

Ashmore SICAV

Société d'Investissement à Capital Variable Luxembourg
R.C.S. Luxembourg B 90279

UNAUDITED SEMI-ANNUAL REPORT

For the period ended 30 June 2023

General Information

The information represented in this report relates to the period from 1 January 2023 to 30 June 2023. It should not be taken as an indication of the future development of Ashmore SICAV (the “Company”).

The Board of Directors may establish different portfolios of assets in one or more Sub-Funds of the Company at any time to meet, in its opinion, the needs of different Shareholders. During the period under review, the Company comprised 30 Sub-Funds, namely:

- Ashmore SICAV Emerging Markets Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund
- Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund
- Ashmore SICAV Emerging Markets China Bond Fund
- Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund (entered liquidation on 27 June 2023)
- Ashmore SICAV Emerging Markets Local Currency Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund
- Ashmore SICAV Emerging Markets Total Return ESG Fund
- Ashmore SICAV Emerging Markets Absolute Return Debt Fund
- Ashmore SICAV Emerging Markets Total Return Fund
- Ashmore SICAV Emerging Markets Investment Grade Total Return Fund
- Ashmore SICAV Emerging Markets Multi-Asset Fund
- Ashmore SICAV Emerging Markets Corporate Debt Fund
- Ashmore SICAV Emerging Markets Corporate Debt ESG Fund
- Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund
- Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund
- Ashmore SICAV Emerging Markets Asian High Yield Debt Fund
- Ashmore SICAV Emerging Markets Short Duration Fund
- Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund
- Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund
- Ashmore SICAV Emerging Markets Frontier Equity Fund
- Ashmore SICAV Emerging Markets Active Equity Fund
- Ashmore SICAV Middle East Equity Fund
- Ashmore SICAV Emerging Markets Equity Fund
- Ashmore SICAV Emerging Markets Indonesian Equity Fund
- Ashmore SICAV Emerging Markets Equity ESG Fund
- Ashmore SICAV Global Liquidity US\$ Money Market Fund
- Ashmore SICAV Emerging Markets Shariah Active Equity Fund (launched on 16 May 2023)

This report does not constitute an offer or an invitation to purchase Shares of the Sub-Funds referred to herein. Subscriptions are only valid if made on the basis of the current Prospectus and Key Investor Information Document (KIID) supplemented by the latest audited annual report. Should the reference date of the audited annual report date back more than eight months, the subscriber must also be supplied with a semi-annual report.

The figures stated in this report are historical and not necessarily indicative of future performance.

1: Introduction

Investment Manager's Report

Market Review

Markets climbed the wall of worry, defied the bearish consensus and a banking sector crisis to post strong returns across all asset classes during Q1 2023. This was driven notably by strong gains in January as global markets celebrated the re-opening of China. Despite lingering inflation concerns, the rally was sustained by positive surprises in economic data releases, particularly in the US and Emerging Markets (EM). Global equities jumped by 7.2% in Q1, led by European stocks (DAX Index +13.7%) and Tech (NASDAQ +20.5%). After a strong start, cyclical sectors retreated, notably the Financials sector (Standard and Poor's (S&P) Financials Index -1.6%), hit by the Silicon Valley Bank (SVB) and Credit Suisse debacles. EM equities lagged the global markets rally (MSCI EM Index +4.0%), despite strong performance in EM heavyweights such as Mexico, Taiwan, and Korea (MSCI country indices up 20.3%, 14.8% and 9.5%, respectively). In core interest rate markets, the 2-year and 10-year US Treasury yields both fell by 40 basis points (bps) over the quarter, but this failed to capture the enormous yield curve changes in March 2023, when the 2-year note rallied by 150 bps from peak to trough, clocking a 12 sigma move before the US Federal Reserve System (Fed) support package for troubled US banks was announced. Despite the huge spike in interest rate volatility, which saw the MOVE Volatility Index reach 200 for the first time since September 2008, both the US 10-year breakeven and the 2s/10s curve closed the quarter unchanged at 2.32% and -0.56%, respectively. In credit markets, the lower core bond yields allowed indices to post strong returns despite tighter financial conditions: an index of US IG corporate bonds (JP Morgan JULI) rose by 3.6% in Q1, as spreads widened by 4 bps to 156 bps. This was matched by US High Yield (HY) bond prices, which posted index returns of 3.80% and saw spreads move tighter by 2bps to 500 bps. Euro-denominated corporate Investment Grade (IG) bond prices rose by 2.0% as spreads widened by 6 bps to 1,170 bps. In a topsy-turvy quarter for short-term interest rate expectations, the US dollar ended the period circa 1.1% lower versus Developed Markets (DM) trading partners, and the bearish US dollar trend had been firmly set in place. EM FX out-performed, posting a 2.2% gain in nominal exchange rates owing notably to a strong rebound in Latin America and Central Europe. The uncertain growth outlook weighed on oil and gas prices, but other commodities performed well. Precious metals were buoyed by lower interest rates, and gold rallied by 8%.

The banking crisis that started in Q1 in the US continued to weigh on financial markets through the start of Q2 2023, when First Republic Bank came under pressure and was eventually bought by JP Morgan Chase. This allowed global

banking stocks to trough in early May, and the markets to move on to other things. The debt ceiling debate in the US briefly caused another period of heightened uncertainty during the month of May, when T-bills rates shot up, but the swift resolution of the issue allowed risk premia to ease again in June and markets to rally strongly. The VIX Index of equity volatility fell back from 18 to 13.6 at the end of the quarter, its lowest level since the start of the pandemic. Global equities advanced for a third consecutive quarter, with the MSCI World Index rising 6.3%, helped by US stocks (S&P 500 Index +8.3%) and tech stocks in particular (Nasdaq +15.2%), while European stocks (Eurostoxx 50 Index +1.3%) and EM (MSCI EM Index -0.1%) lagged, due notably to China (Shanghai Composite Index -2.2%). While headline inflation continued to decline in Q2 (June US Consumer Price Index (CPI) 3.0% versus 5.0% in March), core inflation remained sticky (June Core CPI 4.8% versus 5.6% in March). Likewise, Euro Area core inflation came in at 5.4% in June versus 5.7% in March. Services inflation and upward pressure on wages from tight labour markets have been of concern to central banks, who tightened their policy rates further: the Fed hiked by another 25 bps in May, and then paused at the June Federal Open Market Committee (FOMC) for the first time in over a year but signalled two further rate hikes for the rest of 2023. The European Central Bank (ECB) hiked by 25 bps in both May and June, taking their deposit rate up to 3.5%. This upward pressure on funding costs caused further inversion in the core bond yield curves, especially in the US: the 2-year US Treasury yield rose by 87 bps to 4.90%, and the 10-year Treasury yield rose by 37 bps to 3.84%. In the UK, the 2-year Gilt yield rose by a whopping 183 bps to 5.27% during the quarter. The shape of the yield curve is often viewed as a tell-tale sign of recession, and there has been lingering concerns about the risk of recession. The markets have also been concerned about the disappointing pace of economic growth in China. This notably translated into a fall in commodity prices during the quarter, in particular Brent crude oil prices (-6.1%), metals (copper -8.6%) as well as wheat (-8.1%) and corn (-16.0%).

Overview by Investment Theme

External Debt

The External Debt theme represents US dollar denominated EM sovereign and quasi-sovereign bonds. Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan Emerging Market Bond Index Global Diversified Index (EMBI GDI), which returned +4.09% in the six months to 30 June 2023.

