BLACKROCK FUNDS I ICAV

BACKGROUND

BlackRock FUNDS I ICAV (the “Entity”) is an Irish collective asset-management vehicle. The Entity was incorporated in Ireland on 8 March 2018 with segregated liability between its funds and is organised under the laws of Ireland and is regulated by the Central Bank of Ireland (“CBI”) pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the “ICAV Act 2015”) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”).

The Entity is structured as an umbrella fund and comprises of separate funds (“Fund”) of the Entity. The shares of each Fund may be grouped into different classes of shares (each a “share class”). Each Fund will represent a separate portfolio of assets and may consist of one or more share classes. Each share class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of shares will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus.

While assets and liabilities that are specific to a share class within a Fund would be attributable to (and should be borne by) only that share class, there is no segregation of liabilities between share classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a share class may bring a claim against the assets of the Fund notionally allocated to other share classes.

As a matter of Irish law, the assets of one Fund will not be available to meet the liabilities of another. However, the Entity is a single legal entity that may operate or have assets held on its behalf or be subject to claims in other jurisdictions that may not necessarily recognise such segregation of liability.

The term “Fund” or “Financial Product” shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term “BlackRock” and “Investment Manager” are used to represent BlackRock Investment Management (UK) Limited as appropriate. All references to “redeemable shares” shall be deemed to mean redeemable participating shares when Fund shares are classified as financial liabilities. The term “Directors” means the directors of the Entity.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity’s prospectus.

Fund details

The Entity had 17 Funds in operation as at 31 October 2022.

- Updates to Directors information.
- Updates to EU Taxonomy regulations.
- Updates to ESG policy.

COVID-19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies it is clear that the worst of the impact is now over. However there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and deliver and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by Entity.

BACKGROUND (continued)

Russia-Ukraine conflict

Certain financial markets have fallen due primarily to geo-political tensions arising from Russia's incursion into Ukraine and the impact of the subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. The Investment Manager continue to monitor investment performance in line with the Funds' investment objectives, and the operations of the Funds and the publication of net asset values ("NAV") are continuing.

Performance summary

The following table compares the realised Fund performance against the performance of the relevant performance measure during the financial period ended 31 October 2022.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary share class for each Fund, net of fees, which has been selected as a representative share class. The primary share class represents the class of share invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary share class, unless otherwise stated. Performance returns for any other share class can be made available on request.
- Fund returns are based on the NAV calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per share as recorded in the financial statements and the NAV per share calculated in accordance with the prospectus.

INVESTMENT MANAGER'S REPORT (continued)

Global economic overview

Global equities, as represented by the MSCI All Country World Index ("ACWI"), returned -9.42% (in US dollar terms) for the six months ended 31 October 2022. Amid concerns about a global economic downturn, both bonds and equities were pressured by persistently high inflation (rate of increase in the prices of goods and services) and rapid monetary policy tightening from the world's largest central banks. Russia's ongoing invasion of Ukraine continued to drive uncertainty and disruption in financial markets. Sanctions imposed on Russia negatively impacted businesses with ties to the region and contributed to significant volatility (market ups and downs) in some commodity prices.

The US economy faltered in the second quarter of 2022, contracting amid slowing growth in consumer spending and a sharp decline in business confidence. However, the US economy returned to growth in the third quarter as the balance of trade improved and unemployment remained low. The Japanese economy growth picked up, boosted by the lifting of COVID-19 restrictions and increased government spending. The UK economy slowed amid weakness in the services sector and manufacturing. Growth slowed in the Eurozone as an initial increase tourist activity amid easing COVID-19 restrictions began to fade.

Economic growth was generally slow among emerging market nations as the global economy cooled. However, the Chinese economy continued to grow despite significant regulatory shifts, concerns about the heavily indebted property sector, and renewed lockdowns on account of COVID-19.

As inflation continued to rise globally, the world's largest central banks implemented different measures aimed at monetary tightening. The US Federal Reserve ("the Fed") raised interest rates four times in an effort to control inflation, including three consecutive 75 basis points increases in June, July, and September 2022. The Fed also ended its bond-buying programmes and began reducing some of its accumulated bond holdings in June 2022.

The Bank of England ("BoE") also raised interest rates four times, as inflation reached a forty-year high. Inflation accelerated in the Eurozone, and the European Central Bank ("ECB") raised interest rates twice in an effort to control rising prices. Furthermore, the ECB signalled that it would take action to prevent significant divergence between bond yields (which move inversely to prices) of Eurozone states as interest rates rise.

Global equity performance was negative in most parts of the world. Rising inflation amid supply chain constraints and tighter monetary policy from many central banks negatively impacted equities. US, European, and Asia-Pacific equities all retreated during the six-month period.

