

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

World Sustainability Equity Fund

Share Class: GBP Distributing Shares (ISIN: IE000VWAU7M9)

a sub fund of Dimensional Funds plc. This Fund is managed by Dimensional Ireland Limited.

Objectives & Investment Policy

The aim is to increase the value of your investment over the long term and to earn income within the Fund.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed in reference to a benchmark.

The Fund primarily invests in shares of companies traded in developed and/or emerging markets. The Fund generally has a greater allocation to shares of smaller sized companies, value companies and/or companies generating high profits as compared to their representation in the general equity market universe. Value companies are those where, at the time of purchase, the Investment Manager believes that the share price is low compared to the accounting value of the company.

The composition of the Fund may be adjusted based on considerations such as the number of outstanding shares of public companies that are freely available to the investing public, the tendency of the price of a security/share to continue movement in a single direction, how readily available the shares are to buy and sell, liquidity management, size, value, profitability and investment characteristics.

The environmental and sustainability impact considerations seek to identify factors that the Investment Manager believes indicate

whether or not a company, as compared to other companies with similar business lines, promotes environmental and sustainability interests by pursuing economic growth and development that meets the needs of the present without compromising the needs of future generations.

The Fund may invest up to 20% of its net assets in emerging markets countries.

The Fund may use financial contracts or instruments (derivatives) to manage risk, reduce costs or improve returns.

Income is normally distributed twice yearly.

You may sell your investment in the Fund on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 5 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund may invest up to 20% of its assets in other underlying funds. The Fund's performance, costs and risks will be affected by the underlying funds. There can be no assurance that an underlying fund will achieve its investment objective.

The Fund's investments are subject to issuer-specific risks, market risks, economic or political risks that may cause the share prices to fluctuate over time. This can affect the value of your investment in the Fund.

The assets in which the Fund invests may be denominated in or have exposure to a currency other than the currency of the shares in the Fund or of the country in which you live. Additionally, the currency of the shares you hold may be denominated in a currency different to the base currency of the Fund. The Fund does not actively manage movements in the value of currencies and currency fluctuations may affect the value of the Fund's assets.

The Fund may invest in smaller companies. This carries a higher risk as shares of small companies are often more difficult to sell than those of large companies, and as a result their share price can fluctuate more. In general,

smaller companies are also more vulnerable than larger companies to adverse market conditions.

The Fund may seek to identify and invest in value shares, which are (in the Investment Manager's view) shares, the prices of which are low compared to the accounting values of the companies issuing them.

Value shares may perform differently from the market as a whole and following a value oriented investment strategy may cause the Fund, at times, to underperform funds that use other investment strategies.

The Fund's sustainability impact considerations may limit the number of investment opportunities available, and as a result, at times may produce different returns or more modest gains than funds that are not subject to such special investment conditions. Sustainability impact considerations may cause a Fund's industry allocation to deviate from that of funds without these considerations and of conventional benchmarks.

Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

The Fund invests in emerging markets which may be less economically or politically developed and can involve greater risks than well developed economies. Amongst other issues, decreased liquidity, political unrest and economic downturn may be more likely and could affect the value of your investment. Investment in emerging markets can be more expensive and challenging to buy, sell and withdraw investments. Investments in emerging markets also have an increased risk of settlement default.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.40%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser or distributor.

The ongoing charges figure shown here is an estimate of the charges as there is insufficient historical data. It excludes portfolio transaction costs and performance fees, if any. The Fund's annual report for each financial year will include detail on the exact charges made.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

No conversion fee will be charged by the Fund or the investment manager.

Past Performance

There is insufficient data to provide a useful indication of past performance to investors.

Please be aware that past performance is not a reliable indicator of future results.

The Fund was launched in 2023 and the share class was launched in 2023.

Practical Information

The depositary is State Street Custodial Services (Ireland) Limited.

Copies of the prospectus (which includes additional information relating to your investment), the latest annual reports and subsequent half-yearly reports (all in English), as well as other information (including the latest share prices) are available free of charge at www.dimensional.com.
