning, looking to raise the Fund's exposure to more defensive market sectors.

During the review period, we maintained a preference for banks. Against an uncertain macroeconomic backdrop, we saw banks as being well positioned for upcoming economic pressures. Their increased revenues thanks to higher interest rates would, in our view, help them meet regulatory capital requirements, build buffers against future expected loan losses and fund payments to investors.

## AVIVA INVESTORS MONTHLY INCOME PLUS FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Outlook**

We believe that the prospect of UK interest rate cuts in 2024 will be an important underpinning for bonds. That said, it is important to highlight that 2024 will be another bumper year for debt issuance via the gilt market. It is an election year and the political parties do not appear to show much desire to rein in their spending plans. This could exert downward pressure on gilt prices, which will in turn feed into corporate bond returns.

We still see the yield generated by high-quality corporate bonds as being attractive versus equity dividends, and with investors seemingly still having capital to deploy in the market, we see positive potential drivers. That said, with corporate bonds looking very expensive and companies still issuing debt at a very high rate, the supply/demand balance is weakening and the rally that we have seen in recent months is becoming more vulnerable. Overall, however, we do not envisage a material downturn in the sterling corporate bond market barring a major macro-economic or geopolitical shock.

**Synthetic Risk and Reward Indicator**

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

## INVESTMENT PERFORMANCE

## Net Asset Value – Income Shares

Share class	As at	Net asset value* £000	Shares in issue	Pence per share
Class 1	15.10.21	91,512	169,621,362	53.95
	15.10.22	62,282	154,016,114	40.44
	15.10.23	57,142	133,939,351	42.66
	15.04.24	55,674	126,388,168	44.05

	15.04.24	7,329	4,178,443	175.40

\* Valued at bid market prices.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

## Share Price Record – Income Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 1	2021	57.16	53.63
	2022	55.43	40.11
	2023	45.76	41.19
	2024**	45.88	42.12
Class 2	2021	123.48	115.83
	2022	119.78	86.65
	2023	98.86	89.05
	2024**	99.12	91.07

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

## Share Price Record – Accumulation Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 1	2021	182.39	173.63
	2022	180.09	132.64
	2023	152.72	136.72
	2024**	158.17	144.06
Class 2	2021	160.15	152.63
	2022	158.34	116.81
	2023	134.57	120.40
	2024**	139.69	127.12
Class 8***	2021	205.14	195.95
	2022	203.38	150.34
	2023	173.43	154.97
	2024**	181.10	164.43

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	0.75%	0.75%
Class 2	0.55%	0.55%
Class 8**	0.03%	0.03%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

\*\* Class 3 was renamed Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Income Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	1.0760	19.28
	2022	1.0759	19.28
	2023	1.3019	23.33
	2024*	0.7300	13.08
Class 2	2021	2.4914	20.67
	2022	2.5120	20.84
	2023	2.9998	24.89
	2024*	1.8300	15.18

\* Up to 24 May 2024 (the interim distribution payment date).

**Revenue Record – Accumulation Shares**

The revenue record table below shows the net distribution rates per financial year on an accounting date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	3.4514	19.48

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS STRATEGIC BOND FUND

### INVESTMENT OBJECTIVE

The Fund will aim to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, governments or supranational organisations, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is a Bloomberg® Composite Index, as detailed below.

### INVESTMENT POLICY

#### Core investment

At least 80% of the Fund will be invested in bonds, issued in Sterling or hedged to Sterling, and no more than 50% of the Fund will be invested in bonds which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality and therefore higher risk than "investment grade" bonds, but typically offer a higher yield.

#### Other investments

The Fund may also invest in shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives may be used for investment purposes or to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund.

#### Strategy

The Fund is actively managed, with a flexible asset allocation approach across global bond markets. The Investment Manager will seek to blend the key asset classes including government, investment grade and sub-investment grade bonds to effectively manage the overall risk and reward profile of the Fund.

The Fund's allocation to these asset classes will vary over time, reflecting the Investment Manager's view of both the changing longer-term market outlook and shorter-term opportunities. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

### Performance & Risk Measurement

The Fund's performance is measured against the Index a composite benchmark of one third Bloomberg® Treasury G7 Index (Sterling Hedged), one third Bloomberg® Global Aggregate Corporate Index (Sterling Hedged), and one third Bloomberg® Global High Yield Index ex CMBS ex EMG 2% Issuer Capped (Sterling Hedged), after charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024, the Aviva Investors Strategic Bond Fund delivered a total return of 5.62%, (share class 1) net of fees. The Fund's composite benchmark, one third Bloomberg® Treasury G7 Index, one third Bloomberg® Global Aggregate Corporate Index and one third Bloomberg® Global High Yield Index ex CMBS ex EMG 2% issuer capped, returned 5.65% over the same period.