Global bond prices also declined, as heightened inflation put pressure on returns. US treasuries fell amid concerns that the Fed would continue to raise interest rates due to high inflation. Yields on UK gilts rose substantially, and late in the period a tax cut proposal raised the likelihood of increased government borrowing. This was followed by substantial volatility in UK gilt markets, leading the BoE to intervene by providing additional liquidity, stabilizing the UK bond market. The government subsequently dropped its proposal, further easing pressure on gilts. European government bonds also declined notably for the six-month period, while Japanese government bonds were nearly flat. Corporate bonds fell globally as investors became concerned about the impact of rising interest rates on companies' financing costs.

Equities in emerging markets posted a substantial decline as the US dollar strengthened and interest rates rose. Central banks in several emerging markets, such as India, Brazil, and Mexico raised interest rates multiple times in response to heightened inflation concerns, and emerging market bond prices declined.

The commodities market was volatile, as uncertainty around the impact of the war in Ukraine and slowing economic growth impacted prices. Brent crude oil prices declined as demand moderated and markets adapted to new conditions. Natural gas prices were volatile, particularly in Europe, as governments sought substitutes for Russian gas. Gold prices declined, as higher interest rates made non-interest-bearing investments relatively less attractive.

On the foreign currencies, the US dollar rose against most other global currencies, particularly as the Fed began tightening monetary policy in 2022. The Japanese yen declined notably against the US dollar, as the Bank of Japan's maintained its ultra-low interest rate policy. The euro, pound sterling, and Chinese yuan also weakened relative to the US dollar as investors saw the US dollar being more insulated from the geopolitical turmoil.

Fund performance review and activity

BlackRock Advantage Asia ex Japan Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was 2.81%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The Fund delivered robust performance over the period outperforming its performance measure despite the turbulent market backdrop.

Sentiment insights looking at the behaviour of market participants such as sell-side analysts, company management, employees and others in the investment community delivered the majority of gains. Top performing insights were those that designed to capture a forward-looking view of company fundamentals that included an insight constructed from analysing local textual information of broker reports.

In addition, picking stocks based on traditional fundamental measures was an effective technique. In the turbulent environment, selecting companies with conservatively managed balance sheets and good dividend payouts generated returns, for example. Several environmentally focused ESG measures offset some of the positive results.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

BlackRock Advantage Asia ex Japan Equity Fund (continued)

Top contributors		Bottom detractors	
Country	Effect on Fund return	Country	Effect on Fund return
China #	1.06%	Malaysia ^o	(0.19%)
India ^o	0.59%	Philippines ^o	(0.08%)
Korea ^o	0.51%		
Indonesia #	0.41%		
Taiwan #	0.32%		

Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

An overweight in energy and industrials in Chinese companies was most additive over the period. A large overweight in the financials sector in India contributed strongly as well.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 31 October 2022 and 30 April 2022:

Largest overweight position			
31 October 2022		30 April 2022	
Country	Weighting	Country	Weighting
China	2.06%	Singapore	1.05%
Singapore	1.87%	Taiwan	0.76%
Taiwan	0.93%	China	0.36%

Largest underweight position			
31 October 2022		30 April 2022	
Country	Weighting	Country	Weighting
Korea	(1.89%)	Hong Kong	(1.63%)
Hong Kong	(1.46%)	Korea	(0.94%)
India	(1.25%)	Philippines	(0.45%)

Leadership across countries has not seen a significant change with the exception of positioning in the offshore Chinese companies with a larger overweight in consumer discretionary and communication services at the end of the period.

BlackRock Advantage Emerging Markets Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was 0.25%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

Emerging markets underperformed developed equities on the back of several adverse trends, namely rising interest rates, global inflationary concerns as well as an ongoing conflict in Ukraine. Despite this backdrop, traditional fundamental bottom-up stock selection approach has delivered positive performance. In addition, market sentiment insights looking at the behaviour of a wide range of market participants such as sell-side analysts, company management, employees and others in the investment community delivered majority of gains. Insights that are designed to capture a forward-looking view of company fundamentals such as sell side analysts' revisions predicting companies' future earnings contributed. However, several ESG aligned insights detracted. For example, insights that look at reducing risk associated with the companies' governance and management such as news controversy and tax avoidance have delivered negative returns over the period.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Country	Effect on Fund return	Country	Effect on Fund return
Indonesia #	0.42%	India ^o	(0.50%)
Korea ^o	0.40%	Saudi Arabia ^o	(0.22%)
Taiwan #	0.23%	China #	(0.19%)
Brazil #	0.20%	Chile ^o	(0.13%)
Turkey #	0.17%	Kuwait ^o	(0.08%)

Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

An overweight in Indonesia delivered majority of positive performance from an overweight positioning in the financials and utilities sectors. Most of the India underperformance was generated from underweight positions in the industrials and health care sectors.

Korea	(1.97%)	Qatar	(1.06%)
India	(1.21%)	Brazil	(1.03%)
Poland	(0.63%)	China	(1.03%)

Leadership across the country positions has changed over the period. Main change was a reduction in an overweight in Taiwan and an increase in underweight in Korea.

