Vanguard Japan Government Bond Index Fund

Sub-managed by Vanguard Investments Australia Ltd.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg Japan Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of Japanese yen-denominated treasury and Japan government-related securities with maturities greater than 1 year.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- With some signs of inflation close to peaking or having peaked toward year-end, major central banks including the US Federal Reserve, the Bank of England and the European Central Bank began to slow the pace of rate hikes but continued tightening monetary policy.
- It was an especially tough year for global bonds. With yields rising and bond prices falling, global fixed income markets ended the year down significantly.
- In this environment, Japanese government bonds ended the year lower overall. The fund's benchmark index returned -7.06% for the 12 months ended 31 December 2022.
- By maturity, shorter-dated bonds held up better. By sector, treasuries fared worse than local government bonds and agency bonds.

Benchmark returns in the commentary above are in Japanese yen.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Japan Government Bond 0.10% 20/12/2031	1,762,900,000	1,738,394,466			
Japan Government Bond 0.01% 1/3/2024	1,410,950,000	1,412,107,789			

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard SRI Euro Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg EUR Non-Government Float Adjusted Bond Index, a market-weighted index of euro-denominated investment-grade fixed income securities excluding euro zone treasury and euro zone government-related securities, with maturities greater than 1 year.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- With some signs of inflation close to peaking or having peaked toward year-end, major central banks including the US Federal Reserve, the Bank of England and the European Central Bank began to slow the pace of rate hikes but continued tightening monetary policy.
- It was an especially tough year for global bonds. With yields rising and bond prices falling, global fixed income markets ended the year down significantly.
- In this environment, the fund's benchmark index returned -15.15% for the 12 months ended 31 December 2022.
- Each sector within the index posted negative returns, but non-corporates, which make up a little less than a quarter of the benchmark, lost the most ground. Within non-corporates, the largest detractors were supranationals, foreign agencies and sovereigns.
- Each country within the index also posted negative returns for the year. The largest constituents – supranationals, France and Germany – were no exception.
- Longer-dated bonds weighed on performance.

Benchmark returns in the commentary above are in euros.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

¹ Since-inception returns: EUR Acc, 18 July 2017; Institutional Plus Eur Acc, 14 December 2017.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard U.K. Government Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg U.K. Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of pound sterling-denominated UK treasury and government-related securities with maturities greater than 1 year.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- With some signs of inflation close to peaking or having peaked toward year-end, major central banks including the US Federal Reserve, the Bank of England and the European Central Bank began to slow the pace of rate hikes but continued tightening monetary policy.
- It was an especially tough year for global bonds. With yields rising and bond prices falling, global fixed income markets ended the year down significantly.
- In this environment, the fund's benchmark index returned -26.99% for the 12 months ended 31 December 2022.
- With rising rates, bond prices fell across maturity levels, with the longest-duration securities seeing the steepest declines. Within the index, relative performance by credit quality was mixed, with A-rated bonds doing worse than those rated higher or lower. By sector, local government bonds saw a decline roughly twice as large as those for treasury and agency bonds.

Benchmark returns in the commentary above are in British pounds.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

¹ Since-inception returns: EUR Hedged Acc, 21 January 2021; Institutional Plus GBP Acc and Institutional Plus GBP Dist, 2 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard U.K. Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg GBP Non-Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of pound sterling-denominated, investment-grade fixed income securities, excluding government and government-related securities, with maturities greater than 1 year.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- With some signs of inflation close to peaking or having peaked toward year-end, major central banks including the US Federal Reserve, the Bank of England and the European Central Bank began to slow the pace of rate hikes but continued tightening monetary policy.
- It was an especially tough year for global bonds. With yields rising and bond prices falling, global fixed income markets ended the year down significantly.
- In this environment, the fund's benchmark index returned -17.57% for the 12 months ended 31 December 2022.
- With rising rates, bond prices fell across maturity levels, with the longest-duration securities seeing the steepest declines. Within the index, relative performance by credit quality and sector were mixed, though all posted negative returns.

Benchmark returns in the commentary above are in British pounds.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

¹ Since-inception returns: Institutional Plus GBP Acc and Institutional Plus GBP Dist, 2 September 2014.

Significant Portfolio Changes (unaudited)

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard U.K. Short-Term Investment Grade Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg GBP Non-Government 1–5 Year 200MM Float Adjusted Bond Index, a market-weighted index of pound sterling-denominated, investment-grade bonds, excluding government bonds, with maturities between 1 and 5 years.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- With some signs of inflation close to peaking or having peaked toward year-end, major central banks including the US Federal Reserve, the Bank of England and the European Central Bank began to slow the pace of rate hikes but continued tightening monetary policy.
- It was an especially tough year for global bonds. With yields rising and bond prices falling, global fixed income markets ended the year down significantly.
- In this environment, the fund's benchmark index returned –7.31% for the 12 months ended 31 December 2022.
- With rising rates, bond prices fell across maturity levels, but shorter-duration bonds held up better than longer-duration bonds, which helped the fund relative to those investing in longer bonds. Within the benchmark index, neither credit quality nor sector was a big differentiator in relative returns.

Benchmark returns in the commentary above are in British pounds.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

¹ Since-inception returns: GBP Acc and GBP Dist, 22 May 2013; Institutional Plus GBP Acc and Institutional Plus GBP Dist, 2 September 2014.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard U.S. Government Bond Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg U.S. Government Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of US dollar-denominated US Treasury and US government-related securities with maturities greater than 1 year.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- In response, major central banks wound down their bond-purchasing programs and began raising short-term interest rates. The US Federal Reserve was especially aggressive, raising the federal funds rate target from near zero in March 2022 to a range of 4.25%–4.5% by the end of the year.
- Global fixed income markets had an especially tough year, with bond yields in major economies moving sharply higher across the maturity spectrum. Global bonds ended the 12 months down roughly 16% in US dollars, as measured by the Bloomberg Global Aggregate Bond Index.
- In this environment, the fund's benchmark index returned –12.32% for the 12 months ended 31 December 2022.
- With rising rates, government bond prices fell across maturity levels, with the longest-duration securities seeing the steepest declines. Within the index, the returns were also negative across credit ratings and sectors, but lower-rated agency bonds fared somewhat better than higher-rated Treasuries.

Benchmark returns in the commentary above are in US dollars.

 Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard U.S. Investment Grade Credit Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg Global Aggregate USD Credit Float Adjusted Bond Index, a market-weighted index designed to reflect the total universe of US dollar-denominated, investment-grade fixed income securities, excluding US Treasury, US government-related and securitised securities, with maturities greater than 1 year.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- In response, major central banks wound down their bond-purchasing programs and began raising short-term interest rates. The US Federal Reserve was especially aggressive, raising the federal funds rate target from near zero in March 2022 to a range of 4.25%–4.5% by the end of the year.
- Global fixed income markets had an especially tough year, with bond yields in major economies moving sharply higher across the maturity spectrum. Global bonds ended the 12 months down roughly 16% in US dollars, as measured by the Bloomberg Global Aggregate Bond Index.
- In this environment, the fund's benchmark index returned –14.68% for the 12 months ended 31 December 2022.
- With rates rising, bond prices across all maturity levels fell, with the steepest declines coming from the longest-duration securities. Within the index, bonds with lower credit ratings generally saw sharper declines than higher-rated ones. By sector, credit securities (those coming from corporations and sovereign entities) fared worse than securitised bonds (such as asset-backed).

Benchmark returns in the commentary above are in US dollars.

Each benchmark is in its respective currency.
 Sources: Vanguard Global Advisers, LLC, and Bloomberg.
 Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

¹ Since-inception returns: Institutional Plus EUR Acc, 19 December 2013; Institutional Plus EUR Hedged Acc, 24 September 2015; GBP Hedged Acc, 31 January 2014; Institutional Plus GBP Hedged Acc and Institutional Plus GBP Hedged Dist, 8 September 2016; Institutional Plus USD Acc, 6 December 2013; Institutional Plus USD Dist, 24 September 2015.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the year and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

Vanguard U.S. Treasury Inflation-Protected Securities Index Fund

Managed by Vanguard Global Advisers, LLC.

Investment Objective

This fund seeks to provide returns consistent with the performance of the Bloomberg U.S. Government Inflation-Linked 1–10 Year Index, a market-weighted index designed to measure the performance of US Treasury Inflation-Protected Securities ("TIPS") with maturities between 1 and 10 years.

Performance Summary (unaudited)

The Performance Summary does not form part of the Financial Statements.

- The period was defined by a historic rise in interest rates, which caused ripple effects across every sector of the financial markets and brought with it renewed volatility.
- Russia's invasion of Ukraine added to inflationary pressures from ongoing supply-chain bottlenecks and labour shortages in some sectors of the economy, lifting year-on-year inflation readings to multidecade highs across much of the world. While energy prices eventually began to cool, price increases broadened to other categories of goods and services, heightening concerns that inflation might remain stubbornly high.
- In response, major central banks wound down their bond-purchasing programs and began raising short-term interest rates. The US Federal Reserve was especially aggressive, raising the federal funds rate target from near zero in March 2022 to a range of 4.25%–4.5% by the end of the year.
- Global fixed income markets had an especially tough year, with bond yields in major economies moving sharply higher across the maturity spectrum. Global bonds ended the 12 months down roughly 16% in US dollars, as measured by the Bloomberg Global Aggregate Bond Index.
- In this environment, the fund's benchmark index returned –7.38% for the 12 months ended 31 December 2022.
- With rates rising, bond prices across maturity levels fell, with the steepest declines coming from the longest-duration securities. Treasury Inflation-Protected Securities (TIPS) generally held up better during the period than nominal bonds, both government and corporate.

Benchmark returns in the commentary above are in US dollars.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, swing pricing, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Notes to the Financial Statements

1. General Information. Vanguard Investment Series plc (the “Company”), an open-ended investment company with variable capital, was incorporated in Ireland as a public limited company on 4 March 1998. The Company is authorised by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”).

Where applicable, shares are listed on the Global Exchange Market of the Euronext Dublin Exchange.

The Company is organised as an umbrella fund with segregated liabilities between funds. During the year ended 31 December 2022 the Company had 31 constituent funds and 2 closed funds (each a “Fund”, collectively the “Funds”):

	Commenced Operations
Vanguard Emerging Markets Stock Index Fund (the “Emerging Markets Stock Index Fund”)	7 June 2006
Vanguard ESG Developed World All Cap Equity Index Fund (the “ESG Developed World All Cap Equity Index Fund”)	7 February 2011
Vanguard ESG Emerging Markets All Cap Equity Index Fund (the “ESG Emerging Markets All Cap Equity Index Fund”)	9 June 2020
Vanguard European Stock Index Fund (the “European Stock Index Fund”)	14 September 1998
Vanguard Eurozone Stock Index Fund (the “Eurozone Stock Index Fund”)	25 October 2001
Vanguard Global Small-Cap Index Fund (the “Global Small-Cap Index Fund”)	10 October 2009
Vanguard Global Stock Index Fund (the “Global Stock Index Fund”)	4 August 1998
Vanguard Japan Stock Index Fund (the “Japan Stock Index Fund”)	22 October 2003
Vanguard Pacific ex-Japan Stock Index Fund (the “Pacific ex-Japan Stock Index Fund”)	22 July 2005
Vanguard SRI European Stock Fund (the “SRI European Stock Fund”)	29 June 2010
Vanguard U.S. 500 Stock Index Fund (the “U.S. 500 Stock Index Fund”)	4 November 1998
Vanguard U.S. Opportunities Fund (the “U.S. Opportunities Fund”)	8 April 2002
Vanguard 20+ Year Euro Treasury Index Fund (the “20+ Year Euro Treasury Index Fund”)	29 August 2007
Vanguard Emerging Markets Bond Fund (the “Emerging Markets Bond Fund”)	3 December 2019
Vanguard ESG Global Corporate Bond Index Fund (the “ESG Global Corporate Bond Index Fund”)	25 October 2022
Vanguard Euro Government Bond Index Fund (the “Euro Government Bond Index Fund”)	29 September 2000
Vanguard Euro Investment Grade Bond Index Fund (the “Euro Investment Grade Bond Index Fund”)	29 September 2000
Vanguard Eurozone Inflation-Linked Bond Index Fund (the “Eurozone Inflation-Linked Bond Index Fund”)	31 May 2005
Vanguard Global Bond Index Fund (the “Global Bond Index Fund”)	31 March 2008
Vanguard Global Corporate Bond Index Fund (the “Global Corporate Bond Index Fund”)	2 November 2017
Vanguard Global Credit Bond Fund (the “Global Credit Bond Fund”)	14 September 2017
Vanguard Global Short-Term Bond Index Fund (the “Global Short-Term Bond Index Fund”)	31 January 2014
Vanguard Global Short-Term Corporate Bond Index Fund (the “Global Short-Term Corporate Bond Index Fund”)	2 November 2017
Vanguard Japan Government Bond Index Fund (the “Japan Government Bond Index Fund”)	1 April 2004
Vanguard SRI Euro Investment Grade Bond Index Fund (the “SRI Euro Investment Grade Bond Index Fund”)	18 July 2017
Vanguard U.K. Government Bond Index Fund (the “U.K. Government Bond Index Fund”)	23 June 2009
Vanguard U.K. Investment Grade Bond Index Fund (the “U.K. Investment Grade Bond Index Fund”)	20 March 2007
Vanguard U.K. Short-Term Investment Grade Bond Index Fund (the “U.K. Short-Term Investment Grade Bond Index Fund”)	22 May 2013
Vanguard U.S. Government Bond Index Fund (the “U.S. Government Bond Index Fund”)	31 January 2002
Vanguard U.S. Investment Grade Credit Index Fund (the “U.S. Investment Grade Credit Index Fund”)	16 December 2004
Vanguard U.S. Treasury Inflation-Protected Securities Index Fund (the “U.S. Treasury Inflation-Protected Securities Index Fund”)	24 October 2016

The following Funds are currently approved by the Central Bank but have either been liquidated or not yet commenced trading:

	Central Bank Approval
Vanguard Global Enhanced Equity Fund ¹	12 January 2007
Vanguard U.S. Fundamental Value Fund ¹	10 February 2004

¹ The Fund liquidated.

2. Basis of Presentation. The financial statements are prepared in accordance with accounting standards generally accepted in Ireland, including Financial Reporting Standard (“FRS”) 102, Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “CBI UCITS Regulations”) and the Listing Rules of the Euronext Dublin Exchange. Accounting standards generally accepted in Ireland in preparing financial statements which present a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council (the “FRC”).