The tracking error at the period end was 0.97%.

#### Review

The Fund posted a positive return against a mixed backdrop for fixed income investments. Initially, the sovereign bond market rallied strongly as softer language from the main central banks and positive progress in bringing down inflation suggested that interest rate cuts may be delivered much earlier than expected in 2024. However, sovereign bonds gave back some of these gains in the early months of 2024 as hopes for a swift loosening of monetary policy faded following some higher-than-expected inflation data in the US.

Corporate bonds posted stronger returns than sovereign bonds, benefiting from the view that the feared sharp slowdown of the global economy in 2024 was not likely to materialise. The credit worthiness of many corporate bond issuers was broadly maintained as many companies appeared to be weathering the impact of high interest rates. Moreover, the market was supported by resilient demand from investors as they looked to lock in attractive yields while they were still available.

There was no meaningful divergence in the Fund's performance versus its benchmark over the course of the review period. Given the uncertainty over the outlook for the developed economies and the path of interest rates – not to mention the rich valuations of corporate bonds – we maintained broadly cautious positioning, looking to raise the Fund's exposure to more defensive market sectors. Structurally, we held a preference for higher-quality 'investment-grade' bonds as we were concerned about the raised potential for defaults in lower-rated issues.

## AVIVA INVESTORS STRATEGIC BOND FUND (CONTINUED)

## FUND MANAGER'S REPORT (CONTINUED)

**Review (continued)**

During the review period, we maintained a preference for banks. Against an uncertain macroeconomic backdrop, we saw banks as being well positioned for upcoming economic pressures. Their increased revenues thanks to higher interest rates would, in our view, help them meet regulatory capital requirements, build buffers against future expected loan losses and fund payments to investors.

**Outlook**

As we move into the mid part of the year, there is an interesting interaction of two themes: the ongoing lagged effect of monetary tightening versus the continued strength of the US economy, which has been buoyed by easier financial conditions and rising real wages. This brings with it uncertainty about inflation which could lead to more sovereign bond volatility. To add to this, 2024 is a year full of political risk.

Overall, with the interest rate hiking cycle over in most major markets, we believe the backdrop for bonds is positive given the income now available and a monetary easing cycle ahead. That said, the major markets risk being too optimistic about rate cuts, which makes the market vulnerable to setbacks if expectations shift. The extent of further easing will be determined not by the need for policy to be made less restrictive but by how much policy will need to be accommodative in the face of a weaker growth outlook.

Regarding corporate bonds, we are moderately positive on the outlook and expect them to continue to outperform sovereign bonds in the short to medium term in the absence of major geopolitical or economic shocks. Despite relatively heavy new issuance and rich valuations, we note ongoing strong investor demand as all-in yields remain attractive.

**June 2024**

\*\*\* Class 3 was renamed Class 8 on 21 November 2022.

## Ongoing Charges Figure\* (unaudited)

Share class	15.04.24	15.10.23
Class 1	0.88%	0.88%
Class 2	0.63%	0.63%
Class 5	0.58%	0.58%
Class 8**	0.03%	0.03%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

\*\* Class 3 was renamed Class 8 on 21 November 2022 and the Fund Management Fee was restructured.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## AVIVA INVESTORS MULTI-STRATEGY TARGET RETURN FUND

### INVESTMENT OBJECTIVE

To deliver a positive return over rolling three year periods regardless of the prevailing stock market environment. The Fund aims to generate a positive return, on average 5% per annum above the Bank of England Base Rate before the deduction of charges, over rolling three year periods. In seeking to target this level of return the Fund also aims to manage volatility to a target of less than half the volatility of global equities, measured over the same rolling three year periods. These aims, however, are not guaranteed and it may not always be possible to achieve positive returns or to achieve the target level of volatility over rolling three year periods, or over any period of investment. Consequently, investors' capital is at risk.

### INVESTMENT POLICY

#### Core Investment

The Fund invests across a broad range of global asset classes (including emerging markets) that may include shares of companies, bonds (both corporate and government), cash, commodities, indirect property, and currencies. Other funds (including funds managed by Aviva Investors companies) may also be used to gain exposure to these asset classes. The Fund will make significant use of derivative instruments for investment purposes including: futures, options, swaps, swaptions and forwards.

