Heriot Global Fund (the "Fund"), Class A Sterling Net Income Shares, a fund within Heriot Investment Fund (the "Company") (ISIN: GB00B835GN22)

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

Objectives and Investment Policy

The aim of the Fund is to provide capital appreciation over the long term (5 years or more) by investing in dividend growth companies.

The Fund will invest in listed global equities.

The Fund aims to invest in a portfolio of approximately 60-100 companies which have high levels of profitability and cash generation, consistent re-investment, low levels of debt and prudent governance in order to deliver the investment objective.

The Investment Adviser will perform research to identify shares in companies that provide this.

To the extent that the Fund is not fully invested in the asset class listed above, investments may be made in money market instruments, deposits, cash and near cash. Such investments are not intended to be more than 10% in aggregate of the Fund.

The Fund will not use derivatives and will not invest in units or shares of other collective investment schemes.

Investors can redeem shares on demand, at the daily valuation point of 8am (UK time) when this is a normal business day in the UK.

For income shares, any income received is paid out to you twice a year. For accumulation shares, any income received is reflected in the price of the shares.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short-term. The Fund should be viewed as a long-term investment only (5 years or more).

Risk and Reward Profile

The Risk and Reward Indicator below demonstrates in a standard format where the Fund ranks in terms of its potential risk and reward. It is based on historical performance data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking. The higher the rank the greater the potential reward but the greater the risk of losing money.

- The Fund is in the above risk category because it will invest primarily in global company shares, which have experienced high rises and falls in value in the past 5 years.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- The Fund invests predominantly in global shares, with some regions being regarded as more risky. The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is a risk that any company providing services such as safe keeping of assets may become insolvent, which may cause losses to the Fund.