The Company has determined that the headings and sub-headings of the financial statements require adaptation from the requirements in the Companies Act 2014 to more appropriately reflect the Company’s business as an investment fund.

Cash Flow Statements have not been presented due to the exemption contained in FRS 102, Section 7.1A.

The information required by FRS 102 to be included in a statement of comprehensive income is contained in the Statement of Operations of each Fund and the Company.

The financial statements have been prepared on a going concern basis, subject to the historical cost convention, as modified by the revaluation of financial assets and liabilities at fair value through profit or loss (“FVTPL”).

3. Significant Accounting Policies.

(a) Critical Accounting Estimates and Judgements. The preparation of these financial statements requires the use of certain accounting estimates and requires the Company to exercise judgement when applying the Fund's accounting policies. The estimates and associated judgements are based on historical experience and various other factors that are believed to be reasonable under the circumstances, which affect the classification of financial assets and liabilities, the carrying values of financial instruments, the fair value of certain financial instruments in instances where information is not readily apparent from other sources, as well as the functional currency of the Company and Funds. Refers to Note 3(d), Note 3 (e) and Note 3 (g) for further information.

(b) Income Recognition. Dividends, whether cash or stock, are recognised as income when the securities are quoted ex-dividend. Special dividends are treated as either capital or income depending on the facts of each particular case.

In the case of debt securities, any difference between acquisition cost and maturity value is recognised as interest income over the life of the security using the effective yield basis of calculating amortisation. Any Funds holding inflation-linked bonds recorded net positive income during the year ended 31 December 2022 (31 December 2021: same).

Interest income on cash is recognised on an effective interest basis.

Securities-lending income is recognised on an accrual basis.

All income is recognised gross of any withholding taxes incurred.

(c) Taxation. Current tax is recognised as the amount of income tax paid or payable in respect of the taxable overseas net profit. Deferred taxation is provided on all timing differences that have originated but not reversed by the reporting date. Deferred tax is measured at the rates expected to apply for the year in which the timing differences will reverse. Deferred taxes are not discounted to reflect the time value of money and are only recognised to the extent they are expected to crystallise.

Withholding taxes on foreign dividends and capital gains have been provided for in accordance with the Funds' understanding of the applicable countries' tax rules and rates.

(d) Financial Assets and Financial Liabilities. FRS 102 requires a reporting entity to apply either (a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues; (b) the recognition and measurement provisions of International Accounting Standards ("IAS") 39, Financial Instruments: Recognition and Measurement ("IAS 39"), and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments; or (c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9, Financial Instruments, and the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments. The Company has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of FRS 102.

Classification and Measurement. Financial assets and financial liabilities, including financial derivative investments, are held for trading and classified and measured at FVTPL from their initial recognition. Redeemable participating shares are classified as financial liabilities at amortised cost and are measured at the present value of the redemption amounts, which approximates their fair value. All other financial assets and liabilities are measured at amortised cost, which approximates fair value.

Recognition and Derecognition. Purchases and sales of financial instruments are recognised on the trade date, being the date on which the Fund commits itself to the purchase or sale. Financial instruments at FVTPL are initially recognised when the Funds become party to the contractual provisions of the instrument. Financial instruments are derecognised when the contractual rights to the cash flows from the instruments expire, or when substantially all the risks and rewards of ownership have been transferred. Realised gains and losses are specifically identified when securities are derecognised. Premiums received on expired options are realised as gains, while premiums paid on expired options are realised as losses. Premiums on exercised options will result in gains or losses by either increasing the proceeds received when selling the underlying security or decreasing the cost basis when purchasing the underlying security.

(e) Fair Value Measurement. Financial instruments are measured at fair value using a three-level hierarchy. Instruments are categorised in their entirety based on the lowest level input that is significant to the fair value measurement. Assessing the significance and observability of a particular input requires significant judgement specific to an asset or liability. Inputs are considered to be observable when they are readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Level 1—Quoted prices in active markets for identical securities.

Level 2—Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3—Significant unobservable inputs (including the Fund's own assumptions used to determine the fair value of investments).

Equities. Equities (including warrants and rights) are valued at the latest available last traded value at year-end. Instruments traded on a recognised market are valued on the basis of valuations provided by a principal market maker or a pricing service. When applicable, unlisted and suspended instruments are based on the Investment Manager's assessment of their net realisable value or the last traded price from broker-dealers for non-exchange-trade purposes.

Fixed Income. Fixed income securities traded in recognised markets are valued using the latest bid prices on the securities exchange in which they are principally traded or using valuations based on a matrix system (which considers such factors as security prices, yields, maturities and ratings), both as furnished by independent pricing services.

Financial Derivative Instruments. Futures contracts are valued in an active market if quoted prices are readily and regularly available; this represents the amount that would be required to close the position. Forward currency contracts are valued based on quoted forward exchange rates as provided by a reliable pricing service, bank or dealer. Credit default swaps, interest rate swaps and

over-the-counter options (including swaptions) are valued using a pricing service; where no pricing service is available, contracts are marked-to-market daily based upon quotations received from counterparties or based upon calculations using valuation models.

(f) Transaction Costs and Commissions. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment. These costs include fees and commissions paid to agents, advisors, brokers and dealers, and transfer taxes and duties. Transaction costs which are separately identifiable in the purchase and sale of financial instruments designated at FVTPL are expensed on an accrual basis. For fixed income securities and certain derivatives, transaction costs are not separately identifiable from the purchase price and therefore cannot be disclosed separately.

(g) Foreign Currency. Functional currency is the currency of the primary economic environment in which the Funds operates. If indicators of the primary economic environment are mixed, then the Board of Directors uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. All transactions in foreign currencies are translated into each Fund's functional currency at the exchange rates prevailing on the date of the transaction. At the reporting date, monetary assets and liabilities denominated in foreign currencies are translated at the prevailing exchange rates. Gains and losses arising on translation are included in total return and are reported on a net basis.

The presentation currency of the Company's financial statements is USD.

In preparing the aggregate Company Statement of Assets and Liabilities, all transactions have been translated into USD. Funds which are not recorded in the Company's presentational currency are translated to USD using the prevailing exchange rates as at 31 December. For the purpose of producing the Company Statement of Operations and the Company Statement of Changes in Net Assets from the accounts of the individual Funds, average exchange rates for the year are used.

The presentational and functional currency of each Fund is:

Fund	Currency	Fund	Currency
Emerging Markets Stock Index Fund	US dollar (US\$)	U.S. Investment Grade Credit Index Fund	US dollar (US\$)
ESG Developed World All Cap Equity Index Fund	US dollar (US\$)	U.S. Treasury Inflation-Protected Securities Index Fund	US dollar (US\$)

Global Short-Term Corporate Bond Index Fund	US dollar (US\$)	Japan Government Bond Index Fund	Japanese yen (¥)
U.S. Government Bond Index Fund	US dollar (US\$)		

(h) Cash and Bank Overdrafts. Cash is composed of demand deposits with financial institutions or bank overdrafts. Bank overdrafts, when applicable, are presented as current liabilities. Cash held or pledged as collateral against financial transactions or financial derivative instruments is not included within Cash and Bank Overdrafts but is segregated and presented separately on the Statement of Assets and Liabilities as Cash Collateral.

In respect to share issuances or redemptions, the Company operates an umbrella cash account. Monies received or proceeds due will be held and transmitted through this account and are included in Cash and Bank Overdrafts.

Margin. Upon entering into futures contracts and centrally cleared swap contracts, cash deposits are required (initial margin) in an amount equal to a certain percentage of the contract value. Subsequent payments (variation margin) are made or received by the Funds each day. Margin against these financial derivative instruments is not included within Cash or Bank Overdrafts but is segregated and presented separately as Margin Cash Due from Broker or Margin Cash Due to Broker, as applicable.

(i) Redeemable Participating Shares. Redeemable participating shares provide shareholders with the right to redeem their shares for cash and are classified as financial liabilities.

(j) Trade Date Reporting. Investment transactions for financial statement purposes as at 31 December are accounted for on the trade date. This is different from the basis used for the daily dealing net asset value, which is accounted for using the trade date plus one business day.

(k) Offsetting. Financial assets and liabilities are offset and the net amount reported when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. As at 31 December 2022 and 2021, there were no financial assets or liabilities offset.

(l) Equalisation. Equalisation occurs to reflect the pro rata payment of distributions based on the time period over which shares have been owned by an investor. If shares are purchased when the Funds have accrued income but not yet declared a distribution, the Funds will credit to the equalisation account the portion of the purchase price representing income accrued but directly attributable to those shares. Conversely, if shares are redeemed when the Funds have accrued income but not yet declared a distribution, the Funds will deduct from the equalisation account the portion of the redemption price representing income accrued but directly attributable to those shares. Equalisation is reflected on the Statement of Operations as a finance cost.

(m) Swing Pricing. The Funds employ swing pricing as a means to prevent dilution. Swing pricing results from the Company's determination to adjust the Funds' net asset value, on any dealing day, following a consideration of dealing activity (i.e. level of subscriptions and redemptions) and the level of costs associated with such activity. A dilution adjustment is exercised only for the purpose of reducing the negative effects of transaction charges in the interest of the non-dealing shareholders in the Funds and is applied consistently in respect of the Funds, and in respect of all assets of the Funds. The direction of the swing depends on whether there are net subscriptions or net redemptions in the Funds on the relevant dealing day, while the magnitude of the swing is based on pre-determined estimates of the average execution costs in the relevant asset classes in which the Funds are invested.

Any dilution adjustment did not exceed 2% of the net asset value per share of the Funds for the years ended 2022 and 2021.

4. Risk Management Policies.

The Funds' investments in financial instruments create a direct exposure to a variety of risks. The Funds may also make investments in other underlying funds. The financial instruments which constitute these other underlying funds generally expose the Funds to indirect risks resulting from currency, interest rate, other price risk and credit risk.

Funds may trade in financial derivative instruments such as exchange traded futures and options contracts (to manage cash flows on a short term basis and to achieve cost efficiencies), warrants, swap agreements and equity-linked notes (to gain market exposure or exposure to a particular asset class) and currency forwards (to protect against currency fluctuations). The use of financial derivative instruments may expose the Funds to a higher degree of risk. In particular, financial derivative instruments contracts can be highly volatile, and the initial investment is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on financial derivative instruments than on standard securities. Leveraged financial derivative instruments positions can therefore increase Fund volatility. Global exposure is measured and monitored using the commitment approach. Leverage will not exceed 100% of the net asset value of the relevant Fund and will be done in accordance with regulations applicable to the Funds.

Significant market disruptions, such as those caused by pandemics (e.g., COVID-19 pandemic), natural or environmental disasters, war (e.g., Russia's invasion of Ukraine), acts of terrorism, or other events, can adversely affect local and global markets and normal market operations. Any such disruptions could have an adverse impact on the value of the Funds' investments and Funds' performance.

The Manager seeks to minimise potential adverse effects of risk on the Funds' performance by employing professional, experienced portfolio advisors; by daily monitoring of the Funds' positions and market events; by diversifying the investment portfolio within the constraints of the investment objectives; and by periodically using derivatives to economically hedge certain risk exposures.

Price Risk. Price risk is the risk that the value of financial instruments will fluctuate because of changes in the market. The Investment Manager considers the asset allocation of the portfolio in order to minimise the risk associated with particular countries or industry sectors while continuing to follow the stated investment objective.

The investment objective for an index fund is to seek to track as closely as reasonably possible the performance of the benchmark indices. In order to achieve this objective, an index fund invests primarily in securities held in the relevant benchmark index. An index fund places limitations on the amount by which a holding may deviate from the proportion in the benchmark to limit the market risk from mismatched positions.

All investments present a risk of loss of capital. The Investment Manager assesses market risk volatility to ensure that the effect of using financial derivative instruments is not significant enough to cause disproportionate losses to overall value. The Investment Manager moderates this risk through careful selection of financial instruments.

Currency Risk. Currency risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in currency exchange rates. Local interest rates and monetary policy, as well as other government fiscal and labour policies, can also adversely impact currency values. The Funds may enter into foreign currency contracts for hedging purposes, which can include the economic hedging of all or a portion of the currency exposure of an investment or group of investments. The Funds may also enter into these contracts for non-hedging purposes, which can include increasing the exposure to a foreign currency, or the shifting of exposure to foreign currency fluctuations from one country to another. Currency positions are reconciled daily and discrepancies are immediately resolved. Procedures are established with the Investment Manager to trade currency as closely as possible to the close of the markets, so as to obtain exchange rates that closely approximate the rates used in the daily valuation.

The tables below indicate the currencies to which certain Funds had exposure either directly or indirectly and the notional value of foreign currency contracts:

Each hedged share class incorporates a currency hedge, which acts as a buffer against the impact of currency fluctuations for investors for whom the base currency is hedge share class-specific currency.

Interest Rate Risk. Income on fixed income securities may be affected by changes in interest rates relevant to particular securities or as a result of the Investment Manager being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed rate securities may be affected by interest rate movements or the expectation of such movements in the future. Interest receivable on bank deposits or payable on bank overdraft positions will also be affected by fluctuations in interest rates.

The Company's and each Fund's interest rate exposure by maturity is summarised below as a percentage of fixed income holdings:

Fund	31 December 2022

Management of Market Risk (Including Price and Interest Rate Risks). Using risk models and quantitative tools, the Investment Manager performs daily reviews of exposure to: style, country, sector and currency related risk factors for equity portfolios and interest rate, credit spread, and currency related risk factors for fixed income portfolios. For index funds, in practice, this is implemented by either fully replicating a benchmark or by holding a representative sample of benchmark securities. The Investment Manager employs a “passive” investment strategy aimed to minimise tracking-error and portfolio management related costs through the optimisation of the Funds' relative exposure to the relevant risk factors of the benchmarks. In addition, the Investment Manager performs daily checks of performance against the respective benchmarks. For actively-managed funds, the Investment Manager assesses these risks in line with the unique investment objective and portfolio composition of each Fund. Efficient portfolio management techniques, as described in Note 10, may be used to minimise transaction costs or taxes. Procedures are established with the Investment Manager to trade currency as closely as possible to the close of the markets, so as to obtain exchange rates that closely approximate the rates used in the daily valuation.

