### Management Charges

Ongoing Charges Figure\* 0.22%

\*The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds. When you invest with any fund manager, you pay a number of charges, starting with the Annual Management Charge (AMC) which covers the fund manager's costs of managing the fund. The AMC plus ongoing running costs and other operational expenses make up the fund's total 'ongoing charges figure'.

Quoted Historic Yield 2.28%

### Objectives and investment policy

- The Fund seeks to hold investments that will pay out money and increase in value through a portfolio comprising approximately 100% shares.
- The Fund gains exposure to shares by investing more than 90% of its assets in Vanguard passive funds that track an index ("Associated Schemes"). Direct investment in shares may also be made.
- The Fund is actively managed in that the Investment Adviser has discretion in respect of the Associated Schemes in which the Fund may invest and the allocations to them, each of which may change over time. The Investment Adviser manages the Fund through the pre-determined exposure to shares and bonds (and other similar fixed income investments), as detailed above.
- The Fund will have exposure to shares of UK companies and non-UK companies (including emerging markets (i.e. countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body)). The UK will generally form one of the largest single country exposures for shares.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.

### Investment manager

Vanguard Global Advisers, LLC  
Europe Equity Index Team

\*The minimum initial investment of (Investor) Income and Accumulation shares or for anyone approaching Vanguard directly is £100,000.

\*Synthetic Risk and Reward Indicator

## GBP Accumulation Shares

Data as at 31 May 2024 unless otherwise stated.

### Performance summary

GBP—Vanguard LifeStrategy® 100% Equity Fund

### Annualised performance\*\*

|                        | 1 month | Quarter | Year to date | 1 year | 3 years | 5 years | 10 years | Since inception |
|------------------------|---------|---------|--------------|--------|---------|---------|----------|-----------------|
| Fund (Net of expenses) | 2.39%   | 4.46%   | 8.86%        | 18.84% | 8.59%   | 10.26%  | 10.29%   | 10.19%          |

**\*\*Past performance is not a reliable indicator of future results.** Performance figures include the reinvestment of all dividends and capital gains distributions. The performance data does not take account of the commissions and costs incurred in the issue and redemption of shares. Basis of fund performance NAV to NAV with gross income reinvested. The NAV of a Fund swings according to subscription/redemption activity so that transaction costs caused by these cashflows are not borne by the existing holders in a Fund.

Performance and Data is calculated on closing NAV as at 31 May 2024.

### Rolling 12-month performance

### Key investment risks

The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events. Movements in currency exchange rates can adversely affect the return of your investment.

Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

**Please also read the risk factors section in the prospectus and the Key Investor Information Document, both of which are available on the Vanguard website.**

### Investment risk information

---

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Past performance is not a reliable indicator of future results.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall.

Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

The Funds may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

The Vanguard LifeStrategy® Funds may invest in Exchange Traded Fund (ETF) shares.

For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>.