Investment Manager's Report *continued*

Overview by Investment Theme *continued*

External Debt *continued*

Egypt and Ecuador were the top detractors from performance for the JP Morgan EMBI GDI. Egypt and the International Monetary Fund (IMF) continue to work towards the first review of the US\$ 3bn facility established in December 2022. The Egyptian government has made progress on divestment of state-owned assets, while progress towards a flexible exchange rate regime remains a key objective. The government appears motivated to address concerns expressed by Moody's to avoid a potential downgrade, with presidential elections looming in March/April 2024. In Ecuador, the rejection of all questions posed in a referendum dealt President Guillermo Lasso a major blow and led to a pullback in asset prices after several months of improvement. The initiation of impeachment proceedings against Lasso, which look increasingly likely to result in Lasso's removal from office, has been a further hit. Lasso holds a trump card in that he could invoke the "Muerte Cruzada" which would dissolve the National Assembly and permit Lasso to rule by decree until the election of a new President and Assembly within six months.

Sri Lanka, Nigeria, Mexico, Argentina and El Salvador were amongst the top contributors to performance for the JP Morgan EMBI GDI. Having secured a US\$ 3bn rescue package from the IMF, Sri Lanka remained on track to meet its quantitative targets, while making progress on debt restructuring with announcement of a domestic debt plan and draft terms of a restructuring of the country's sovereign external debt. Nigeria's new president Bola Tinubu started his term with rapid implementation of a number of reforms including the elimination of fuel subsidies and floating the national currency, the Naira. A new oil refinery coming online will lead to an improvement in the important oil sector, which accounts for 90% of the country's exports. Tinubu showed his independence by suspending the governor of the central bank. Candidates have been confirmed for the upcoming presidential election in Argentina, with Economy Minister Sergio Massa heading the Peronist party's ticket. The markets responded well to the match-up with the opposition's likely candidate Patricia Bullrich. The IMF announced that negotiations to reformulate the current US\$ 44bn program are ongoing. President Nayib Bukele blocked publication of the IMF's Article IV consultation report on the "economic situation and policy strategy" of El Salvador. The move will exacerbate tensions with international lenders even as El Salvador maintains it is still working towards a US\$ 1.3bn refinancing agreement with the IMF that would have necessitated increased revenue and spending cuts.

Local Currencies and Local Currency Bonds

Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan GBI-EM GDI, that returned +7.79% in the six months to 30 June 2023.

EM local currencies continued to rebound in the first quarter as the US dollar remained on the backfoot in anticipation of a slower rate hike cycle in the US for the remainder of 2023. The DXY Dollar Index lost -1.0% in Q1 2023 with the Euro the chief beneficiary (up 1.3% against the US dollar). EM currencies also performed well with the FX component of the index nudging up 2.2%. Rates also contributed as index yields dropped to 6.59% from 6.86% to generate a quarterly return of 5.2%.

The EM local currency bond index (JP Morgan GBI-EM GDI) was up 2.5% during Q2 2023, thanks to the strong performance of local bond curves (index yield tightened by 25 bps to 6.3%). Contribution from FX was negative (-0.2%) owing to the rebound in the US dollar observed during May. Latin American local bond indices surged 11.1% over the period, while Middle East and Africa (MEA) lagged (ZAR and TRY indices were down 7.5% and 29.5%, respectively).

Over the period, among the best performers were Colombia, Hungary and Brazil with six month returns of 39.9%, 25.0% and 21.1%, respectively. Laggards included Turkey, Egypt and South Africa, posting returns of -36.2%, -18.1% and -8.3%, respectively.

The central bank of Hungary kept its policy rate unchanged at 13.0%, in line with consensus. The year-on-year (yoy) rate of average gross wage inflation declined to 15.7% in April 2023 from 16.9% in March, significantly lower than consensus at 18.0%. The current account deficit narrowed to US\$ 0.6bn in Q1 2023 from US\$ 4.8bn in Q4 2022 (revised from US\$ 4.3bn), in line with consensus, but was also the best result since March 2021. Just like Germany, Hungary went into a recession in the first quarter of the year. Hungary's Gross Domestic Product (GDP) fell 0.3% quarter-on-quarter (qoq) in Q1 2023, following a 0.6% qoq contraction in the previous period. Hungary is undergoing a major external rebalancing: it recorded a trade surplus of EUR 1.1bn in Q1, or circa 3% of GDP in annualised terms, a return to pre-COVID-19 levels of external balance. This is in sharp contrast with the large deficit (around 8% of GDP in annualised terms) recorded at some point in 2022.

The Governor of Brazil's Central Bank, Roberto Campos Neto, struck a hawkish tone when keeping its policy rate at 13.75% in June 2023, despite much softer than expected inflation. Data from statistics agency IBGE showed yoy Consumer Price Index (CPI) inflation dropped below 4% (coming in at 3.94%) for the first time since 2020, below expectations. The S&P Global Brazil Composite Purchasing Managers' Index (PMI) rose to 52.3 versus 51.8 prior quarter, while the Services PMI was somewhat lower at 54.1 versus 54.5 prior quarter. The National Monetary Council (CMN) decided to keep the 2025 inflation target unchanged at 3.0% with a +/- 1.5% interval band but opted to extend the time horizon from a calendar year to a 24-month rolling period.

1: Introduction

Investment Manager's Report *continued*

Overview by Investment Theme *continued*

Local Currencies and Local Currency Bonds *continued*

Central Bank Governor Roberto Campos Neto highlighted this as a positive evolution of the inflation target regime system and will allow the institution to target inflation at a more relevant time-horizon for its monetary tools. Economic data was marginally stronger than expected as government transfers, lower inflation and the strong BRL offset the drastic tightening in financial conditions from higher rates. The economic activity index rose 0.6% month-on-month (mom) in April after declining 0.1% in March, bringing the yoy rate down to a still robust 3.3% from 5.7% over the same period. GDP growth for Q1 2023 surprised positively, coming in at 4.0% vs. 3.1% expected (and 1.9% prior quarter).

The Turkish lira sold off by just over 20% in June, following President Recep Erdogan's win in the second round of Turkey's elections after which the currency was allowed to weaken. In a sign of a shift from the past unorthodox monetary policies, the Central Bank of Türkiye (CBT) under new governor Hafize Gaye Erkan hiked its policy rate by 650 bps to 15.0%, significantly below the consensus estimate of a 1,150 bps hike to 20.0%. The statement accompanying the announcement emphasised the willingness to implement a gradual adjustment of policy rates and heterodox administrative measures that were implemented by the previous governor (now deputy governor). Türkiye's annual inflation rate eased for the seventh consecutive month to 39.6% in May, mainly due to the government's move to provide unlimited free natural gas for all households for a year, but it is still far from the CBT's target of 22.3% for 2023. Türkiye's current account deficit widened from US\$ 4.9bn in March to US\$ 5.4bn in April.

Some positive economic data in South Africa lifted the sombre mood after a few quarters of disappointing economic performance. First, the current account deficit narrowed to ZAR 66.2bn (1% of gross domestic product (GDP)) in Q1 2023 from ZAR 155.3bn in Q4 2022 (2.3% GDP), which was well below market expectations, and the smallest deficit number since Q2 2011. The trade surplus notably widened substantially from ZAR 34.2bn to ZAR 103bn, due to the increased value of goods exports. Manufacturing production also surprised positively by recording a 3.4% yoy gain in April 2023, the first annual gain in six months, and better than consensus forecasts of 2.5% yoy. This is consistent with better news regarding the impact of load shedding, which has essentially been suspended during working hours. Electricity Minister Kgosientsho Ramokgopa said the energy availability factor had improved to 60%, the strongest since August 2022. CPI inflation increased by 0.2% mom in May after being 0.4% in April, bringing the yoy rate down 50 bps to 6.3% which was 20 bps below consensus, while core CPI declined by 10 bps to 5.2%, in line with consensus.

Corporate Debt

Ashmore SICAV Funds which are managed under this theme are primarily benchmarked against the JP Morgan CEMBI Broad Diversified Index. The benchmark returned +3.6% in the six months to 30 June 2023.