Each index Fund's market risk profile is correlated to the change in return for its respective benchmark index. The sensitivity analysis below reflects the interdependencies between risk variables (price, foreign currency, and interest rate) and demonstrates the effect a change in benchmark return had on the net assets of the Fund during the year.

Fund	Benchmark	Year Ended 31 December 2022		Year Ended 31 December 2021

Global Credit Bond Fund	\$564,812,545	\$56,481,255	\$584,562,482	\$58,456,248

The presentation for prior period has been amended for consistency to the current period.

The effect of market price movement of +/- 10% to the Company's Financial Assets at Fair Value Through Profit or Loss of \$107,002,023,847, with all other variables remaining constant, would result in a change to the Company's net assets of \$10,700,202,385 (31 December 2021: \$13,235,936,475).

Liquidity Risk. Liquidity risk is the risk that sufficient cash cannot be raised to meet liabilities when due. One of the key liquidity factors influencing the Company and the Funds is exposure to cash redemptions of redeemable participating shares. Hence the Company through the Funds invests the large majority of its assets in investments that are traded in active markets and can ordinarily be readily disposed. However, liquidity risk will occur if an issuer becomes credit-impaired or if the relevant market becomes illiquid. In such a case, it may not be possible to initiate or liquidate a position at a price deemed by the Investment Manager to be demonstrating fair value. Liquidity risk may be temporary or may last for extended periods. The Company through the Funds invests in securities that form part of the benchmark indices. Benchmark indices are constructed from index rules requiring securities to have a specified minimum trading volume, which, although not guaranteeing liquidity, provides indication of the liquid nature of the securities underlying the Funds. The Funds are exposed to withdrawals and contributions that are invested to ensure that exposures to the benchmark indices are maintained in order to meet the investment objective of the Funds. All of the Funds' financial liabilities, based on contractual maturities, fall due within three months. The expected settlement dates can be more than three months based on the analysis of the remaining period at the reporting date to the maturity date and are outlined in the schedules of investments.

No shareholder owns greater than 25% of the net assets of the Company. Shareholders owning greater than 25% of the net assets of a Fund may further expose the Fund to concentration risks that could impact liquidity should one or more of these shareholders submit redemption requests.

	31 December 2022		31 December 2021

¹ The Fund launched during the year. See Note 1.

Management of Liquidity Risk. In order to meet redemption requests and raise cash from the portfolio, the Investment Manager receives daily reports of share capital activity from the Administrator. The Investment Manager incorporates cash forecasts into the daily management of the portfolio and monitors cash balances daily.

Index futures contracts also support liquidity and may be used to a limited extent, to maintain full exposure to the index, maintain liquidity and minimise transaction costs. The Funds may equitise cash holdings by purchasing or selling futures contracts in response to cash inflows and outflows, thereby simulating a fully invested position in the underlying index while maintaining a cash balance for liquidity purposes.

Subject to certain circumstances as detailed in the Prospectus, negative impacts to liquidity or transaction costs caused by significant shareholder redemptions may be mitigated through the Funds' available liquidity measures including, but not limited to, the use of (a) its swing pricing policies, (b) distribution of underlying investments rather than cash, subject to certain conditions, in which case the shareholder may bear the cost of charges incurred in connection with the sale of such underlying investments, (c) limiting the maximum amount of daily redemptions when total redemption requests for the day exceed 10%, or (d) temporary suspension of dealing in shares. Should the Funds require, they also have access to a syndicated line of credit for temporary or emergency purposes (as disclosed in Note 9).

Credit Risk. Credit risk is the risk that a counterparty to a transaction or an issuer of a financial instrument will fail to pay interest and principal when due, or that perceptions of the issuer's ability to make such payments will cause the price of an investment to decline. Significant investment in debt securities or use of over-the-counter derivative contracts to a material degree will generally increase credit risk.

Credit risk exposure is also created through interactions with brokers and custodians. However, transactions in listed securities are settled and paid for upon delivery of securities using only approved brokers. The risk of default is therefore considered minimal because securities are delivered only when the broker has made payment and the broker is paid for purchases only once the securities have been received by Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary").

The securities lending activity of the Funds creates exposure to the borrowing counterparties which is mitigated by the collateral arrangements in place and an indemnity provided by the lending agent, Brown Brothers Harriman & Co., against any losses suffered under the lending program.

Credit risk may also arise from assets of the Funds which are substantially all held by the Depositary. Bankruptcy or insolvency of the Depositary may cause certain rights with respect to securities and other positions held to be delayed or limited. As of 31 December 2022, the Depositary has a long-term credit rating of A+ from Fitch (31 December 2021: A+). Additionally, the Depositary ensures there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. All securities held in custody by the Depositary are segregated from the Depositary's own assets, whether in a vault, in segregated accounts on the books of sub-custodians, or in an account maintained at a central securities depositary. The Depositary maintains segregated accounts per client on its own books as well as on the books of sub-custodians in local markets, where possible.

Certain Funds may use credit default swaps to a limited extent, for efficient replication of credit risk exposure or to transfer default protection on an underlying fixed income security. Credit protection purchased results in an asset which may increase credit risk, while credit protection sold results in a liability which may increase liquidity risk. For credit default swaps, the notional amount best represents the maximum potential future undiscounted payments that the Funds would be required to pay. The notional amount of credit protection sold are disclosed in the Funds' Statements of Investments.

The Company is exposed to credit risk through investments made in fixed income securities within its Funds. Credit risk is managed at the Fund level. For Funds invested in debt securities, the Statements of Investments and the following table is an analysis of the concentration of issuer credit ratings determined by a middle rating of Moody's, S&P and Fitch, which is then reflected as a percentage of their fair value measurement of these financial assets in the financial statements:

Management of Credit Risk. Credit risk is managed by investment policies which restrict or place limits on acceptable portfolio and net asset concentrations as well as exposure to certain instruments, credit institutions, and counterparties. The Investment Manager performs daily reviews of portfolio attributes, such as sector diversification and credit quality, and makes adjustments where necessary to ensure that the credit risk components closely match those of the respective benchmarks. Credit ratings of debt instruments and counterparties are monitored and evaluated periodically by the Investment Manager; an approved counterparty list is maintained, and trading with approved counterparties is enforced. The Funds also enter into master netting arrangements with their counterparties and require the transfer of collateral to secure performance. The value of securities pledged or received as collateral against securities lending transactions and derivative contracts is disclosed in Notes 10 and 11, respectively. Securities received as collateral from counterparties are not recognised by the Funds as an asset because they do not have rights to sell or re-pledge the collateral, unless in the event of default.

Interest Rate Benchmark Reform. Certain Funds are exposed to specific interest rate benchmarks subject to reform and whose publication has already, or will, cease in the future. While the Funds are transitioning to alternative benchmark rates, any existing investment in floating rate securities referencing these rates can introduce an element of pricing and liquidity risk, should the market for these securities become less liquid. The Funds' investment manager monitors and manages the transition to alternative rates by continually reviewing the total amounts of contracts that have yet to transition, reducing or eliminating exposure to these contracts, or ensuring these contracts contain appropriate fallback clauses. The transition away from benchmark rates to which the funds have exposure has largely been completed.

5. Taxation. Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares, or appropriation or cancellation of shares of a shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer. Any tax arising on a chargeable event is a liability of the shareholders, albeit it is paid by the Company (although if the Company fails to deduct the correct amount of tax it becomes ultimately a liability of the Company).

No Irish tax will arise on the Company in respect of chargeable events in respect of:

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Income to make gross payments in the absence of appropriate declarations; and

(b) certain exempted Irish tax resident shareholders (b) who have provided the necessary signed statutory declarations.

Dividends, interest and capital gains received on investments may be subject to withholding or other taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable. Foreign withholding taxes on dividends and interest are recognised when such taxes are not recoverable and are included in Taxation. Funds may also be subject to tax on the realised and unrealised portion of their capital gains.

The Funds have filed tax reclaims for previously withheld taxes on dividends earned in certain European Union countries. These filings are subject to various administrative and judicial proceedings within these countries. Such tax reclaims recognised during the year, if any, are included in Taxation. No other amounts for these tax reclaims are reflected in the financial statements due to the uncertainty as to the ultimate resolution of proceedings, the likelihood of receipt of these reclaims and the potential timing of payment.

Below is an analysis of the tax charge for the year ended 31 December 2022:

¹ The Fund liquidated during the year. See Note 1.

6. Distribution Policy. The Directors intend to distribute all, or substantially all, of the net income (interest and dividends, less expenses) to distributing share class holders. Should expenses exceed income, no distribution is made. Dividend distributions are payable to shareholders of record on the date on which the dividend is declared. Dividends on other equity funds are paid on a quarterly basis and dividends on fixed income funds are paid on a monthly basis, unless otherwise detailed. The Directors do not intend to declare dividends on accumulating shares.

The following table presents the payment frequency with respect to distributing share classes. If a dividend has not been declared, income and gains of such Fund will be reflected in the net asset value per share.

7. **Net Asset Value Per Share.** The net asset value per share of each share class is calculated by dividing the total net assets of each share class by the number of shares in issue.

8. **Share Capital.** The Company has variable share capital consisting of 500,000,030,000 authorised shares divided into 30,000 subscriber shares and 500,000,000,000 redeemable participating shares (no par value).

The Directors may issue shares of any class and create new classes of shares on such terms as the Directors may from time to time determine in relation to any Fund and in accordance with the requirements of the Central Bank. Shares may be divided into different classes to accommodate different subscription, redemption or fee arrangements, dividend provisions, or charges.

Subscriber Shares. There are two Subscriber Shares in issue, which are held by nominees for the Investment Manager. Subscriber Shares do not entitle the holders thereof to any dividend and on a winding-up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The Subscriber Shares do not form part of the Shareholders' funds and are not included in the net asset value of the Company.

Redeemable Participating Shares. Members who are individuals may attend and vote at general meetings in person or by proxy. Members who are corporations may attend and vote at general meetings by appointing a representative or proxy. Subject to any special terms as to voting upon which any shares may be issued or may for the time being be held, at any general meeting on a show of hands every Shareholder who (being an individual) is present in person or (being a corporation) is present by duly authorised representative shall have one vote. On a poll every such holder presents as aforesaid or by proxy shall have one vote for every share held. If the Company shall be wound up, then the payment to the holders of the redeemable participating shares of each class of a sum in the currency in which that class is designated as nearly as possible equal to the Net Assets Attributable to Holders of Redeemable Participating Shares respectively as at the date of commencement. In the event that there are insufficient assets available in the relevant Fund to enable such payment, the assets of the Company not comprised within any of the Funds to the assets remaining in the Funds for the other classes of Shares after payment to the holders of the Shares of the class to which they relate of the amounts to which they are respectively entitled under this paragraph prorata to the total value of such assets remaining within each such Fund.

Share capital activity for the year ended 31 December 2022:

9. Credit Facility. The Funds and certain other funds managed by the Manager or its affiliates participate in an annually renewable USD \$4.4 billion (2021: \$4.3 billion) committed credit facility. Each participating Fund is individually liable for its borrowings under the credit facility. Borrowings may be utilised for temporary or emergency purposes and are subject to the participating fund's regulatory and contractual borrowing restrictions. Participating Funds are allocated an annual commitment fee of 0.10% of the undrawn facility amount as well as certain administrative fees. Any fees allocated to the Funds are paid by the Manager. Interest and direct borrowing costs associated with draws on the credit facility are charged to the Funds and recorded in the Statement of Operations.

Any borrowings under this facility denominated in euros bear interest at the Euro Interbank Offered Rate plus an applicable margin, while borrowings under this facility in denominations other than euros bear interest at a rate equal to the higher of the one-month London Interbank Offered Rate (or an acceptable alternate rate, if necessary), federal funds effective rate or overnight bank funding rate plus an agreed-upon spread.

As part of the annual credit facility renewal, new funds launched since the previous renewal are considered for inclusion in the agreement. The ESG Global Corporate Bond Index Fund was added to the credit facility agreement as part of the 2023 renewal.

The Funds did not have any borrowings outstanding as at 31 December 2022 or at any time during the period that ended (31 December 2021: none).

10. Efficient Portfolio Management. Investment techniques and financial derivative instruments (FDIs) may be employed for efficient portfolio management purposes, including hedging against market movements, currency exchange or interest rate risks. Any investment technique or use of FDIs must be one which is reasonably believed by the Investment Manager to be economically appropriate in that it is realised in a cost-effective way. Realised and unrealised gains or losses arising from financial derivative instrument transactions are accounted for through the Statement of Operations as Net Gain/(Loss) on Investment Instruments.

Securities lending is also used for efficient portfolio management. The securities lending agent is Brown Brothers Harriman & Co. All operational costs in support of the lending programme are borne by the lending agent and paid directly out of any lending agent fees. Securities lending income is net of any lending agent fees paid.

Securities on loan continue to be recognised by the Funds as financial assets because they substantially retain the risks and rewards of ownership. Similarly, security collateral received from the borrower is not recognised by the Funds as an asset because they do not have rights to sell or re-pledge the collateral, unless in the event of default. Collateral accepted by the Funds is limited to high quality sovereign debt (US Treasuries, UK Gilts, etc.).

Securities on loan by the Funds and the value of collateral held in respect of the securities were:

31 December 2022

Fund	Value of Outstanding Securities on Loan	Value of Collateral
Emerging Markets Stock Index Fund	\$154,296,958	\$164,545,239

Company Total	\$9,165,351	\$673,680

11. Collateral. The Funds pledge and receive non-cash collateral against financial derivative instrument transactions, but such collateral cannot be sold, re-invested or re-pledged. As a result, pledged collateral remains an asset of the Fund and is included in the Statement of Investments. Equally, securities received as collateral are not considered assets of the Fund and will not appear in the Statement of Investments. The Funds may also be required to maintain cash collateral in margin accounts with certain counterparties. This cash is segregated on the Statement of Assets and Liabilities and presented separately as "Cash Collateral". In addition, the Funds receive other non-cash collateral in relation to securities lending transactions which is separately disclosed in Note 10. Counterparties to financial derivative transactions where collateral was required to be exchanged included Bank of America N.A., Barclays Bank plc, Brown Brothers Harriman & Co., BNP Paribas, Goldman Sachs International, HSBC, JPMorgan Chase Bank, Morgan Stanley, Nomura Holdings, Standard Chartered Bank, Royal Bank of Canada, State Street Bank, Toronto Dominion Bank and UBS.