#### Strategy

The Fund is actively managed and the Investment Manager may take both long and synthetic short positions and derivative usage may include but is not limited to derivatives on interest rates, inflation rates, bonds, credit, equity, financial indices, volatility, dividend payments and currencies. Derivatives usage may be for the purposes of hedging, efficient portfolio management, or investment purposes and may be exchange traded or traded off exchange through market counterparties. The use of derivative instruments as part of the investment policy will mean that the Fund may, from time to time, have substantial holdings in liquid assets including deposits and money market instruments.

#### Environmental, Social and Governance (ESG) factors

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the Prospectus.

#### Performance & Risk Measurement

The Fund aims to generate returns which exceed the Bank of England base rate, which has been chosen as the market standard indicator of the risk-free rate of return. The Fund targets 5% above this rate because that is the level of outperformance that the Investment Manager believes to be realistic for this strategy alongside the volatility aim.

The Fund is managed to a defined risk target – linked to the volatility of global equities. Volatility measures how much the returns of the Fund may fluctuate and is an indicator of the level of risk taken by the Investment Manager.

The Fund is expected to operate with a volatility no greater than 50% of that of global equities, however, there may be times where the Fund operates above this target. The Index we use to represent global equities is the MSCI® All Country World Index GBP (the "Index"). The Fund's volatility is compared against the Index's daily volatility, annualised, over 3-year rolling periods.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark due to the broad range of companies that it represents, and it is therefore an appropriate measure of the volatility of global equities.

### FUND MANAGER'S REPORT

#### Performance

Over the six months ended 15 April 2024 the Aviva Investors Multi-Strategy Target Return Fund returned 10.02% (share class 2) net of fees. The Fund's benchmark, the Bank of England Base Rate Plus 5%, returned 5.25% over the same period.

#### Review

The review period saw most risk assets bounce back as investors' confidence grew on the odds of a soft economic landing in the US. All equity regions bar China were up over the fourth quarter, while bonds also rallied. October had been a challenging month for markets in the wake of the attack by Hamas on Israel and concerns around potential escalation. However, November and December saw strong risk rallies, driven by the growing expectation that material slowdowns would be avoided in the developed economies. The Fund delivered strong gains in Q4 2023, with Market Returns, Opportunistic Returns and Risk Reducing Returns all delivering positive performance. Market Returns drove performance over the period, with key contributors being our long regional equities positions. Opportunistic Returns also contributed well during the quarter, with the long exposure in UK rates being the strongest contributor, more than offsetting losses in short Japanese rates. The Risk Reducing section ended the quarter in positive territory, led by gains in long Korean rates. This was slightly dampened by modest losses in the risk-reducing options strategy.

Risk assets started off strong in 2024, on the back of growing expectations for a soft landing and continued excitement around artificial intelligence. Several equity indices reached all-time highs, while bonds struggled as interest rate cuts were pushed back. The Fund posted strong results through 2024 to the end of the review period. Market Returns contributed positively due to our long regional equities positions. Opportunistic Returns was the main driver of performance, largely due to our commodities positions, with long exposure to copper, oil and newly introduced gold all contributing positively. The long UK versus US rates strategy was another key contributor, more than offsetting losses in the long UK rates position. The Risk-Reducing Returns section of the portfolio detracted from performance, driven by losses in long Korean rates and long equity volatility.

## AVIVA INVESTORS MULTI-STRATEGY TARGET RETURN FUND (CONTINUED)

### FUND MANAGER’S REPORT (CONTINUED)

#### Outlook

Economic data continues to be supportive of risk assets with odds of a soft economic landing in the US increasing and interest rates likely to have peaked. While there should be scope for interest rates to decline appreciably from current levels, they are unlikely to fall nearly as low as in the years that followed the global financial crisis. We see them hovering between two and three per cent rather than approaching zero. The balance of risks is tilted to moderate risk exposure within equities and credit, but things can change rather quickly, and we continue to focus on dynamic position management to manage the overall level of risk in the portfolio.

We continue to hold a preference for value versus growth in the US and Europe, as well as the resources sector. Within duration, we are moderately short duration at portfolio level, but this is driven largely by our idiosyncratic-driven short position in Japanese rates. The rest of the duration positioning is through long Korean rates, as well as relative value in long UK versus US rates.

#### Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean ‘risk free’.
- Bond values are affected by changes in interest rates, and the bond issuer’s creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Where a third party appointed to manage transactions or ensure the safe keeping of assets fails in their duty a loss may occur.
- Financial derivatives may only require a low initial deposit relative to the asset exposure, a relatively small price movement in the underlying asset may result in substantial losses to the Fund.
- Developing market investments can be less easy to buy and sell, and their values may be influenced by the economic and political risks of the countries of issue.
- Further information on the risks applicable to the Fund is detailed in the Fund’s Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request.

