

Royal London Global Equity Select Fund

M Acc GBP
31 May 2024

Fund objective

The Fund's investment objective is to achieve capital growth over the long term, which should be considered as a period of 7-plus years, by predominantly investing in the shares of companies globally that are listed on a stock exchange. The Fund's performance target is to outperform, after the deduction of charges, the MSCI World Net Total Return Index GBP (the "Index") by 2.5% per annum over rolling 3-year periods. The Index is considered an appropriate benchmark for the Fund's performance, as the Fund's potential investments will predominantly be included in the Index. In addition to the benchmark for the Fund's performance as noted above (the "Index"), the IA Global sector is considered an appropriate benchmark for performance comparison.

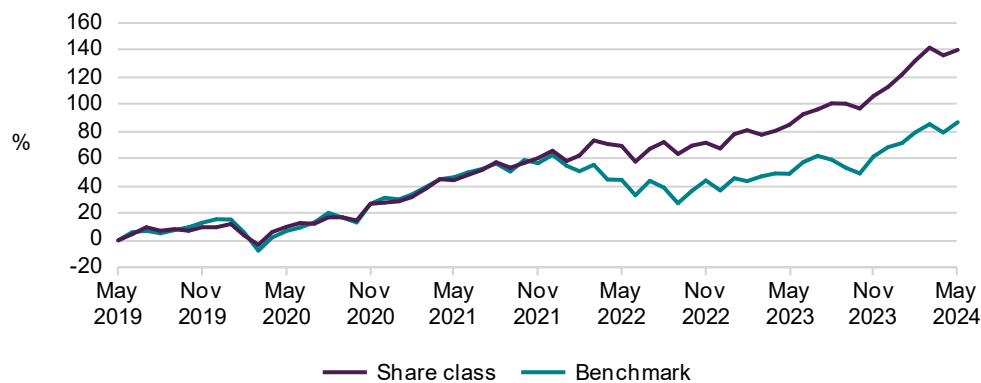

Cumulative performance %

	Cumulative performance %					Annualised %	
	3M	6M	1Y	3Y	5Y	3Y	5Y
Share class	3.39	16.46	29.75	66.28	139.81	18.45	19.09
Fund end of day	3.59	17.32	32.73	70.88	152.34	19.55	20.34
Benchmark	3.14	14.24	21.60	35.50	80.44	10.65	12.51

	31/05/2023 - 31/05/2024	31/05/2022 - 31/05/2023	31/05/2021 - 31/05/2022	31/05/2020 - 31/05/2021	31/05/2019 - 31/05/2020
Share class	29.75	9.18	17.38	31.24	9.89

Rolling performance

Past performance is not a guide to future performance. The value of investments and the income from them is not guaranteed and may go down as well as up and investors may not get back the amount originally invested. Fund performance is shown on a mid to mid price basis, net of fees and gross of taxes, with gross income reinvested unless otherwise stated. Benchmark performance is shown gross of fees and taxes. The impact of commissions, fees and other charges can be material on the performance of your investment.

Fund launch date	10 October 2017
Fund size	£683.14m
Fund type	ICVC
Fund domicile	GB
Fund managers	Mike Fox George Crowdy
ISA eligible	Yes
Fund base currency	GBP
Share class currency	GBP
Share class launch date	5 March 2018
Benchmark	MSCI World Net Total Return Index

Mike Fox
Head of Sustainable Investments
Tenure from: 29 April 2024

Deputy Fund Manager

George Crowdy
Sustainable Fund Manager
Tenure from: 29 April 2024

Key concepts to understand

Alpha: Measure of excess return of an investment relative to a benchmark index. It measures the performance of a stock or portfolio, relative to a benchmark. A positive alpha indicates outperformance, while a negative alpha suggests underperformance.

Beta: It measures a stock's volatility relative to the market. A beta of 1 means the stock moves with the market, while a beta less than 1 is less volatile, and a beta greater than 1 is more volatile.

Capital growth: The rise in an investment's value over time.

Derivatives: A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management (EPM) techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Equities: Securities that represent an ownership interest in a company.

Information ratio (IR): It is a measure of risk-adjusted performance of a portfolio against a benchmark. It calculates the excess returns of a portfolio relative to the benchmark, adjusted for the volatility of those returns. A higher IR indicates more consistent excess returns.

P/B ratio (Price-to-book ratio): A valuation ratio calculated by dividing the market price per share of a company by its book value per share. A low P/B ratio may indicate that the company is undervalued, while a high P/B ratio may suggest that the company is overvalued.

P/CF ratio (Price-to-cash flow ratio): It is used to determine the company's share value and to compare it to others or the market average. A low P/CF ratio may indicate that the company is undervalued, while a high P/CF ratio may suggest that the company is overvalued.

P/E ratio (Price-to-earnings ratio): The P/E ratio is used to determine a company's share value and compare valuations. A high P/E ratio may indicate high market expectations for future growth, while a low P/E ratio may suggest lower expectations for future performance.

P/S ratio (Price-to-sales ratio): A valuation ratio calculated by dividing a company's market capitalization by its total sales over the past 12 months. It is used to determine a company's share value and compare valuations. A low P/S ratio may indicate undervaluation, while a high P/S ratio may suggest overvaluation.

Performance (supplementary end of day): Official performance at share class level is shown on a mid-to-mid price basis, net of fees and taxes, with gross income reinvested unless otherwise stated. Supplementary end of day performance at Fund level has also been provided in order to show a comparison vs the benchmark which is also priced at end of day, gross of fees and taxes.

Rolling 3-year period: A rolling 3-year period is any period of three years, no matter which day you start on.

Tracking error: Tracking error indicates how closely a fund follows its benchmark index. It is a measure of the risk in the fund that is due to active management decisions made by the fund manager. It is calculated on an ex-post basis (actual basis, post period end).

Fund risks

Concentration risk: The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

EPM techniques risk: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Emerging markets risk: Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Exchange rate risk: Changes in currency exchange rates may affect the value of your investment.

Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Liquidity risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Share class fees and charges

Share class	ISIN	Fee	Minimum investment
M Acc GBP	GB00BF93W972	0.710%	£100,000
M Inc GBP	GB00BF93WB97	0.710%	£100,000
Z Acc GBP	GB00BNFF075	0.650%	£3,000,000
