

Premier Miton Global Smaller Companies Fund

Sterling class C - Income shares

Objective

The objective of the fund is to provide capital growth over the long term, being five years or more. Five years is also the minimum recommended term for holding shares in this fund. This does not mean that the fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

Risk and reward profile

The fund is ranked as 6 because it and portfolios holding similar assets have experienced relatively high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment

Investment overview

- Invests in smaller company shares worldwide
- All companies are listed on the stock markets of countries in the MSCI AC World Small Cap Index
- Focus on undervalued smaller companies with the most promising prospects
- Typically 40 to 80 individual investments
- Actively managed by experienced global smaller companies team

Awards and ratings

Awards and ratings are based on past events and are not an indication of future performance. Ratings are not a recommendation. Please see page 4 for further information.

Source: FE Analytics. Based on Sterling class C - Income shares, on a total return basis to 31 May 2024. Performance is shown net of fees with income reinvested. This fund is priced on a swing pricing basis. The full 5 years of calendar year performance is not available as the fund launched on 22.03.2021.

The performance information presented on this page relates to the past. Past performance is not a reliable indicator of future returns.

Investing involves risk. The value of an investment can go down as well as up which means that you could get back less than you originally invested when you come to sell your investment. The value of your investment might not keep up with any rise in the cost of living. More information about the risks of investment is provided later in this document.

Charges

Ongoing charges figure (OCF) as at 31.08.2023	0.95%
--	-------

The OCF is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). The OCF includes the annual management charge. Transaction charges will also apply. Please refer to the [total costs & charges document](#) on our website for more information.

Initial charge	4.00%
----------------	-------

This is the maximum charge that we might take out of your money before it is invested. In some cases, you might pay less, and you should speak to your financial adviser about this. The initial charge has been waived by Premier Miton until further notice, with the exception of the F share class. However, if you have invested via a financial adviser, the initial charge may still apply and be paid to your adviser.

Charges are taken from income

The fund's charges will be taken from income generated by the fund in the form of interest or dividends. If there is not enough income to cover the charges, the rest of the charges will be taken from the fund's capital which could result in capital erosion or constrain capital growth.

A typical investor in the fund

This fund may be compatible for clients who:

- are seeking the potential for long-term growth on their original investment
- can invest for the long-term, by which we mean staying invested for at least 5 years
- do not need a capital guarantee
- understand the risks of investing, including the risk that they could lose some of the amount originally invested
- understand the risks of investing in smaller companies which are typically higher risk than larger companies
- are comfortable with seeing the value of their investment go up and down.

There will be times when the value of the fund will fall, especially over the short-term

- understand that there is no guarantee on the amount of investment growth they can expect to receive during the period that they remain invested

This fund may not be compatible for clients who:

- are fully risk averse / have no risk tolerance
- seek capital preservation
- have a short/medium term investment time horizon
- are seeking to receive a regular income
- are looking for a guaranteed level of investment growth
- would be uncomfortable with seeing the value of their investment fluctuating
- are uncomfortable with the additional risk associated with investing in smaller companies

How the fund might perform

This fund invests principally in the shares (known as equities or stocks) of smaller companies around the world listed on a stock market. Therefore, the performance of the fund will be impacted by how stock markets perform overall. Different regions may experience different economic conditions at any point in time, which means that not all stock markets will do well or badly at the same time. For example, the US economy may be doing well when the Japanese economy is doing badly. The fund may invest in the shares of companies in less developed countries (called emerging markets) which can be riskier than companies in developed countries. The share prices of these companies can experience sharper

movements up or down. Therefore, the performance of the fund will be impacted by the amount invested in different regions.

Similarly, different industries will be affected in different ways by the same conditions. For example, if the economy is strong, it is likely that the share prices of retail companies would do well and if the economy is weak, the share prices of healthcare companies might do better than other industries. Therefore, the performance of the fund will be impacted by the amount invested in different industries.

The fund managers focus on what they believe to be the most attractive regions,

industries and individual companies with the aim of building a portfolio of high quality companies that they expect will thrive in different economic and financial market conditions.

You should not expect the fund to perform like any specific stock market index, such as the MSCI World Small Cap Index, as the fund invests in a range of specially selected smaller companies from around the world. There is no guarantee as to how financial markets will perform in the future or how the fund will perform. Smaller companies are typically riskier than larger companies as they are less developed and therefore their share prices can move sharply down or up.

Performance comparator

This fund is classified in the IA Global sector which we believe is a meaningful comparator to help investors assess the

performance of the fund.

General risks

Investing involves risk. The value of an investment can go down as well as up which means that you could get back less than you originally invested when you come to sell your investment. The value of your investment might not keep up with any rise in the cost of living.

Typically, there is less risk of losing money over the long-term (which we define as over 5 years) from an investment that is considered low risk, although potential returns may also be lower. Investments considered higher risk typically offer greater opportunities for better long-term

returns, though the risk of losing money is also likely to be higher. Premier Miton is unable to provide investment, tax or financial planning advice. We recommend that you discuss any investment decisions with a financial adviser.

Specific fund risks

Some of the main specific risks of investing in this fund are summarised here. Further detail is available in the prospectus for the fund.

Currency

Where investments in a fund are denominated in currencies other than sterling (for example, if a fund holds assets priced in euros), its value will be affected by changes in the relevant exchange rate. Certain other investments, such as the shares in companies with profits from other countries, will also be effected.

Equities

Equities (shares) can experience high levels of price fluctuation.