As of 31 December 2022 and 31 December 2021, non-cash collateral pledged or received by the Funds for financial derivative instrument transactions was:

Fund	Type	31 December 2022		31 December 2021

12. Related and Connected Parties Transactions.

Parties are related if one can control or exercise significant influence over the other in making financial or operational decisions or is a member of a group which provides key management personnel services. The Company's directors and Manager are considered related parties. The Investment Manager, as well as any sub-investment manager or their delegates, are considered connected parties.

Manager. Vanguard Group (Ireland) Limited is the Funds' Manager and acts as a principal in respect of all transactions of shares in the Funds. For its services, the Manager receives a fixed single fee per share class (the "Management Fees") calculated on a daily basis and paid monthly. Out of the fees received, the Manager pays for any sub-advisers, as well as the costs of administration including audit, depository, legal, registration and regulatory fees associated with the Funds. As a result, the Manager anticipates that the ongoing charges figure ("OCF") of each share class will closely track the Management Fees. In the event that the costs and expenses of the Company or any Fund exceed the OCF, the Manager will be responsible for discharging any excess out of its own assets. The Manager,

in its sole discretion, may voluntarily waive all or part of its fee, and any such waiver could be discontinued at any time and without notice.

Any amounts due from or to the Manager at the end of the year are disclosed in the Statement of Assets and Liabilities. Amounts earned by the Manager in respect to fees for the year are disclosed in the Statement of Operations.

The Annual Management Fees for each share class as at 31 December 2022:

¹ The Fund liquidated during the year. See Note 1.

Directors' Fees. The Manager has agreed to pay all Directors' fees and expenses including out-of-pocket expenses. Only the independent directors are paid fees for their services as a director. None of the Directors has entered into a service contract with the Company nor is any such contract proposed, and none of the Directors is an executive of the Company. Aggregate Director fees paid by the Manager on behalf of the Funds and other funds managed for the year ended 31 December 2022 were US\$355,259 (31 December 2021: US\$371,994), of which US\$Nil (31 December 2021: US\$Nil) was outstanding at the year-end.

The Company had seven Directors as at 31 December 2022:

Director ¹	Independent Director	Director of other Vanguard funds or affiliates
William Slattery	Yes	Yes
Sean Hagerty	No	Yes
Tara Doyle	Yes	Yes
Robyn Laidlaw	No	Yes
Karin A. Risi	No	Yes
Ranjit Singh ²	Yes	Yes
Thomas Challenor ²	Yes	Yes

¹ Peter Blessing, Michael S. Miller and Ann Stock resigned on 31 December 2022.

² Appointed on 1 December 2022.

Investment Manager. Vanguard Global Advisers, LLC, is the Investment Manager to the Company and is compensated by the Manager. PRIMECAP Management Company sub-manages the U.S. Opportunities Fund.

The Investment Manager or the Manager, at their discretion, may appoint other companies from within the Vanguard Group of Companies to provide investment management and advisory services with respect to the Funds.

Inter-Fund Trading. The table below details the inter-fund trades between the Company and related parties and/or funds managed by related parties during the year ended 31 December 2022. All transactions were carried out at fair value:

Fund	Bought	Sold
ESG Developed World All Cap Equity Index Fund	\$25,430,699	\$9,696,939

18. Auditors' Remuneration. The statutory audit fee (including out-of-pocket expenses incurred by the auditors in connection with their work) paid by the Manager out of the OCF on behalf of the Company for the year amounted to US\$413,559 (31 December 2021: US\$551,840). The Auditors provided no other services to the Company.

19. Material Changes to the Prospectus.

On 21 March 2022, the prospectus was updated primarily to reflect changes in the ESG screening methodology made by FTSE Russell and Bloomberg, respectively, as index provider in respect of the relevant index tracked by the Vanguard ESG Developed World All Cap Equity Index Fund, Vanguard ESG Emerging Markets All Cap Equity Index Fund and the Vanguard ESG Global Corporate Bond Index Fund.

On 18 July 2022, the prospectus was updated to remove the references to the Vanguard U.S. Ultra Short-Term Bond Fund following the completion of withdrawal of approval with the Central Bank; updated for the use of reverse repurchase agreements to ensure readiness for activation on certain of the fixed income funds; updated for auditor details to reflect the appointment of KPMG; updated for Taxonomy related disclosure for existing ESG funds in respect of exposure to environmentally sustainable investments; updated to include the existing Russian Markets risk factor as a result of recent events in Ukraine; updated to include reference to Nasdaq Iceland as an eligible securities market; updated the supplement for Vanguard Pacific ex-Japan Stock Index Fund to disclose the ability to avail of the increased issuer diversification limit; updated the supplement for Vanguard U.S. Opportunities Fund to clarify that the fund's measures its performance against the Russell 3000 Index; updated the supplement for Vanguard SRI Euro Investment Grade Bond Index Fund to clarify the current screening methodology applied in respect of the exclusion of tobacco; and updated the supplement in respect of Russian exposure to clarify that following actions taken by the relevant index providers, 0.00% of the relevant index comprised Russian securities.

On 28 September 2022, the prospectus was updated to include disclosure in the investment policies of Vanguard Emerging Markets Bond Fund and Vanguard Global Credit Bond Fund to reflect the funds' ability to invest in China Bonds; updated to reflect the Change of distribution cycle for Vanguard Eurozone Inflation Linked Bond Index Fund from annually to quarterly; updated for Brazilian CGT disclosure; updated for directors positions; and updated to remove Moscow Exchange as an eligible securities/derivatives market.

On 29 November 2022, the prospectus was updated to address the requirements of SFDR and the Taxonomy Regulation which came into effect on 1 January 2023, specifically the updates include: a general "Sustainable Finance" disclosure and disclosure in relation to certain specific sustainable finance items such as compliance with the Taxonomy Regulation and Principal Adverse Impact disclosure; the inclusion of a general "Sustainability Risks" disclosure; the inclusion of specific disclosure in the investment policy section of the fund which has been categorised as an Article 8 fund under SFDR; and the inclusion of the mandatory pre-contractual disclosure templates for the Article 8 fund.

20. Events During the Year Ended 31 December 2022.

The Vanguard ESG Global Corporate Bond Index Fund was launched on 25 October 2022.

There were no other events during the year requiring recognition or disclosure in the financial statements.

21. Events Since the Statement of Assets and Liabilities Date.

Lisa Harlow was appointed as Director on 1 January 2023.

There were no other events subsequent to year-end requiring recognition or disclosure in the financial statements.

22. Approval of Financial Statements. The Financial Statements were approved by the Directors on 27 April 2023.

Report of the Depositary to the Shareholders (unaudited)

We have enquired into the conduct of the Vanguard Investment Series plc (“the Company”) for the year ended 31 December 2022 in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (“the UCITS Regulations”), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company’s Memorandum and Articles of Association, the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not complied we, as Depositary, must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Memorandum and Articles of Association and the appropriate regulations; and (ii) otherwise in accordance with the Company’s constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (‘the Central Bank UCITS Regulations’); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF VANGUARD INVESTMENT SERIES PLC

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Vanguard Investment Series plc ('the Company') for the year ended December 31, 2022 set out on pages 15 to 17, which comprise the Company Statement of Assets and Liabilities, Company Statement of Operations, Company Statement of Changes in Net Assets and related notes, including the summary of significant accounting policies set out in note 3, set out on pages 1172 to 1229, and the Statement of Investments of each fund.

The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Company as at December 31, 2022 and of its decrease in net assets for the year then ended;
- the financial statements have been properly prepared in accordance with FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland*; and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We have fulfilled our ethical responsibilities under, and we remained independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to listed entities.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the director's assessment of the entity's ability to continue to adopt the going concern basis of accounting included considering the inherent risks to the Company's business model and analysis of how those risks might affect the Company's financial resources or ability to continue operations over the going concern period. The risks we considered most likely to adversely affect the Company's available financial resources over this period was the availability of capital to meet operating costs and other financial commitments (liquidity risk) and the valuation of investments at fair value as a result of market performance (price risk).

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF VANGUARD INVESTMENT SERIES PLC *(continued)*

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Detecting irregularities including fraud

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the directors. In addition, our risk assessment procedures included:

- Inquiring with the directors and other management as to the Company's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of directors, as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of directors regarding their assessment of the risk that the financial statements may be materially misstated due to irregularities, including fraud.
- Inspecting the Company's regulatory and legal correspondence.
- Reading Board minutes and Audit Committee minutes.
- Performing planning analytical procedures to identify any usual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including companies and financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items, including assessing the financial statement disclosures and agreeing them to supporting documentation when necessary.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: certain aspects of company legislation recognising the financial and regulated nature of the Company's activities and its legal form.

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management override of controls. On this audit we do not believe there is a fraud risk related to revenue recognition. We did not identify any additional fraud risks.

In response to the fraud risks, we also performed procedures including:

- Identifying journal entries to test based on risk criteria and comparing the identified entries to supporting documentation.
- Assessing significant accounting estimates for bias.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

INDEPENDENT AUDITOR’S REPORT TO THE MEMBERS OF VANGUARD INVESTMENT SERIES PLC *(continued)*

Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In arriving at our audit opinion above, the key audit matters, in decreasing order of audit significance, were as follows :

Ownership, Valuation and Accuracy of pricing of financial assets at fair value through profit or loss

Transferable Securities (Assets) USD 106,463,211,897 (2021: USD 131,624,714,133), Transferable Securities (Liabilities) USD 25,308,487 (2021: Nil), Financial Derivative Instruments (Assets) USD 538,811,950 (2021: USD 734,650,612), Financial Derivative Instruments (Liabilities) USD 450,233,347 (2021: USD 198,373,996), together being the Company’s “Investments”.

Refer to page 1173 (Note 3d - Financial Assets and Financial Liabilities) and pages 1217 to 1228 (Note 17 - Fair Value Hierarchy)

The key audit matter	How the matter was addressed in our audit
<p>The Company’s investments make up 98.62% of the net asset value (“NAV”) of the Company, and are considered to be the key driver for the Company’s results.</p> <p>While the nature of the Company’s investments do not require significant levels of judgment, investments are identified as a significant area of audit focus due to their significance in the context of the financial statements as a whole.</p> <p>Investments held by the Company include Equities, Fixed Income Securities, Futures Contracts, Forward Currency Exchange Contracts, Credit Default Swap Contracts, Option Contracts, and Interest Rate Swap Contracts.</p> <p>The Company’s investments have the greatest impact on our overall audit strategy and allocation of resources both at planning and completion of our audit.</p>	<p>Our audit procedures included</p> <ul style="list-style-type: none"> - We obtained an understanding of the process in place to record investment transactions and to price the portfolio of investments. - We obtained independent external confirmation of transferable securities held by the Company as at 31 December 2022 directly from the Depository. Confirmations obtained were reconciled to the Company’s records. - We obtained independent external confirmation of or performed alternative procedures on 100% of the financial derivative instruments held by the Company. Confirmations obtained were reconciled to the Company’s records. - We engaged our valuations specialist to assist us to independently re-price and value accurately 99.9% of investments held by the Company as at 31 December 2022. - We performed substantive attribute sampling to gain comfort over the inputs into the valuation of investments. - We assessed the adequacy of the disclosure of investments in accordance with the fair value level hierarchy as set out in FRS 102. <p>No material misstatements were identified as a result of the procedures performed.</p>

Our application of materiality and an overview of the scope of our audit

Materiality for the financial statements as a whole was set at USD 1,080 million, determined with reference to a benchmark of the Company’s net asset value (“NAV”) of which it represents 100 basis points as at 31 December 2022.

In applying our judgement in determining the most appropriate benchmark, the factors, which had the most significant impact were:

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF VANGUARD INVESTMENT SERIES PLC *(continued)*

- the elements of the financial statements (for example, total assets, net asset value, total investment income and decrease in net assets attributable to holders of redeemable participating shares);
- the items on which attention of the users of the Company's financial statements tends to be focused;
- the nature of the Company, where the Company is in its life cycle, and the industry and economic environment in which the Company operates; and
- the Company's ownership structure and the way it is financed.

In applying our judgement in determining the percentage to be applied to the benchmark, the following qualitative factors, which had the most significant impact, increasing our assessment of materiality were:

- the Company's ownership structure and the way in which the entity is financed;
- the limited amount of external debt on the Company's balance sheet; and
- the stability of the business environment in which it operates.

We applied Company materiality to assist us determine the overall audit strategy.

Performance materiality for the Company was set at 75% of materiality for the financial statements as a whole, which equates to USD 810 million. We applied this percentage in our determination of performance materiality because we did not identify any factors indicating a significant level of risk.

In applying our judgement in determining performance materiality, the following factors were considered to have the most significant impact on our assessment of performance materiality:

- entity level control deficiencies, such as in the control environment;
- the number and severity of deficiencies in control activities, including those that may be pervasive;
- turnover of senior management or key financial reporting personnel;
- the number and/or value of detected misstatements;
- the value of uncorrected misstatements, including the cumulative current period effect of immaterial prior period uncorrected misstatements; and
- management's attitude towards correcting misstatements.

We applied Company performance materiality to assist us determine what risks were significant risks for the company.

We reported to the Audit Committee any corrected or uncorrected identified misstatements exceeding 5 basis points of the Company's net asset value, in addition to other identified misstatements that warranted reporting on qualitative grounds. With specific regard to the valuation of the Company's financial assets and liabilities at fair value through profit or loss, we also report to the Board of Directors all corrected and uncorrected misstatements we have identified through our audit with a value in excess of 50 basis points of each sub-fund's NAV.

Our audit was undertaken to the materiality and performance materiality level specified above and was all performed by a single engagement team in Dublin.

Other information

The directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the section labelled, 'Investment Objective' of each fund, Tracking Error, 'Performance Summary' of each fund, 'Significant Portfolio Changes' of each fund, Report from the Directors, Additional Information from the Directors, Report of the Depositary to the Shareholders, Additional Information for Investors in the Federal Republic of Germany and Appendix: EU Sustainable Finance.

The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information undertaken during the course of the audit, we report that:

- we have not identified material misstatements in the directors' report;

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF VANGUARD INVESTMENT SERIES PLC *(continued)*

- in our opinion, the information given in the directors' report is consistent with the financial statements;
and
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014.

Our opinions on other matters prescribed by the Companies Act 2014 are unmodified

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

We have nothing to report on other matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 4, the directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:

Vanguard ESG Developed World All Cap Equity Index Fund

Legal entity identifier:

U8M2TPY5GCP8TRLEU815

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

<input type="checkbox"/> It made sustainable investments with an environmental objective : % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : %	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of_% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment.