BlackRock Advantage Europe Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was 1.45%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The Fund considerably outperformed its benchmark over the period. Market sentiment insights looking at the behaviour of a wide range of market participants such as sell-side analysts, company management, employees and others in the investment community have delivered majority of gains. Top performing insights were clustered around a forward-looking view of company fundamentals as predicted by the sell side analysts. Traditional fundamental measures have also delivered positive performance with fundamental quality insights looking at the strength of the balance sheet driving majority of gains. Environmentally focused measures delivered muted results. Moreover, insights that look at the changing macro thematic trends and utilise traditional and alternative data sources to position the Fund towards certain countries and industries delivered a mixed performance. A measure looking at the electronic invoices by companies on the industry level was additive particularly across consumer discretionary and consumer staples. However, a measure looking to position the Fund across the industries depending on the business cycle has struggled to predict returns.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Country	Effect on Fund return	Country	Effect on Fund return
France #	0.67%	Sweden ^o	(0.11%)
Germany ^o	0.41%	Finland ^o	(0.05%)
Denmark #	0.29%	Belgium #	(0.05%)
Netherlands #	0.20%	Austria #	(0.02%)
Switzerland #	0.17%	Ireland ^o	(0.02%)

Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

Large overweight positions in consumer discretionary and utilities in France were the main contributors to the returns. Also, an underweight in health care in Germany was additive. An underweight positioning in consumer staples and industrials in Sweden detracted from the performance.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 31 October 2022 and 30 April 2022:

France	1.63%	Denmark	1.24%

The Fund maintained an overweight position in France with positive views on consumer discretionary and utilities sectors. A large underweight in energy and utilities sectors in the United Kingdom was brought back to neutral. The Fund has also built a larger underweight in Sweden.

BlackRock Advantage Europe ex UK Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was 1.32%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

Moreover, insights that look at the changing macro thematic trends and utilise traditional and alternative data sources to position the Fund towards certain countries and industries delivered a mixed performance. A measure looking at the electronic invoices by companies on the industry level was additive particularly across consumer discretionary and consumer staples. However, a measure looking to position the Fund across the industries depending on the business cycle has struggled to predict returns.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Country	Effect on Fund return	Country	Effect on Fund return
France #	0.85%	Italy #	(0.20%)
Germany ^o	0.44%	Belgium #	(0.13%)
Denmark #	0.32%	Sweden ^o	(0.12%)
Switzerland ^o	0.29%	Ireland ^o	(0.07%)
Netherlands ^o	0.16%	Finland ^o	(0.04%)

Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

Large overweight positions in consumer discretionary and utilities in France were the main contributors over the period. Also, an underweight in health care in Germany was additive. An overweight positioning in Italy in the utilities sector was the largest detractor from the performance.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 31 October 2022 and 30 April 2022:

Largest overweight position			
31 October 2022		30 April 2022	
Country	Weighting	Country	Weighting
Denmark	1.90%	Belgium	1.50%
France	1.75%	Italy	1.14%
Netherlands	1.06%	Netherlands	1.03%

Largest underweight position			
31 October 2022		30 April 2022	
Country	Weighting	Country	Weighting
Sweden	(1.74%)	Switzerland	(1.83%)
Germany	(1.26%)	Spain	(1.08%)
Ireland	(1.17%)	Germany	(0.99%)

Leadership across the countries has changed as the Fund repositioned from a large overweight position from Belgium to Denmark. The Fund has reduced a large overweight in real estate in Belgium to reduce exposure to rising interest rates. The Fund has reversed the large underweight in Switzerland by bringing an underweight in the consumer staples to neutral. The Fund built a larger underweight in Sweden in the financials sector over the period.

BlackRock Global Corporate Sustainable Credit Screened Fund

Over the six-month period to 31 October 2022, the Fund's active return was (0.46%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The market narrative in the second quarter of 2022 shifted from higher inflation concerns to slowing growth risks as the moderation of global growth became more apparent. Developed market government bond yields rallied in the third quarter of 2022 as concerns of a global recession and monetary tightening weighed on investor sentiment. Turmoil in the UK government bond market towards the end of the September also led to heightened volatility globally. Meanwhile, global inflationary pressures remained, with core inflation (excluding food and energy) well above central bank targets in most countries. Despite entering the month with heightened levels of volatility, investor sentiment in global bond markets was much more positive in October while the combination of high inflation and solid labour markets continued to support hawkish actions from central banks globally.

Over the review period, the Fund underperformed its performance measure. The Fund was defensively positioned with underweights (screens) in selected communication sub-sectors, particularly wirelines, media & entertainment, and cable & satellite as well as in selected aerospace & defense issuers within capital goods sector. The Fund also avoided selected tobacco names within consumer non-cyclicals as well as selected automotive issuers within consumer cyclicals. Within financial institutions, the Fund held underweights in selected banking, financial other and life insurance names. Within utilities, the Fund screened selected electric issuers.

