Fidelity Sustainable Global Equity Income Fund

a sub-fund of Fidelity Investment Funds IX

Fidelity Sustainable Global Equity Income Fund W Income Shares
(ISIN:GB00BPGC5764)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The fund aims to provide income and long-term capital growth over a period of 5 years or more.

Investment Policy: The fund is part of the Fidelity Sustainable Family of Funds and adheres to the Fidelity Sustainable Family Framework under which at least 70% of the fund's net assets will be invested in issuers deemed to maintain sustainable characteristics. The fund will also adhere to the Fidelity Sustainable Family exclusion policy. The fund will invest at least 70% in the shares of companies globally, which maintain sustainable characteristics. This could include investment in countries considered to be emerging markets as determined by the Investment Manager at its sole discretion. The Investment Manager will choose investments which it believes offer attractive dividend yields in addition to price appreciation. The Investment Manager seeks to identify and select companies with an attractive, sustainable dividend income and/or sustainable income growth.

Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body. Companies with sustainable characteristics are those which the Investment Manager believes have effective governance and management of environmental and social issues. The fund may also obtain exposure to companies globally which demonstrate improving sustainable characteristics and other transferable securities, collective investment schemes, money market instruments, cash and deposits and is also able to use derivatives for efficient portfolio management (but not on any significant basis). Such investments will be made to take advantage of investment opportunities consistent with the income and growth objectives of the fund. The fund may also take positions which enable it to benefit from falling asset prices. The fund aims to hold a concentrated portfolio, investing in 30-50 companies or other types of investment. Further information on sustainable stock selection for the fund can be found at fidelity.co.uk/sustgeinfo

Investment Process: The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI All Country World Index. The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

Additional information: Income from the fund is either paid out to you or it is used to buy you more shares in the fund. As the

fund aims to generate an income some charges will be taken from the fund rather than the income generated by the fund. This means the amount payable as income may be increased and the potential to increase the value of your investment may be reduced. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the MSCI All Country World Index.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. As the fund invests in a relatively small number of investments or issuers it may experience a more volatile Net Asset Value as a result of this concentration of holdings relative to a fund that diversifies across a larger number of investments or issuers.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

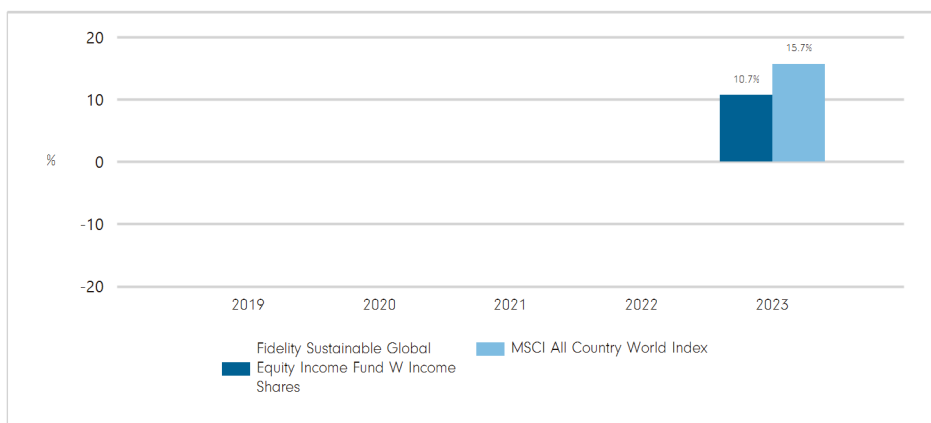

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.90%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 31 January 2004. This class was launched on 13 April 2022.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '*' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts.
This Class was previously the Income Class of the fund.
