

Non-UCITS retail scheme Key Investor Information

Handelsbanken

Authorised Corporate Director

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Handelsbanken Cautious Multi Asset Fund (the "Fund")

Class: I Accumulation Shares

A sub-fund of Handelsbanken Multi Asset Funds

ISIN: GB00B4P12091

The Fund is managed by Handelsbanken ACD Limited

Currency: GBP

Objectives and investment policy

Objective

To deliver a total return (the money made or lost on an investment from the combination of income and capital growth) that at the end of any five year period is equivalent to achieving a return of the Consumer Price Index plus 2% each year over that period, after all costs and charges have been taken. There is no guarantee that the objective will be met or that a positive return will be delivered over any time period and you may get back less than you invest.

Investment Policy

To invest directly and indirectly in equities (which are shares in companies), bonds (which are loans to either a company or government that pay interest), property, commodities (for example gold), hedge funds, money market instruments (which are short term loans that pay interest), deposits and cash. The Portfolio Manager determines the mix of asset classes and geographic areas to achieve the Fund's objective, and then on an ongoing basis assesses economic conditions and market opportunities and will adjust the amount invested in the different asset classes, geographic areas and industry sectors accordingly.

Other Features

The Fund is actively managed. The Portfolio Manager uses its expertise to research and select investments aimed at achieving the Fund's investment objective. The Fund may invest in other funds (including those managed by the Manager, the Portfolio Manager and their associates). The Fund will not invest in property and commodities directly, but by using, for example, other funds. Whilst the Fund can invest in different asset classes it may not have exposure to all asset classes at all times. The Fund is part of a range of five funds that are managed according to different target return benchmarks. Funds with a higher target return benchmark will have a larger allocation to higher risk investments such as equities. This Fund has the second lowest target return benchmark within this range and the second lowest expected risk. The Fund can invest in different geographical areas and industry sectors with return limitation. Derivatives (investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates) may be used for investment purposes and to manage the risk profile of the Fund.

Benchmark

The Consumer Price Index plus 2% has been selected as the Fund's target return benchmark as the Fund aims to achieve a return (the money made or lost on an investment) that is 2% above the rate of inflation. The Consumer Price Index is used to measure the rate of inflation. The Fund's performance may also be compared against: (1) MSCI United Kingdom Index (GBP) - Net total return (representing UK shares) and (2) BoA Merrill Lynch UK Gilts (representing UK government bonds); which have been selected as appropriate comparators as they assist in evaluating the performance of two of the principle underlying asset classes (UK shares and UK government bonds) that the Fund may have exposure to. Please refer to the Fund's investment objective for detail regarding how achievement of the target return benchmark is measured, and over what time period.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing

You can buy and sell shares in the fund on each business day.

Income

Income from the Class is added to the value of your investment.

Risk and reward profile

The Risk and Reward Indicator

The calculation of the risk and reward indicator is based on 5 years of historical (actual or simulated) information so may not be a reliable indication of the future risk profile of the Fund. The risk and rewards indicator of the Fund is not guaranteed and may change over time.

The risk and reward profile is classified by the level of historical fluctuation (i.e. volatility) of the Net Asset Values of the class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

A category 1 fund is not a risk-free investment – the risk of losing your money is small, but the chances of making gains is also limited.

Other Risks

The risk category does not take into account the following material risks:

Currency Risk: As the Fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.

Emerging Markets Risk: The Fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, which may result in large and frequent price movements that may cause a loss to the fund.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a counterparty providing services to the Fund may expose the fund to financial loss.

For a more detailed explanation of risks, please refer to the Prospectus.

Charges for this fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum that might be taken out of your money before it is invested (entry charge) or before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over the year

Ongoing Charges	0.96%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	None
-----------------	------

The **entry** and **exit** charges shown are maximum figures. In some cases you may pay less – you can find this out from your financial advisor.

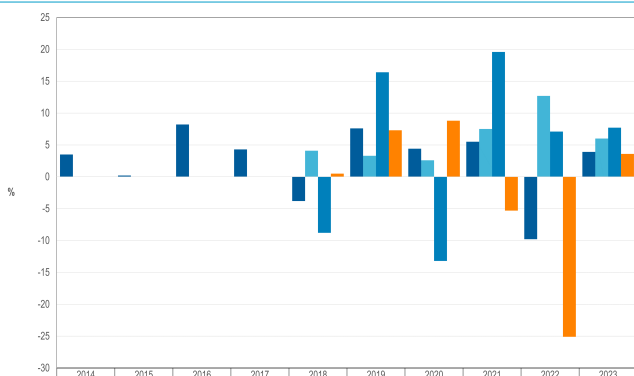

The Ongoing charges figure is based on expenses as at 31 December 2023 and this figure may vary.

It excludes:

- performance fees,
- portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective undertaking,
- the cost of investing in any listed “closed ended” funds e.g., investment trusts (as such costs are included in the share price of the closed-ended fund)

For more information about charges, please see the relevant sections of the Fund’s Prospectus.

Past performance

This chart shows how much the Fund increased or decreased in value as a percentage in each year.

Performance has been calculated in GBP and takes account of ongoing charges.

The Fund launched 30 November 2009 and the Class was launched on 26 March 2010. In November 2017, the Fund changed its investment objective. The performance before this date was achieved under circumstances that no longer apply. The Fund name was changed from LF Heartwood Cautious Multi Asset Fund to LF Handelsbanken Cautious Multi Asset Fund in November 2020; and to Handelsbanken Cautious Multi Asset Fund in November 2021.

Past performance is not a guide to future performance; the value of your investment and any income from it may go down as well as up.