## INVESTMENT PERFORMANCE

## Net Asset Value – Accumulation Shares

Share class	As at	Net asset value* £000	Shares in issue	Pence per share
Class 1	15.10.21	2,339	2,039,166	114.72

	15.04.24	2,209,778	1,568,607,543	140.88
Class 9	15.10.21	25,489	21,844,099	116.68
	15.10.22	23,652	19,911,906	118.78
	15.10.23	40,144	32,327,755	124.18
	15.04.24	42,834	31,243,862	137.09

\* Valued at bid market prices.

\*\* Class 3 was renamed as Class 8 on 21 November 2022.

## Share Price Record – Accumulation Shares

Share class	Financial year	Highest price* (p)	Lowest price* (p)
Class 1	2021	115.23	107.47
	2022	120.96	110.56
	2023	123.39	116.87
	2024**	134.59	120.49
Class 2	2021	116.90	108.83
	2022	122.86	112.28
	2023	125.55	118.83
	2024**	137.27	122.74
Class 5	2021	119.13	110.76
	2022	125.32	114.50
	2023	129.68	121.30
	2024**	141.79	126.90
Class 8***	2021	119.21	110.73
	2022	125.50	114.65
	2023	128.38	121.53
	2024**	141.26	126.11
Class 9	2021	117.17	109.03
	2022	123.18	112.56
	2023	125.82	119.17
	2024**	137.48	123.05

\* Valued at mid market prices.

\*\* Up to 15 April 2024.

\*\*\* Class 3 was renamed as Class 8 on 21 November 2022.

## INVESTMENT PERFORMANCE (CONTINUED)

**Ongoing Charges Figure\* (unaudited)**

Share class	15.04.24	15.10.23
Class 1	1.05%	1.05%
Class 2	0.85%	0.85%
Class 5	0.70%	0.70%
Class 8**	0.03%	0.03%
Class 9	0.80%	0.80%

\* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

\*\* Class 3 was renamed as Class 8 on 21 November 2022.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

**Revenue Record – Accumulation Shares**

The revenue record table below shows the net distribution rates per financial year on a payment date basis for an investment made on 15 October 2020.

Share class	Financial year	Net revenue per share (p)	Per £1,000 invested (£)
Class 1	2021	0.0000	–
	2022	0.2572	2.36
	2023	2.9772	27.29
	2024*	–	–
Class 2	2021	0.2399	2.17
	2022	0.4338	3.93
	2023	3.3369	30.21
	2024*	–	–
Class 5	2021	0.4217	3.75
	2022	0.5985	5.32
	2023	4.7816	42.53
	2024*	–	–
Class 8**	2021	0.5465	4.86
	2022	0.8229	7.32
	2023	3.7811	33.64
	2024*	–	–
Class 9	2021	0.3001	2.71
	2022	0.5536	5.00
	2023	3.1251	28.24
	2024*	–	–

\* Up to 15 April 2024 (no interim distribution).

\*\* Class 3 was renamed as Class 8 on 21 November 2022.

### ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the financial statements for the year ended 15 October 2023 and are described in those annual financial statements.

## SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

As defined in Article 3 of Regulation (EU) 2015/2365, Securities Financing Transactions ("SFT's") include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions. The only Fund impacted by this regulation is the Aviva Investors Multi-Strategy Target Return Fund. Whilst the Fund does not engage in such SFT's, it does engage in Total Return Swaps ("TRS") therefore, in accordance with Article 13 of the Regulation, the Fund's involvement in and exposures related to TRS for the accounting period ended 15 April 2024 are detailed below.

### Amount of assets engaged in TRS

The following table represents the fair value of assets engaged in TRS as at the balance sheet date:

	Value £000	% of AUM
TRS	1,468	0.05%

### TEN LARGEST COLLATERAL ISSUERS

All collateral received or pledged in relation to TRS positions is in the form of cash. As a result of this there is no requirement to list the top 10 non-cash collateral issuers.

### Counterparties

The following table provides details of the top ten counterparties, their country of incorporation and the gross volume of outstanding transactions (underlying exposure per counterparty, on a gross absolute basis), in respect of TRS, as at the balance sheet date.

Counterparty	Country of incorporation	Value £000
Barclays	United Kingdom	1
Goldman Sachs	United States	8,704
Morgan Stanley	United States	8,753
UBS	Switzerland	8,747

### Type and quality of collateral

All collateral received £490,000 and provided £nil by the Fund in respect of OTC ("Over The Counter") derivatives (including TRS) with the counterparty noted (UBS) as at the balance sheet date is in the form of cash and is therefore open maturity.