During the six-month the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Financial other ^o	0.10%	Basic industry #	(0.05%)
Communications ^o	0.04%	Finance companies #	(0.04%)
REITs ^o	0.01%	Technology #	(0.04%)
		Capital goods ^o	(0.02%)
		Consumer cyclical #	(0.02%)

Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

There are no overweight positions in the Fund. The Fund uses a credit screening approach that only seeks to remove issuers at the highest risk of credit deterioration. Once these issuers have been removed, the Fund will seek to match the beta of the underlying investment universe, and thus the Fund aims to avoid any active overweights.

BlackRock Global High Yield Sustainable Credit Screened Fund

Over the six-month period to 31 October 2022, the Fund's active return was 0.54%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

BlackRock Global Impact Fund

Over the six-month period to 31 October 2022, the Fund's active return was (2.72%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

Over the 6-month period, heightened volatility in global equity markets contributed to the underperformance of the portfolio versus its performance measure, as did a broader rotation from growth into value stocks among investors. Given continuous inflationary concerns and uncertainties around growth expectations, many of our small capitalization names detracted during the period.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Information technology ^o	1.38%	Materials [#]	(1.21%)
Health care [#]	1.00%	Financials ^o	(1.20%)
Consumer staples ^o	0.48%	Utilities [#]	(1.07%)
Communication services ^o	0.32%	Energy ^o	(0.97%)
Consumer discretionary ^o	0.24%	Real estate [#]	(0.46%)

[#] Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

For the 6-month period, the Fund's underweight allocation to information technology boosted active returns the most, mainly driven by positions in the semiconductors and information technology services industries. Conversely, an overweight allocation to materials was the largest detractor, driven by positions in the containers & packaging and chemicals industries.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 31 October 2022 and 30 April 2022:

Largest overweight position			
31 October 2022		30 April 2022	
Sector	Weighting	Sector	Weighting
Utilities	9.98%	Health care	17.99%
Health care	8.98%	Utilities	7.41%

Financials	(8.12%)	Information technology	(8.87%)
Energy	(5.81%)	Financials	(7.95%)
Information technology	(3.00%)	Energy	(4.64%)

There has been a considerable decrease in our overweight allocation to the health care sector during the period. This was mainly driven by several positions we exited in the pharmaceuticals and health care technology industries.

BlackRock Global Target Return: Conservative Fund

Over the six-month period to 31 October 2022, the Fund's active return was (5.85%) underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The Fund invests tactically across asset classes, regions, and sectors with wide universe and asset allocation range.

Markets remained highly volatile after a turbulent start in 2022. Global equities and fixed income assets struggled amid multiple risk events such as monetary policy tightening, elevated inflation, growth concerns and geopolitical conflicts – all with negative impact on sentiments. BlackRock Global Unconstrained Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was (3.03%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

As interest rates rose to tackle inflation, the outlook for the economy deteriorated with equity markets displaying significant volatility over the period. Forward-looking earnings estimates were revised down following both the quarter 2 and quarter 3 results season and all sectors delivered a negative return over the period except for energy. This weighed on Fund returns as the portfolio owns no energy stocks.

We build the portfolio based on bottom-up fundamental analysis and aim to have at least half of the Fund invested in businesses with resilient earnings and cash flows. Even as share prices are volatile, we continue to focus on the long-term sustainability of earnings in our analysis and avoiding trading around the cycle given the inherent market timing and whipsaw risk this creates.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Verisign Inc #	0.61%	ASML holding NV #	(0.67%)

Intuit Inc #	0.37%	S&P global Inc #	(0.29%)

Overweight position - held more exposure than the performance measure.

^o *Underweight position - held less exposure than the performance measure.*

ASML underperformed as investors become increasingly concerned about the outlook for global growth and the potential demand implications for the semiconductor industry. ASML experienced some delays in recognizing revenues during the period, although this timing issue should be resolved next calendar year and we believe ASML's technological edge in lithography ensures the company is well-positioned to deliver long-term sustainable growth. Elsewhere, a position in Nike weighed on returns as inventories built up and the company offered more promotions to maintain demand, putting margins under pressure.

Positive contributors included Verisign, a domain name registry business, which raised its full year margin guidance, and Cadence design systems, a market leader in electronic design automation (EDA) software for designing semiconductors, which raised its full year 2022 revenue and margin guidance at both quarter 2 and quarter 3 results. Structurally, Cadence continues to benefit from the demand for increasingly complex and specific semiconductors.

Portfolio changes are driven by stock-specific investment decisions. Typically, trades are made where the structural investment case changes or when competition for capital forces action. Environmental, governance and social factors risks are integrated into our investment research process at the stock level.

Over the review period a position in Edward life sciences was sold and a new position in thermo fisher scientific was added to the Fund. We became increasingly concerned about the long-term size of the market opportunity for Edward life sciences on evidence that procedure volumes had not rebounded post-COVID to the extent we might have expected. Thermo fisher is a life science instruments and solutions business, utilizing its scale and wide product portfolio to deepen relationships with customers. The company has a strong track record of acquiring businesses, integrating them into the thermo portfolio and ultimately delivering an attractive return on investment. The company benefits from the structural growth in life sciences and biologics, and has a strong track record of innovation to meet evolving client needs.

