a sub-fund of Vontobel Fund II

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to generate long-term capital growth in USD and has a sustainable investment objective by contributing towards UN Sustainable Development Goals (UN SDGs) and by investing in emerging markets securities which the Investment Manager identifies as Sustainability Champions. Sustainability Champions are companies that (i) contribute significantly to at least one of the UN SDGs as evaluated by the Investment Manager using its proprietary UN SDG evaluation framework; and (ii) pass a detailed evaluation of their environment, social and governance (ESG) operational performance using the Investment Manager's proprietary ESG framework; and (iii) comply with the extensive exclusion criteria that the Investment Manager has set to avoid investments in certain economic activities that are harmful to society and environment. It is categorized as Article 9 SFDR. More details can be found in the prospectus.

- The Sub-Fund invests at least 80% of its net assets in equities, equity-like transferable securities, including depositary receipts, real estate equities and qualifying REITs issued by or for market-leading companies as described above. Emerging markets are, among others, countries included in the MSCI Emerging Markets Index. It may invest up to 35% of its assets via Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect in China A-Shares.

- **Type of approach:** The Sub-Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's criteria. The implementation of the sustainability selection criteria leads to the exclusion of at least 20% of potential investments.
- **Investment universe:** emerging markets equity markets. 100% of the securities in the sub-fund have the ESG and impact selection criteria applied to it. **Main methodological limits:** potential inconsistency, inaccuracy or lack of availability of ESG data issued by third party providers.
- It may also hold up to 20% of its net assets in bank deposits at sight.
- The sub-fund may use derivatives for hedging purposes.
- The currency of this class is NOT hedged against the Sub-Fund's main currency. The investor consequently bears the full currency risk.
- The sub-fund is managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Income may be paid out each year.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- AN shares are reserved for specific investors and do not grant any rebate or retrocessions. See prospectus for details.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Risk Considerations" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- The sub-fund also includes sustainability criteria in its investment process. This may mean that the sub-fund's performance is more positive or negative than a conventionally managed portfolio.
- Investments in Chinese A-Shares are subject to changes in political, economic and social conditions in China as well as changes in the policies of the PRC government, laws and regulations.
- A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.
- Investments in emerging markets entail increased liquidity and operational risks as these markets tend to be underdeveloped and more exposed to political, legal, tax and foreign exchange control risks.
- This share class is issued in a currency different from the sub-fund currency. The investor is therefore exposed to the full currency risk when investing in the sub-fund.