This Fund is passively managed. Its objective is to track the performance of the FTSE Developed All Cap Choice Index (the "Index"). For this reason, the Index also serves as the designated Reference Benchmark for the purpose of attaining the E/S characteristics promoted by the Fund.

The Index excluded stocks of companies that the sponsor of the Index determined to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, the following activities: (a) Vice Products (i.e., adult entertainment, alcohol, gambling, tobacco, cannabis); (b) Non-Renewable Energy (i.e., nuclear power, fossil fuels (including power generation from oil, gas, and thermal coal)); and (c) Weapons (chemical & biological weapons, cluster munitions, anti-personnel landmines, nuclear weapons, civilian firearms, and conventional military weapons).

The Index methodology also excluded companies that, as determined by the Index provider, are involved in severe controversies (i.e., companies which do not meet the labour, human rights, environmental, and anticorruption standards as defined by the United Nations Global Compact Principles).

Derivatives have not been used to meet the environmental or social characteristics of this Fund.

The investments of this Fund contributed to the following EU Taxonomy environmental objectives:

- Climate Change Mitigation

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the fund contributed to Climate Change Adaption.

● **How did the sustainability indicators perform?**

The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the exclusion criteria described above were applied and measuring the proportion of the portfolio excluded from the Parent Index (being the FTSE Developed All Cap Index).

Regarding the extent to which the exclusions have been applied, the Fund tracked the Reference Benchmark appropriately. The exclusions were applied without issue and the appropriate controls were followed.

The proportion of the portfolio excluded from the Parent Index can be found in the table below. These figures are weighted averages of the actual rate of exclusion by market value as at the end of March, June, September and December 2022.

Exclusion Category	Exclusion Rate (%)
Overall	20.63%

● **...and compared to previous periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the Fund promoted environmental and social characteristics, it did not commit to make any sustainable investments. This is separate to our EU Taxonomy-alignment disclosures.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors during the reference period.

By avoiding investment in non-renewable energy (i.e., nuclear power, fossil fuels (including power generation from oil, gas, and thermal coal)), the Fund considered the following principal adverse impact indicator:

- Exposure to companies active in the fossil fuel sector

By avoiding investment in weapons (chemical & biological weapons, cluster munitions, anti-personnel landmines, nuclear weapons, civilian firearms, and conventional military weapons), the Fund considered the following principal adverse impact indicator:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

By avoiding investment in companies involved in severe controversies (i.e., companies which do not meet the labour, customers, human rights, environmental, governance and anticorruption standards as defined by the United Nations Global Compact Principles (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises), the Fund considered the following principal adverse impact indicator:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

The values of these principal adverse impact indicators can be found in the table below. These figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The data relating to these principal adverse indicators may be greater than zero because of the data methodology differences between the Index provider and Vanguard's PAI data vendor. Each data provider uses different approaches to assess ESG credentials, which can result in different outcomes in their determination of a company's involvement in certain business activities.

Indicator	Impact	Measure	Data Coverage %
Exposure to companies active in the fossil fuel sector	2	Percentage	98%
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	98%
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	98%

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 January 2022 to 31 December 2022

What were the top investments of this financial product?

The top investments of this Fund are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

Largest investments	Sector	% Assets	Country
APPLE INC	Technology	4.75%	UNITED STATES

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

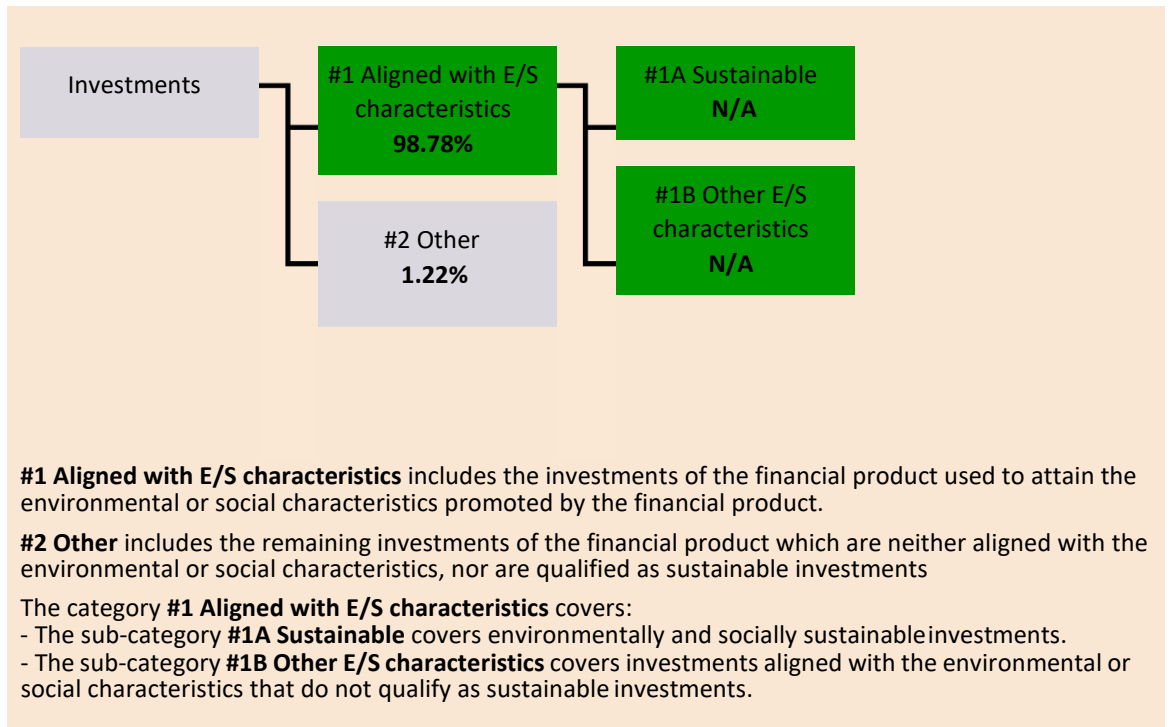

Asset

allocation describes the share of investments in specific assets.

● What was the asset allocation?

The Fund invested 98.78% of its net assets in line with the ESG requirements of the Index, which is consistent with the environmental and/or social characteristics promoted by the Fund. The Fund did not commit to make any sustainable investments. The Fund did not use indirect exposures (including derivatives) to attain the environmental or social characteristics promoted by the Fund.

The remaining 1.22% of the Fund's net assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Fund.

● In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Fund were made are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

Within the Energy sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Industry Classification Benchmark):

- Coal
- Integrated Oil and Gas
- Offshore Drilling and Other Services
- Oil Equipment and Services
- Oil: Crude Producers
- Pipelines

Within the Energy sector: at the end of the reference period, the Fund held less than 0.01% of its net assets in the following sub-sectors (as defined by the Industry Classification Benchmark):

- Oil Refining and Marketing

Within the Utilities sector: at the end of the reference period, the Fund held 0.11% of its net assets in the following sub-sectors (as defined by the Industry Classification Benchmark).

- Gas Distribution

Sector	Sub Sector	% Assets
Basic Materials	Basic Resources	1.23%

Basic Materials	Chemicals	1.73%
Consumer Discretionary	Automobiles & Parts	3.00%
Consumer Discretionary	Consumer Products & Services	3.45%
Consumer Discretionary	Media	1.53%
Consumer Discretionary	Retail	5.51%
Consumer Discretionary	Travel & Leisure	1.89%
Consumer Staples	Food, Beverage & Tobacco	3.60%
Consumer Staples	Personal Care, Drug & Grocery Stores	2.68%
Energy	Energy	0.27%
Financials	Banks	6.92%
Financials	Financial Services	4.22%
Financials	Insurance	3.94%
Health Care	Health Care	15.09%
Industrials	Construction & Materials	0.97%
Industrials	Industrial Goods & Services	10.38%
Other	Other	0.09%
Real Estate	Real Estate	4.32%
Technology	Technology	23.86%
Telecommunications	Telecommunications	3.41%
Utilities	Utilities	0.73%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund does not commit to making environmentally sustainable investments within the meaning of the Taxonomy Regulation, the overall Taxonomy-alignment of the Fund, for the reference period, is set out in the graph below.

The proportion of the Fund's investments that contributed to each of the environmental objectives is as follows:

- Climate Change Mitigation = 2.43%

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the Fund contributed to Climate Change Adaption.

In each case the figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The Taxonomy-alignment data is based solely on disclosures by non-financial entities that have been captured by the data provider. When reporting guidelines are not exactly followed, for example where revenue is only provided for a subset of activities combined instead of per activity, then this is not captured.

The figures are not subject to an assurance provided by one or more auditors or a review by one or more third parties.

At the end of the reference period the Fund had no sovereign exposure (i.e., exposure to governments, central banks or supranational issuers).

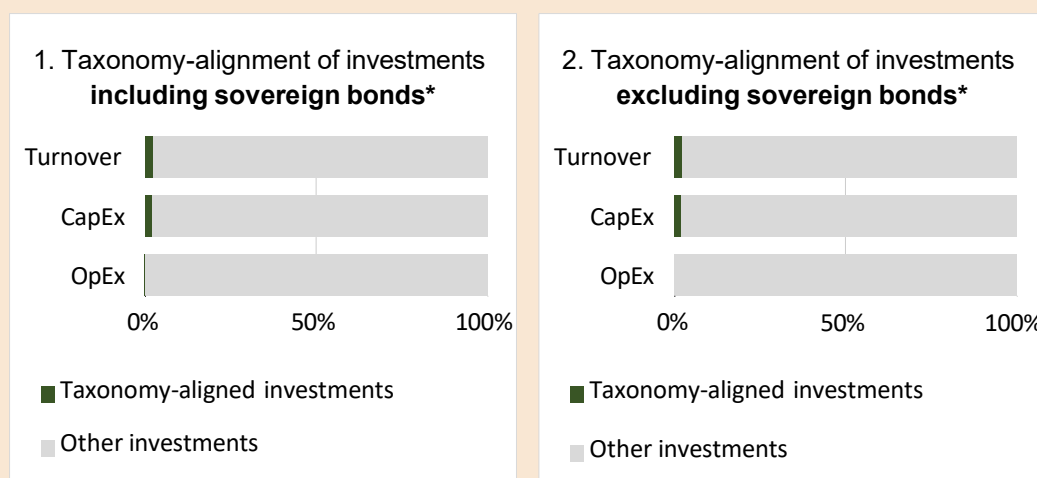

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund’s investments made in transitional and enabling activities is as follows:

- Transitional Activities = 0.09%
- Enabling Activities = 1.15%

The figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 1.22% of net assets which fell into the sub-category “#2 Other” represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the Index excluded stocks of companies that the sponsor of the Index determined to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, certain activities in order to promote the environmental and social characteristics of the Fund. In order to ensure that the Fund promoted such characteristics on an ongoing basis, the Investment Manager monitored the Index and its exclusions on a regular basis to ensure the alignment of the investment strategy with the methodology of the Index.

Rebalancing activity in ESG index funds is reviewed and overseen by several ‘lines of defense’, including Vanguard’s portfolio management, risk management, investment data and product teams. Inputs from third-party data providers, consistent with the Index provider’s own ESG data, were used to analyse Index constituents as part of this review process. This helped mitigate the risk of the Fund holding Index constituents that were inconsistent with the specified ESG screening criteria.

There are additional internal trade compliance controls, that checked whether new instruments bought were Index constituents as well as checking for any Fund holdings that may no longer be part of the Index. These checks aimed to confirm that out of Index holdings were not added and were removed in a timely fashion. The Investment Manager monitored tracking error (difference between portfolio and Index) on a daily basis and followed up on any significant deviations.

How did this financial product perform compared to the reference benchmark?

Please see the information below in this respect.

● **How does the reference benchmark differ from a broad market index?**

The Index was constructed from the FTSE Developed All Cap Index which was then screened for certain environmental, social, and corporate governance criteria by the sponsor of the Index, which is independent of Vanguard.

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

See above.

- **How did this financial product perform compared with the reference benchmark?**

The figures in the table below show financial performance between January 1st 2022 and December 31st 2022.

Share Class	Fund Performance (%)	Reference Benchmark Performance (%)
EUR Acc	-17.88%	-17.84%

GBP Dist	-13.22%	-13.18%
Institutional Plus GBP Acc	-13.16%	-13.18%
USD Acc	-22.93%	-22.90%

- **How did this financial product perform compared with the broad market index?**

The figures in the table below show financial performance between January 1st 2022 and December 31st 2022.

Fund Performance (%)	Broad Market Index Performance (%)
-13.22%	-13.18%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Vanguard ESG Emerging Markets All Cap Equity Index Fund

Legal entity identifier:
549300MT3LCLRRD4TY54

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment.

This Fund is passively managed. Its objective is to track the performance of the FTSE Emerging All Cap Choice Index (the "Index"). For this reason, the Index also serves as the designated Reference Benchmark for the purpose of attaining the E/S characteristics promoted by the Fund.

The Index excluded stocks of companies that the sponsor of the Index determined to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, the following activities: (a) Vice Products (i.e., adult entertainment, alcohol, gambling, tobacco, cannabis); (b) Non-Renewable Energy (i.e., nuclear power, fossil fuels (including power generation from oil, gas, and thermal coal)); and (c) Weapons (chemical & biological weapons, cluster munitions, anti-personnel landmines, nuclear weapons, civilian firearms, and conventional military weapons).

The Index methodology also excluded companies that, as determined by the Index provider, are involved in severe controversies (i.e., companies which do not meet the labour, human rights, environmental, and anticorruption standards as defined by the United Nations Global Compact Principles).

Derivatives have not been used to meet the environmental or social characteristics of this Fund.

The investments of this Fund contributed to the following EU Taxonomy environmental objectives:

- Climate Change Mitigation

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the fund contributed to Climate Change Adaption.

● **How did the sustainability indicators perform?**

The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the exclusion criteria described above were applied and measuring the proportion of the portfolio excluded from the Parent Index (being the FTSE Emerging All Cap Index).

Regarding the extent to which the exclusions have been applied, the Fund tracked the Reference Benchmark appropriately. The exclusions were applied without issue and the appropriate controls were followed.

The proportion of the portfolio excluded from the Parent Index can be found in the table below. These figures are weighted averages of the actual rate of exclusion by market value as at the end of March, June, September and December 2022.