The first quarter of 2023 ended with positive returns, but a softer risk sentiment prevailed especially in March. During the quarter, we have witnessed a lot of volatility in the US Treasury market with yields rallying in January, selling off in February and rallying strongly again in March. EM bonds, which trade predominantly on price rather than spread, have struggled to keep up with the Treasuries, resulting in a widening in credit spreads during the quarter. Spreads widened more in the HY space compared to IG, nevertheless, IG credits slightly underperformed HY credits in terms of total return, given a longer average duration position.

Primary market activity for EM corporate debt remained subdued with issues declining again in June 2023 when we saw only US\$ 21bn of new supply of EM corporate bonds. Issuance remains well below historical averages for the summer months, with a typical June seeing on average US\$ 41bn of new supply (past five years average). Asia was the most active region at US\$ 11bn, followed by Latin America with US\$ 6bn.

In terms of net issuance, robust repayments during June meant that we continue to see negative net supply this month again at US\$ -3bn. Net supply for year-to-date (YTD) stands now at US\$ -83bn.

The Philippines, Macau, Indonesia, Argentina and India were among the top contributors for the index over the period. There were no notable detractors over the period.

Equities

The MSCI EM Index returned +4.89% for H1 2023. Global markets saw strong performance over the period driven by a pause in the Fed's tightening cycle, and broadly supportive global macroeconomic data. EM participated in the rally although uncertainty over the economic recovery in China weighed on the performance of the asset class relative to global peers.

Across the globe, headline inflation is falling driven by food and oil prices, though core inflation remains high and 'sticky', notably in DM. We expect core inflation will remain elevated in DM until labour markets loosen.

Investment Manager's Report *continued*

Overview by Investment Theme *continued*

Equities *continued*

The prospect for monetary easing in EM will enhance the operating environment for many industries, as well as providing a liquidity boost to stock markets. In general, EM countries have proactively tightened monetary policy and are expected to go through a normal interest rate cycle. The next stage is interest rate cuts, with Brazil and Chile likely to be among the first. These drivers have positive feedback loops for activity levels, discretionary spending, and domestic economic growth trajectories. EM FX, which are already seeing support from high carry, will see the additional benefit of capital flows as a result.

Artificial intelligence (AI) presents significant opportunities in EM most notably in select semiconductor/hardware industries in Korea and Taiwan. Many of these companies have leading industry positions and will be direct beneficiaries. Internet companies in other markets, such as China, are adopting the technology as well, and we expect their businesses to be positively impacted in the coming years.

Over the past six months, China has had an inconsistent economic recovery. Business and consumer sentiment have taken time to fully heal from the scarring of the COVID-19 Pandemic and recent regulatory changes. In the coming years, a dynamic corporate sector and resilient consumer balance sheets will be the key enablers of economic growth. On the other hand, we expect the real estate sector will present continued challenges. At the corporate level, businesses continue to control costs and deliver growth despite the slow recovery in domestic and export markets. A recent research trip highlighted how companies continue to expand their technology and technical capabilities to position themselves to take market share from overseas competitors. The market eagerly awaits news of stimulus, and the recent State Council meeting previewed some areas of policy focus. However, the magnitude and timing of these policies remain uncertain. In other noteworthy news, the regulatory environment for companies in China has swung back to being positive. We expect the macroeconomic backdrop will gradually improve over time, and the current uncertainty is providing an excellent opportunity to invest in the technology and consumer segments of the market.

Meanwhile, in our view, several other EMs are undergoing strong domestic capital expenditure cycles and providing attractive investment opportunities. Mexico is benefiting from US corporate reshoring, India and Malaysia are successfully positioning themselves as alternative manufacturing hubs to China, while Indonesia has increased downstream processing for nickel which has boosted exports and moved the country to a current account surplus.

All in all, in our view, the outlook for EM is bright. Our expectation is that China will pass through recent headwinds and become a tailwind for the asset class. With that said, we remain mindful of the macro challenges which could present themselves given the tighter monetary policy in DM.

Outlook

The economic picture is contrasted, between improving data in the US and EM (ex-China) but disappointing economic performance in Western Europe. The US matters more than Europe for global growth, but a return to a healthier growth dynamic in China is important for the global outlook. After a period of counter-cyclical policy, the focus of Chinese policymakers is set to return to economic growth. Weak manufacturing data in May 2023, and concern surrounding domestic consumer sentiment led the government to cut policy rates in June. At a State Council meeting later in the month, government officials discussed increasing domestic demand through stimulus targeted at green energy/infrastructure/high-end manufacturing with additional policies designed to support the real estate sector. Ultimately, we expect this to be beneficial to the Chinese consumer.

The second theme we are looking at is the out-performance of EM currencies, where we are seeing the formation of a positive trend that is gaining momentum: the US dollar has been weakening since last October 2022, and has been unable to rebound at various turns when there was an opportunity to do so: e.g., the risk aversion episode during the SVB crisis last March. It is interesting to note that the US dollar has remained weak despite the recent hawkish Fed surprise, and despite very dovish central banks and weaker currencies in China and Japan. The strength of EM currencies, and the resilience of the rally in local markets indicate a return to self-confidence in many EM countries, where local investors and corporate treasury managers are returning to local currency deposit accounts. We expect that cross-border inflows will follow suit in the second half of 2023.

Mexico is benefiting from US corporate reshoring, while India and Malaysia are successfully positioning themselves as alternative manufacturing hubs to China. In Indonesia, downstream processing for nickel has increased which has boosted exports and provided a support for a sustainable current account surplus. These dynamics support trade flows and brighten the outlook for FX. We also believe that several countries have additional scope to ease monetary policy, which should improve the operating environment for local businesses.

1: Introduction

Investment Manager’s Report *continued*

Overview by Investment Theme *continued*

Outlook *continued*

Lastly, while funding conditions remain challenging for highly indebted countries, we have finally seen progress on sovereign debt resolution discussions (e.g., the Common Framework deal in Zambia) and an international agreement on an increase in the IMF/World Bank (WB) lending capacity. These decisions will provide immediate debt relief where it is needed the most. Besides, the IMF has already moved to approve more financing in programme countries such as Pakistan and Argentina – two countries where we expect market friendly administrations to be elected in the autumn term 2023.

Notes to the Consolidated Financial Statements

1. General

Ashmore SICAV (the “Company”) is incorporated as a société anonyme (public limited company) under the laws of the Grand-Duchy of Luxembourg and qualifies as an open-ended société d’investissement à capital variable (a “SICAV”). It is authorised as an undertaking for collective investment in transferable securities under part I of the law dated 17 December 2010 on undertakings for collective investment (the “Law of 2010”), as amended by the law of 10 May 2016.

The Company was incorporated under the laws of the Grand-Duchy of Luxembourg on 19 December 2002 for an unlimited period of time. It is registered under number B 90279 at the Register of Commerce at the District Court of Luxembourg.

The Memorandum and Articles of Association of the Company were published in the Mémorial, Recueil Spécial des Sociétés et Associations du Grand-Duché de Luxembourg (the “Mémorial”) and filed with the Registry of the Luxembourg District Court where they may be consulted and copies may be obtained upon the payment of Registry fees.

