

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Marlborough Global Essential Infrastructure Fund Class X Shares

A Sub-fund of the IFSL Marlborough No2 OEIC (ISIN Income GB00BQPB2H08, Accumulation GB00BQPB2G90)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, as well as to provide income, that is, money paid out from an investment as dividends from shares, over a minimum of 5 years.

The Fund will invest at least 80% in the shares of global infrastructure companies, including investment companies and investment trusts, listed on a range of global developed and emerging market stock exchanges, however exposure to emerging markets will be limited to 10% of the Fund. Notwithstanding the emerging markets limit, investments will span a range of global markets with no maximum or minimum exposure to any other market or geographical region.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when. The Fund will generally hold between 25 and 45 listed companies.

The Investment Manager seeks to invest in global infrastructure companies that have assets that are "essential" for the basic functioning of a society, such as regulated utilities (eg electricity, gas and water), transport (eg toll roads, airports), energy (eg regulated or contracted pipelines) and communications (eg mobile phone towers).

The Fund may, from time to time, hold shares in companies that become unquoted following investment, due to a delisting or other corporate event, for

example. The Fund will not make new investment into the shares of companies that are unquoted.

The Fund will not invest in other collective investment schemes.

The Fund may hold up to 20% in cash or near cash, to enable the ready settlement of liabilities (including redemptions), for the efficient management of the Fund and in pursuit of the Fund's objectives.

The Fund will not invest in derivatives (instruments whose returns are linked to another asset or other variable factor such as exchange rates or stock markets).

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Infrastructure sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not wish to receive income we will reinvest it to buy more units for you.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund will have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

The Fund has a concentrated portfolio, which means it has greater exposure to a smaller number of assets. Therefore, the performance of a single investment in the Fund has a greater effect on the price of the Fund.

The Fund invests indirectly in infrastructure-related companies and may be vulnerable to factors affecting the infrastructure sector, for example, natural disasters, operational disruption and national and local environmental laws.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/07/2023. This share class is benefiting from expense funding whereby some of the charges outlined in the prospectus have been fully or partially funded. Without this expense funding it is anticipated the OCF would be higher and potentially to the extent of having a noticeable impact on the returns investors receive. The expenses will continue to be funded until the Fund grows to a size able to support the OCF quoted on this KIID. Class X is designed to attract investors into the Fund during its establishment through the offer of a reduced annual management charge. The share class will be available to all investors until the Fund's value reaches £50m. Once the Fund's value reaches £50m there will still be an opportunity for investors to invest in the share class whilst the ACD prepares to close the share class. Class X shares are anticipated to be available for a period of 8 weeks following the Fund's value reaching £50m. Once the Class X is closed, the Class P will be launched for all future investment. Investors who hold the Class X will be able to hold these existing shares indefinitely, however no new Class X shares can be purchased once the share class is closed. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.57%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2023

	2019	2020	2021	2022	2023
■ Fund	-	-	-	-	-2.9
■ Benchmark	-	-	-	-	-2.8

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this unit class is calculated in GBP.

This Fund was launched on 20 September 2022.

This share class was launched on 20 September 2022.

Benchmark: IA Infrastructure.
