

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Marlborough Nano-Cap Growth Fund Class P Shares

A Sub-fund of the IFSL Marlborough No2 OEIC (ISIN Accumulation GB00BF2ZV048)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to increase the value of your investment by more than any increase in the FTSE SmallCap Index (ex-Investment Companies) over any 10 year period, after any charges have been taken out of the Fund, however, there is no certainty this will be achieved.

At least 80% of the Fund will be invested in the shares of very small companies and investment trusts listed on UK stock exchanges. These are companies whose market capitalisation (the market value of a company's shares) is £200m or less at the time the initial purchase is made.

The aim of the investment team is to identify companies which they believe show good long-term growth potential or which appear to be under-valued given their future prospects.

The team consider economic and market conditions but the main focus is on individual company analysis and selection.

Following the same investment philosophy the Fund may also invest in companies which are listed on overseas stock exchanges, the shares of larger companies, other securities which offer returns linked to the company performance, such as, preference shares, convertible bonds and warrants, and unquoted companies.

The Fund is actively managed, which means the investment manager decides which investments to buy or sell and when. The Fund invests in a diverse portfolio

of investments and is not constrained by any industry or sector.

The Fund may hold cash, government bonds and money market instruments (short term loans typically issued by governments and banks) to enable ready settlement of liabilities (including the redemption of units), for the efficient management of the Fund and in order to meet its objective.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA UK Smaller Companies sector. You may want to assess the Fund's performance compared to the performance of this sector.

The performance benchmark is the level of performance the Fund aims to deliver however there is no certainty this will be achieved. The FTSE SmallCap Index has been chosen as the performance target as the composition of the index is broadly similar to the holdings in the Fund.

The IFSL Marlborough Nano-Cap Growth Fund does not pay income. Instead, any income received by the Fund is reinvested back into the Fund.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund will be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than

more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund will invest mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/07/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 22 - 24 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.81%
------------------------	-------

Charges taken from the fund under certain conditions