### Currency of collateral

The following table provide an analysis of the currency profile of collateral received and provided in respect of OTC derivatives (including TRS) with the counterparties noted (UBS) as at the balance sheet date.

	Collateral Received	Value £000
Currency		
EUR		490
		490

### Maturity tenor of TRS

The following table provides an analysis of the maturity tenor of open TRS positions as at the balance sheet date.

	Value £000
Maturity	
Open maturity	1,354
3 to 12 months	114
	1,468

The above maturity tenor analysis has been based on the contractual maturity date of the relevant TRS.

## SECURITIES FINANCING TRANSACTIONS (UNAUDITED) (CONTINUED)

### **Settlement and clearing**

OTC derivative transactions are entered into by the Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC derivative transactions (including TRS) entered into by the parties. All OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes, therefore any collateral disclosures provided in this report are in respect of all OTC derivative transactions entered into by the Fund with the applicable TRS counterparties under the ISDA Master agreement, not just TRS.

### **Share of collateral received that is reused and reinvestment return**

As at the balance sheet date, all cash collateral received in respect of OTC derivative transactions (including TRS) with the counterparties noted (Barclays, Morgan Stanley, Goldman Sachs and UBS) was re-invested in other instruments in accordance with Prospectus provisions. Returns generated by the Fund from the reinvestment of cash collateral, net of any interest payable to the relevant counterparty, for the period ended 15 April 2024 is included in the financial statements for the Aviva Investors Multi-Strategy Target Return Fund.

### **Safekeeping of collateral**

All collateral received and provided by the Fund in respect of OTC derivative transactions as at the reporting date is cash.

### **Return and cost**

All returns from TRS will accrue to the Fund and are not subject to any return sharing arrangements with the Authorised Fund Manager, Investment Manager or any other third parties. Returns from those instruments are disclosed in the financial statements for the Aviva Investors Multi-Strategy Target Return Fund.

## STATEMENT OF THE AUTHORISED CORPORATE DIRECTOR'S RESPONSIBILITIES

The Collective Investment Schemes Sourcebook of the Financial Conduct Authority requires the Authorised Corporate Director (ACD) to prepare financial statements for each accounting period which give a true and fair view of the financial position of the Company at the period end and of the net income and net gains or losses on the scheme property of the Company for the period then ended.

In preparing the financial statements the ACD is required to:

- follow applicable accounting standards;
- make judgements and estimates that are reasonable and prudent;
- select suitable accounting policies and then apply them consistently;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future; and
- comply with the Instrument of Incorporation of the Company and the Statement of Recommended Practice for Authorised Funds.

The ACD is required to keep proper accounting records and to manage the Company in accordance with the Regulations and the Instrument of Incorporation.

The ACD is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

## AUTHORISED CORPORATE DIRECTOR'S STATEMENT

We hereby approve the Report and Financial Statements of Aviva Investors Investment Funds ICVC for the six months ended 15 April 2024 on behalf of Aviva Investors UK Fund Services Limited in accordance with the requirements of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority.

M Bell  
Director  
14 June 2024

## GENERAL INFORMATION

Investments in Aviva Investors Investment Funds ICVC are intended to be medium to long term investments and should not be considered as a short term investment.

Past performance is not a guide to the future.

The value of an investment in the Funds and the revenue from it may go down as well as up, and you may not get back the original amount invested.

Where Funds are invested abroad, the value of your investment may rise and fall purely on account of movement in exchange rates.

Please refer to the Prospectus (which is available on the internet at [www.avivainvestors.com](http://www.avivainvestors.com) or from the ACD on request) for a full description of the risks involved when investing in the Funds.

Any future returns and opinions expressed are those of the Investment Manager and should not be relied upon as indicating any guarantee of return from investment in the Funds.

The performance figure given for each Fund (source: Aviva Investors) is based on midday values (with the exception of Aviva Investors UK Index Tracking Fund which is based on 5.00pm values and Aviva Investors Multi-Strategy Target Return Fund which is based on 11:59pm values). The performance figure given for each comparative index (source: Lipper) is based on close of business values. Hence any over/under performance may be adversely or favourably affected by this time difference.

The information contained within this document should not be construed as a recommendation to purchase or sell stocks.

### **Publication of Prices**

Information on the prices of Shares will be available by calling 0800 051 2003 or on the internet at [www.avivainvestors.com](http://www.avivainvestors.com). Calls may be recorded for training or monitoring purposes. Calls are free from landlines and mobiles.
