

The value of investments and any income provided by them can go down as well up. Investors could get back less than invested. Past performance is not a guide to future performance. This factsheet is for information purposes only and is not designed to provide advice on the suitability of an investment for your personal situation. If you have any questions regarding this factsheet, you are recommended to speak to a financial adviser.

## Investment Objective and Policy Summary

The Fund seeks to generate a monthly income. The Fund is an actively managed fund of funds which invests at least 70% of its assets in other funds (underlying funds) including those traded on stock exchanges, other closed-ended funds and funds which are managed by Liontrust or its associates. The underlying funds will primarily (meaning at least 70%) invest in bonds and debt instruments which can easily be converted into cash (money market instruments). The Fund may also invest directly or indirectly (through underlying funds) in a range of asset classes including shares, bonds,

money market instruments, freely transferable rights to buy other investments at a future date (warrants), financial contracts that derive their values from those of other investment instruments or indices (derivatives) and deposits. The Fund may invest indirectly in property through Real Estate Investment Trusts and shares in property investment companies. When investing directly in debt instruments, the Fund will favour investment grade securities (that is, securities with a credit rating of at least BBB- as rated by Standard and Poors, or Baa3 as rated by Moody's), but the Fund may also invest in non-investment grade securities.

## RISK AND REWARD INDICATOR

Potentially  
lower rewardPotentially  
higher reward

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile. The category may shift over time and is not guaranteed.

Funds of category 4 have shown in the past low to medium volatility. Volatility describes how much the value of the fund went up and down. The shares of a fund of category 4 might be subject to low to medium fluctuations based on the historical volatility.

The following are additional risks not covered by the risk and reward category:

**Credit Risk:** There is a risk that an investment will fail to make required payments and this may reduce the income paid to the fund, or its capital value.

**Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

**Liquidity Risk:** If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

**Interest Rate Risk:** Fluctuations in interest rates may affect the value of the Fund and your investment.

**Derivatives Risk:** Some of the underlying funds may invest in derivatives, which can, in some circumstances, create wider fluctuations in their prices over time.

**Emerging Markets:** The Fund may invest in less economically developed markets (emerging markets) which can involve greater risks than well developed economies.

**Currency Risk:** The Fund invests in overseas markets and the value of the Fund may fall or rise as a result of changes in exchange rates.

## Important information

Yield is the amount of income generated by a fund's investment in relation to the price shown as an annual percentage.

The Annual Management Charge (AMC), is a charge taken from the fund. The charge is expressed as a percentage per annum but is normally taken daily from the fund and is calculated based on the value of funds under management. Normally the fund manager reserves the right to review the level of charge.

The Ongoing Charges Figure (OCF), is a charge you'll pay over a year for as long as you hold your investment, it is made up of the Annual Management Charge (AMC) and other operating costs. Other charges may occur.

Under fixed Administration Fees, the Operating Expenses are paid directly by Liontrust and we are reimbursed by each fund at a flat rate per year out of their respective net asset values. The OCF is made up of the AMC plus the fixed Administration Fees. In some periods, the Operating Expenses paid by Liontrust may be more than the Administration Fees collected by Liontrust from a fund. If this is the case, Liontrust will pay the difference from its own resources. Conversely, in some periods, the Administration Fees may be higher than the Operating Expenses, in which case Liontrust will retain the difference. As the funds in which you are invested grow in assets, the fixed Administration Fees are reduced.