Exclusion Category	Exclusion Rate (%)
Overall	18.76%

● **...and compared to previous periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the Fund promoted environmental and social characteristics, it did not commit to make any sustainable investments. This is separate to our EU Taxonomy-alignment disclosures.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors during the reference period.

By avoiding investment in non-renewable energy (i.e., nuclear power, fossil fuels (including power generation from oil, gas, and thermal coal)), the Fund considered the following principal adverse impact indicator:

- Exposure to companies active in the fossil fuel sector

By avoiding investment in weapons (chemical & biological weapons, cluster munitions, anti-personnel landmines, nuclear weapons, civilian firearms, and conventional military weapons), the Fund considered the following principal adverse impact indicator:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

By avoiding investment in companies involved in severe controversies (i.e., companies which do not meet the labour, customers, human rights, environmental, governance and anticorruption standards as defined by the United Nations Global Compact Principles (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises), the Fund considered the following principal adverse impact indicator:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

The values of these principal adverse impact indicators can be found in the table below. These figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The data relating to these principal adverse indicators may be greater than zero because of the data methodology differences between the Index provider and Vanguard's PAI data vendor. Each data provider uses different approaches to assess ESG credentials, which can result in different outcomes in their determination of a company's involvement in certain business activities.

Indicator	Impact	Measure	Data Coverage %
Exposure to companies active in the fossil fuel sector	2	Percentage	98%
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1	Percentage	98%
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	1	Percentage	98%

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 January 2022 to 31 December 2022

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

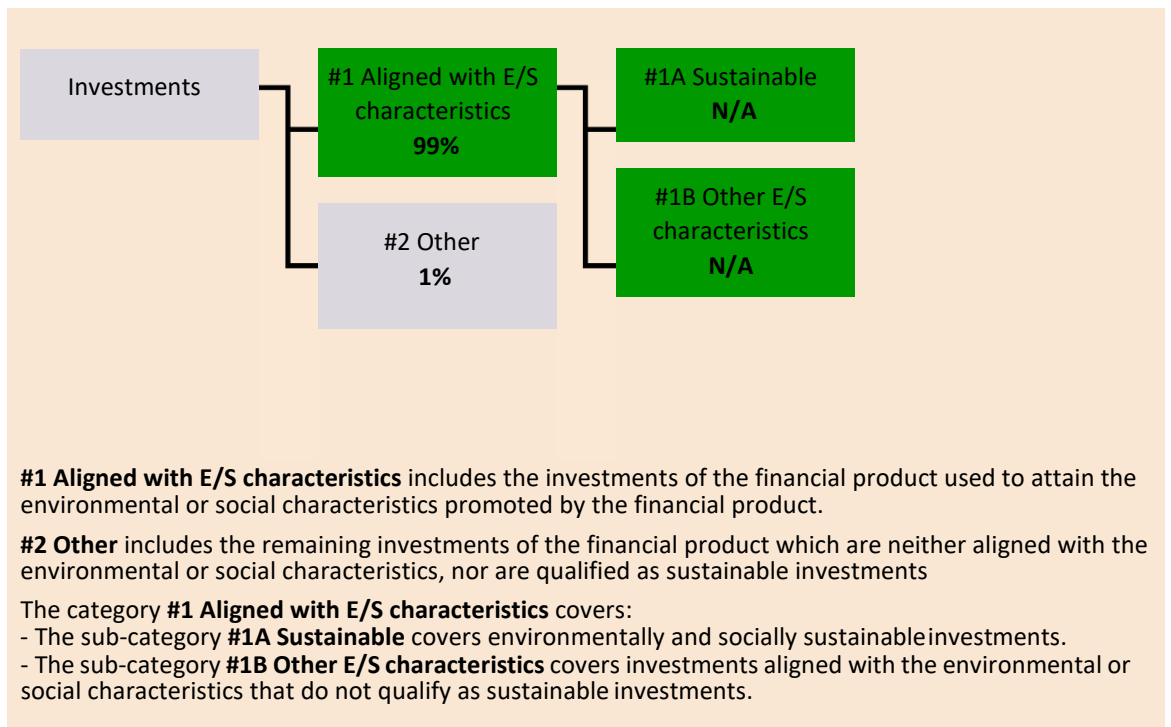

Asset

allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The Fund invested 99.00% of its net assets in line with the ESG requirements of the Index, which is consistent with the environmental and/or social characteristics promoted by the Fund. The Fund did not commit to make any sustainable investments. The Fund did not use indirect exposures (including derivatives) to attain the environmental or social characteristics promoted by the Fund.

The remaining 1.00% of the Fund's net assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The sectors and sub-sectors where investments of the Fund were made are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

Within the Energy sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Industry Classification Benchmark):

- Coal
- Integrated Oil and Gas
- Offshore Drilling and Other Services
- Oil Equipment and Services
- Oil Refining and Marketing
- Oil: Crude Producers
- Pipelines

Within the Utilities sector: at the end of the reference period, the Fund held 0.47% of its net assets in the following sub-sectors (as defined by the Industry Classification Benchmark).

- Gas Distribution

Sector	Sub Sector	% Assets
Basic Materials	Basic Resources	3.39%
Basic Materials	Chemicals	3.02%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund does not commit to making environmentally sustainable investments within the meaning of the Taxonomy Regulation, the overall Taxonomy-alignment of the Fund, for the reference period, is set out in the graph below.

The proportion of the Fund's investments that contributed to each of the environmental objectives is as follows:

- Climate Change Mitigation = 3.18%

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the Fund contributed to Climate Change Adaption.

In each case the figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The Taxonomy-alignment data is based solely on disclosures by non-financial entities that have been captured by the data provider. When reporting guidelines are not exactly followed, for example where revenue is only provided for a subset of activities combined instead of per activity, then this is not captured.

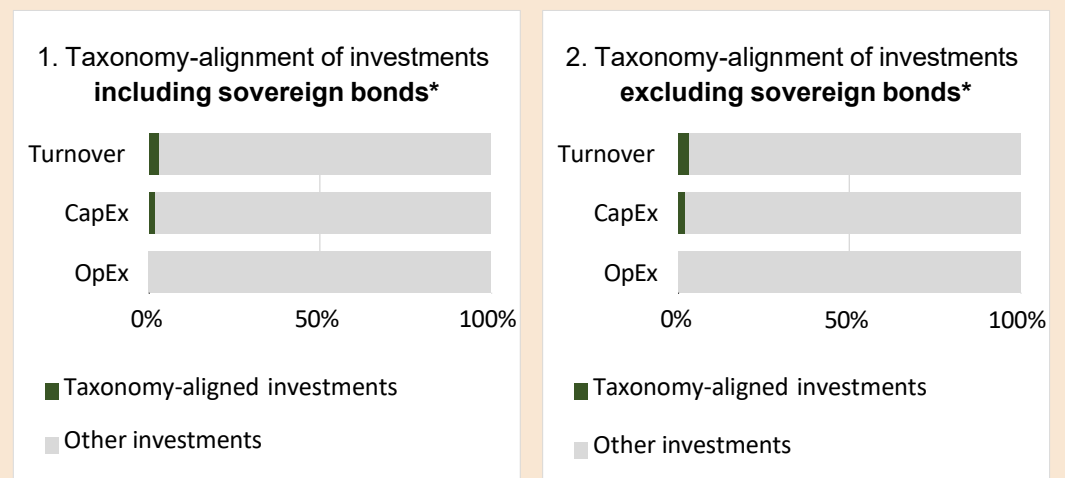

The figures are not subject to an assurance provided by one or more auditors or a review by one or more third parties.

At the end of the reference period the Fund had no sovereign exposure (i.e., exposure to governments, central banks or supranational issuers).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund’s investments made in transitional and enabling activities is as follows:

- Transitional Activities = 0.07%
- Enabling Activities = 1.72%

The figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 1.00% of net assets which fell into the sub-category “#2 Other” represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the Index excluded stocks of companies that the sponsor of the Index determined to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, certain activities in order to promote the environmental and social characteristics of the Fund. In order to ensure that the Fund promoted such characteristics on an ongoing basis, the Investment Manager monitored the Index and its exclusions on a regular basis to ensure the alignment of the investment strategy with the methodology of the Index.

Rebalancing activity in ESG index funds is reviewed and overseen by several ‘lines of defense’, including Vanguard’s portfolio management, risk management, investment data and product teams. Inputs from third-party data providers, consistent with the Index provider’s own ESG data, were used to analyse Index constituents as part of this review process. This helped mitigate the risk of the Fund holding Index constituents that were inconsistent with the specified ESG screening criteria.

There are additional internal trade compliance controls, that checked whether new instruments bought were Index constituents as well as checking for any Fund holdings that may no longer be part of the Index. These checks aimed to confirm that out of Index holdings were not added and were removed in a timely fashion. The Investment Manager monitored tracking error (difference between portfolio and Index) on a daily basis and followed up on any significant deviations.

How did this financial product perform compared to the reference benchmark?

Please see the information below in this respect.

● **How does the reference benchmark differ from a broad market index?**

The Index was constructed from the FTSE Emerging All Cap Index which was then screened for certain environmental, social, and corporate governance criteria by the sponsor of the Index, which is independent of Vanguard.

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

See above.

- **How did this financial product perform compared with the reference benchmark?**

The figures in the table below show financial performance between January 1st 2022 and December 31st 2022.

Share Class	Fund Performance (%)	Reference Benchmark Performance (%)
EUR Acc	-13.55%	-13.35%
Institutional Plus EUR Acc	-13.49%	-13.35%
GBP Acc	-8.65%	-8.44%
GBP Dist	-8.65%	-8.44%
Institutional Plus GBP Acc	-8.58%	-8.44%
Institutional Plus GBP Dist	-8.58%	-8.44%
USD Acc	-18.87%	-18.68%

- **How did this financial product perform compared with the broad market index?**

The figures in the table below show financial performance between January 1st 2022 and December 31st 2022.

Fund Performance (%)	Broad Market Index Performance (%)
-8.65%	-7.16%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment. This was met by not holding stocks of companies in the FTSE Developed Europe Index (the "Index") that do not meet specific "socially responsible" criteria.

The Index provider has developed a customized SRI screening process designed to analyse companies issuing securities in the Index. The SRI screening process includes avoidance of owning companies that are involved in the production of controversial weapons such as cluster munitions, land mines, biochemical and nuclear weapons and those involved in the manufacture and distribution of tobacco products. Additionally, the SRI screening process excludes companies that, as determined by the Index provider, are or have engaged in activities that result in serious violations of the United Nations Global Compact Principles (i.e., companies which do not meet labour, human rights, environmental, and anticorruption standards).

A Reference Benchmark has not been designated for the purpose of attaining the environmental and / or social characteristics promoted by the financial product.

Derivatives have not been used to meet the environmental or social characteristics of this Fund.

The investments of this Fund contributed to the following EU Taxonomy environmental objectives:

- Climate Change Mitigation

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the fund contributed to Climate Change Adaption.

● **How did the sustainability indicators perform?**

The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the exclusion criteria described above were applied and measuring the proportion of the portfolio excluded from the Index.

Regarding the extent to which the exclusions have been applied, the exclusions were applied without issue and the appropriate controls were followed.

The proportion of the portfolio excluded from the Index can be found in the table below. These figures are weighted averages of the actual rate of exclusion by market value as at the end of March, June, September and December 2022.

Exclusion Category	Exclusion Rate (%)
Overall	5.66%

● **...and compared to previous periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the Fund promoted environmental and social characteristics, it did not commit to make any sustainable investments. This is separate to our EU Taxonomy-alignment disclosures.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors during the reference period.

By avoiding investment in controversial weapons (i.e., cluster munitions, land mines, biochemical and nuclear weapons), the Fund considered the following principal adverse impact indicator:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

The values of these principal adverse impact indicators can be found in the table below. These figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The data relating to these principal adverse indicators may be greater than zero because of the data methodology differences between the Index provider and Vanguard's PAI data vendor. Each data provider uses different approaches to assess ESG credentials, which can result in different outcomes in their determination of a company's involvement in certain business activities.

Indicator	Impact	Measure	Data Coverage %
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	100%

What were the top investments of this financial product?

The top investments of this Fund are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From 1 January 2022 to 31 December 2022

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

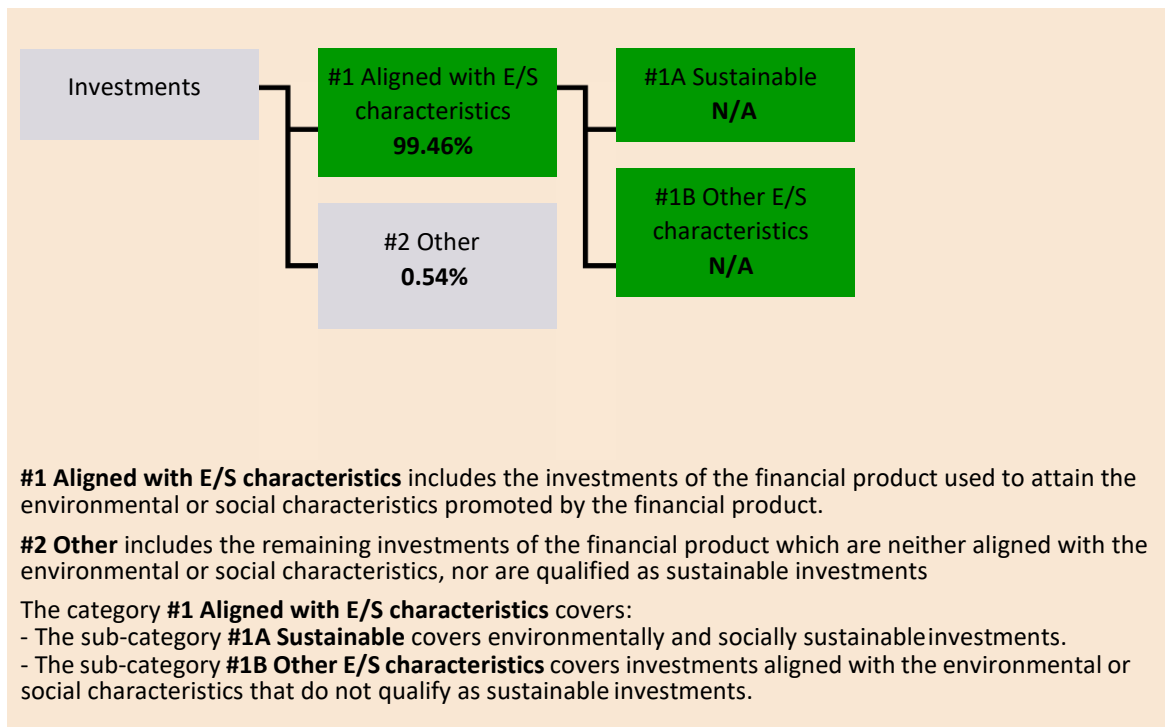

Asset

allocation describes the share of investments in specific assets.