As at 30 June 2023, the Company comprised 29 active Sub-Funds (individually the “Sub-Fund” and collectively the “Sub-Funds”):

- Ashmore SICAV Emerging Markets Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt Fund
- Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund
- Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund
- Ashmore SICAV Emerging Markets China Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund
- Ashmore SICAV Emerging Markets Local Currency Bond Fund 2
- Ashmore SICAV Emerging Markets Investment Grade Local Currency Fund
- Ashmore SICAV Emerging Markets Total Return ESG Fund
- Ashmore SICAV Emerging Markets Absolute Return Debt Fund
- Ashmore SICAV Emerging Markets Total Return Fund
- Ashmore SICAV Emerging Markets Investment Grade Total Return Fund
- Ashmore SICAV Emerging Markets Multi-Asset Fund
- Ashmore SICAV Emerging Markets Corporate Debt Fund
- Ashmore SICAV Emerging Markets Corporate Debt ESG Fund
- Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund
- Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund
- Ashmore SICAV Emerging Markets Asian High Yield Debt Fund
- Ashmore SICAV Emerging Markets Short Duration Fund
- Ashmore SICAV Emerging Markets Investment Grade Short Duration Fund
- Ashmore SICAV Emerging Markets Global Small-Cap Equity Fund
- Ashmore SICAV Emerging Markets Frontier Equity Fund
- Ashmore SICAV Emerging Markets Active Equity Fund
- Ashmore SICAV Middle East Equity Fund
- Ashmore SICAV Emerging Markets Equity Fund
- Ashmore SICAV Emerging Markets Indonesian Equity Fund
- Ashmore SICAV Emerging Markets Equity ESG Fund
- Ashmore SICAV Global Liquidity US\$ Money Market Fund
- Ashmore SICAV Emerging Markets Shariah Active Equity Fund

During the period, the Ashmore SICAV Emerging Markets Shariah Active Equity Fund launched on 16 May 2023 and the Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund entered liquidation on 27 June 2023, it ceased operations on 11 July 2023.

The Money Market Fund Regulation (the “Regulation”) came into force in every EU member state on 21 July 2017, and took effect on 21 July 2018 for new Money Market Funds. Existing UCITS that were substantially similar to Money Market Funds as defined in the Regulation, complied with the new rules on 21 January 2019. Northern Trust Luxembourg Management Company S.A, acting as Management Company until 30 September 2019, undertook a detailed analysis of all Sub-Funds under management to identify any qualifying funds, and the implications for them. The result of the analysis was that the Ashmore SICAV 2 Global Liquidity US\$ Money Market Fund, now the Ashmore SICAV Global Liquidity US\$ Money Market Fund, fell within the scope of the Regulation. The Sub-Fund qualifies as a short-term Low Volatility NAV Money Market Fund (“LVNAV”).

* This EUR (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Local Currency Bond Fund.

** This JPY (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Sovereign Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, and the Ashmore SICAV Emerging Markets Active Equity Fund.

*** This AUD (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Equity Fund.

**** This GBP (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Frontier Equity Fund, and the Ashmore SICAV Emerging Markets Active Equity Fund.

***** This HKD (unhedged) Class is only available within the Ashmore SICAV Emerging Markets Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Asian High Yield Debt Fund, and the Ashmore SICAV Emerging Markets Short Duration Fund.

The Company also has the ability to issue Advisory Class Shares. These are only available in US\$ and are restricted to certain distributors used by the Management Company where a fee based advisory and/or discretionary client agreement has been entered into. The distributors then purchase Shares of the Company on behalf of their clients via advisory platforms. Advisory Class Shares are also available to any other investor at the discretion of the Investment Manager, acting as a delegate and under the responsibility of the Management Company. Currently no Advisory Class Shares of the Company are in issue.

As at 30 June 2023, the active Institutional Class Shares of all the Ashmore SICAV Sub-Funds were listed on the Luxembourg Stock Exchange, with the exception of the following Share classes:

- Institutional Class Shares (EUR) Accumulation of the Ashmore SICAV Emerging Markets Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund and the Ashmore SICAV Emerging Markets Multi-Asset Fund;
- Institutional Class Shares (GBP) Accumulation of the Ashmore SICAV Emerging Markets Sovereign Debt Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund, the Ashmore SICAV Emerging Markets Corporate Debt Fund and the Ashmore SICAV Emerging Markets Short Duration Fund;
- Institutional Class Shares (US\$) Accumulation of the Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund, the Ashmore SICAV Emerging Markets High Yield Corporate Debt Fund and the Ashmore SICAV Emerging Markets Asian High Yield Debt Fund;
- Institutional Class Shares (EUR) Income of the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund;

- Z 2 Class Shares (GBP unhedged) Income of the Ashmore SICAV Emerging Markets Local Currency Bond Fund.

2. Principal accounting policies

a) Presentation of the consolidated financial statements

The consolidated financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment.

The consolidated financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis, except for the Sub-Fund Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund which entered liquidation on 27 June 2023 and ceased operations on 11 July 2023.

This report is presented on the basis of the latest NAV calculated during the financial period (i.e. 30 June 2023).

b) Basis of consolidation

The consolidated financial statements of the Company and the financial statements of each Sub-Fund are expressed in US\$ (the “reference currency”). The Consolidated Statement of Net Assets and the Consolidated Statement of Operations and Changes in Net Assets are the sum of the individual Statements of Net Assets and the sum of the individual Statements of Operations and Changes in Net Assets of each Sub-Fund adjusted to eliminate transactions and balances between Sub-Funds.

The consolidated financial statements include all the assets, liabilities and operations of the Company. Transactions between Sub-Funds (linked to investments in other Sub-Funds of the Company) are fully eliminated on consolidation but this has no impact on the results and financial positions of the individual Sub-Funds.

c) NAV adjustment

Swing pricing

The swing pricing mechanism may apply across all Sub-Funds with the exception of the Ashmore SICAV Global Liquidity US\$ Money Market Fund and any Sub-Funds that are fully invested in other Ashmore Funds.

5: Notes

Notes to the Consolidated Financial Statements *continued*

2. Principal accounting policies *continued*

c) NAV adjustment *continued*

Swing pricing *continued*

Shares of the Sub-Funds may suffer a reduction in value as a result of subscriptions, redemptions and/or conversions in and out of the Sub-Funds due to the transaction costs incurred in the purchase and sale of the underlying investments and the spread between the buying and selling prices. This is known as “dilution”. In order to counter this and to protect Shareholders’ interests, the Administrator, upon instruction from the Management Company, may apply “swing pricing” as part of its valuation policy. This will mean that in certain circumstances the Administrator, upon instruction from the Management Company, may make adjustments to the calculation of the NAVs per Share, to counter the impact of dealing and other costs on occasions when these are deemed to be significant.

If on any Valuation Day the aggregate transactions in Shares of a Sub-Fund result in a net increase or decrease of Shares which exceeds a threshold of 5% of such Sub-Fund’s NAV (or a threshold as determined by the Board of Directors and as applicable to all transactions) for that Sub-Fund, the Administrator upon instruction from the Management Company, shall apply an alternative NAV calculation method (to include such reasonable factors as they see fit) to the NAV per Share.

The NAV of the Sub-Fund may, therefore, be swung by an amount equal to the actual bid or offer spread. Such adjustments may vary from Sub-Fund to Sub-Fund based on normal dealing and other costs for the particular assets in which a Sub-Fund is invested, and will not normally exceed 2% of the original NAV per Share. However, the Board of Directors may decide to increase this adjustment limit above the 2% in exceptional circumstances to protect Shareholders’ interests.

More information related to the swing pricing policy of the Company is available in the Prospectus.

No swing pricing mechanism was applied to the NAVs as at 30 June 2023.

Fair value adjustment

Fair value factors are applied to the valuation of equities in order to offer protection to existing/remaining investors within the Sub-Funds to ensure that the asset pricing within the NAV (price) of the Sub-Fund where a particular market is closed is in line with the expected market valuations of the assets when the NAV is struck.

A quantitative fair valuation model is supplied by Investment Technology Group (“ITG”) to produce factors. ITG monitors and back tests the factors for appropriateness. The factors may increase or decrease the valuation of a security and not all securities in the same exchange or market will necessarily be impacted to the same degree or even in the same direction.

Where available, factors are supplied daily by ITG for equities and are applied by the Administrator to the daily NAV calculations.

