Schroder Global Multi-Asset Balanced Portfolio

a sub-fund of Schroder Investment Solutions Company

Class F Accumulation GBP (GB00BZCR4F60)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth and income by investing in a diversified range of assets and markets worldwide with a target average annual volatility (a measure of how much the fund's returns may vary over a year) over a rolling five year period of between 50% to 65% of that of global stock markets (represented by the MSCI All Country World index).

Investment Policy

The fund may invest up to 100% of its assets in collective investment schemes, closed ended investment schemes, real estate investment trusts, exchange traded funds and other Schroder funds which themselves invest worldwide in any of the following:

- (A) equity or equity related securities;
- (B) fixed income securities including government bonds and corporate bonds;
- (C) currencies; and
- (D) alternative assets.

Alternative assets may include funds that use absolute return strategies or funds that invest indirectly in real estate and commodities.

The fund may also invest directly in (A), (B) or (C).

The fund is part of the Schroder Global Multi-Asset Portfolio range, which offers five funds with different expected combinations of investment risk and return. The fund aims to take a balanced approach, which means that it aims to be the third highest risk fund in this range, with a balance of 'lower risk' assets (such as certain fixed income securities) and 'higher risk' assets (such as

certain equities). The fund may invest between 20 and 60% of its assets, directly or indirectly, in equity and equity-related securities.

The fund seeks to achieve the target volatility range by varying the weighting of asset types. During the relevant rolling five year period the fund's volatility may be higher or lower than the target range if the investment manager believes it is necessary to seek to mitigate potential losses. The fund's potential gains and losses are likely to be constrained by the aim to achieve its target volatility range.

The fund may invest up to 100% of its assets in Schroder funds. The fund may also invest in warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently (for more information please refer to section 10 of appendix III of the prospectus).

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the Investment Association Mixed Investment 20-60% shares sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial adviser.

The ongoing charges figure is based on the last year's expenses for the year ending December 2023 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail share classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this share class of the fund is 0.19%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 10/01/2017.
