Fund manager Multi-Manager Team

Fund objective and policy

The Fund aims to achieve capital growth. The Fund is actively managed. It is not constrained by its comparator benchmark, the IA Flexible Investment sector median, and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Fund seeks to achieve its objective by investing primarily in a range of collective investment schemes and closed ended funds in order to gain exposure to a diversified portfolio of primarily equities. The underlying equity component may include companies anywhere in the world and in any industry sector. Any underlying fixed interest component may include government and corporate bonds and other debt instruments from issuers anywhere in the world, including emerging market and high yield bonds.

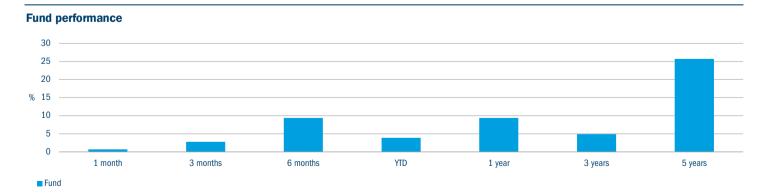

Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. This fund invests principally in units of collective investment schemes. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