As at 30 June 2023, the NAVs of equity securities were adjusted in this manner.

d) Valuation of investments of each Sub-Fund

Where possible, bonds are priced at bid prices, while equities are priced at the official close or last traded prices. If a security is traded on several stock exchanges, the valuation is made on the basis of the price on the main market on which the securities are traded. In the case of securities for which trading on a stock exchange is not significant, but which are bought and sold on a secondary market with regulated trading among security dealers (with the effect that the price is set on a market basis), the valuation may be based on this secondary market. Securities traded on a regulated market are valued in the same way as securities listed on a stock exchange.

Investments in open-ended funds are valued on the basis of the last available NAV of the units or shares of such funds.

Money market instruments are valued on an amortised cost basis.

Under the Regulation, the securities of a Money Market Fund shall be valued by using mark-to-market whenever possible.

Where use of mark-to-market is not possible or the market data is not of sufficient quality, securities shall be valued conservatively by using mark-to-model. Securities may be valued using the amortised cost method provided that the following criteria are met:

Notes to the Consolidated Financial Statements *continued*

2. Principal accounting policies *continued*

d) Valuation of investments of each Sub-Fund *continued*

- the price of the security calculated in accordance with the mark-to-market method, the mark-to-model method does not deviate from the price of the security calculated in accordance with the amortised cost method by more than 10 basis points; and
- the security has a residual maturity of up to 75 days.

The amortised cost method involves valuing a security at its cost and thereafter assuming a constant amortisation (accretion) to maturity of any discount or premium regardless of the impact of fluctuating interest rates on the market value of the security or other instruments. While this method provides certainty in valuation, it may result in periods during which the value, as determined by the amortised cost method, is higher or lower than the price the Sub-Fund would receive if it sold the securities. For certain short-term transferable debt securities, the yield to a Shareholder may differ from that which could be obtained from a similar Sub-Fund which marks its portfolio of securities to market each day.

As at 30 June 2023, the Ashmore SICAV Global Liquidity US\$ Money Market Fund used the mark-to-market method.

Where investments are neither listed on any stock exchange nor traded on any regulated markets, these investments are valued in good faith based on information provided by any person whom the Board of Directors considers to be suitably qualified (an "Approved Person"). The Approved Persons include the Pricing Methodology & Valuation Committee of the Investment Manager and certain brokers. For more information on the fair value measurement of hard to price assets, see note 18.

e) Valuation of financial derivative instruments

The value of financial derivative instruments not traded on a stock exchange or other regulated market is consistently determined for each different variety of contracts as follows:

Forward currency contracts are valued at market value based on the forward rate prevailing on the valuation date of the assets. The forward rate applied is based on WM/Reuters (4 p.m. GMT).

Interest rate swaps, currency swaps, swaptions and OTC options are valued based on daily counterparty prices verified against third-party pricing agents.

Futures contracts are valued using the last available price on the exchange where the contracts are traded.

f) Realised gain/loss on sales of investments in securities of each Sub-Fund

Realised gains or losses on the sale of investments in securities are determined on the basis of the weighted average acquisition cost with tax lots. Investments in securities are accounted for on a trade date basis, net of any applicable tax.

g) Foreign currency translation

Assets and liabilities expressed in currencies other than the reference currency of each Sub-Fund have been converted into the reference currency at the foreign exchange rate prevailing as at 30 June 2023.

Income and expenses in currencies other than the reference currency of each Sub-Fund are converted into the reference currency at the foreign exchange rate ruling at the transaction date. Realised and unrealised gains or losses on foreign currency translation are accounted for in the Consolidated Statement of Operations and Changes in Net Assets.

The acquisition cost of investments expressed in currencies other than the reference currency of each Sub-Fund is converted into the reference currency at the foreign exchange rate prevailing at the date of acquisition.

The principal exchange rates applied as at 30 June 2023 were as follows:

US\$	US dollar	=	3.673050	AED	United Arab Emirates dirham
US\$	US dollar	=	4.824000	BRL	Brazilian real
US\$	US dollar	=	1.323250	CAD	Canadian dollar

h) Income and expenses

Allocation of expenses

Expenses can be allocated in one of three ways: (i) they can be allocated to a specific Sub-Fund if they are directly incurred by the Sub-Fund, (ii) they can be split evenly or by NAV when the expenses are shared across all the Sub-Funds in the SICAV or a sub-population thereof, or (iii) they can be split in proportion to the holdings that a certain population of Sub-Funds hold in an underlying investment.

Income

Interest income is accrued on a daily basis net of withholding tax. Dividend income from quoted equity investments and collective investment schemes is shown net of withholding tax deducted at source and is recorded as income on the ex-dividend date.

All Sub-Funds account for bond and bank interest, with the exception of non-performing assets, on an effective interest rate basis.

Interest income on non-performing assets, pay-in-kind instruments (“PIK”) and PIK paired with profit participating notes (“PIK/PPN”) is recognised on receipt unless the Investment Manager deems it appropriate to recognise income on an accruals basis.

i) Repurchase agreements

Securities sold under agreements to repurchase are treated as collateralised borrowing transactions. The securities continue to be carried on the Consolidated Statement of Net Assets at market value and the related loans are carried at the amount at which the securities were sold under the agreement. The interest expense and interest income recognised under these agreements and the interest income on underlying securities are included in the Consolidated Statement of Net Assets and in the Consolidated Statement of Operations and Changes in Net Assets.

The interest expense or interest income is accrued on a daily basis.

Notes to the Consolidated Financial Statements *continued*

2. Principal accounting policies *continued*

j) Equalisation

Income equalisation arrangements may be applied to some or all the Sub-Funds. These measures are designed to ensure that the income per Share which is distributed or deemed distributed in respect of a distribution period is not impacted by changes in the number of Shares in issue during that period. As a consequence, the first distribution received by a Shareholder in an impacted Sub-Fund following the purchase of Shares in that Sub-Fund will represent partly participation in income received by the Sub-Fund and partly a return of capital.

3. Management fees

The Investment Manager is entitled to receive from each Sub-Fund a management fee at an annual rate expressed as a percentage of the NAV of each Share class of each Sub-Fund and as determined in the Sub-Fund's Appendix of the Prospectus.

The management fees are calculated on the basis of the average NAV of the relevant class payable monthly in arrears. The annual rates applied were as follows:

	Institutional Class Shares %	Institutional II Class Shares %	Retail Class Shares %	Retail II Class Shares %	Z Class Shares %	Z 2 Class Shares %	Z 3 Class Shares %

* Active as at 30 June 2023.

The Investment Manager is not entitled to management fees from the Institutional III Share classes.

On 9 November 2021, the Investment Manager agreed to a fee waiver on the Ashmore SICAV 2 Global Liquidity US\$ Money Market Fund (pre-merger), whereby the management fee on the Institutional Class Shares would be reduced to 0.00% (nil) per annum. The fee waiver is valid for a rolling period of three consecutive calendar months from the date of the agreement unless terminated by the Investment Manager (at any time upon seven days notice by the Investment Manager, with the acknowledgement of the Company).

Effective 15 December 2022, the management fee on the Institutional Class Shares of the Ashmore SICAV Global Liquidity US\$ Money Market Fund was amended to 0.2% per annum.

5: Notes

Notes to the Consolidated Financial Statements *continued*

4. Depositary fees

Under the terms of the Depositary Agreement with Northern Trust Global Services SE, the fees due to the Depositary are calculated as 0.01% per annum of the Company's net assets for the execution of its duties as Custodian and Paying Agent, and 0.01% per annum of the Company's net assets for the execution of its duties as Depositary.

Depending on the requirements of the jurisdictions in which the investments of the Sub-Funds are issued, the Depositary may use the services of one or more sub-custodians. The Depositary is entitled to reimbursement by the Company of reasonable out-of-pocket expenses incurred by it in performing its duties and the fees and charges of any correspondents and agents including any sub-custodians.

5. Fund accounting fees

The fund accounting fees due to the Administrator are calculated as 0.02% per annum of each Sub-Fund's net assets.

6. Management Company fees

The Management Company fees are calculated as 0.015% per annum of each Sub-Fund's net assets.