BlackRock Sustainable Advantage US Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was (0.25%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The Fund underperformed its performance measure over the period characterized by high inflation and rising interest rates. Traditional fundamental, bottom-up stock selection approach as well as market sentiment insights delivered positive results. However, most of these have been offset by macro thematic ideas as well as a weakness in the environmentally focused insights. The top-down macro thematic measure that tilts the positioning to companies that have a high sensitivity of returns to changes in real rates was one of the main detractors over the period.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Health care #	0.59%	Information technology #	(0.60%)
Consumer staples #	0.29%	Consumer discretionary ^o	(0.34%)
Materials #	0.27%	Real estate #	(0.19%)
Industrials ^o	0.25%	Communication services ^o	(0.06%)
Financials #	0.16%		

Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

Aggregate overweight positioning in more defensive health care, consumer staples and materials have delivered most of the positive returns. However, these have been offset by an aggregate overweight in information technology and an underweight in consumer discretionary sectors.

The Fund maintained an overweight in information technology sector and it delivered with positive contributions from Adobe, Hewlett Packard who posted better than expected corporate earnings in later part of the period. However, a large overweight position in Intel Corp stood out as a key detractor to performance after the company had posted disappointing corporate earnings in the third quarter of 2022.

BlackRock Sustainable Advantage World Equity Fund

Over the six-month period to 31 October 2022, the Fund's active return was 0.28%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The performance was greatly supported by the bottom-up stock selection approach with traditional fundamental measures focusing on the balance sheet management delivering solid results. Insights gauging sentiment from the behaviour of a broad set of market participants have also supported the results with measures looking at the analysts' earnings revisions that forecast forward-looking companies' fundamentals delivering results. Moreover, there was a positive contribution from a suite of environmentally focused insights looking at sustainability measures such as credible carbon commitments delivered. However, the top-down macro thematic ideas offset the results with a more defensive measure that tilts the Fund positioning to industries and stocks that demonstrate a consistent ability to outperform in the down markets detracting.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Country	Effect on Fund return	Country	Effect on Fund return
United States [#]	0.47%	Japan ^o	(0.15%)

Spain ^o	0.07%	Italy ^o	(0.03%)

[#] Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

Overweight positions in health care and energy stocks supported by traditional fundamental insights in the United States made the biggest contribution over the period. Also, an underweight positioning in Japan has been additive, however a small overweight in the information technology sector drove majority of losses with semiconductor stocks delivering a weaker performance amid rising chip inventories.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 31 October 2022 and 30 April 2022:

Largest overweight position

The Fund increased its overweight position in the United States with a small reduction of active weight in Canada. The Fund built a larger overweight position in Germany supported by the positive view on consumer discretionary companies. The Fund increased its underweight in Switzerland that was one of the main contributors.

BlackRock Sustainable Equity Factor Plus Fund

Over the six-month period to 31 October 2022, the Fund's active return was (0.30%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

Equity markets finished down over the period as they were challenged by rising inflation and tightening financial conditions which has led to increased fears of an impending recession. On a regional basis, US equities fell the least on the back of a strong jobs market and greater consumer confidence. They outperformed UK and European equities which were more challenged by political uncertainty, rising interest rates and an ongoing energy crisis. Emerging markets were the worst performing region despite finishing the period with a short-lived rally on rumors of a possible COVID-19 reopening in China.

The Fund's underperformance was driven by style factors. Momentum was the top performer over the period, benefitting from persistent trends in market winners and losers. Low volatility was additive during the turbulent period and value insights have continued to perform well as interest rates move higher. Quality factor and diversifying alpha insights detracted slightly over the period and size posted muted positive returns.

During the six-month period, the following were the largest contributors to and detractors from the Fund's return relative to the performance measure:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Communication services ^o	1.10%	Healthcare ^o	(0.66%)

Consumer discretionary ^o	0.27%	Materials [#]	(0.06%)
Information technology [#]	0.25%	Utilities [#]	(0.06%)

[#] Overweight position - held more exposure than the performance measure.

^o Underweight position - held less exposure than the performance measure.

Both sector allocation and stock selection were strongly rewarded over the period. From a sector allocation perspective, an underweight to the communication services sector and an overweight to energy were the most rewarded, while an underweight to materials stocks detracted slightly. From a stock selection perspective, the Fund saw gains across information technology, industrials and consumer staples stocks but these were partly offset by underperformance from stock selection within healthcare, real estate and financials.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 31 October 2022 and 30 April 2022:

BlackRock Systematic ESG Equity Absolute Return Fund

Over the six-month period to 31 October 2022, the Fund's active return was (2.36%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The portfolio struggled against a changeable monetary policy backdrop over the summer. A defensive tilt from top-down macro insights went against the grain as investors positioned in hope of a dovish central bank policy pivot. Our ESG insights in aggregate contributed positively to performance, with techniques measuring tax policies, the sentiment of employees and the water intensity of businesses among the most effective over the period.

