Regnan Sustainable Water and Waste Fund

F Accumulating GB00BMYXQ553

A sub-fund of Regnan UK Umbrella Fund

Managed by JOHCM Funds (UK) Limited

Objectives and investment policy

- The Fund aims to generate capital growth over rolling 5-year periods and to pursue a sustainable objective by investing in companies which provide solutions to the global water and/or waste related challenges.
- At all times, the Fund will invest at least 70% of its assets in the shares of companies quoted and/or traded on regulated markets worldwide that operate in the water and/or waste sectors and provide solutions to global water and waste challenges.
- The Fund may also invest in the shares of other companies (including investment trusts and REITs) and cash or near cash. Up to 10% of the Fund may be invested in collective investment schemes. Derivatives may be used for efficient portfolio management purposes (including hedging).
- For all assets in the Fund, the Investment Manager will ensure that (i) a minimum of 70% of the Fund's Net Asset Value will be invested in assets which maintain sustainable attributes; and (ii) a maximum of 30% of the Fund's Net Asset Value will be invested in assets which demonstrate improving sustainable attributes.
- For all assets in the Fund, the Investment Manager applies an enhanced principle-based exclusion policy including both norms-based screening and negative screening of certain companies or practices based on specific environmental, social and governance ("ESG") criteria as determined by the Investment Manager from time to time.
- The Fund is actively managed with the fund managers using their expertise to pick investments to achieve the Fund's objective.
- The Fund's performance may be measured against the MSCI ACWI Index (N) (12pm adjusted, the "Index"). The Index is used as a comparator benchmark for the Fund. Use of the Index does not limit the investment decisions of the fund managers so the Fund's shareholdings may differ significantly from the Index. The Index is used as it captures large and mid cap representation across 23 Developed Markets and 24 Emerging Markets countries. With 2,920 constituents, the Index covers approximately 85% of the global investable equity opportunity set.
- Any income the Fund generates for this share class is accumulated.
- You can buy and sell shares in the Fund on any day which is a working day in London. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within five years.
- The mid-day index is a customised variant designed and maintained by MSCI, for alignment with this Fund's UK mid-day valuation point.

Risk and reward profile

Typically lower rewards Lower risk			Typically higher rewards Higher risk			
1	2	3	4	5	6	7

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.
- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the Company's tax status or in legislation could affect the

value of investments held by the Company.

- Political and/or regulatory risks.
- Equity risk: Equities invested in by the Fund may involve substantial risks and may be subject to wide and sudden fluctuations in market value, with a resulting fluctuation in the amount of profits and losses.
- Emerging markets risk: Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. Investments in emerging markets' funds should not constitute a substantial portion of an investor's portfolio.
- As the portfolio is concentrated, it may be more volatile than a diversified one.
- Sustainability risk: An ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.
