# 31 May 2024 **OEIC**

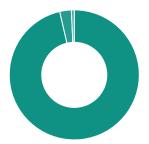

# Scottish Widows European Select Growth A

# **Fund Objective**

To provide capital growth through investment in a select portfolio, typically 45 to 60 holdings, of Continental European shares. The benchmark index for the Fund is the MSCI Europe ex UK Index (the "Index"). The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Index by 3% per annum on a rolling 3 year basis, before deduction of fees. The MSCI Europe ex UK Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the European equities market, excluding the UK. For further information on this fund's policy and objectives, please refer to the Key Investor Information Document or the Prospectus. These documents can be accessed via the following link:

## **Past Performance**

#### European Select Growth

Benchmark

The returns shown in the performance table illustrate past performance of the Fund and its benchmark index. The outperformance target is applied to the index and we illustrate it in the figures from 7th August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.

Past performance is not a guide to future performance. Investment value and income from it may fall as well as rise, as a result of market and currency movements. You may not get back the amount originally invested.

#### **Discrete Performance**

Performance figures are in  $\pounds$  Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

### **Quarterly Fund Manager Review**

Eurozone shares posted a strong gain in Q1. The information technology sector led the charge amid ongoing optimism over demand for Al-related technologies. Other top gaining sectors included financials, consumer discretionary and industrials. Improvements in the economic outlook boosted more economically sensitive stocks while banks were supported by some announcements of improvements to shareholder returns. By contrast, utilities, consumer staples and real estate were the main laggards. Over the quarter there were signs of improving business activity in the eurozone. The flash eurozone purchasing managers' index (PMI) rose to 49.9 in March compared to 49.2 in February. This signals that business activity is almost at stable levels. (PMI data is based on surveys of companies in the manufacturing and service sectors. A reading above 50 indicates growth while below 50 indicates contraction). Eurozone inflation continued to cool in the quarter. The annual inflation rate (consumer price index) was 2.6% in February, down from 2.8% in January. In February, European Central Bank President Christine Lagarde sought to downplay the chances of an imminent interest rate cut. She told the European Parliament that the central bank does not want to run the risk of reversing any cuts.