Utilities	0.6%	Information Technology	(0.8%)
Communication Services	0.5%	Industrials	(0.5%)
Consumer Staples	0.3%	Energy	(0.2%)

Positioning within real estate was a notable detractor amidst rates driven volatility. Country positioning also went against the grain, namely across Europe.

The following table details the significant portfolio weightings as at 31 October 2022 and 30 April 2022:

31 October 2022		30 April 2022	
Sector	Gross exposure	Sector	Gross exposure
Industrials	91%	Industrials	107%
Financials	73%	Financials	89%
Consumer Discretionary	63%	Information Technology	81%
Information Technology	61%	Consumer Discretionary	78%
Materials	47%	Real Estate	52%

No significant changes to allocations. Overall gross exposure has been reduced slightly over the period, within the Fund's typical range.

BlackRock Systematic Multi-Strategy ESG Screened Fund

Over the six-month period to 31 October 2022, the Fund's active return was (2.36%) underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The market narrative in the second quarter of 2022 shifted from higher inflation concerns to slowing growth risks as the moderation of global growth became more apparent. Developed market government bond yields rallied in the third quarter of 2022 as concerns of a global recession and monetary tightening weighed on investor sentiment. Turmoil in the UK government bond market towards the end of the September also led to heightened volatility globally. Meanwhile, global inflationary pressures remained, with core inflation (excluding food and energy) well above central bank targets in most countries. Despite entering the month with heightened levels of volatility, investor sentiment in global bond markets was much more positive in October while the combination of high inflation and solid labour markets continued to support hawkish actions from central banks globally.

The directional asset allocation strategy was the main detractor over the review period. The macro strategy also negatively contributed, whilst the defensive equity strategy offset some of the losses, as it is designed to generate defensive alpha in down equity markets. Overall, our regime indicator continues to see the economy in a contractionary phase due to a stagflationary shock that had been persisting over the previous months. The portfolio maintains its risk-off stance.

During the six-month period the following were the largest detractors from the Fund's return:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Defensive equity strategy	1.15%	Directional asset allocation	(2.12%)
		Macro strategy	(0.17%)

The following table details the significant portfolio weightings at 31 October 2022 and 30 April 2022:

31 October 2022		30 April 2022	
Sector	Weighting	Sector	Weighting

BlackRock Tactical Opportunities Fund

Over the six-month period to 31 October 2022, the Fund's active return was 0.60%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

INVESTMENT MANAGER'S REPORT (continued)

Fund performance review and activity (continued)

BlackRock Tactical Opportunities Fund (continued)

The macroeconomic backdrop remained volatile over the past six months as countries across the world continued to diverge on key variables such as growth and policy. Slowing growth, persistent inflation, and continued central bank tightening have us positioning the Fund for greater opportunities in cross-country and cross-industry bets and maintaining relatively muted directional positioning in stocks and bonds. The Fund remains focused on positioning in country stocks, bonds, and currencies based on macro fundamentals and pricing developments.

The Fund was positioned net long equities over the period while its net bond position moved from a net long to a net short. Positive returns came primarily from a relative value interest rate strategy that trades a global universe and from a macro thematic strategy. Meanwhile, a relative value bond strategy trading a basket of developed markets and a relative value equity country strategy each detracted.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

Top contributors		Bottom detractors	
Strategy	Effect on Fund return	Strategy	Effect on Fund return
Global relative value interest rate strategy	3.77%	Relative value equity strategy	(1.93%)
Macro thematic strategy	2.61%	Relative value bond strategy	(1.14%)
		Equity timing strategy	(0.58%)
		Bond timing strategy	(0.49%)

In terms of relative value interest rate views, shorts in Poland and South Korea versus a long in China was a key contributor as the Polish and Korean central banks were decisively hawkish to combat rising inflation, while in China policy remains relatively accommodative to support a COVID-battered economy. The Fund's thematic strategy further boosted returns as it was positioned for the US Federal Reserve normalization and global reflation. Our relative value equity and bond strategies detracted from performance. Long positions in German bunds underperformed our short positions in Canada, the UK and Australia over the summer months. The relative value equity strategy was also challenged as longs in select European markets versus a short in US equities detracted in the later months of the period as the US outperformed.

The following table details the significant portfolio weightings at 31 October 2022 and 30 April 2022:

31 October 2022		30 April 2022	
Equities (%)	Weighting	Equities (%)	Weighting
Japan	(3.66%)	North America	(6.47%)
North America	(1.50%)	Emerging markets	(3.35%)
Emerging markets	1.87%	Japan	0.59%
Asia (ex-Japan)	4.49%	Europe	5.70%
Europe	6.56%	Asia (ex-Japan)	15.03%
Bond (years duration)		Bond (years duration)	
Europe	(3.65)	North America	(1.24)
Japan	(0.95)	Japan	(0.50)
North America	0.05	Asia (ex-Japan)	(0.31)
Emerging markets	0.73	Emerging markets	0.43
Asia (ex-Japan)	2.02	Europe	4.78

The Fund maintained its long equity exposure throughout the period but moved its short duration profile as the medium-term outlook weakened due to persistently high inflation, slowing activity in China, and hawkish monetary policy signaling. Within equities, the Fund prefers Asia-ex Japan and emerging markets to Japan, the US, and Europe. Within bonds, the Fund is long in the UK and Australia versus Germany in developed markets, and China against South Korea in emerging markets. The Fund does not have any active currency views as of period end.

