

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG High Yield Opportunities Fund Professional Accumulation Shares (Class C)

(ISIN:GB00BJK3W057) Man GLG High Yield Opportunities Fund (the 'Fund') is a sub-fund of Man Fixed Interest ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to provide income and capital growth by investing mainly in sub-investment grade bonds (debt securities of issuers that are considered to have a higher risk of failing to make interest payments or repay the initial amount borrowed than "investment grade" issuers, who are considered to carry a low to medium risk).
- The debt securities in which the Fund may invest include those issued by corporate bodies, and those issued or guaranteed by governments or supranational bodies. The Fund may also invest in other transferable securities (such as shares), money market instruments (investments usually issued by banks or governments that are a short term loan), deposits, cash or cash equivalents and other funds (which may include those managed by the ACD or its associates). The Fund may hold a significant portion (or all) of its value in cash and/or liquid assets where it is believed to be in the interests of the Fund and its investors. The Fund will invest at least 80% of its assets in securities rated below investment grade by Standard & Poor's (i.e. below BBB minus) or Moody's (i.e. below Baa3) or an equivalent external rating agency under normal market conditions. The Fund may invest up to 30% of its assets in securities that provide exposure to emerging markets (developing countries). The Fund may invest in or hold distressed, stressed and special situations credit investments (being investments, the issuers of which, are subject to events impacting on their current valuations). Such investments may be in the form of debt instruments or certain credit-related equities.
- The Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective, however, the Investment Adviser may use the ICE BofA Global High Yield Index as a guide in selecting assets for the Fund. The Fund principally uses a bottom-up approach to select assets (i.e. focusing on analysing individual investments, rather than markets), and will consider a number of factors, mainly using the issuer's financial statements, for example, leverage (indebtedness), cash-flow and earnings.
- The Fund may pursue a 'long-short strategy', which means that, in addition to buying and holding assets with the expectation that they will rise in value, it may take positions against issuers which are viewed as overvalued or expected to fall in value ('short' positions).
- Use of financial derivative instruments ("FDI")*. The Fund may use FDI (instruments whose prices are dependent on one or more underlying assets) to take 'short' positions in order to achieve the investment objective and for efficient portfolio management to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- Benchmarks*. The Fund is managed with reference to benchmarks. The ICE BofA Global High Yield Index, is considered to constrain the assets in which the Fund may invest and is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- Dealing*. Shares can be bought and sold on each Business Day, as detailed in the Fund prospectus.
- Investment Horizon*: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.
- Treatment of income*. Income earned on investments will be added to the value of investors' shares.

Risk and reward profile

- The lowest category does not mean 'risk free'.
 - The risk and reward profile is not guaranteed and may change over time.
 - Historical data may not be a reliable indication for the future.
 - The risk category for this share class is 4 as funds of this nature engage in strategies that typically have a moderate volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.
 - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- The following risks may not be fully captured by the risk and reward profile:**
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
 - The Fund may invest a significant proportion of its assets in non-investment grade securities (such as "high yield" securities) which are considered higher risk investments that may cause income and principal losses for the Fund. They are instruments which credit agencies have given a rating which indicates a higher risk of default. The market values for high yield bonds and other instruments tend to be volatile and they are less liquid than investment grade securities.
 - The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.
 - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
 - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
 - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, "over-the-counter" ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.
 - The Fund's use of FDI may result in increased leverage which may lead to significant losses.
 - Whilst the Fund aims to provide capital growth over 3 years a positive return is not guaranteed over any time period and capital is in fact at risk.
 - The Fund may invest in contingent convertible ("coco") bonds. The performance of such bonds is dependent on a number of factors including interest rates, credit and equity performance, and the correlations between factors. As such these securities introduce significant additional risk to an investment in the Fund.
 - The Fund will invest financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.
 - There is no guarantee that the Fund will achieve its investment objective.
- A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.75%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
------------------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 30/06/2023.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

Past performance

- The Fund was authorised in 2019. This share class was launched on 06 June 2019.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.
- Please note that in May 2021 the constraining benchmark changed from the ICE BofA European Currency High Yield Constrained Index To ICE BofA Global High Yield Index.

Practical information

- The Fund is a sub-fund of the Company which is an umbrella scheme comprising a number of sub-funds.
- The Bank of New York Mellon (International) Limited is the depository of the Company. The Fund's assets are treated as being segregated from the assets of other sub-funds of the Company.
- Additional information related to the Fund is located in the prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The prospectus is available together with the most recent financial statements, information on other share classes and the latest prices of shares free of charge at www.man.com.
- The Fund is subject to taxation legislation in the UK, which may have an impact on your personal tax position as an investor in the Fund.
- Man Fund Management UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
- You may switch shares in the Fund for shares in any other sub-fund of the Company. Further information and provisions are in the prospectus.
- Details of Man Fund Management UK Limited's Remuneration Policy are available at www.man.com/mfm-remuneration-policy, including: (a) a description of how remuneration and benefits are calculated; and (b) the identity of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, at Man Fund Management UK Limited at Riverbank House, 2 Swan Lane, London, EC4R 3AD, United Kingdom.