7. Other operating expenses

Other operating expenses represent amounts paid by the Company relating to the operations of the Sub-Funds. They include legal fees, audit fees, the cost of printing and distributing the prospectuses, Directors' fees, Directors' insurance fees, financial servicing fees, regulatory fees and other professional fees. They also include fees in connection with obtaining or maintaining any registration or authorisation of the Company with any governmental agency or stock exchange as well as the cost of publication of information, bank charges and other miscellaneous expenses.

8. Taxation

Under Luxembourg law, the Company is not subject to any taxes on income or capital gains. However, the Company is subject to the "Taxe d'abonnement" or "Subscription tax" of 0.01% per annum for all net assets attributable to Institutional, Institutional II and Institutional III, as well as any net assets in Sub-Funds whose exclusive object is collective investment in money market instruments and the placing of deposits with credit institutions; and 0.05% per annum for all net assets attributable to Retail, Retail II, Z, Z 2 and Z 3 Class Shares. This tax is payable quarterly and is calculated on the basis of the NAV of each Share class at the end of the relevant calendar quarter.

No subscription tax is paid on the assets held by the Sub-Funds in other undertakings for collective investment already subject to that tax in Luxembourg.

Exemption from subscription tax is available for Share classes which:

- are reserved for one or more Institutional Investors; and
- whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions; and
- where the weighted residual maturity of the portfolio does not exceed 90 days; and
- which have the highest possible rating of a recognised rating agency.

The Sub-Fund Ashmore SICAV Global Liquidity US\$ Money Market Fund is not subject to the UK reporting fund regime.

UK reporting status is granted retrospectively by the UK taxation authorities. The UK taxation authorities approved the reporting status applications for the Share classes where the Company made applications for the year ended 31 December 2022.

The current list of Share classes with UK reporting status and the effective dates when they entered into the UK reporting fund regime can be found on the [hmrc.gov.uk](https://www.hmrc.gov.uk) website.

The Board of Directors intends to apply to the UK taxation authorities for UK reporting status for the year ended 31 December 2023 and for subsequent years if the Board of Directors deems it appropriate to do so.

9. Transaction costs

Transaction costs represent costs incurred by the Company in relation to the purchase and sale of transferable securities and costs incurred by the Company in relation to trade communication services. For further information on transaction costs, please refer to Supplementary Information – Direct transaction costs.

17. Risk management

In pursuing their investment objectives, the Sub-Funds enter into investment transactions in financial instruments which give exposure to a variety of financial and operational risks, including market risk (comprising price risk, interest rate risk and currency risk), liquidity risk and credit risk. Further information on these risks and how they are mitigated is set out below.

5: Notes

Notes to the Consolidated Financial Statements *continued*

17. Risk management *continued*

All investment strategies are approved by the Investment Manager's Investment Committee and are minuted. Decisions are restricted by the policies contained in the Investment Committee Terms of Reference, the investment restrictions pertaining to UCITS funds, the investment restrictions pertaining to SICAVs and the investment restrictions specific to each Sub-Fund. The details of these investment restrictions are set out in the Company's Prospectus. With regard to portfolio construction, risk is monitored as an integral part of the investment decision making process. The Investment Committee also reviews risk exposure on a weekly basis and the portfolio of each Sub-Fund is monitored with regards to:

- Interest rate sensitivity, including duration
- Currency sensitivity
- Liquidity
- Volatility
- Credit

Analysis includes:

- Global: Analysis of macro issues including global interest rates, liquidity and major events to determine portfolio duration, interest rate sensitivity and cash levels.
- Fundamental: Analysis of country macro-economic and financial fundamentals.
- Political: Analysis of country and international politics including policy dynamics as large changes result from political events and the understanding of incentive structures.
- Asset/Credit: Identification of fundamental value across countries globally and their respective assets.
- Technical/Market: Analysis of asset and market technicals, timing and dynamics.
- Portfolio Construction: Selection of assets using the Ashmore Portfolio Framework and adjustment of the portfolio to achieve:
 - Diversification and correlation objectives including those in relation to benchmarks;
 - Desired duration, principally through altering relative asset category proportions;
 - Desired interest rate sensitivity (through split between fixed and floating instruments);
 - Desired cash level;
 - Portfolio liquidity;
 - Conformity with the limits agreed for currency risk and portfolio volatility and the pre-specified investment restrictions.

The Sub-Funds are exposed to certain risk factors peculiar to investing in Emerging Markets. These require the consideration of matters not usually associated with investing in the securities of issuers in the developed capital markets of North America, Japan or Western Europe. The economic and political conditions in Emerging Markets differ from those in developed markets, and offer less social, political and economic stability. The value of investments in Emerging Markets may be affected by changes in exchange regulations, tax laws (including withholding taxes) or monetary policies. The absence, in many cases until relatively recently, of any move towards capital markets structures or to a free market economy means investing in Emerging Markets may be considered more risky than investing in developed markets.

Notes to the Consolidated Financial Statements *continued*

17. Risk management *continued*

Market risk

i) Price risk

The main risk arising from the financial instruments held by each Sub-Fund is price risk. All trading securities, investments and derivatives are recognised at fair value, and all changes in market conditions directly affect the results of operations of the Sub-Funds. Price risk primarily arises from uncertainty about the future prices of financial instruments held. The Investment Manager, acting in accordance with the Terms of Reference and each Sub-Fund's investment restrictions, regularly assesses the appropriate allocation of assets in order to minimise overall risks while continuing to follow the investment objectives. The investment restrictions are intended to ensure that each Sub-Fund's investments are appropriately diversified. Details of the investment portfolios as at the period-end date are disclosed in the Schedules of Investments.

ii) Interest rate risk

For Sub-Funds where a substantial portion of financial assets and liabilities are interest bearing, a key risk is fluctuations in the prevailing levels of market interest rates. This risk is managed through duration management and issue selection (the mix between fixed and floating instruments). Some Sub-Funds may also from time to time enter into transactions in derivative instruments and take short positions with a view to hedging the portfolio's interest rate exposure.

iii) Currency risk

The principal exposures to currency risk for the Sub-Funds arise from investments denominated in currencies other than US\$ and from derivative investments. The value of such investments may be affected favourably or unfavourably by fluctuations in exchange rates, notwithstanding any efforts made to hedge such fluctuations. The Sub-Funds may deal in derivative instruments and other synthetic products where investing in such vehicles would be more efficient, is required for legal, tax or regulatory reasons or would otherwise be to the advantage of the Shareholders. If, in the view of the Investment Manager, it is more efficient or cost effective, the Investment Manager may take exposure to the underlying local currency Emerging Market debt or other investments through synthetic products offered by third parties. The Investment Manager may sell investments or currencies short, including through the use of derivative instruments, in order to manage the Sub-Funds' currency risk through hedging. Details of the forward currency contracts held by the Sub-Funds at the period-end date are disclosed in note 11.

Liquidity risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The main liquidity risk for the Sub-Funds is the potential redemption of any Shares that Shareholders wish to sell. The Company's Prospectus provides for daily subscriptions and redemptions and it is therefore exposed to the liquidity risk of meeting Shareholder redemptions on a daily basis. The Sub-Funds mitigate this risk by holding a portion of their assets in securities that can be liquidated quickly at an amount close to fair value in order to meet liquidity requirements. The Sub-Funds also operate a Swing Pricing Policy as outlined in note 2c.

Some of the investments which the Sub-Funds may make are traded only on over-the-counter ("OTC") markets and there may not be an organised public market for such securities. The effect of this is to increase the difficulty of valuing the investments and until a market develops, certain investments may generally be illiquid. There may be no established secondary market for certain of the investments made by the Sub-Funds. Reduced secondary market liquidity may adversely affect the market price of the investments and the Sub-Funds' ability to dispose of particular investments to meet liquidity requirements or in response to specific events such as deterioration in the creditworthiness of any particular issuer. Due to the lack of adequate secondary market liquidity for certain securities, the Administrator may find it more difficult to obtain accurate security valuations for the purposes of valuing the Sub-Funds and calculating the NAVs. Valuations may only be available from a limited number of sources and may not represent firm bids for actual sales. In addition, the current or future regulatory regime may adversely affect liquidity.