BLACKROCK FUNDS I ICAV

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is structured as an Irish collective asset-management vehicle and is authorised by the CBI and is governed by the provisions of the UCITS Regulations with its registered office at 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements with the exception of those outlined below.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

Specific valuation techniques used to value financial instruments classified as level 2 and/or level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for investments which are a share of participation in an investee collective investment scheme ("CIS") are valued at the unaudited NAV, and where available the independently audited NAV, on the valuation date of such unit of participation as calculated by the administrator of the investee CIS and in accordance with the requirements of the scheme of which the relevant investment is a share of participation. The unaudited NAV of the underlying investee CIS is reflected gross of any redemption costs which may potentially arise upon redemption from the underlying CIS. The unaudited NAV of the underlying investee CIS may be subject to adjustments upon issuance of their respective independently audited financial statements and such adjustments may be material to the Fund's financial statements;
- (iii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of the each Fund;
- (iv) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;
- (v) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (vi) for total return swaps, the value of the estimated cash flows based on the market value of the underlying reference asset or index at the balance sheet date;
- (vii) for inflation swaps, the present value of the estimated future cash flows based on observable yield curves. Certain zero coupon inflation swaps may be valued using a single quote from the swap counterparty, where the model and inputs are not market observable.
- (viii) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the balance sheet date;
- (ix) for SPAC PIPE commitments, the use of underlying quoted market prices and application of discounts for lack of marketability, volatility and deal probabilities;
- (x) for foreign currency options, option pricing models; and
- (xi) for other financial instruments, discounted cash flow analysis.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk, or certain CISs which have gates or redemption restrictions imposed or that can't be redeemed within 90 days, are included in level 3.

BLACKROCK FUNDS I ICAV

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Fund's financial assets and financial liabilities measured at fair value as at 31 October 2022 and 30 April 2022:

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a 'chargeable event'. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- Certain exempted Irish tax resident shareholders who have provided the Entity with the necessary signed annual declarations.

NOTES TO THE FINANCIAL STATEMENTS (continued)

6. Taxation (continued)

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable by the Entity or its shareholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

7. Share capital

Authorised

The authorised share capital of the Entity is 2 subscriber shares of a par value of €1.00 each and 500,000,000,000 participating shares of no par value.

Subscriber shares

2 subscriber shares are currently in issue and are held by the Manager and nominees of the Manager at 31 October 2022 and 30 April 2022. They do not form part of the NAV of the Entity. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors this disclosure reflects the nature of the Entity's investment business.

Voting rights

The holders of the subscriber shares and redeemable shares shall, on a poll, be entitled to one vote per share.

No provisions have been recognised by the Funds against amounts due from related parties at the financial period end date (30 April 2022: Nil).

No amounts have been written off during the financial period in respect of amounts due to or from related parties (30 April 2022: Nil).

No commitments secured or unsecured or guarantees have been entered into with related parties during the financial period (30 April 2022: Nil).

11. Credit facility

The Funds entered into a credit facility with JPMorgan Chase Bank, N.A. ("JPMorgan") whereby JPMorgan, together with other syndicated lenders, made a portion of a USD 300,000,000 credit facility available to the Funds. The portion of the USD 300,000,000 credit facility will be allocated to the Funds based on the credit facility agreement dated 23 April 2021. On 22 April 2022, an amended credit facility agreement was issued to facilitate an increase in the credit facility available by JPMorgan and the other syndicated lenders to USD 450,000,000. This credit facility will be utilised by the Funds for temporary funding purposes, including, without limitation, the funding of investor redemptions. Any interest and commitment fees in relation to drawdowns from such credit facility are paid out of the assets of the Fund. Any new Fund will not automatically be subject to a credit line and will therefore be required to be added by way of a joinder process. This process includes, inter alia, any necessary due diligence being carried out by the lenders in order to approve the addition of the new Fund. During this year, such Funds will not be subject to, or able to draw down on, any credit line. Furthermore, there is no guarantee that the addition of any new Fund will be approved by the lenders, or that credit will be available to a Fund since the credit line is subject to availability (on an equitable allocation basis) between the Fund and other BlackRock Funds participating in the credit agreement. As such, certain Funds may not be subject to the credit line and will not incur any fees with respect to same.

A loan commitment fee is charged on a daily basis in relation to this credit facility which is included in the income statement under caption "Credit administration fee". The loan commitment fee is charged at 0.10% on the outstanding balance.

The credit facility was not used during the period.

12. Commitments and contingent liabilities

There were no significant commitments or contingent liabilities as at 31 October 2022 and 30 April 2022.

