

abrdn MyFolio Sustainable III Fund

Platform P Fixed Acc GBP

31 May 2024

Objective

To generate growth over the long term (5 years or more) while being managed to a defined level of risk. The fund is part of the abrdn MyFolio Sustainable range, which offers five funds with different expected combinations of investment risk and return that follow the abrdn MyFolio Sustainable Investment Approach. The fund is risk level III, which aims to be the middle risk fund in this range.

Risk Target: The defined level of risk referred to above that the management team is targeting is within the range of 45-75% of world stock markets (represented by the MSCI AC World Index), over 10 years. There is no certainty or promise that this target will be achieved. The Risk Target has been chosen as it represents a risk range which is appropriate for the fund.

Portfolio securities

- The fund will invest its assets in actively managed (which invest using manager discretion) and passively managed funds (which aim to replicate performance of a market index), including those managed by abrdn, to obtain broad exposure to a range of diversified investments.
- Typically, at least 25% of the assets will be those traditionally viewed as lower risk, such as cash, assets that can be turned into cash quickly, government bonds (which are like loans to governments that pay interest) and investment grade corporate bonds (which are like loans to companies that pay interest and are typically regarded as having a low default risk).
- The rest of the fund will be invested in a selection of other assets. These will include assets such as equities (company shares) including property shares, high yield corporate bonds (which are like loans to companies that pay a high rate of interest, but have a lower credit rating than investment grade bonds) and emerging market bonds (which are like loans to companies or governments that pay a rate of interest, invested in regions including Eastern Europe, Asia, Africa, Latin America and the Middle East).
- All funds selected will adhere to the abrdn MyFolio Sustainable Investment Approach (the "Investment Approach") available on www.abrdn.com under "Fund Centre".
- This means they must have one of the following characteristics :i) Sustainable Funds funds which explicitly target improved environmental, social and governance ("ESG") or sustainability related outcomes; or ii) Impact Funds funds which aim to make a positive, measurable environmental and/or social impact alongside strong financial returns; or iii) Neutral Funds funds which have no specific ESG or sustainability criteria within their investment objective or process. Neutral Funds will include holdings in cash, assets that can be turned into cash quickly, and government bonds.
- The use of Neutral Funds is limited to 15% of the total portfolio.

Performance

Cumulative and annualised performance

	1 month	6 months	Year to date	1 year	3 years (p.a.)	5 years (p.a.)
Fund (net) (%)	0.75	7.36	2.91	8.64	1.22	n/a

Discrete annual returns - year to 31/5

	2024	2023	2022	2021	2020
Fund (net) (%)	8.64	-0.56	-4.00	n/a	n/a

Performance Data: Share Class Platform P Acc GBP.

Source: abrdn. Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested.

"Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge. These figures do not include the initial charge; if this is paid it will reduce performance from that shown. The performance comparator for this fund was removed on 3 May 2024.

Past performance is not a guide to future returns and future returns are not guaranteed.

Citicode	A1IJ
Domicile	United Kingdom

Risk and reward profile

This indicator reflects the volatility of the fund's share price. See the relevant UCITS Key Investor Information Document (KIID) or PRIIPs Key Information Document (KID) for details

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

Management process

- The management team (the "Team") use their discretion (active management) to select funds within each asset class and ensure that the strategic asset allocation (long term proportions in each asset class) meets the fund's objectives.
- The Team will review and analyse the investments within the underlying funds to assess alignment with the Investment Approach and meet with the fund managers to discuss the fund's philosophy.
- For Sustainable Funds, the Team identify funds that explicitly consider and embed positive ESG factors when making investments.
- For Impact Funds, analysis will include assessing whether investments are made in assets which focus on aiming to generate net-positive social and environmental impacts alongside positive financial returns.
- With the exception of the Neutral Funds, the Team will only invest in funds that have an active engagement and voting policy.
- Additionally, the fund seeks to avoid investment in companies which are related but not limited to tobacco, coal and weapons, as more particularly detailed in the Investment Approach.
- Please note that the number contained in the fund name is not related to the SRRI contained in the Key Investor Information document (NURS-KII).

- (f) Emerging markets are countries generally considered to be relatively less developed or industrialized, and investments in emerging markets countries are subject to a magnification of the risks that apply to foreign investments. These risks are greater for securities of companies in emerging market countries because the countries may have less stable governments, more volatile currencies and less established markets.
- (g) The fund may hold money-market instruments, the value of which may be subject to adverse movements in extreme market conditions.
- (h) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- (i) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

Derivative usage

- The fund will routinely use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund.
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Derivatives include instruments used to express asset allocations reflecting expected changes in interest rates, companies share prices, inflation, currencies or creditworthiness (debt repayment ability) of corporations or governments.
- The fund may also invest in other funds which may use derivatives extensively although these investments shall be in line with fund's overall risk profile.
- Derivatives are exempt from the abrdn MyFolio Sustainable Investment Approach.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.abrdn.com The Prospectus also contains a glossary of key terms used in this document.

¹The Historic Yield as at 30/04/2024 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.60% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

The fund is a sub-fund of abrdn OEIC III, an authorised open-ended investment company (OEIC).
