31-May-24 | For professional investors only

**Fund manager**  
Multi-Manager team

## Fund objective and policy

The Fund aims to deliver capital growth with some income. The Fund is actively managed and not managed with reference to a benchmark. The allocation to particular asset classes or geographies may vary over time at the manager's discretion. The manager uses a strategic asset allocation model matched to a specific target risk and volatility band (the volatility band is supplied by an external provider). The Fund invests at least 70% in collective investment schemes to obtain exposure to a wide range of asset classes. To reflect the risk profile of the Fund, more than half of the Fund's exposure will be mainly to a combination of UK corporate and government bonds, as well as global corporate bonds and cash. The remaining exposure will be to a range of UK and global equities and property.

## Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. This fund invests principally in units of collective investment schemes. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.

## Fund details