13. Subsequent events

On 2 November 2022, the Class X USD Distributing (Monthly) was launched for the BlackRock Global Corporate Sustainable Credit Screened Fund and the BlackRock Global High Yield Sustainable Credit Screened Fund.

On 11 November 2022, the Class I EUR Distributing (Annual) was launched for the BlackRock Global Impact Fund.

On 17 November 2022, the BlackRock Global Corporate ESG and Credit Screened Fund changed its name to the BlackRock Global Corporate Sustainable Credit Screened Fund.

Other than the above, there have been no events subsequent to the financial period end, which, in the opinion of the Directors, may have had an impact on the financial statements for the financial period ended 31 October 2022.

14. Approval date

The financial statements were approved by the Directors on 19 December 2022.

INFORMATION FOR INVESTORS IN SWITZERLAND (continued)

Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The performance figures do not consider charges and fees that may be levied at the time of subscription or redemption of shares. Levels and bases of taxation may change from time to time.

The ongoing charge for each share class, is disclosed in the following table for the twelve-month period ended 31 October 2022:

¹TER disclosed is the synthetic TER in line with Swiss Funds & Asset Management Association ("SFAMA") requirements.

TRANSACTIONS WITH CONNECTED PERSONS

In accordance with the requirements of the CBI, the Manager shall ensure that any transactions carried out between each Fund and the Manager or Depositary to a Fund, the delegates or sub-delegates of the Manager or Depositary (excluding any non-group company sub-custodians appointed by a Depositary) and any associated or group company of the Manager, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and in the best interests of the shareholders.

The Directors are satisfied that there are arrangements in place, as evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Persons and that transactions with Connected Persons entered into during the financial year complied with this obligation.

SOFT COMMISSIONS

There were no soft commission arrangements entered into by the Investment Manager on behalf of each Fund during the financial year ended 31 October 2022.

CROSS INVESTMENTS

As at 31 October 2022, there were no cross umbrella investments held by any Fund within the Entity.

BLACKROCK FUNDS I ICAV

EFFICIENT PORTFOLIO MANAGEMENT AND SECURITIES FINANCING TRANSACTIONS

Efficient portfolio management techniques

The Directors may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI and the prospectus, employ techniques and instruments relating to transferable securities, including investments in OTC FDIs provided that such techniques and instruments are used for efficient portfolio management purposes or to provide protection against exchange risk or for direct investment purposes, where applicable.

The underlying exposure obtained through FDI and the identity of the counterparties to these FDIs at the financial year end are disclosed on the relevant Fund's schedule of investments.

Securities lending

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Advisors (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depository on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depository or the securities lending agent.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and as a proportion of the Fund's NAV, as at 31 October 2022. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction.

BlackRock Sustainable Advantage World Equity Fund	USD	7.21	6.71
BlackRock Sustainable Equity Factor Plus Fund	USD	0.70	0.61
BlackRock Tactical Opportunities Fund	USD	3.53	2.48

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. Each Fund receives at least 62.5% while securities lending agent receives up to 37.5% of such income with all operational costs borne out of the securities lending agent's share.

The following table details the value of securities on loan (individually identified in the relevant Fund's schedule of investments), analysed by counterparty as at 31 October 2022.

All securities on loan have an open maturity tenor as they are callable or terminable daily.

Total return swaps

All total return swaps are entered into by each Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC FDIs (including total return swaps) entered into by the parties. The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all OTC FDIs entered into by a Fund under the ISDA Master Agreement, not just total return swaps.

All collateral received/posted by each Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

The collateral received/posted by each under the ISDA Master Agreement in respect of variation margin is transferred bilaterally under a title transfer arrangement. Collateral received by each Fund in respect of variation margin is held in an account in the name of the Depository on behalf of each Fund. Collateral received is segregated from the assets belonging to the Fund's Depository. The collateral posted by the Fund under the ISDA Master Agreement that constitutes the Independent Amount (sometimes referred to as initial margin) is posted by the Fund under a security interest arrangement.

The following table details the value of total return swaps as a proportion of the Fund's NAV, as at 31 October 2022 and the income/returns earned for the year ended 31 October 2022. The value of total return swaps is based on the underlying exposure value on a gross absolute basis.

		% of NAV	Total returns earned '000
BlackRock Advantage Emerging Markets Equity Fund	USD	6.64	(36)
BlackRock Systematic ESG Equity Absolute Return Fund	EUR	485.16	(295)
BlackRock Systematic Multi-Strategy ESG Screened Fund	USD	102.58	465
BlackRock Tactical Opportunities Fund	USD	5.66	(249)

The total returns earned from total return swaps is presented on a total return basis, including related interest and dividend income or expense and net gains/losses from fair value price movements. All returns and costs from total return swaps will accrue to the Fund and are not subject to any returns or costs sharing arrangement with the Fund's Manager or any other third parties.

The following table details the underlying exposure value for total return swaps, analysed by counterparty as at 31 October 2022.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities and ETFs received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

All cash received or posted as collateral has an open maturity tenor as it is not subject to a contractual maturity date.

Reuse of collateral received

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.