Geographic concentration

Funds that have a strong focus on a particular country or region can carry a higher risk than funds with a more diversified portfolio.

High volatility

This fund may experience high volatility due to the composition of the portfolio or the portfolio management techniques used.

Inflation

Higher inflation can lead to some investments falling in value, particularly those with a fixed level of interest, for example government bonds and corporate bonds.

Infrastructure

Investments are often in large-scale projects whose profitability can be affected by supply problems or rising prices for raw materials or natural resources. Changes in the wider economy and government regulation can also have a significant influence.

Interest rate

Changes in central bank interest rates can affect all types of assets, in particular, securities such as government bonds and corporate bonds that generally offer a fixed level of interest. If interest rates go up, the value of a bond may fall, and vice versa.

Legal and tax

The income or capital gains from investments can sometimes be affected by changes in legal and tax regulations or how these rules are applied.

Liquidity

In some instances, for example, when market conditions generally are difficult, holdings in a fund may be difficult to sell and buy at the desired price. The fund value could fall as a result.

Operational

Processes, systems and controls around your investment might fail. The more complex or unusual the investments that the fund holds, the more likely this is to happen. For example, developing markets may have less reliable systems or lower standards of governance than more developed markets.

Property and Real Estate Investment Trusts

Property values can rise and fall sharply depending on the strength of a country's economy.

Smaller companies

Investment in smaller companies is typically higher risk than investment in larger companies. Shares in smaller companies can experience greater levels of volatility.

Ratings, awards and other information

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Premier Asset Management Limited. affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

A swing pricing is where the price can swing to either a bid or an offer basis depending on the investment and redemption activity in the fund. This means the investor selling or buying fund shares bears the associated [dis] investment costs and protects the continuing holders in the fund. Performance could be shown on a combination of bid, mid or offer prices, depending on the period of reporting. MSCI ESG Research LLC's ("MSCI ESG") Fund Metrics and Ratings (the "Information") provide environmental, social and governance data with respect

to underlying securities within more than 31,000 multi-asset class Mutual Funds and ETFs globally. MSCI ESG is a Registered Investment Adviser under the Investment Act of 1940. MSCI ESG materials have not been submitted to, nor received approval from, the US SEC or any other regulatory body. None of the Information constitutes an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product or trading strategy nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. None of the Information can be used to determine which securities to buy or sell or when to buy or sell then. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information.

Glossary

Annual management charge (AMC)

The yearly fee paid to Premier Miton for managing a fund, expressed as a percentage of your investment. The AMC does not typically change from year to year.

Capital

Describes financial assets, particularly cash, or other assets, such as shares, owned by a person or organisation.

Capital growth

The increase in the value of an asset or investment over time, excluding any income received, measured by its current value compared to its purchase cost.

Emerging markets

Countries with less developed financial markets and which are generally considered riskier than investing in developed markets.

Equities

Another name for shares (or stock) in a company.

Investment Association (IA)

The trade association that represents investment management firms in the UK.

Investment Association (IA) sectors

To help with comparisons between the thousands of funds available, funds are categorised into different groups or sectors, organised and reviewed by the Investment Association (IA).

IA Global sector

Funds in this sector are required to invest at least 80% of their assets globally in equities. Funds must be diversified by geographic region.

Individual Savings Account (ISA)

A wrapper in which you can place your savings and investments to protect them from some forms of taxation. There are different types of ISA. All of Premier Miton's funds are available for investing in an ISA (with the exception of Premier Miton Capital Financials Securities Fund). HM Revenue & Customs set the amount that you are allowed to invest into an ISA in each tax year. Further details about ISAs, including the current ISA investment limits, can be found on the Government website.

Ongoing Charges Figure (OCF)

A measure of what it costs to invest in a fund over a year. It includes the fee paid to Premier Miton for the management of the fund (known as the annual management charge) and the OCFs of underlying funds that might be held in a portfolio (excluding any Premier Miton funds held) with the remainder covering costs that have to be paid to external companies for other services relating to the ongoing administration and management of a fund, such as the fees paid to the depositary, custodian, regulator, auditor and administrator. The fee is deducted from the value of the fund and reflected in the fund's share price. The OCF is typically calculated once a year and can change from year to year. The OCF does not include transaction costs which are associated with buying and selling investments in a fund.

Total return

A way of showing how an investment has performed and is made-up of the capital appreciation or depreciation and includes any income generated by the investment. Measured over a set period, it is expressed as a percentage of the value of the investment at the start of that period.

Customer care

Investors may find themselves in difficult circumstances at any point in their lives, whether as a result of a change in physical or mental ill-health, or during key life stage events such as bereavement, loss of job, personal debt concerns, or more generally through lack of confidence in dealing with financial matters.

We encourage all our investors to seek financial advice before making any important investment decisions and particularly when life may be more challenging.

We want to make sure that we can provide our customers with the support they need. If you would like copies of product information in a

different format, such as **large print**, **Braille** or **audio**, please send us your request using the contact details provided. It may take up to 15 working days to send the information to you in these formats.

Whilst every effort has been made to ensure the accuracy of the information contained within this document, we regret that we cannot accept responsibility for any omissions or errors. Reference to any particular stock or fund does not constitute a recommendation to buy or sell the stock or fund. All data is sourced to Premier Miton unless otherwise stated.

A free, English language copy of the fund's full prospectus, the Key Investor Information Document and Supplementary Information Document are available on the Premier Miton website, or you can request copies by calling us on 0333 456 4560.
