

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fidelity Multi Asset Open Strategic Fund

a sub-fund of Fidelity Investment Funds IV

Fidelity Multi Asset Open Strategic Fund W Accumulation Shares
(ISIN:GB00BC9S3B08)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

Objective: The fund aims to deliver an average 4% increase in the value of your investment per year, after the deduction of ongoing fund charges, over a period of 5-7 years. There is no guarantee that the target will be achieved by the fund.

Investment Policy: The fund will invest at least 70% in funds (including funds managed by Fidelity) and aims to maintain an allocation as follows: 0-35% company shares, 15-100% debt instruments (e.g. bonds, which may include investment grade bonds, sub-investment grade bonds, i.e. bonds with a rating of BBB/Baa or lower from an internationally recognised ratings agency, and emerging market debt), 0-20% commodities, 0-30% cash and 0-30% alternatives (such as property and infrastructure). The fund provides global exposure to a diversified range of assets (including bonds, equities, alternatives and commodities). The fund may use index tracking and active managed funds. The fund has a large exposure to lower risk investments (such as debt instruments including global government bonds, global corporate bonds and cash) with the aim of mitigating the risk of capital losses, however, an investor may not get back the full amount invested. The remainder will be invested in other investment types such as cash and derivatives.

Investment Process: The fund is managed without reference to a benchmark and has full discretion in its choices of investments within its objectives and policies.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment. The fund may also use derivatives with the aim of achieving the investment objective.

Additional information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the IA Mixed Investment 0-35% sector.

Risk and Reward Profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average. The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	1.01%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 17 October 2003. This class was launched on 24 July 2013.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an "**"; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

Practical Information

Depository: JP Morgan Europe Limited.