● What was the asset allocation?

The Fund invested 99.46% of its net assets in line with the ESG requirements of the Index, which is consistent with the environmental and/or social characteristics promoted by the Fund. The Fund did not commit to make any sustainable investments. The Fund did not use indirect exposures (including derivatives) to attain the environmental or social characteristics promoted by the Fund.

The remaining 0.54% of the Fund's net assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

The sectors and sub-sectors where investments of the Fund were made are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

Within the Energy sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Industry Classification Benchmark):

- Coal
- Offshore Drilling and Other Services

Within the Energy sector: at the end of the reference period, the Fund held 6.65% of its net assets in the following sub-sectors (as defined by the Industry Classification Benchmark):

- Integrated Oil and Gas
- Oil Equipment and Services
- Oil Refining and Marketing
- Oil: Crude Producers
- Pipelines

Within the Utilities sector: at the end of the reference period, the Fund held 0.05% of its net assets in the following sub-sectors (as defined by the Industry Classification Benchmark).

- Gas Distribution

Sector	Sub Sector	% Assets
Basic Materials	Basic Resources	2.97%

Basic Materials	Chemicals	2.79%
Consumer Discretionary	Automobiles & Parts	2.29%
Consumer Discretionary	Consumer Products & Services	6.23%
Consumer Discretionary	Media	1.72%
Consumer Discretionary	Retail	0.73%
Consumer Discretionary	Travel & Leisure	0.93%
Consumer Staples	Food, Beverage & Tobacco	8.48%
Consumer Staples	Personal Care, Drug & Grocery Stores	3.01%

Industrials	Industrial Goods & Services	11.94%
Other	Other	0.33%
Real Estate	Real Estate	1.33%
Technology	Technology	6.52%
Telecommunications	Telecommunications	3.34%
Utilities	Utilities	4.04%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund does not commit to making environmentally sustainable investments within the meaning of the Taxonomy Regulation, the overall Taxonomy-alignment of the Fund, for the reference period, is set out in the graph below.

The proportion of the Fund's investments that contributed to each of the environmental objectives is as follows:

- Climate Change Mitigation = 2.06%

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the Fund contributed to Climate Change Adaptation.

In each case the figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The Taxonomy-alignment data is based solely on disclosures by non-financial entities that have been captured by the data provider. When reporting guidelines are not exactly followed, for example where revenue is only provided for a subset of activities combined instead of per activity, then this is not captured.

The figures are not subject to an assurance provided by one or more auditors or a review by one or more third parties.

At the end of the reference period the Fund had no sovereign exposure (i.e., exposure to governments, central banks or supranational issuers).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

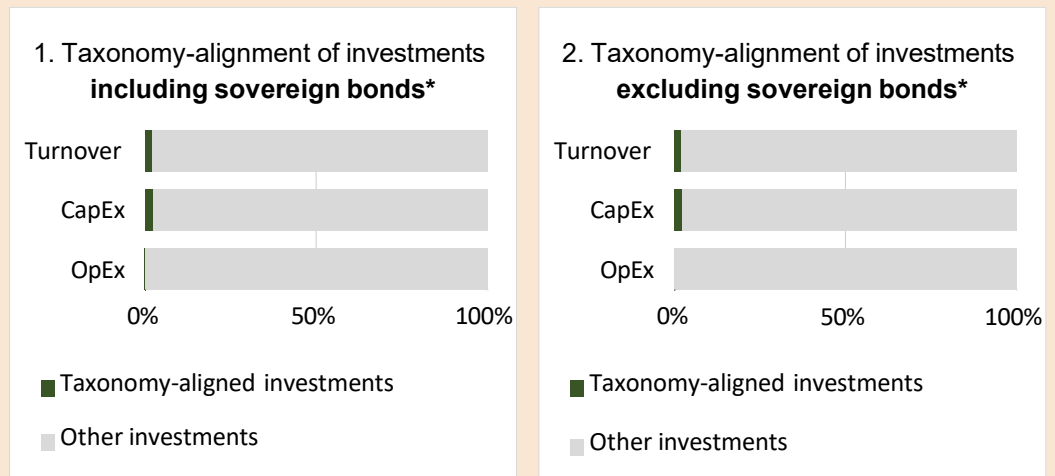

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities is as follows:

- Transitional Activities = 0.00%
- Enabling Activities = 0.78%

The figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.54% of net assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager undertakes independent oversight of the investment management processes and systems. As part of this oversight, the investment and operational risks are considered. The Investment Manager oversees ESG risk as part of our general investment risk and operational risk monitoring activities.

There are additional internal trade compliance controls, that checked whether new instruments bought were Index constituents as well as checking for any Fund holdings that may no longer be part of the Index. These checks aimed to confirm that out of Index holdings were not added and were removed in a timely fashion. The Investment Manager monitored tracking error (difference between portfolio and Index) on a daily basis and followed up on any significant deviations.

How did this financial product perform compared to the reference benchmark?

The Index does not determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes. This is because the exclusionary screening methodology (that promotes the relevant environmental and social characteristics) was applied outside of the Index that this financial product tracks.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Vanguard ESG Global Corporate Bond IndexFund

Legal entity identifier:

54930040E8WABNYV4893

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by excluding fixed income securities from its portfolio based on the impact of the issuer's conduct or products on society and / or the environment.

This Fund is passively managed. Its objective is to track the performance of the Bloomberg MSCI Global Corporate Float Adjusted Bond Screened Index (the "Index"). For this reason, the Index also serves as the designated Reference Benchmark for the purpose of attaining the environmental and / or social characteristics promoted by the Fund.

The Index excluded the bonds of issuers that MSCI determines engage in activities in, and/or derive revenue (above a threshold specified by the Index Provider) from, certain business segments of the following:
 (a) Vice Products (i.e., adult entertainment, alcohol, gambling, tobacco)
 (b) Weapons (i.e., nuclear weapons, controversial weapons, conventional weapons, civilian firearms)
 (c) Non-Renewable Energy (i.e., nuclear power, or thermal coal, oil, or gas)

The index methodology also excluded the bonds of issuers that, as determined by MSCI, have no controversy score or a controversy score of less than one as defined by MSCI's ESG controversies assessment framework.

Derivatives have not been used to meet the environmental or social characteristics of this Fund.

The investments of this Fund contributed to the following EU Taxonomy environmental objectives:

- Climate Change Mitigation

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the fund contributed to Climate Change Adaption.

● **How did the sustainability indicators perform?**

The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the exclusion criteria described above were applied and measuring the proportion of the portfolio excluded from the Parent Index (being the Bloomberg Global Aggregate Float Adjusted Corporate Index).

Regarding the extent to which the exclusions have been applied, the Fund tracked the reference benchmark appropriately. The exclusions were applied without issue and the appropriate controls were followed.

The proportion of the portfolio excluded from the Parent Index can be found in the table below. These figures are the actual rate of exclusion by market value as at the end of December 2022.

Exclusion Category	Exclusion Rate (%)
Overall	34.82%

● **...and compared to previous periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the Fund promoted environmental and social characteristics, it did not commit to make any sustainable investments. This is separate to our EU Taxonomy-alignment disclosures.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors during the reference period.

By avoiding investment in non-renewable energy (i.e., nuclear power, fossil fuels (including power

generation from oil, gas, and thermal coal)), the Fund considered the following principal adverse impact indicator:

- Exposure to companies active in the fossil fuel sector

By avoiding investment in weapons (chemical & biological weapons, cluster munitions, anti-personnel landmines, nuclear weapons, civilian firearms, and conventional military weapons), the Fund considered the following principal adverse impact indicator:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

By avoiding investment in companies involved in severe controversies (i.e., companies which do not meet the labour, customers, human rights, environmental, governance and anticorruption standards as defined by the United Nations Global Compact Principles (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises), the Fund considered the following principal adverse impact indicator:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

The values of these principal adverse impact indicators can be found in the table below. These figures are the actual values as at the end of December 2022.

The data relating to these principal adverse indicators may be greater than zero because of the data methodology differences between the Index provider and Vanguard's PAI data vendor. Each data provider uses different approaches to assess ESG credentials, which can result in different outcomes in their determination of a company's involvement in certain business activities.

Indicator	Impact	Measure	Data Coverage %
Exposure to companies active in the fossil fuel sector	0	Percentage	88%
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	2	Percentage	88%
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	88%

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 25 October 2022 to 31 December 2022

What were the top investments of this financial product?

The top investments of this Fund are set out below. These figures are percentages of net assets and are the market value as at the end of December 2022.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

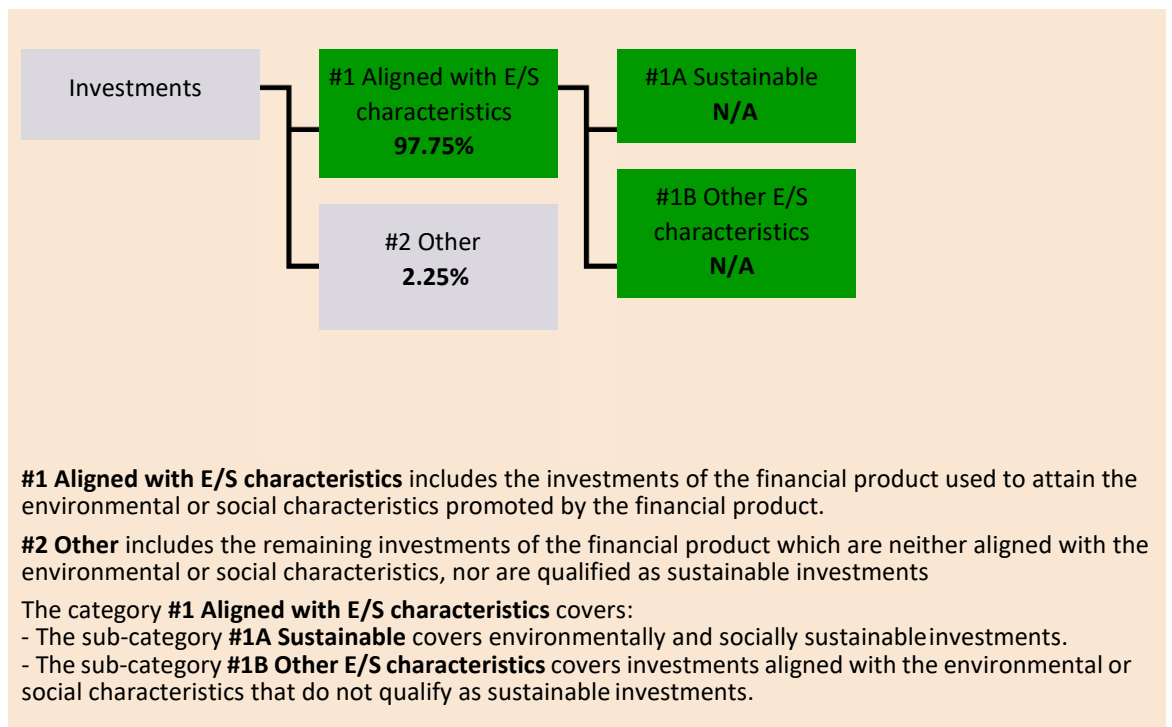

Asset

allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The Fund invested 97.75% of its net assets in line with the ESG requirements of the Index, which is consistent with the environmental and/or social characteristics promoted by the Fund. The Fund did not commit to make any sustainable investments. The Fund did not use indirect exposures (including derivatives) to attain the environmental or social characteristics promoted by the Fund.

The remaining 2.25% of the Fund's net assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

The sectors and sub-sectors where investments of the Fund were made are set out below. These figures are percentages of net assets and are the market value as at the end of December 2022.

Within the Energy sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Global Industry Classification Standard):

- Coal & Consumable Fuels
- Integrated Oil & Gas
- Oil & Gas Drilling
- Oil & Gas Equipment & Services
- Oil & Gas Exploration & Production
- Oil & Gas Refining & Marketing
- Oil & Gas Storage & Transportation

Within the Utilities sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Global Industry Classification Standard):

- Gas Utilities
- Independent Power Producers & Energy Traders

Sector	Sub Sector	% Assets
Communication Services	Media & Entertainment	3.51%
Communication Services	Telecommunication Services	6.15%
Consumer Discretionary	Automobiles & Components	2.02%
Consumer Discretionary	Consumer Durables & Apparel	0.53%

Consumer Discretionary	Consumer Services	1.22%
Consumer Discretionary	Retailing	2.98%
Consumer Staples	Food & Staples Retailing	0.39%
Consumer Staples	Food, Beverage & Tobacco	3.39%
Consumer Staples	Household & Personal Products	0.71%
Financials	Banks	32.88%
Financials	Diversified Financials	5.84%
Financials	Insurance	4.31%
Health Care	Health Care Equipment & Services	4.29%
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.08%
Industrials	Capital Goods	2.38%
Industrials	Commercial & Professional Services	1.36%
Industrials	Transportation	0.73%
Information Technology	Semiconductors & Semiconductor Equipment	2.02%
Information Technology	Software & Services	3.70%
Information Technology	Technology Hardware & Equipment	2.42%
Materials	Materials	2.54%
Real Estate	Real Estate	5.87%
Utilities	Utilities	1.87%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund does not commit to making environmentally sustainable investments within the meaning of the Taxonomy Regulation, the overall Taxonomy-alignment of the Fund, for the reference period, is set out in the graph below.

The proportion of the Fund's investments that contributed to each of the environmental objectives is as follows:

- Climate Change Mitigation = 1.20%

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the Fund contributed to Climate Change Adaption.

In each case the figures are the actual values as at the end of December 2022.

The Taxonomy-alignment data is based solely on disclosures by non-financial entities that have been captured by the data provider. When reporting guidelines are not exactly followed, for example where revenue is only provided for a subset of activities combined instead of per activity, then this is not captured.

The figures are not subject to an assurance provided by one or more auditors or a review by one or more third parties.