Credit risk

The Sub-Funds are exposed to credit risk, which is the risk that a counterparty is unable to pay amounts in full when they fall due. The main concentration of credit risk for most Sub-Funds arises from investments in debt securities. The Sub-Funds are also exposed to counterparty credit risk if they invest in derivative products, and on their cash at bank and other debtor balances.

The Sub-Funds' policy to manage credit risk is to invest in debt securities that have been rated by established well-known rating agencies. The Investment Manager monitors the credit ratings of the Sub-Funds' counterparties, maintains an approved counterparty list and periodically reviews all counterparty limits. The breakdown of investments by credit rating for the Sub-Funds is disclosed in Other Information on Investments.

5: Notes

Notes to the Consolidated Financial Statements *continued*

17. Risk management *continued*

Credit risk continued

The Sub-Funds' financial instruments may include purchases of securities and other obligations of companies that are experiencing significant financial or business distress, including companies involved in bankruptcy or other reorganisation and liquidation proceedings. Although such purchases may result in significant returns, they involve a substantial degree of risk. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies or sovereign issuers experiencing significant business and financial distress is unusually high. There is no assurance that the Investment Manager will correctly evaluate the nature and magnitude of the various factors that could affect the prospects for a successful reorganisation or similar action. The completion of debt and/or equity exchange offers, restructurings, reorganisations, mergers, takeover offers and other transactions can be prevented or delayed, or the terms changed, by a variety of factors. If a proposed transaction appears likely not to be completed or in fact is not completed or is delayed, the market price of the investments purchased by a Sub-Fund may decline sharply and result in losses which could have a material adverse effect on the performance of the Sub-Fund and returns to Shareholders.

The administrative costs in connection with a bankruptcy or restructuring proceeding are frequently high and will be paid out of the debtor's assets prior to any return to creditors (other than out of assets or proceeds thereof, which may be subject to valid and enforceable liens and other security interests) and equity holders. In addition, certain claims that have priority by law over the claims of other creditors (for example, claims for taxes) may reduce any entitlement of the Sub-Funds. In any reorganisation or liquidation proceeding relating to a company or sovereign issuance in which a Sub-Fund invests, the Sub-Fund may lose its entire investment or may be required to accept cash or securities with a value less than its original investment. Under such circumstances, the returns generated from such investments may not compensate investors adequately for the risks assumed, which could have a material adverse effect on the performance of the Sub-Fund and returns to Shareholders.

It is frequently difficult to obtain accurate information as to the condition of distressed entities. Such investments may be adversely affected by laws relating to, among other things, fraudulent transfers and other voidable transfers or payments, lender liability and the bankruptcy court's power to disallow, reduce, subordinate or disenfranchise particular claims. The market prices of such securities are subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and offer prices of such securities may be greater than those prevailing in other securities markets.

Substantially all of the assets of the Sub-Funds are held with the Custodian which is an indirect wholly-owned subsidiary of the Northern Trust Corporation. Bankruptcy or insolvency of the Custodian may cause the Sub-Funds' rights with respect to cash and securities held by the Custodian to be delayed or limited. This risk is managed by monitoring the credit quality and financial positions of the Custodian that the Sub-Funds use. The credit rating as at 30 June 2023, of the Northern Trust Corporation was A+. Depending on the requirements of the jurisdictions in which the investments of the Sub-Funds are issued, the Custodian may use the services of one or more sub-custodians.

Global exposure

The Management Company uses a risk management process which enables it to assess the exposure of each of the Sub-Funds to market, liquidity, counterparty and operational risks, which are material for the Sub-Fund. As part of the risk management process, the Management Company calculates the global exposure of each Sub-Fund by using either the commitment approach or the Value-at-Risk (VaR) methodology. The methodology used depends on an assessment of the risk profile of the relevant Sub-Fund resulting from its policy (including but not limited to its potential use of financial derivative instruments and features thereof) in accordance with relevant European and Luxembourg laws and regulations. In the interest of the Shareholders, the Company has determined that the Management Company will, as a default, use the commitment approach to monitor and measure the global exposure of each Sub-Fund unless otherwise specified for a particular Sub-Fund. This approach measures the global exposure related to positions in financial derivative instruments and other efficient portfolio management techniques which, unless otherwise specified for a particular Sub-Fund, may not exceed the total net value of the portfolio of the relevant Sub-Fund. The global risk on derivatives has been determined according to the commitment approach for all Sub-Funds during the reporting period from 1 January 2023 until 30 June 2023.

18. Fair value measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants at the measurement date.

Notes to the Consolidated Financial Statements *continued*

18. Fair value measurement *continued*

For certain of the Company's financial instruments, including cash at bank, repurchase agreements, amounts payable on the purchase of investments/receivable on the sale of investments, amounts receivable on subscriptions/payable on redemptions, accrued income, prepaid/accrued expenses and other receivables, their carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The Company's investments and financial derivative instruments are carried at market value which approximates fair value.

The Company classifies financial instruments within a fair value hierarchy that prioritises the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are observable inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in markets that are not active;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by an observable market.

Level 3 inputs are unobservable inputs for the asset or liability.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgement. The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Company's perceived risk of that instrument.

Investments: Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities, certain US government and sovereign obligations, and certain money market securities. The Company does not adjust the quoted price for such instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These may include government and sovereign obligations, government agency securities, corporate bonds, and municipal and provincial obligations.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments may include private equity and real estate investments, certain loan participations, less liquid corporate debt securities (including distressed debt instruments), collateralised debt obligations and collective investment schemes. Also included in this category are government and sovereign obligations, government agency securities and corporate bonds for which independent broker prices are used and information relating to the inputs of the price models is not observable.

Fair value factors are applied to the valuation of equities in order to offer protection to existing/remaining investors within the Sub-Funds to ensure that the asset pricing within the NAV (price) of the Sub-Fund where a particular market is closed is in line with the expected market valuations of the assets when the NAV is struck.

5: Notes

Notes to the Consolidated Financial Statements *continued*

18. Fair value measurement *continued*

A quantitative fair valuation model is supplied by ITG to produce factors. ITG monitors and back tests the factors for appropriateness. The factors may increase or decrease the valuation of a security and not all securities in the same exchange or market will necessarily be impacted to the same degree or even in the same direction.

Where available, factors are supplied daily by ITG for equities and are applied by the Administrator to the daily NAV calculations.

As at 30 June 2023, the NAVs of equity securities were adjusted in this manner.

When observable prices are not available; e.g. if an asset does not trade regularly, the Administrator may rely on information provided by any person, firm or entity including any professional person whom the Directors consider to be suitably qualified to provide information in respect of the valuation of investments and who is approved by the Custodian (an “Approved Person”). Approved Persons may include certain brokers and the Pricing Methodology and Valuation Committee (“PMVC”) of the Investment Manager.

The PMVC may, upon request, provide assistance to the Administrator in determining a methodology for valuing assets where the Administrator cannot determine a price or methodology from another source. It is the Administrator’s responsibility to determine whether to use any such assistance provided by the PMVC. These assets, which are classified within Level 3, may include all asset types but are frequently ‘Special Situations’ type investments, typically incorporating distressed, illiquid or private investments.

For these hard-to-value investments, the methodology and models used to determine fair value are created in accordance with the International Private Equity and Venture Capital Valuation (“IPEV”) guidelines. Smaller investments may be valued directly by the PMVC but material investments are valued by experienced personnel at an independent third-party valuation specialist. Such valuations are subject to review, amendment if necessary, then approval by the PMVC. The valuations are ultimately approved by the Directors and subsequently reviewed by auditors as they make up part of the NAV in the consolidated financial statements.

