

# abrdn (Lothian) Japan Trust

Institutional Acc GBP

31 May 2024

## Objective

To generate growth over the long term (5 years or more) by investing in Japanese equities (company shares).

**Performance Target:** To achieve the return of the MSCI Japan Index, plus 3% per annum over rolling three year periods (before charges). There is no certainty or promise that the Performance Target will be achieved.

**Performance Comparator:** The Investment Association Japan Equity Sector Average. The MSCI Japan Index (the "Index") is a representative index of the Japanese stock market. Investment Association Japan Equity Sector Average (the "Sector") is a representative group of investment funds with a focus on Japanese equities.

## Portfolio securities

- The fund will invest at least 70% in Japanese equities.
- The fund may also invest other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

Performance Data: Share Class I Acc.

Benchmark history: Performance comparator - IA Japan Equity Sector Average

Source: Lipper. Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested.

"Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark. These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

**Past performance is not a guide to future returns and future returns are not guaranteed.**

## Risk and reward profile

This indicator reflects the volatility of the fund's share price. See the relevant UCITS Key Investor Information Document (KIID) or PRIIPs Key Information Document (KID) for details

## Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

## Management process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and company level.
- Their primary focus is on selecting companies using research techniques to select individual holdings. The research process is focused on finding attractive high quality companies that can be held for the long term through the assessment of their business, the industry they operate in, their financial strength and the capability of their management team.
- Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the Index.

## Derivative usage

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to equities.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website [www.abrdn.com](http://www.abrdn.com) The Prospectus also contains a glossary of key terms used in this document.

<sup>1</sup>The Historic Yield as at 30/04/2024 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

<sup>2</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

<sup>3</sup>The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.
