

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdrn Multi-Asset Fund, a Sterling denominated sub fund of the abrdrn OEIC I, A Inc Shares (ISIN: GB0031682288). This fund is managed by abrdrn Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in a globally diversified portfolio of assets.
Performance Target: To exceed the return of the following composite index: 40% FTSE All-Share Index, 25% MSCI World ex UK Index, 15% FTSE Actuaries UK Conventional Gilts All Stocks Index, 5% FTSE Small Cap UK Index, 7.5% SONIA, 5% HFRI FOF Conservative Index, 2.5% FTSE All-Share Index-Equity Investment Instruments. The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.
Performance Comparator: The Investment Association's Mixed Investment 40-85% Shares Sector Average Returns.
The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of each index.

Investment Policy

Portfolio Securities

- The fund will invest in equities (company shares and investment companies) and bonds (loans to companies and governments) issued anywhere and in any currency.
- The fund may also invest in other funds (including those managed by abrdrn), money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- Their primary focus is on asset allocation and stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects to that of the market, and which align with their views regarding future economic and business conditions.
- The composite index is used as a reference point for portfolio construction and as a basis for setting risk constraints. Due to the active nature of the management process, the fund's performance profile may

deviate significantly from that of the composite Index. The fund will also be subject to constraints such that the fund's allocation to equities will be limited to the equity parameters of the Investment Association's Mixed Investment 40-85% Shares Sector Average Returns Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, to reduce cost and/or generate additional income or consistent with the risk profile of the fund (often referred to as 'Efficient Portfolio Management').
 - Derivatives include instruments used to express short term and long term views reflecting expected changes in interest rates, company share prices, inflation, currencies or creditworthiness of corporations or governments.
 - The fund may also invest in other funds which may use derivatives extensively although these investments shall be in line with the fund's overall risk profile.
- Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards → Typically higher rewards

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- The fund's price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	1.58%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

PAST PERFORMANCE

abrnd Multi-Asset Fund, A Inc, 31 December 2022

% Returns

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/2022.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP.

The fund was launched in 1991. The share/unit class was launched in 2002.

Performance Target – [40% FTSE All-Share Index, 25% MSCI World ex UK Index, 15% FTSE Actuaries UK Conventional Gilts All Stocks Index, 5% FTSE Small Cap UK Index, 7.5% SONIA, 5% HFRI FOF Conservative Index, 2.5% FTSE All-Share Index–Equity Investment Instruments] from 01/11/2021.