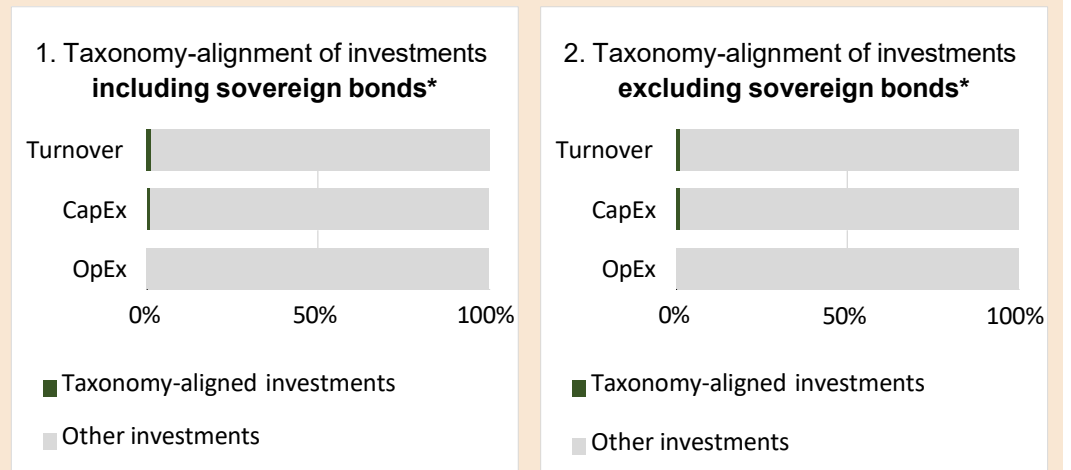

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities is as follows:

- Transitional Activities = 0.06%
- Enabling Activities = 0.06%

The figures are the actual values as at the end of December 2022.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

● **What was the share of socially sustainable investments?**

Not applicable.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 2.25% of net assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

As outlined above, the Index excluded the bonds of issuers that MSCI determined to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, certain activities in order to promote the environmental and social characteristics of the Fund. In order to ensure that the Fund promoted such characteristics on an ongoing basis, the Investment Manager monitored the Index and its exclusions on a regular basis to ensure the alignment of the investment strategy with the methodology of the Index.

Rebalancing activity in ESG index funds is reviewed and overseen by several 'lines of defense', including Vanguard's portfolio management, risk management, investment data and product teams. Inputs from third-party data providers, consistent with the Index provider's own ESG data, were used to analyse Index constituents as part of this review process. This helped mitigate the risk of the Fund holding Index constituents that were inconsistent with the specified ESG screening criteria. Further monitoring is in place surrounding new issues which may be eligible for inclusion in the Fund between rebalances.

There are additional internal trade compliance controls, that checked whether new instruments bought were Index constituents as well as checking for any Fund holdings that may no longer be part of the Index. These checks aimed to confirm that out of Index holdings were not added and were removed in a timely fashion. The Investment Manager monitored tracking error (difference between portfolio and Index) on a daily basis and followed up on any significant deviations.

● **How did this financial product perform compared to the reference benchmark?**

Please see the information below in this respect.

● **How does the reference benchmark differ from a broad market index?**

The Index was constructed from the Bloomberg Global Aggregate Float Adjusted Corporate Index which was then screened for certain environmental, social, and corporate governance criteria by the sponsor of the Index, which is independent of Vanguard.

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

See above.

- **How did this financial product perform compared with the reference benchmark?**

The figures in the table below show financial performance between Fund launch on October 25th 2022 and December 31st 2022.

Share Class	Fund Performance (%)	Reference Benchmark Performance (%)
CHF Hedged Acc	2.87%	3.02%
EUR Hedged Acc	3.17%	3.33%
GBP Hedged Acc	3.53%	3.64%
GBP Hedged Dist	3.60%	3.64%
Institutional Plus GBP Hedged Acc	3.50%	3.64%
Institutional Plus GBP Hedged Dist	3.61%	3.64%
USD Hedged Acc	3.90%	3.99%

- **How did this financial product perform compared with the broad market index?**

The figures in the table below show financial performance between Fund launch on October 25th 2022 and December 31st 2022.

Fund Performance (%)	Broad Market Index Performance (%)
3.53%	3.64%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:

Vanguard SRI Euro Investment Grade Bond Index Fund

Legal entity identifier:

549300UWPLB5D830BW90

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by excluding fixed income securities from its portfolio based on the impact of the issuer’s conduct or products on society and / or the environment. This was met by not holding fixed income securities in the Bloomberg EUR Non-Government Float Adjusted Bond Index (the “Index”) of issuers that do not meet specific “socially responsible” criteria.

The Index provider has developed a customized SRI screening process designed to analyse securities in the Index. The SRI screening process includes avoidance of owning securities of issuers that are involved in the production of controversial weapons such as cluster munitions, land mines, biochemical and nuclear weapons and those involved in the manufacture and distribution of tobacco products. Additionally, the SRI screening process excludes Index constituents that, as determined by the Index provider, are or have engaged in activities that result in serious violations of the United Nations Global Compact Principles (i.e., companies which do not meet labour, human rights, environmental, and anticorruption standards).

A Reference Benchmark has not been designated for the purpose of attaining the environmental and / or social characteristics promoted by the financial product.

Derivatives have not been used to meet the environmental or social characteristics of this Fund.

The investments of this Fund contributed to the following EU Taxonomy environmental objectives:

- Climate Change Mitigation

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the fund contributed to Climate Change Adaption.

● **How did the sustainability indicators perform?**

The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the exclusion criteria described above were applied and measuring the proportion of the portfolio excluded from the Index.

Regarding the extent to which the exclusions have been applied, the exclusions were applied without issue and the appropriate controls were followed.

The proportion of the portfolio excluded from the Index can be found in the table below. These figures are weighted averages of the actual rate of exclusion by market value as at the end of March, June, September and December 2022.

Exclusion Category	Exclusion Rate (%)
Overall	1.88%

● **...and compared to previous periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the Fund promoted environmental and social characteristics, it did not commit to make any sustainable investments. This is separate to our EU Taxonomy-alignment disclosures.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors during the reference period.

By avoiding investment in controversial weapons (i.e., cluster munitions, land mines, biochemical and nuclear weapons), the Fund considered the following principal adverse impact indicator:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

The values of these principal adverse impact indicators can be found in the table below. These figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

The data relating to these principal adverse indicators may be greater than zero because of the data methodology differences between the Index provider and Vanguard's PAI data vendor. Each data provider uses different approaches to assess ESG credentials, which can result in different outcomes in their determination of a company's involvement in certain business activities.

Indicator	Impact	Measure	Data Coverage %
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	88%

What were the top investments of this financial product?

The top investments of this Fund are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 January 2022 to 31 December 2022

Asset allocation describes the share of investments in specific assets.

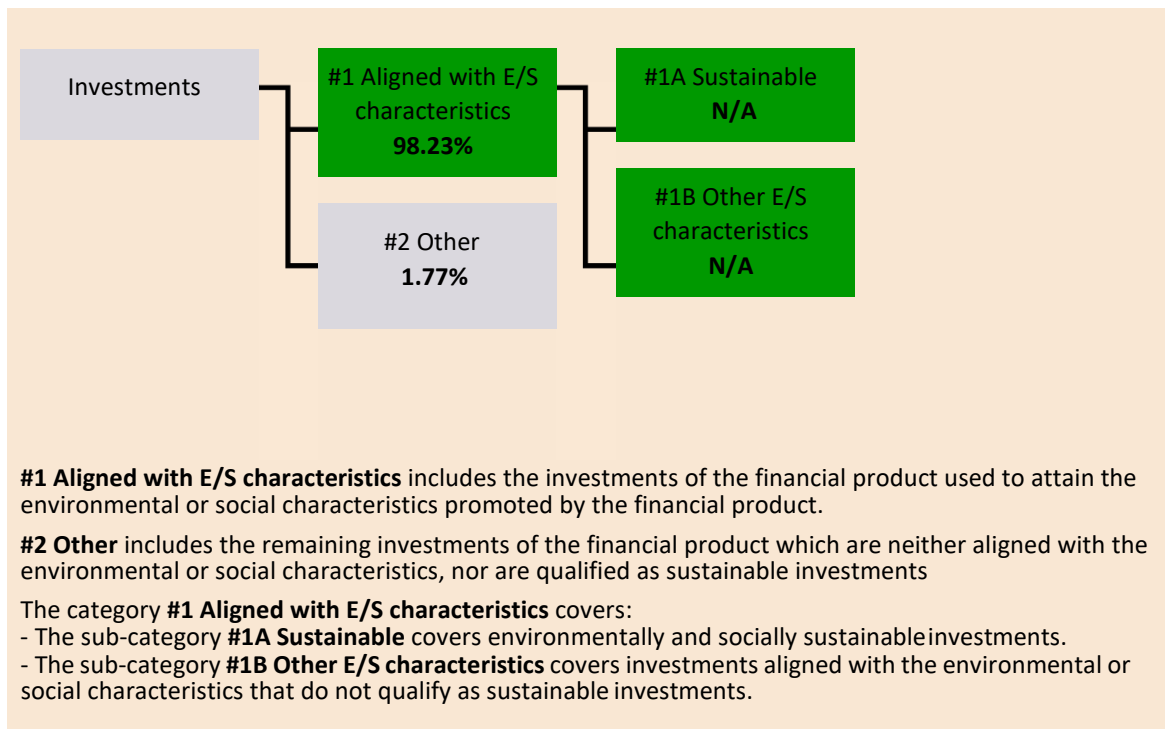

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

The Fund invested 98.23% of its net assets in line with the ESG requirements of the Index, which is consistent with the environmental and/or social characteristics promoted by the Fund. The Fund did not commit to make any sustainable investments. The Fund did not use indirect exposures (including derivatives) to attain the environmental or social characteristics promoted by the Fund.

The remaining 1.77% of the Fund's net assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Fund.

● **In which economic sectors were the investments made?**

The sectors and sub-sectors where investments of the Fund were made are set out below. These figures are percentages of net assets and are weighted averages of the market value as at the end of March, June, September and December 2022.

Within the Energy sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Global Industry Classification Standard):

- Coal & Consumable Fuels
- Oil & Gas Drilling
- Oil & Gas Refining & Marketing

Within the Energy sector: at the end of the reference period, the Fund held 2.86% of its net assets in the following sub-sectors (as defined by the Global Industry Classification Standard):

- Integrated Oil & Gas
- Oil & Gas Equipment & Services
- Oil & Gas Exploration & Production
- Oil & Gas Storage & Transportation

Within the Utilities sector: at the end of the reference period, the Fund held no investments in the following sub-sectors (as defined by the Global Industry Classification Standard):

- Independent Power Producers & Energy Traders

Within the Utilities sector: at the end of the reference period, the Fund held 0.24% of its net assets in the following sub-sectors (as defined by the Global Industry Classification Standard):

- Gas Utilities

Sector	Sub Sector	% Assets
Communication Services	Media & Entertainment	0.75%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund does not commit to making environmentally sustainable investments within the meaning of the Taxonomy Regulation, the overall Taxonomy-alignment of the Fund, for the reference period, is set out in the graph below.

The proportion of the Fund's investments that contributed to each of the environmental objectives is as follows:

- Climate Change Mitigation = 1.75%

Due to delays in delivery of the climate change data, our periodic reports do not reflect where the Fund contributed to Climate Change Adaption.

In each case the figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

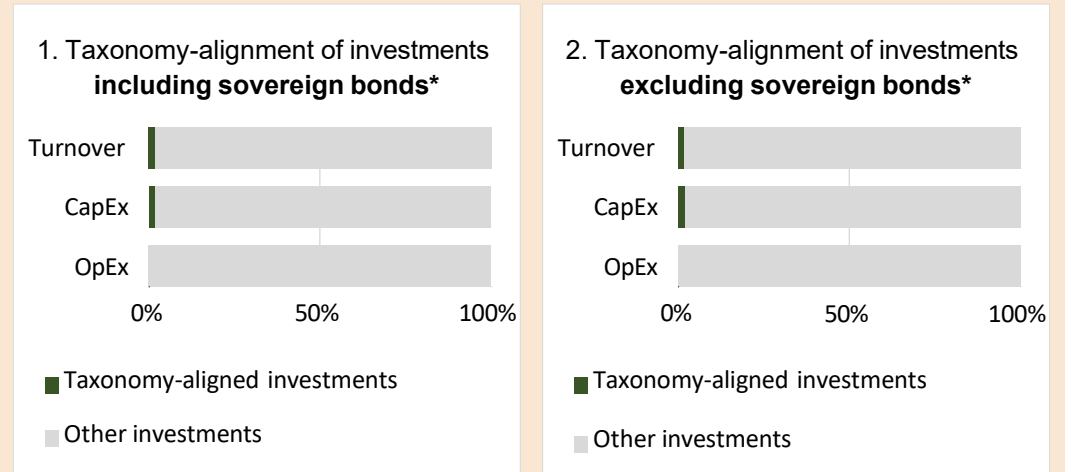

The Taxonomy-alignment data is based solely on disclosures by non-financial entities that have been captured by the data provider. When reporting guidelines are not exactly followed, for example where revenue is only provided for a subset of activities combined instead of per activity, then this is not captured.

The figures are not subject to an assurance provided by one or more auditors or a review by one or more third parties.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
- In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional and enabling activities is as follows:

- Transitional Activities = 0.02%
- Enabling Activities = 0.12%

The figures are weighted averages of the actual values as at the end of March, June, September and December 2022.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable. This is the first sustainable finance-related periodic reporting annex produced for this Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 1.77% of net assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager undertakes independent oversight of the investment management processes and systems. As part of this oversight, the investment and operational risks are considered. The Investment Manager oversees ESG risk as part of our general investment risk and operational risk monitoring activities.

There are additional internal trade compliance controls, that checked whether new instruments bought were Index constituents as well as checking for any Fund holdings that may no longer be part of the Index. These checks aimed to confirm that out of Index holdings were not added and were removed in a timely fashion. The Investment Manager monitored tracking error (difference between portfolio and Index) on a daily basis and followed up on any significant deviations.

How did this financial product perform compared to the reference benchmark?

The Index does not determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes. This is because the exclusionary screening methodology (that promotes the relevant environmental and social characteristics) was applied outside of the Index that this financial product tracks.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.
