

IFSL atomos Defensive Fund

May-24 | Factsheet

On 21st April 2023, Atomos Investments Limited (atomos) appointed Towers Watson Limited ("WTW") as sub investment manager of the Fund. The investment policy was also updated to reflect the fund moving from direct investment in securities to investment in other funds.

Overview

The Fund will be actively managed on a low to medium risk strategy, primarily through a fund of funds approach (which is a fund that invests into other funds). The Fund will gain exposure to between 30-80% in bonds and 20-50% in the shares of companies, covering a range of global markets. The Fund may also gain exposure to other asset classes such as money market instruments (which are shorter term loans), property and commodities. The aim of the Fund is to grow the value of your investment over a period of at least 5 years. This growth is expected to come from a combination of profit on investments and income paid out of investments, such as interest and dividends.

Performance

Performance of the fund since launch (%)

Past performance is not a reliable indicator of future performance. The value of investments, and any income from them, can go down as well as up and is not guaranteed. You may get back less than you originally invested. 31 May 2024

The vertical dotted line indicates the date WTW was appointed as sub investment manager of the fund. All performance figures quoted are from atomos (source: Morningstar Direct) and are shown net of fees. NAV to NAV figures are used. Calculations are based on a lump sum investment.

* This figure is an estimate, calculated by aggregating the estimated yields of the portfolio's income-yielding holdings, based on complete 12 months. Data is sourced from Morningstar and the underlying investment managers directly.

Performance (%)

Asset Allocation

The Fund targets a cash allocation of 2%, Please note that daily cash balances may differ from this due to fund trading, inflows, and outflows. For the purpose of producing the factsheet, asset allocations are taken on the last calendar day of each month. Data is obtained from Investment Fund Services Limited (IFSL).

Fund Information and charges

Shareclass	ISIN	SEDOL	Bloomberg	Initial charge	AMC	OCF*	Price	Min. Investment
A Accumulation GBP	GB00BK8VGD91	BK8VGD9	IFSDFAA	none	0.80%	1.03%	1.09	£1,000
A Income GBP	GB00BK8VGF16	BK8VGF1	IFSDFAI	none	0.80%	1.03%	1.00	£1,000

* OCF figure is an estimate. As at 21 April 2023 the Fund changed its investment policy, therefore the ongoing charges figure shown is an estimate intended to reflect the portfolio realignment. This figure may vary from year to year.

Important Information

Before investing, please read the Fund Prospectus and Key investor Information Document (KIID), which can be obtained in English from atomos, or at www.ifslfunds.com.

As at 21 April 2023 the Fund changed its investment policy, therefore the past performance prior to this date is based on an old investment policy. If you would like to receive more information about the previous investment policy, please contact us. The ongoing charges figure shown is also an estimate intended to reflect the portfolio realignment. This figure may vary from year to year.

The information in this document, the Prospectus, and KIID is for guidance only. It should not be considered financial advice or a recommendation to invest. If you are unsure if investment in the Fund is suitable for you, please seek independent advice from a regulated financial adviser. The Fund should be considered a medium to long term investment, with a minimum investment period of at least five years.

There is no guarantee the Fund will meet its objectives. The Fund is subject to risks which may affect the value of your investment. Specific risks relating to the fund are outlined in the Prospectus and KIID. The Fund may make investments denominated in currencies other than sterling and exchange rate movements can affect the return of your investment. The Fund may also invest into derivatives for the purposes of effective portfolio management. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.

The fund price is calculated on a net asset value (NAV) basis, which is the total value of all assets in the portfolio including any income and expense accruals.