Valuation techniques used include the market approach, the income approach or the cost approach depending on the availability of reliable information. The market approach generally consists of using; comparable transactions, earnings before interest, tax, depreciation and amortisation (“EBITDA”) multiples; or enterprise value (“EV”) multiples (based on comparable public company information). The use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as deemed appropriate for liquidity, credit, market and/or other risk factors.

Inputs used in estimating the value of investments may include the original transaction price, recent transactions in the same or similar instruments, completed or pending third-party transactions in the underlying investment or comparable issuers, subsequent rounds of financing, recapitalisations and other transactions across the capital structure, offerings in the equity or debt capital markets and bids received from potential buyers.

For the determination of the NAV, Level 3 investments may be adjusted to reflect illiquidity and/or non-transferability. However, any such adjustments are typically reversed in the consolidated financial statements where it is required by the accounting standards.

The Company believes that its estimates of fair value are appropriate, however estimates and assumptions concerning the future, by definition, seldom equal the actual results and the estimated value may not be realised in a current sale or immediate settlement of the asset or liability. The use of different methodologies, assumptions or inputs would lead to different measurements of fair value and given the number of different factors affecting the estimate, specific sensitivity analysis cannot be reliably quantified.

Financial Derivative Instruments: Financial derivative instruments can be exchange-traded or privately negotiated OTC. Exchange-traded derivatives, such as futures contracts and exchange-traded options contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

Notes to the Consolidated Financial Statements *continued*

18. Fair value measurement *continued*

OTC derivatives, including forwards, credit default swaps, interest rate swaps and currency swaps, are valued using observable inputs, such as quotations received from the counterparty, dealers or brokers, whenever these are available and considered reliable. In instances where models are used, the value of an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability and reliability of observable inputs. Such inputs include market prices for reference securities, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. Certain OTC derivatives, such as generic forwards, swaps and options contracts, have inputs which can generally be corroborated by market data and are therefore classified within Level 2.

Those OTC derivatives that have less liquidity or for which inputs are unobservable are classified within Level 3. While the valuations of these less liquid OTC derivatives may utilise some Level 1 and/or Level 2 inputs, they also include other unobservable inputs which are considered significant to the fair value determination.

The following tables present the assets and liabilities that are measured at fair value on a recurring basis as at 30 June 2023 in US\$.

Ashmore SICAV Emerging Markets Debt Fund

19. Additional information concerning representation in Germany

Deutsche Bank AG, TSS post-IPO Services, Taunusanlage 12, 60325 Frankfurt am Main, acts as the German representative of the Company and carries out the function of the Company's paying agent in relation to Shares distributed in or from Germany.

20. Additional information concerning representation in Switzerland

The Directors have appointed BNP Paribas Securities Services, Paris, Succursale de Zurich, Selnaustrasse 16, 8002 Zurich, as the Company's representative and paying agent for Switzerland. In accordance with Article 124 CISA, BNP Paribas Securities Services, Paris, Succursale de Zurich, represents the Company vis-à-vis the investors and the Swiss Financial Market Supervisory Authority FINMA.

Notes to the Consolidated Financial Statements *continued*

20. Additional information concerning representation in Switzerland *continued*

For Shares distributed in or from Switzerland, the performance place is at the BNP Paribas Securities Services, Paris, Succursale de Zurich address. Investors can obtain the following information free of charge from the representative at the above address: the Prospectus, the Key Investor Information Document ("KIID") (both of which are also available for potential investors), the most recent audited annual and unaudited semi-annual reports, copies of the Articles of Incorporation and any amendments thereto, in German, and a list of the purchases and sales made on behalf of the Company.

Publications in respect of the foreign collective investment scheme are made in Switzerland on the electronic platform of fundinfo AG (www.fundinfo.com). The issue and the redemption prices or the NAV together with a footnote stating that these figures are "excluding commissions" are published daily on www.fundinfo.com.

21. Commitments

In relation to its investments, the Company may from time to time agree to indemnify and/or pre-fund trustees or other agents, either solely or alongside other creditors on a several basis. Generally, such agreements do not have a termination date. The Directors are not aware of and do not currently expect any claims to be made against the Company under any such indemnity or pre-funding agreements.

22. Significant events during the period

On 24 February 2022, Russia invaded Ukraine. This conflict has continued throughout the period and the combination of the Russian invasion and the resultant sanctions imposed by US and other governments is impacting liquidity and asset values in Russia, Ukraine and Belarus. Certain Sub-Funds continue to hold investments in Ukraine and Russia. While exposure is limited, the value and liquidity of these investments has been impacted and consequently, the performance of these Sub-Funds has been impacted.

Juraj Pekar tendered his resignation as a Director of the Company on 7 March 2023, he has not been replaced.

The Ashmore SICAV Emerging Markets Shariah Active Equity Fund launched on 16 May 2023.

The Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund entered liquidation on 27 June 2023.

There were no other significant events during the period.

23. Subsequent events

The Ashmore SICAV Emerging Markets Volatility-Managed Local Currency Bond Fund ceased operations on 11 July 2023.

The investment objectives and policies of the following seven Sub-Funds of the Company: the Ashmore SICAV Emerging Markets Sovereign Debt Fund, the Ashmore SICAV Emerging Markets Sovereign Investment Grade Debt Fund, the Ashmore SICAV Emerging Markets Local Currency Bond Fund 2, the Ashmore SICAV Emerging Markets Equity Fund, the Ashmore SICAV Emerging Markets Investment Grade Corporate Debt Fund, the Ashmore SICAV Emerging Markets Debt Fund and the Ashmore SICAV Emerging Markets Corporate Debt Fund were amended and effective 17 July 2023, the Sub-Funds were reclassified from Article 6 to Article 8 pursuant to the EU Sustainable Financial Disclosure Regulation (SFDR).

The Ashmore SICAV India Equity Fund and the Ashmore SICAV Emerging Markets Total Return Debt Fund 2 are due to launch in H2 2023.

The Ashmore SICAV Emerging Markets Sovereign Debt ESG Fund and the Ashmore SICAV Emerging Markets Total Return ESG Fund are due to close in H2 2023.

There were no other significant events subsequent to the period-end date that require adjustment to, or disclosure in, the consolidated financial statements.

Supplementary Information

Reconciliation of differences between US GAAP and Luxembourg GAAP

FASB ASC 946-20-25 Paragraphs 7-8, Recognition - Capital Share Transactions, requires that subscriptions and redemptions received on the last valuation day of the period be included in the period-end NAV of the Sub-Funds, whereas under Luxembourg GAAP they are recorded subsequent to the period end. There are no other reconciling items between the figures in these financial statements published in accordance with Luxembourg GAAP and their equivalent published in accordance with US GAAP. A reconciliation of these differences for US\$ denominated Share classes is provided below:

	Luxembourg GAAP	Subscriptions (including equalisation)	Redemptions (including equalisation)	US GAAP

	Fees/taxes thereon:		
	Equities	(1,303)	(0.10)
Total fees, commissions and taxes on sales		(2,648)	(0.21)
Total fees, commissions and taxes paid		(21,457)	(1.71)

There were no direct transaction costs incurred by the other Sub-Funds during the period ended 30 June 2023.

In most instances there are no direct transaction costs on bonds, but in addition to the direct transaction costs disclosed above, indirect costs are incurred through the bid-offer spread. Investments in pooled vehicles may incur transaction costs on the purchase or sale of investments within those vehicles.

Securities Financing Transaction Regulation

In accordance with Regulation (EU) 2015/2365 of the European Parliament on transparency of securities financing transactions ("SFTs") and of reuse, the Company details below the use it made of SFTs during the period under review:
