Federated Hermes Investment Funds Public Limited Company

Directors' Report

The Directors of Federated Hermes Investment Funds Public Limited Company (the "Company") present their Annual Report and the Audited Financial Statements of the Company for the financial year ended 31 December 2023.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the Financial Statements in accordance with the Companies Act 2014 and the applicable regulations.

Irish company law requires the Directors to prepare Financial Statements for each financial year. Under the law, the Directors have elected to prepare the Financial Statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("relevant financial reporting framework"). Under Irish company law, the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014.

In preparing those Financial Statements, the Directors are required to:

- select suitable accounting policies for the Financial Statements and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for ensuring that the Company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, enable them to ensure that the Financial Statements and Directors' Report comply with the Companies Act 2014 and with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and enable the Financial Statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Principal Activity

The Company was incorporated on 23 October 2008 under the laws of Ireland as an open ended umbrella type investment company with variable capital and limited liability, having segregated liability between its sub-funds, in which different sub-funds may be created from time to time. The Company is authorised by the Central Bank of Ireland as an investment company pursuant to the Central Bank UCITS Regulations.

Business Review

Please refer to the Investment Manager Reports on pages 13 to 53 for a review of business.

The principal risks and uncertainties faced by the Company are the investment risks associated with the portfolio of investments held for the account of each sub-fund (the term "Sub-Fund" relates to the Sub-Funds listed on pages 300 to 320 and the operational risks associated with their management and administration (see note 8).

Accounting Records

The measures taken by the Directors to secure compliance with the requirements of sections 281 to 285 of the Companies Act 2014 with regard to the keeping of accounting records are the use of appropriate systems and procedures and employment of competent persons. The accounting records of the Company are maintained by Northern Trust International Fund Administration Services (Ireland) Limited, at Georges Court, 54-62 Townsend Street, Dublin 2, D02 R156, Ireland.

Transactions Involving Directors

There were no contracts or agreements of any significance in relation to the business of the Company in which the Directors had any interest, as defined in the Companies Act, 2014, at any time during the financial year, other than those set out in note 6 to the Financial Statements.

Federated Hermes Investment Funds Public Limited Company

Directors' Report (continued)

Revenue

The results of operations for the financial year are set out in the Income Statement on pages 262 to 268.

Directors' Interests in Shares of the Company

No Director, nor the Company Secretary, had any beneficial interest in the shares of the Company throughout the financial year.

Distributions

Details of distributions paid and proposed are set out in note 14 to the Financial Statements.

Independent Auditor

The independent auditor, Deloitte Ireland LLP ("Deloitte"), has indicated its willingness to continue in office in accordance with section 383(2) of the Companies Act, 2014.

Directors

The Directors who served at any time during the financial year are stated below:

Michael Boyce (Irish) appointed as Chairman 1 January 2024

Gregory Dulski (American)

Joseph Kagan (British/South African)

Sylvie McLaughlin (Irish)

Patrick Wall (Irish) appointed 1 January 2024

Ronan Walsh (Irish) resigned 1 January 2024

Connected Persons

The Central Bank UCITS Regulations require that any transaction carried out with a UCITS by a management company or depositary to the UCITS, the delegates or sub-delegates of the management company or depositary and any associated or group of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Board of Directors is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the year complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

Significant Events During the Financial Year

On 17 February 2023, the Federated Hermes Absolute Return Credit Fund Supplement was updated to clarify the use of Climate Change Impact ("CCI") scores during the investment process.

On 17 February 2023, the Federated Hermes Biodiversity Equity Fund Supplement was updated with exclusion increased from 5% to 10% for companies that receive revenues from alcohol distribution.

On 23 February 2023, the Federated Hermes US High Yield Credit Fund Supplement was updated with the Sustainable Finance Disclosure Regulation ("SFDR") disclosures.

On 20 March 2023, the Federated Hermes Sustainable Global Investment Grade Credit Fund was launched.

On 21 March 2023, the Class Y USD Accumulating Share class and the Class Y JPY Accumulating Hedged Share class of the Federated Hermes SDG Engagement High Yield Credit Fund were listed on Euronext Dublin.

On 19 April 2023, the Federated Hermes Emerging Markets Debt Fund Supplement was updated to reflect changes to the sustainability indicators and the policy on assessing companies for good governance, as outlined in the SFDR disclosures.

On 24 May 2023, all of the SFDR Annex II disclosures were updated to include new data points detailing each sub-funds' exposure to environmentally sustainable economic activities in the Gas and Nuclear sectors, as defined under the EU Taxonomy Regulation.

On 26 May 2023, Mr. Jordan Patel was appointed as the deputy fund manager on the Federated Hermes Biodiversity Equity Fund.

Federated Hermes Investment Funds Public Limited Company

Directors' Report (continued)

Significant Events During the Financial Year (continued)

On 2 June 2023, Ms. Kathryn Glass and Mr. Thomas Scherr were appointed as co-portfolio managers on the Federated Hermes US High Yield Credit Fund.

On 20 June 2023, a notice was sent out to inform shareholders in the Federated Hermes Climate Change High Yield Credit Fund of our intention to hold an EGM on 13 July 2023 to propose changes to the investment objective and benchmark.

On 26 June 2023, the Federated Hermes Sustainable European Equity Fund and the Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription and are in the process of being terminated. Final redemption day was on 26 June 2023.

On 13 July 2023, the resolution to change the investment objective and benchmark of the Federated Hermes Climate Change High Yield Credit Fund was approved by shareholders. The effective date of the changes was 1 November 2023, following the approval of the Central Bank.

On 18 October 2023, the Federated Hermes US High Yield Fund was reclassified as an Article 8 Fund for the purposes of SFDR and Mr. Mitch Reznick was appointed as a co-portfolio manager.

On 23 November 2023, the Federated Hermes Global Equity Fund was closed to further subscription and is in the process of being terminated. Final redemption day was on 23 November 2023.

On 5 December 2023, the Board of Directors approved the merger of the Federated Hermes Multi-Strategy Credit Fund into the Federated Hermes Unconstrained Credit Fund. EGM of shareholders scheduled for March 2024 to consider proposal.

With the imposition of additional sanctions during 2023, the military action being undertaken by Russia in Ukraine may impact on securities related to companies domiciled in Russia and/or listed on exchanges located in Russia, including the Moscow Exchange ("Russian securities"). The Directors are monitoring developments related to this military action, including current and potential future interventions of foreign governments and economic sanctions against Russia. As at 31 December 2023, Federated Hermes Emerging Markets Debt Fund held one Russian security with the market value of USD 7,206 (USD 16,085 as at 31 December 2022) and Federated Hermes Absolute Return Credit Fund held one Russian security with nil market value (nil as at 31 December 2022). None of the other sub-funds have any direct exposure to Russian securities at 31 December 2023.

There have been no other significant events during the financial year which may have had an impact on the Financial Statements for the financial year ended 31 December 2023.

Subsequent Events

On 1 January 2024, Mr. Patrick Wall was appointed as an Independent Non-Executive Director of the Board, Mr. Ronan Walsh resigned from his role as Independent Non-Executive Director and Chairman of the Board and Mr. Michael Boyce was appointed as Chairman of the Board.

The Board has approved the presentation currency of the Company being changed from Sterling ("GBP£") to US Dollar (US\$).

On 1 March 2024, the investors in the Federated Hermes Multi-Strategy Credit Fund approved the merger into Federated Hermes Unconstrained Credit Fund. The effective date of the merger will be on or around 23 May 2024, subject to the approval of the Central Bank.

Up to the date of approval of these Financial Statements there have been no other significant events affecting the Company subsequent to the financial year end, which would impact on the Financial Statements for the financial year ended 31 December 2023.

Corporate Governance Statement

The Board of Directors has voluntarily adopted the Corporate Governance Code for Irish domiciled Collective Investment Schemes as published by Irish Funds, as the Company's corporate governance code.

Directors' Compliance Statement

The Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations as set out in section 225 of the Companies Act 2014.

Federated Hermes Investment Funds Public Limited Company
Directors' Report (continued)

Directors' Compliance Statement (continued)

The Directors confirm that:

- 1) A compliance policy document has been drawn up that sets out policies that in their opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations.
- 2) Appropriate arrangements or structures are in place that are, in their opinion, designed to secure material compliance with the Company's relevant obligations, and
- 3) During the financial year, the arrangements or structures referred to in (2) have been reviewed.

Directors' Statement on Relevant Audit Information

The Directors confirm that:

- 1) so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware, and
- 2) the Directors have taken all the steps they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Federated Hermes Investment Funds Public Limited Company

Investment Manager Information (Unaudited)

Hermes Investment Management Limited

Responsibility: a core value

Hermes Investment Management Limited is an active asset manager working to deliver excellent, long-term, risk adjusted performance – responsibly. We strive to lead the debate and contribute to the transformation of the investment industry for the benefit of our clients, their stakeholders and, where possible, society at large.

Our agenda and activities are driven by the long-term objectives of our clients' beneficiaries and we act in their interests.

Responsibility in practice

We have a comprehensive programme to ensure our responsibility approach and activities are integrated seamlessly in our funds and stewardship service. This includes:

- Delivering sustainable performance within the terms of the mandate and within the clients' risk appetite, taking into account all material investment factors including material environmental, social and governance (ESG) factors ensuring that we are informed though not constrained by these considerations
- Acting as a responsible, engaged, long-term steward of investments encompassing constructive dialogue and taking action where necessary
- Engaging with public policy makers and industry bodies to encourage a sustainable economy beyond the timeframe of a specific mandate

At Federated Hermes Limited ("FHL"), the parent company of Hermes Investment Management Limited, we integrate relevant and material ESG considerations and engagement insights into our investment processes in all of our products, across all asset classes. The public-equities and fixed-income teams supplement fundamental financial analysis with information provided through a range of proprietary ESG and engagement tools. Through these tools, along with additional engagement insights, the teams have access to third-party ESG data, such as MSCI, Sustainalytics, Trucost, ISS, Planetrics, Net Purpose and Bloomberg, as well as insights from engagement carried out by FHL's subsidiary EOS at Federated Hermes ("EOS") with investee companies and the broader investable universe. These sources are a valuable input to the investment process, as well as to the ongoing monitoring of and engagement with companies.

For public markets, FHL's proprietary ESG tools are of particular note:

- Our ESG Dashboard includes our proprietary Quantitative ESG (QESG) Score and identifies stocks with positive ESG characteristics and/or stocks demonstrating positive ESG change. The QESG score captures how a company manages its ESG risks.
- The Portfolio Snapshot allows us to observe the aggregate ESG risks across our portfolios relative to their benchmarks. It also examines ESG ratings and controversies and identifies contingent risks. Our portfolio managers use this tool to evaluate a strategy's ESG performance over time. It also provides insights into engagement and the progress made, and our voting choices relative to the benchmark.
- Our Carbon Tool enables fund managers and engagers to identify carbon risks in portfolios and companies that currently exist or may develop in the future. Importantly, the tool incorporates our stewardship activity and intelligence and is able to identify companies that are priorities for engagement and their progress against environmental objectives.
- Our Environmental Tool assesses both portfolios and companies on their carbon, water and waste performance. It also looks to quantify the environmental cost of the impact via the following six lenses; carbon, water, waste, air pollutants, land/water pollutants and natural resource use. In addition, we have incorporated the temperature alignment of portfolios and companies alongside exposures to carbon intensive sectors; namely fossil fuels, mining and thermal coal. This tool also incorporates our stewardship activities with a focus on environmental engagement at both portfolio level and company level.
- Our Corporate Governance Tool provides a breakdown of corporate governance characteristics, such as information on board independence, diversity and audit tenure, etc. This tool compares the governance of companies to the expectations we have set and flags any companies that do not meet the expected standard.

Federated Hermes Investment Funds Public Limited Company Investment Manager Information (Unaudited) (continued)

Hermes Investment Management Limited (continued)

Responsibility in practice (continued)

ESG is integrated into the investment strategy and working practices of all of our real-estate portfolios. A consideration of ESG principles is embedded into the property selection and investment process, including through initial screening and due diligence and as part of the investment decision. For our Real Estate team's indirect and international investments, we carry out active engagement on governance matters and on ESG policies and approaches with property developers, property management teams, tenants, lawyers and agents. We include commitments to develop a joint approach to ESG on acquisitions for jointly managed assets.

EOS which provides stewardship services in public equity and fixed income markets, is a global market leader in voting and engagement with both companies and public policy makers. The team makes voting recommendations over 13,000 company meetings and actively engages with more than 1,100 (core engagement programme for 2023 is around 325) companies a year at executive and board level on a range of issues including board governance, executive remuneration, risk management, business strategy, corporate culture, carbon, pollution, water stress, labour and community rights. We are also active participants in a wide range of public policy discussions and our Chief Executive, Saker Nusseibeh, founded the 300 Club, an independent forum for discussion and debate about the responsibilities of the investment industry.

Whilst the responsibility for implementation resides with all FHL personnel, the ESG and engagement integration programme is led, coordinated and supported by the FHL Responsibility Office: a head of Responsibility reporting to FHL CEO, a policy and advocacy team and an ESG integration team. The Head of Responsibility also leads EOS, Federated Hermes third party stewardship service. This team is further supported by the Responsibility Working Group, which meets quarterly, to have oversight of FHL policy and lead initiatives. The Responsibility Working Group includes investment, product development, marketing, legal, compliance, human resources and responsibility representatives as members.

Federated Investment Counseling

About the Investment Manager

Federated Investment Counseling and other subsidiaries of Federated Hermes combined, advise a range of equity, fixed-income and money market mutual funds as well as a variety of other pooled investment vehicles, private investment companies, and customised separately managed accounts (including non-U.S./offshore funds), which totalled approximately \$757.6 billion in assets as of 31 December 2023. Federated Hermes was established in 1955 as Federated Investors, Inc., and is one of the largest investment managers in the United States with more than 2,000 employees. Federated Hermes provides investment products to more than 10,000 investment professionals and institutions. The Investment Manager advises approximately 132 institutional separate accounts, private investment companies, separately managed accounts and other pooled investment vehicles (including sub-advised funds and non-U.S./offshore funds) which totalled approximately \$202.9 billion in assets as of 31 December 2023.

In December 2017, Federated Investors, Inc., now Federated Hermes, parent company to Federated Investment Counseling, became a signatory to the Principles for Responsible Investment ("PRI"). The PRI is an investor initiative in partnership with the United Nations Environment Programme Finance Initiative and the United Nations Global Compact. Commitments made as a signatory to the PRI are not legally binding, but are voluntary and aspirational. They include efforts, where consistent with our fiduciary responsibilities, to incorporate environmental, social and corporate governance ("ESG") issues into investment analysis and investment decision making, to be active owners and incorporate ESG issues into our ownership policies and practices, to seek appropriate disclosure on ESG issues by the entities in which we invest, to promote acceptance and implementation of the PRI within the investment industry, to enhance our effectiveness in implementing the PRI, and to report on our activities and progress towards implementing the PRI. Being a signatory to the PRI does not obligate Federated Hermes to take, or not take, any particular action as it relates to investment decisions or other activities.

Federated Hermes Investment Funds Public Limited Company Investment Manager Information (Unaudited) (continued)

Federated Investment Counseling (continued)

Additional information regarding the security selection process

As part of analysis in its security selection process, among other factors, the Investment Manager also evaluates whether environmental, social and governance factors could have positive or negative impact on the risk profiles of many issuers or guarantors in the universe of securities in which the Fund may invest. The Investment Manager may also consider information derived from active engagements conducted by its in-house stewardship team with certain issuers or guarantors on environmental, social and governance topics. This qualitative analysis does not automatically result in including or excluding specific securities but may be used by the Investment Manager as an additional input in its primary analysis.

Voting

Throughout 2023, for all sub-funds of Federated Hermes Investment Funds Plc, we voted at 625 shareholder meetings (7,032 resolutions). At 340 of those meetings we opposed one or more resolutions. We voted with management by exception at 55 meetings and abstained at 2 meetings. We supported management on all resolutions at the remaining 228 meetings.

⁴ Russell 2500 TR net benchmark is calculated from the penultimate working day of each month.

⁵ These sub-funds do not have a benchmark for performance comparison purposes. Performance is shown against the risk free rate index of SOFR ("Secured Oversight Financing Rate") 3 month USD (3 month US Libor to end June 2022) as a reference index.

⁶ As Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023, the performance data presented is from inception date to year end.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Emerging Markets Equity Fund

Market Review

Emerging markets (EM) as measured by the MSCI EM Net TR Index posted positive gains in 2023 (+9.83% in US dollar terms, 3.63% in sterling terms), after two years of negative returns. Even as absolute performance recovered, EM underperformed developed markets (DM) by 14.7% as US equities proved remarkably resilient despite unprecedented monetary tightening.

Underwhelming reopening momentum in China dampened investor sentiment for EM while, for much of the year, the US Federal Reserve's (Fed's) policy of higher-for-longer interest rates dampened risk appetite. The Fed's interest-rate hikes strengthened the US dollar and US yields (which briefly peaked above 5% in October), making dollar-denominated debt more expensive and reducing capital inflows to EM.

The fourth quarter then saw a strong finish to the year, EM stocks posting their best quarter in the year (+7.9%), as slowing US inflation data supported a soft-landing scenario, sending US bond yields and the US dollar lower. Fed statements from November – effectively guiding the market for rate cuts at some point – unleashed an 'everything rally', which included lower quality, highly leveraged companies.

Crude oil prices declined c. 10% in 2023 amid geopolitical concerns, production cuts and global measures to rein in fluctuations in prices. Gold rose 13.1%. EM Value finished the year up 14.2%, significantly ahead of EM Growth (+5.8%).

At a regional level, Latin America was the best performing region (32.7%), led by Mexico (40.9%), Peru (36.6%) and Brazil (32.7%) against a backdrop of improving economic data and the prospect of further rate cuts in Brazil and Peru. EM Asia (7.8%) underperformed, led lower by China (-11.2%), due to a lacklustre economic recovery with CPI in negative territory and persistent problems in the property sector. Emerging Europe, the Middle East, and Africa (8.2%) also underperformed.

At a sector level, the period was marked by a wide dispersion in returns, Information Technology (+32.3%) and Energy (26.8%) finished at the top, while Real Estate (-7.1%) Consumer Discretionary (-3.4%) and Health Care (-1.3%) ended at the bottom. Consumer Discretionary underperformed as the weakness of the major Chinese e-commerce providers weighed on returns.

Investment Strategy

In H2 2023, we reviewed several underperforming Chinese holdings. We sold China Merchants Bank, Hundsun Technology, Midea and Glodon, as they are being impacted by the property slowdown; Silergy to reduce active risk; Meituan, China's leading food delivery company, due to weak demand and intense competition from Douyin; and Sungrow Power, the world's leader in power inverters, due to our concern that there is oversupply in the solar supply chain. We also sold Silergy to reduce active risk. We bought H-World, China's second-largest hotel business.

Elsewhere, we increased our exposure to Chile, adding Falabella, the third-largest multi-format retailer in Latin America, and to Brazil, through Rumo, the biggest independent rail logistics operator in Brazil. We sold Shoprite after its strong performance, adding FirstRand, the largest financial services firm in Africa, which we expect to benefit from economic recovery and accelerating loan growth. We sold Dabur India to invest in PowerGrid, India's leading power-transmission infrastructure provider. We sold Qatar National Bank, reallocating to Abu Dhabi Commercial Bank with better exposure to the Middle East growth story.

We trimmed Samsonite, Walmex, Motherson, TSMC, Delta Electronics, WEG and Banorte after they had performed strongly. We added to Tigermed, Lotes, Alibaba, JD.com, Micron, HDFC Bank and Hong Kong Exchanges as we assessed that they had attractive risk-reward potential.

Performance Review

The Fund returned -2.40% in sterling terms, net of fess, underperforming its benchmark by 582 basis points (bps). Our overweight allocation to China, which underperformed, associated exposure to the Renminbi, which depreciated, and stock selection in China detracted the majority from our relative returns. Stock selection in Brazil, India and Hungary also negatively impacted returns, eclipsing stronger selection in Taiwan, Indonesia, Chile and South Africa. Contributors included an off-benchmark US allocation, our overweight allocation to Taiwan, and avoiding underperforming markets including Thailand.

Federated Hermes Global Emerging Markets Equity Fund (continued)

Performance Review (continued)

Samsung Electronics rose thanks to gradual semiconductor demand recovery driving higher dynamic random-access memory (DRAM) and NAND exports and higher average selling prices. Wiwynn, a Taiwanese producer of server equipment, surged as the market factored in the positive impact of artificial-intelligence (AI) related earnings growth and increased spending from data traffic growth. Accton Technology, a Taiwanese network equipment maker that produces switches and smart Network Interface Cards (NICs), also surged due to strong earnings and higher demand as AI applications were expected to grow.

JD.Com, China's second largest e-commerce retailer by market share, fell the most, mainly due to negative sentiment for China, led by foreign-investor selling and weak consumption. Improving margin and free-cash-flow profile resulted in the stock looking cheap (FWD 12M PE 8.1x), offering decent upside and scope for near-term positive momentum as demand for appliances and electronics incrementally recovers. Hangzhou Tigermed, the largest contract drug research and development (CRO) company in China, fell due to soft demand for clinical-related consulting services in overseas markets and even weaker performance of clinical trial services due to prolonged funding pressure in the domestic market. AIA Group, the largest life insurer in Asia, fell, despite reporting strong numbers, due to the slowdown in China's economy and the property sector crisis. We view AIA as a classic compounder, selling protection to an underpenetrated region – it is benefiting from favourable demographic changes and household income growth in China and ASEAN markets, which should support strong long-term growth in its book value.

Outlook

Several central banks in EM are shifting to a dovish stance, after a long period of hawkish monetary policy and interest rate increases. Chile, Brazil, Peru, and Poland have already begun the process by lowering their benchmark interest rates. China also lowered its interest rates to help its economy, which is struggling with low growth and property issues. The developed world is also likely to consider cutting interest rates as inflation is beginning to normalise.

Despite the relatively favourable macroeconomic and monetary-policy outlook, EM equities remain volatile, largely due to China's economic woes. The team is optimistic about the future, based on: several economies easing their monetary policies; India, Indonesia, and Mexico benefitting from structural economic drivers; a new technology cycle boosting companies in Taiwan and Korea; and China's economic overhaul improving the prospect of the new economy and path to sustainable economic growth.

The team continues to prioritise investments in good-quality companies which have the capacity to grow structurally, which have low levels of leverage and which trade at reasonable valuations. Companies which have these characteristics will be best placed to outperform in a world which may see higher-for-longer and more volatile interest rates, slower growth and more geopolitical uncertainty.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global High Yield Credit Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis point (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Investment Strategy

Continued macro uncertainty coupled with an increase in idiosyncratic events meant we remained cautious over the year, staying high in quality, as we expected fundamentals to deteriorate given margins had come under pressure and refinancing risk remained a key concern, especially for the more highly leveraged/lower quality companies. Market volatility picked up meaningfully in March following US and European bank failures – with Credit Suisse taking centre stage in Europe, where we had exposure to AT1 bonds earlier in the year before the position was reduced into strength (taking partial profits) in February.

Against this backdrop, we remained constructive on sector, region and issuer selection – with particular focus on developed markets versus emerging markets, and capital structure positioning with the intention to pivot towards senior debt. Additionally, we undertook a pivot out of cyclical sectors into defensive sectors early in the period, which remained core to our search for new opportunities. As government yields continued to move higher up until October, we took the opportunity to slightly extend duration in the US around Q3. Low cash prices also became a major theme towards the end of year following months of market correction, creating investment opportunities in names we liked, and we participated in primary deals in the subordinated financials space.

Performance Review

The Federated Hermes Global High Yield Credit Fund (Class F, EUR, Accumulating, net) returned 8.55% in 2023, with a notable rebound in performance over Q4 2023, underperforming its benchmark by 163bps. The portfolio faced major headwinds up until October 2023, as rates volatility remained elevated, financials were impacted by idiosyncratic events and higher quality assets underperformed.

From a sectors perspective, the Fund's overweight exposure to capital goods, banking and basic industry contributed the most to relative returns, while its underweight exposure to the Energy and Real Estate sectors, as well as a lack of exposure to the leisure industry, detracted the most.

From an issuer's perspective, the Fund's overweight allocations to Goodyear Tire & Rubber and ICA, as well as its off-benchmark position in Dell Technologies, contributed the most to relative performance. Meanwhile, the Fund's overweight exposures to Country Garden and Next Altice, as well as its off-benchmark exposure to UBS, detracted the most.

From a ratings perspective, the Fund's overweight exposure to BBBs and broad BB-rated securities added the most to relative performance, while its underweight exposure to single-B rated issuers, and below, detracted the most.

From a regional perspective, the Fund's overweight allocations to Western Europe and the UK were the top relative contributors, whereas its underweight exposure to North America, Asia emerging markets and Latam detracted.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global High Yield Credit Fund (continued)

Outlook

Growth has been resilient in 2023 as the impact of higher policy rates was offset by a stronger service sector, supportive fiscal policy and an improving real wage picture. However, growth is expected to decline in developed market economies in 2024. Headline inflation has normalised quickly over the course of 2023 and is expected to continue towards target through 2024 as tight policy constrains activity, momentum in services continues to slow, unemployment slowly picks up and labour markets continue to loosen.

Corporate fundamentals are starting to deteriorate, with earnings being weaker, leverage levels increasing and the ability of companies to pay coupons decreasing. Default activity in the US high yield market, including distressed exchanges, increased in November by 28bps to 2.88% while recovery rates increased slightly to 35.7%, which is below the 25-year annual average of approximately 40%. In Europe the default rate also increased by 12bps to 2.47%, with the average recovery rate rebounding to 55% from a recent low of 35% in July.

Our near-term outlook favours exposure to high quality bonds with selective exposure to B/CCC rated credit, a focus on low-cash-price bonds and a reduction in overall spread duration. We continue to be positioned in defensive sectors, with a preference for Europe versus the US on relative value. Yields remain attractive and, as rates volatility continues to normalise, we would expect this part of the credit market to outperform. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations coupled with active engagement is critical to sustainable long-term performance.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes US SMID Equity Fund

Market Review

The Russell 2500 Index Net rose by 11.26% in sterling terms over the period. Global equity markets ended the year in positive territory in a stark reversal from 2022. The strong returns were driven by excitement around Artificial Intelligence (AI), which boosted the Information Technology sector, and softer inflation prints and strong economic data from the US supported the view that the fight against inflation was on track.

The collapse of Silicon Valley Bank and Credit Suisse in March, led to a sell-off in the financial sector in the US and Europe. Fears were alleviated following the co-ordinated efforts by regulators and large banks, which stabilised the sector. The third quarter stemmed the market's enthusiasm as hopes of a pivot by central banks shifted to markets accepting a 'higher-for-longer' scenario, which led to a correction in September. This was reversed in the final two months of the year. A flurry of economic data, which highlighted the health of both the US economy and consumer, moderating inflation and a third consecutive pause by the Federal Reserve (Fed) led the market to anticipate a series of rate cuts in 2024, and US equities rallied in the final months of 2023.

Investment Strategy

The Fund continued to seek high-quality companies with attractive upside potential, and trim positions in what we believed were fully valued stocks (or stocks that were set to be negatively impacted by the changing landscape).

Over 2023, the Fund initiated five new positions in high quality stocks, ChampionX, Retail Opportunity Investment Corporation, FTI Consulting, Paylocity and Descartes.

ChampionX is a leading global provider of production optimisation technology to the energy industry. It has a strong position in a concentrated market, an extensive patent portfolio, considerable industry experience, a solid balance sheet and good cashflow. Retail Opportunities Investment Corporation is a real estate investment trust that owns, acquires and manages grocery-anchored shopping centres in key markets on the west coast of the US. Its management has consistently executed a focused strategy of targeted acquisitions that has led to industry-leading occupancy, organic growth and deal closure rates. FTI Consulting is an international consulting firm with a market-leading restructuring business practice. Its restructuring business is starting to see an increase in activity and should perform well if we enter a recessionary environment. Paylocity is a leading provider of cloud-based payroll and human capital management software solutions for medium-sized businesses. The firm is well positioned to gain market share given its strong product suite and industry-leading G2 ratings (a measurement of service quality). Descartes is a leading global software company for logistics and supply-chain management for companies involved in shipping goods (such as retailers, manufacturers and distributors), carriers (truckers and airlines) and logistics companies (truck brokers, and freight forwarders). It is well positioned to benefit from the rapid growth in e-commerce and freight automation.

These trades were funded by selling four positions and trimming others where we saw less relative upside. We sold Livanova, Jack Henry, Masterbrands, Cargurus and White Mountains.

Performance Review

The Fund returned 13.99% in net sterling terms, outperforming the benchmark by 246 basis points (bps) over the period. The outperformance was driven by our overweight in Industrials, stock selection in Utilities and our overweight and selection in Technology. This outweighed the negative impact from stock selection in Health Care and Consumer Discretionary. The strong relative performance can also be attributed to the Fund's bias towards companies with higher quality characteristics, which was beneficial over the period.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes US SMID Equity Fund (continued)

Performance Review (continued)

Simpson Manufacturing was the strongest contributor to relative returns over 2023. Simpson outperformed following strong quarterly results in Q1 and Q2, which exceeded expectations. The stock did pull back in October, in spite of strong Q3 results, as management anticipated that the 'higher-for-longer' interest rate environment would impact Q4 results. However, the shares recovered in the last two months of 2023 as the market anticipated the end of the rate tightening cycle by the Fed. Simpson has benefitted from an improvement in input costs and demand, particularly within new construction. Fair Isaac has been a robust performer in 2023, following strong quarterly results. The shares continued their strong performance in November on the back of bullish commentary from their CFO, which highlighted that FY24 guidance was conservative and that momentum was set to continue. FY23 was a strong year for the company, despite muted loan origination volumes owing to pricing power within their B2B Scores business and strong sales momentum in software. Pulte Group, rose after it reported strong quarterly results throughout 2023 and management were cautiously optimistic that momentum would continue. A low supply of existing homes and a moderation in mortgage rates has created an improvement in demand for housebuilders. The shares performed strongly in November and December due to the moderating economic data and falling inflation in the US, and the market anticipated the end of the rate tightening cycle by the Fed.

The largest detractor from relative performance was AMN Healthcare, which fell after its quarterly results missed expectations and outlook disappointed. Whilst the near-term travel nurse market contraction has been stronger than previously anticipated, the prospects for AMN's long-term growth are supported by a structural clinician shortfall. Bio-Rad fell after its Q2 and Q3 results missed expectations. Bio-Rad has suffered, alongside its peers, from a weaker demand in biopharma and macro headwinds in China. ICU Medical fell in September after its full-year guidance missed estimates and its Q3 results were worse than expected. Both Bio-Rad and ICU Medical rallied in the final two months of the year alongside peers, as there were positive signs of a recovery from the broader challenges that had weighed on the industry, and shares were boosted by the anticipation of the end of the rate hiking cycle.

Outlook

The US market remained reasonably robust in the face of increased geopolitical and economic concerns throughout 2023. The significant uncertainty surrounding the economic outlook was, we believe, reflected in stock prices. Whilst the Fed has signalled the end of the rate hiking cycle, we do not believe that rates will return to the level experienced in the last cycle. This should prove supportive of the high-quality, cashflow-generative, sensibly valued companies that the strategy invests in.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Asia ex-Japan Equity Fund

Market Review

The benchmark MSCI AC Asia ex Japan IMI Index returned 1.91% over the period, in GBP terms. Asia ex Japan equities started the year on a strong footing thanks to China's reopening and expectations for easier monetary policy. However, March saw a widespread loss of confidence in US and European banks, which initially weighed on risk assets. And, for much of the year, the Federal Reserve's (Fed's) policy of higher-for-longer interest rates dampened risk appetite and the outlook for global equity markets.

The fourth quarter saw a strong finish to the year, as slowing US inflation data supported a soft-landing scenario, sending Treasury yields and the US dollar lower. Fed statements from November – effectively guiding the market for rate cuts at some point – unleashed an 'everything rally', which included lower quality, highly leveraged companies. Expectations that central banks would cut interest rates sooner in 2024 than previously expected resulted in strong returns across most asset classes.

Still, Chinese equities retreated as indicators continued to point to a lacklustre economic recovery, with CPI in negative territory year-on-year and persistent problems in the property sector. The Central Economic Work Conference, which took place in December, brought no major positive policy surprise, and the spectre of further regulation of the gaming sector weighed on already beleaguered sentiment.

Taiwan and Korea posted strong returns, boosted by the tech sector as investors rushed to buy artificial-intelligence (AI) related stocks and the memory cycle bottomed. India also rose, supported by some positive macroeconomic data including better industrial production, positive flows (foreign and domestic) and significant re-rating of small- and mid-cap companies. A strong showing for the ruling Bharatiya Janata Party in key state elections in December spurred positive sentiment and large foreign inflows. Thailand, the Philippines, Indonesia, and Malaysia underperformed.

At the sector level, Information Technology and Energy performed best, while Real Estate and Consumer Staples lagged.

Investment Strategy

Our key overweight allocations remain Korea and China, while our key underweight position is India. The overweight to Korean stocks reflects their attractive valuations and companies' improving corporate governance. By contrast, Indian stocks remain expensive, explaining our underweight allocation. Our overweight to China results from low valuations, despite geopolitical risk. We are underweight Taiwan on concerns about semiconductor overcapacity.

We sold out of Lite-On Technology, Samsung SDI, Posco Holdings, Universal Scientific, Rohm, SharkNinja (following its spin-off from parent company, JS Global), Vietnam Dairy, Cathay Pacific and Cosco Shipping Ports.

We initiated positions in Samsung Life Insurance, Tencent, China Mengniu Dairy and Foxconn Industrial Internet.

Performance Review

The Fund returned 2.71% in GBP terms (net of fees), outperforming the benchmark MSCI AC Asia ex Japan IMI Index by 0.78%. The outperformance was mainly a result of stock selection in China, Taiwan and Thailand, and the overweight allocation to Korea, which were partly offset by the underweight allocations to India and Taiwan and the overweight to China.

Powertech Technology, a Taiwanese semiconductor assembly and packaging company, rose after it raised sales guidance, largely driven by automotive products and enterprise storage drives. Samsung Electronics, a Korean conglomerate, rose on an improving outlook for memory and recovering prices off a low base. Honda Motor, a global automotive and motorcycle company that derives the majority of its profits from Asia ex Japan, rose after reporting strong earnings, and after announcing ongoing share buybacks amid an improving Japanese corporate governance environment.

JD.Com, a leading Chinese online e-commerce retailer, fell after announcing a multi-billion-dollar consumer-discount campaign, highlighting heightened competition. Our underweight holding in Taiwan Semiconductor Manufacturing Company, the world's leading semiconductor foundry, detracted from relative returns after the stock performed strongly on expectations of a recovery in AI-related semiconductor demand. Shares in Weibo, China's 'Twitter', fell due to negative sentiment and amid fears for rising competition in the advertising space.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Asia ex-Japan Equity Fund (continued)

Outlook

Our portfolio is near a record cheap valuation relative to both book value and earnings (relative to both our own history and the benchmark), with the average quality of the companies we hold being comparable to that of the benchmark. We are overweight Korea, China and Value, while being underweight India, Taiwan and Growth. We are optimistic over return potential given the exceptional value on offer – our portfolio trades at approximately 8 times earnings and under 0.8 times book value.

**Hermes Investment Management Limited
February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Equity ESG Fund

Market Review

Global equities began the year in positive fashion. Risk aversion declined sharply, with sentiment boosted by the reopening of the Chinese economy and signs that inflation was receding from its autumn peaks, which was reflected in falling bond yields. In addition, excitement around artificial intelligence (AI), following the launch of ChatGPT in late 2022, drove equity markets higher.

The excitement caused by AI was the main driver of global equity markets for much of 2023. The result was a distinct lack of market breadth, as a select few companies – the 'Magnificent Seven' – had a huge influence on overall market returns. Indeed, as we entered Q4, over 90% of the MSCI ACWI's year-to-date return had been driven by the Information Technology, Communication Services and Consumer Discretionary sectors.

Outside of the AI-generated excitement, investors remained cautious for much of the year. Inflationary pressures proved to be more stubborn than anticipated, while hawkish central banks, fears of recession and geopolitical uncertainty ensured that investors remained firmly in 'risk off' territory.

That was until Q4, when we witnessed a sudden change in investor sentiment. A more dovish-sounding Federal Reserve increased the likelihood that a soft landing would be achieved and reignited the belief that we had reached peak interest rates. This led to a surge in global equity markets, coupled with a notable increase in market breadth and a more favourable environment for active managers.

The picture was mixed from a factor perspective. We saw a sharp change in sentiment at the start of the year, with Growth the preferred factor. But, for much of H1, investors switched between Growth and Value at regular intervals in response to policymakers' rhetoric around interest rates. In Q3, Value led the way, especially in Europe and Japan. Understandably, given the investor uncertainty, Quality factors such as Capital Structure, Corporate Behaviour and Profitability were generally favoured, although the recent market rally saw Growth and Sentiment come to the fore.

Investment Strategy

The investment approach remains focused on stock selection, with neutral sector and regional biases. The Global Equity ESG Fund uses systematic fundamental analysis to assess the attractiveness of over 5,000 stocks on a daily basis. This analysis involves a disciplined, bottom-up stock selection process, which is based on well-documented anomalies and trends in investor behaviour. The strategy aims to take advantage of systematic behavioural biases of market participants while remaining cognisant of the risks associated with the modelling of such behaviour.

We determine fair value for a stock by using metrics from a company's financial statements. Our modelling incorporates a wide variety of stock characteristics (often referred to as factors) designed to proxy expected investment returns and the behaviour of market participants. ESG is embedded in the Alpha model, using the team's proprietary QESG Score, which enables the team to identify stocks that have good or improving ESG characteristics. The Fund's multi-factor approach ensures it remains exposed to a range of styles with the aim of generating consistent outperformance over the long term. We closely monitor the performance of each factor with the aim of building stock selection models that deliver consistent and sustainable excess returns.

Portfolio modelling is utilised in the portfolio construction process to trade-off between expected return and portfolio risk, allowing for both portfolio constraints and transaction costs. The process is further supplemented by portfolio exposure analysis using our proprietary risk modelling system, MultiFRAME, which allows us to assess the Fund's exposure to any quantifiable risk factor.

Unlike traditional quantitative strategies, analysis is also completed on a disciplined, subjective, stock-level basis. The team uses its extensive experience to challenge the output of the investment model and remove trades subject to significant non-quantifiable factors or unreliable inputs. The team also works closely with EOS at Federated Hermes, our in-house stewardship team, which votes on and engages with companies on our behalf and works with us to further understand the ESG risks and opportunities facing each company.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Equity ESG Fund (continued)

Performance Review

The Global Equity ESG F GBP Accumulating share class returned 12.27% during 2023, underperforming the MSCI ACWI Net, which returned 15.31%, by 263bps. Stock selection was the main influence on relative returns during the period, with significant detractions in the Information Technology and Communication Services sectors. These detractions were largely due to our decision to switch our Nvidia exposure into Advanced Micro Devices in January, and not owning Meta Platforms, which due to significant ESG concerns is not currently considered investable. In fact, Nvidia and Meta Platforms were responsible for almost the entire underperformance in the period. On the positive side, there were notable contributions from stock selection in Industrials, being overweight Information Technology and being underweight Energy.

UniCredit, Advanced Micro Devices and Royal Caribbean contributed the most to relative returns. UniCredit consistently reported strong quarterly results in 2023, with the company also raising guidance on higher net interest income, better profitability and higher trading income. Advanced Micro Devices benefited from the AI trend in 2023. The company was seeing accelerating demand, driven by a faster pace of AI infrastructure across a variety of industries, while new product innovation provided further opportunities. Royal Caribbean consistently reported positive earnings. New bookings outpaced 2019 levels by a "very wide margin", and demand continued to accelerate, reflected in strong bookings for 2024.

Nvidia, Pfizer and Alibaba were the largest detractors from relative returns. Nvidia benefited from its leading position in AI, but we had an underweight allocation to the name, having rotated into Advance Micro Devices (which also performed well) at the start of the year. We subsequently reopened the position in Q4 as the boost that the AI trend gave to Nvidia's outlook prompted the Alpha Model to classify the company as hyper-growth, and as such the company's premium valuation is less of a headwind to the investment thesis. Pfizer was affected by poor sentiment towards companies that had benefited during the Covid-19 pandemic. The company subsequently cut guidance for 2023, reflecting lower demand in its Covid franchise. Alibaba has been affected by poor sentiment towards Chinese stocks due to concerns over sluggish economic growth. The company reported better-than-expected results, but there were some concerns over the increased investment needed to maintain its competitiveness. Meta Platforms, which was not held in the Fund, also detracted significantly from relative returns.

Outlook

Macro sensitivity remains at the forefront of investors' minds as doubts over a soft landing linger. We continue to follow the data, however, and we do not believe the conditions have changed enough to warrant a halt in optimism.

Interest rate decisions are key. Policymakers continue to push the higher-for-longer mantra, but the market is not listening, and anticipation of a rate cut is set to bring about a market broadening. Small caps and mid-caps are ready to take advantage of more comfortable conditions as the burden of servicing debt eases.

Growth stocks should also benefit from the loosening of economic conditions. However, it will be important to be selective. The geopolitical landscape is fragile, and the avoidance of recession is not guaranteed, such that we continue to favour quality growth over more speculative names. In addition, sustainable companies are starting to be rewarded by investors after a challenging period. Yet, the premium valuation that sustainability should command has not been restored, making 2024 a year when sustainability is likely to be rewarded by investors.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Multi-Strategy Credit Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis point (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Investment Strategy

Continued macro uncertainty coupled with an increase in idiosyncratic events meant we remained cautious over the year, staying high in quality, as we expected fundamentals to deteriorate given margins had come under pressure and refinancing risk remained a key concern, especially for the more highly leveraged/lower quality companies. Market volatility picked up meaningfully in March following US and European bank failures – with Credit Suisse taking centre stage in Europe, where we had exposure to AT1 bonds earlier in the year before the position was reduced into strength (taking partial profits) in February.

Against this backdrop, we remained constructive on sector, region and issuer selection – with particular focus on developed markets versus emerging markets, and capital structure positioning with the intention to pivot towards senior debt. Additionally, we undertook a pivot out of cyclical sectors into defensive sectors early in the period, which remained core to our search for new opportunities. As government yields continued to move higher up until October, we took the opportunity to slightly extend duration in the US around Q3. Low cash prices also became a major theme towards the end of year following months of market correction, creating investment opportunities in names we liked, and we participated in primary deals in the subordinated financials space.

Within the hedge overlay, we took opportunities to add protection in Q1, given the relatively attractive cost, as rates volatility remained elevated, especially relative to overall implied volatility. A short index position to the European subordinated financial index was in place for most of the year as the sector faced strong headwinds; we then reduced this position towards Q3, shifting our allocation towards the US.

Within structured credit, we took advantage of the market correction over Q1 and Q2 to reposition our collateralised loan obligation (CLO) allocation, selling some of its low-coupon holdings and redirecting to CLO primaries. In addition, the dislocation within the leveraged loan market, which supported the CLO prints, allowed the Fund to focus its allocation on primary BB tranches, which gave an overall higher carry and convexity.

Performance Review

The Federated Hermes Multi-Strategy Credit Fund (Class F, USD, Accumulating) returned 8.82% net in 2023, with a notable rebound in performance over Q4 2023.

The portfolio faced major headwinds up until October 2023, as rates volatility remained elevated, financials were impacted by idiosyncratic events and higher quality assets underperformed.

From a sectors perspective, the Fund's exposure to basic industry, banking and capital goods contributed the most to absolute returns, while its exposure to the Real Estate sector detracted the most. Our short index exposure detracted, largely as a result of spreads tightening significantly over Q4.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Multi-Strategy Credit Fund (continued)

Performance Review (continued)

From an issuer's perspective, the Fund's allocation to Barclays, Bath & Body Works and Virgin Media contributed the most, while our exposures to Credit Suisse and Country Gardens were the largest detractors.

From a ratings perspective, the Fund's exposure to BBBs and broad BB-rated issues added the most to performance, while single-B and below-rated issuers detracted the most.

From a regional perspective, North America, Western Europe and the UK were the top contributors, while only Asian emerging markets detracted.

Outlook

Growth has been resilient in 2023 as the impact of higher policy rates was offset by a stronger service sector, supportive fiscal policy and an improving real wage picture. However, growth is expected to decline in developed market economies in 2024. Headline inflation has normalised quickly over the course of 2023 and is expected to continue towards target through 2024 as tight policy constrains activity, momentum in services continues to slow, unemployment slowly picks up and labour markets continue to loosen.

Corporate fundamentals are starting to deteriorate, with earnings being weaker, leverage levels increasing and the ability of companies to pay coupons decreasing. Default activity in the US high yield market, including distressed exchanges, increased in November by 28bps to 2.88% while recovery rates increased slightly to 35.7%, which is below the 25-year annual average of approximately 40%. In Europe the default rate also increased by 12bps to 2.47%, with the average recovery rate rebounding to 55% from a recent low of 35% in July.

Our near-term outlook favours exposure to high quality bonds with selective exposure to B/CCC rated credit, a focus on low-cash-price bonds and a reduction in overall spread duration. We continue to be positioned in defensive sectors, with a preference for Europe versus the US on relative value. Yields remain attractive and, as rates volatility continues to normalise, we would expect this part of the credit market to outperform. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations coupled with active engagement is critical to sustainable long-term performance.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Small Cap Equity Fund

Market Review

The MSCI World Small Cap Index Net returned 9.23% in sterling terms in 2023. In a year of continued geopolitical conflict, enthusiasm around Artificial Intelligence (AI) and the anticipation of the end of the rate hiking cycle by central banks, global equity markets rose.

Developed market small caps underperformed their large cap peers, although they were ahead of equally-weighted large cap benchmarks. With regard to regions, North America (17.22%) and Europe (16.69%) were the best performing, while Israel was the worst performing region (-1.29%). Information Technology (28.36%) and Industrials (23.23%) were the best performing sectors, whilst Utilities (-4.30%) and Health Care (5.79%) were the worst.

Investment Strategy

Global Small Cap Equity is a bottom-up stock picking strategy, and we aim to invest in high quality stocks over the long term. We look for stocks that have high returns on equity and/or high sustainability of revenue and returns. We take a bottom-up, fundamental investment approach. We believe that excess returns are best and most consistently generated by concentrating on stock-specific risk and not having significant regional and industry exposures.

We initiated four new positions and exited 10 holdings over the year.

Our new positions were in VZ Holding, FTI Consulting, Samsonite and Littelfuse.

VZ Holding is a Swiss-based, consultant-led wealth manager. The company has brand and reputational strength as the expert in retirement consulting and estate planning. Its independence has differentiated it from competitors, which are the large banks. VZ is a quality business which has delivered good recurring revenues and growth, and has a strong balance sheet.

FTI Consulting is an international consulting firm with a market-leading restructuring business practice. Its restructuring business is starting to see an increase in activity and should perform well if we enter a recessionary environment (equally, its M&A side will do well in bullish markets).

Littelfuse makes fuses and other electronic components, and should benefit from increasingly complex electronics in machinery.

Samsonite designs, manufactures and distributes luggage, and we saw an opportunity to invest in this global leader thanks to a very attractive valuation.

We exited Cargurus, Cargojet, Cherry SE, Dechra Pharmaceuticals, Huntington Bancshares, IMCD, John Wiley & Sons, Livanova, Penta-Ocean and Marr.

Performance Review

The Fund returned 10.19% in sterling terms, outperforming the benchmark by 88 basis points (bps). The outperformance was driven by stock selection in Industrials and Consumer Staples which outweighed the negative impact from our stock selection and overweight position in Health Care and selection in Consumer Discretionary.

Simpson Manufacturing was the strongest contributor to relative returns over 2023. Simpson outperformed following strong quarterly results in Q1 and Q2, which exceeded expectations. The stock did pull back in October, in spite of strong Q3 results, as management anticipated that the higher-for-longer interest rate environment would impact Q4 results. However, the shares recovered in the last two months of 2023 as the market anticipated the end of the rate tightening cycle by the Federal Reserve. Simpson has benefitted from an improvement in input costs and demand, particularly within new construction. Altair Engineering rose after it reported a stellar finish to 2022, delivering revenue growth of more than 18% for the full year and better-than-expected Q3 results. Altair is well positioned within the simulation and analysis market, which will benefit from high-level drivers such as AI. Axon Enterprise rose on the back of strong quarterly results and increasing its earnings expectations. Analysts credited the results to the demand for the company's new products, which should drive market share gains.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Small Cap Equity Fund (continued)

Performance Review (continued)

AMN Healthcare was the largest detractor in 2023. AMN's share price fell as its quarterly results missed expectations and its outlooks have disappointed. Whilst the near-term travel nurse market contraction has been stronger than previously anticipated, the prospects for AMN's long-term growth are supported by a structural clinician shortfall. ICU Medical fell in September after its full-year guidance missed estimates and its Q3 results were worse than expected. The shares recovered in the final month of the year in anticipation of a recovery in 2025. Community Bank fell in the first quarter of the year alongside other regional banks following the collapse of three US regional banks and a fear of contagion in the banking sector. The share price fell in Q3 following results that missed expectations. The share price has started to recover alongside other bank stocks due to the anticipation of the end of the rate hiking cycle.

Outlook

The market clearly got ahead of itself at the end of 2023 in terms of expectation of rates cuts, but these expectations cooled at the start of 2024. A meaningful recession brought on by the full impact of rising rates over the past two years is still a possibility, but a period of low or no growth remains the base case. This is because employment levels are still solid and rates are settling at lower levels than those they reached in 2023 and which are not that different from long-term averages. On this basis, there is likely to be more M&A activity this year than in 2023. From a factor perspective, quality should do reasonably well and growth will probably outperform value once again.

The strategy is well positioned for the current environment, with its tilt towards quality and stability measures, but should also benefit from the longer term growth potential of its holdings.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Absolute Return Credit Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis point (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Investment Strategy

Continued macro uncertainty coupled with an increase in idiosyncratic events meant we remained cautious over the year, staying high in quality, as we expected fundamentals to deteriorate given margins had come under pressure and refinancing risk remained a key concern, especially for the more highly leveraged/lower quality companies. Market volatility picked up meaningfully in March following US and European bank failures – with Credit Suisse taking centre stage in Europe, where we had exposure to AT1 bonds earlier in the year before the position was reduced into strength (taking partial profits) in February.

Against this backdrop, we remained constructive on sector, region and issuer selection – with particular focus on developed markets versus emerging markets, and capital structure positioning with the intention to pivot towards senior debt. Additionally, we undertook a pivot out of cyclical sectors into defensive sectors early in the period, which remained core to our search for new opportunities. As government yields continued to move higher up until October, we took the opportunity to slightly extend duration in the US around Q3. Low cash prices also became a major theme towards the end of year following months of market correction, creating investment opportunities in names we liked, and we participated in primary deals in the subordinated financials space.

Within the hedge overlay, we took opportunities to add protection in Q1, given the relatively attractive cost, as rates volatility remained elevated, especially relative to overall implied volatility. A short index position to the European subordinated financial index was in place for most of the year as the sector faced strong headwinds; we then reduced this position towards Q3, shifting our allocation towards the US.

Within structured credit, we took advantage of the market correction over Q1 and Q2 to reposition our collateralised loan obligation (CLO) allocation, selling some of its low-coupon holdings and redirecting to CLO primaries. In addition, the dislocation within the leveraged loan market, which supported the CLO prints, allowed the Fund to focus its allocation on primary BB tranches, which gave an overall higher carry and convexity.

Performance Review

The Federated Hermes Absolute Return Credit Fund (Class F, USD, Accumulating) returned 5.51% net in 2023, with a notable rebound in performance over Q4.

The portfolio faced major headwinds up until October, as rates volatility remained elevated, financials were impacted by idiosyncratic events and higher quality assets underperformed.

From a sectors perspective, the Fund's exposure to banking, capital goods and telecoms contributed the most to absolute returns, while its exposure to the Real Estate sector detracted the most. Our short index exposure detracted, largely as a result of spreads tightening significantly over Q4.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Absolute Return Credit Fund (continued)

Performance Review (continued)

From an issuers perspective, the Fund's allocations to International Consolidated Airlines, Marks & Spencer and HSBC contributed the most, while our exposure to Credit Suisse and Country Gardens detracted.

The Fund's exposure to BBBs and broad BB-rated issues added the most to performance from a ratings perspective, while single-B and below rated issuers detracted the most.

North America, Western Europe and the UK were the top regional contributors, while only Asian emerging markets detracted.

Outlook

Growth has been resilient in 2023 as the impact of higher policy rates was offset by a stronger service sector, supportive fiscal policy and an improving real wage picture. However, growth is expected to decline in developed market economies in 2024. Headline inflation has normalised quickly over the course of 2023 and is expected to continue towards target through 2024 as tight policy constrains activity, momentum in services continues to slow, unemployment slowly picks up and labour markets continue to loosen.

Corporate fundamentals are starting to deteriorate, with earnings being weaker, leverage levels increasing and the ability of companies to pay coupons decreasing. Default activity in the US high yield market, including distressed exchanges, increased in November by 28bps to 2.88% while recovery rates increased slightly to 35.7%, which is below the 25-year annual average of approximately 40%. In Europe the default rate also increased by 12bps to 2.47%, with the average recovery rate rebounding to 55% from a recent low of 35% in July.

Our near-term outlook favours exposure to high quality bonds with selective exposure to B/CCC rated credit, a focus on low-cash-price bonds and a reduction in overall spread duration. We continue to be positioned in defensive sectors, with a preference for Europe versus the US on relative value. Yields remain attractive and, as rates volatility continues to normalise, we would expect this part of the credit market to outperform. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations coupled with active engagement is critical to sustainable long-term performance.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes SDG Engagement Equity Fund

Market Review

Over the past 12 months the MSCI ACWI SMID Cap Index Net returned 9.47%, in sterling terms. In a year of continued geo-political conflict, enthusiasm around Artificial Intelligence (AI) and the anticipation of the end of the rate hiking cycle by central banks, global equity markets rose.

Global small- and mid-caps (SMID) underperformed their large-cap peers during the period, although they did slightly better compared to equally weighted large-cap indices. Whilst developed market SMID companies underperformed their large-cap peers, emerging market SMID companies significantly outperformed their large-cap peers. With regards to the index, Latin America was the best performing region, whilst Pacific Free ex Japan was the worst. All regions ended the year in positive territory. Information Technology and Industrials were the strongest performing sectors, posting returns of 34.65% and 23.94% respectively. Utilities and Health Care were the weakest, posting returns of 3.99% and 4.87% respectively.

Investment Strategy

The Federated Hermes SDG Engagement Equity Fund is a small- and mid-cap investment product that aims to produce above-benchmark investment returns while also delivering positive social and environmental impact.

The investment team seeks to invest in higher-quality stocks over long time periods and runs a high active-share portfolio. The team also analyses companies to establish which of the UN's Sustainable Development Goals (SDGs) apply to each potential investment, and what else a company could do to contribute to those goals.

The team will then engage with the management teams of stocks selected for the Fund to encourage companies to, for example, change business practices, better manage their supply chains, or develop new products, in order to contribute to the delivery of the goals. The team, in conjunction with EOS at Federated Hermes, our stewardship service, will in turn help facilitate this by communicating industry best practice, advising on reporting and disclosure, and, where relevant, introduce third parties to assist companies in their efforts.

The investment approach taken by the team is a bottom-up, fundamental approach. The team believes that excess returns are best and most consistently generated by concentrating on stock-specific risk and not having significant regional and industry exposures (except to the extent that there is more impact potential in more capital-intensive and labour-intensive industries). The risk profile of the Fund seeks to maximise investors' exposure, to the extent practically possible, to the achievements of individual stocks and related SDG impact. The investment team has extensive local-market knowledge and operates on a regional basis.

Full due diligence on a potential holding will include both an investment thesis and an engagement one. The engagement thesis will detail the proposed ongoing engagement activity, with appropriate milestones, which will then be further enhanced and form a plan once assessed and agreed with the company. The outcomes from engagement will be measured and reported on a semi-annual basis.

Performance Review

The Hermes SDG Engagement Equity Fund returned 13.67% in sterling terms, outperforming the benchmark index by 384 basis points (bps). Stock selection was the primary driver of this outperformance. Strong stock selection and the Fund's overweight in Industrials and stock selection in Consumer Staples, were positive for relative returns and offset the negative impact from the Fund's underweight and stock selection in Information Technology. From a regional perspective, stock selection contributed the most in North America, and Europe and Middle East.

The Fund enjoyed two bursts of relative performance in 2023: first, the flight to quality in the US regional banking crisis in March, then during the market rally from the end of October. The latter was driven by a turbocharged recovery in Industrials, following the market's expectation of rate cuts, with several stocks rising in excess of 40%. This more than offset a period of underperformance immediately prior to this, in October, as the market got particularly concerned about rising rates, and small caps had underperformed.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes SDG Engagement Equity Fund (continued)

Performance Review (continued)

Simpson Manufacturing was the strongest contributor to relative returns over 2023. Simpson outperformed following strong quarterly results in Q1 and Q2, which exceeded expectations. The stock did pull back in October, in spite of strong Q3 results, as management anticipated that the higher-for-longer interest rate environment would impact Q4 results. However, the shares recovered in the last two months of 2023 as the market anticipated the end of the rate tightening cycle by the Federal Reserve. Simpson benefitted from an improvement in input costs and demand, particularly within new construction. Horiba rose at the start of the year, following strong quarterly results and a strong outlook for 2023. The stock rose again in the last quarter of the year after its quarterly results exceeded expectations and management raised their outlook guidance. The results highlighted that the semiconductor business was back to good health, supported by Chinese demand and the effect of the weak yen. Clean Harbors rose following strong Q4 2022 and Q2 2023 results and a positive outlook for 2023, due to the healthy demand expected for its network of waste services.

The largest detractor from relative performance was AMN Healthcare Services, which fell after its quarterly results missed expectations and its outlook disappointed. Whilst the near-term travel nurse market contraction has been stronger than previously anticipated, the prospects for AMN's long-term growth are supported by a structural clinician shortfall. LKQ fell as its Q2 and Q3 results missed expectations. Management cut their full-year profit and revenue outlook, but this was mostly down to what are hopefully one-off items. Chart Industries fell in the last quarter of the year, following worse-than-expected quarterly results and delays of contracts into 2024. This was despite a strong order book and a continued increase in market demand.

The Fund's management team continued to make progress through engagement with investee companies. More than 150 engagement actions took place, often discussing several issues and objectives. We continue to see greater progress from investee companies that we have held for a longer period of time, supporting our view that constructive engagement requires patience.

Outlook

The Fund's focus on engaging for impact towards the UN SDGs causes our positioning to diverge from the benchmark in certain sectors. Engagement opportunities are often more abundant in companies with higher capital requirements, such as personnel and manufacturing facilities, whereas low-capital intensive tech companies have less opportunity for productive engagement, and therefore the Fund is less exposed to these businesses.

The market clearly got ahead of itself at the end of 2023 in terms of expectations of rate cuts, and these expectations cooled at the start of 2024. A meaningful recession brought on by the full impact of rising rates over the past two years is still a possibility, but a period of low or no growth remains the base case. This is because employment levels are still solid and rates are settling at lower levels than those they reached in 2023, which are not that different from long-term averages. On this basis, there is likely to be more M&A activity this year than in 2023. From a factor perspective, quality should do reasonably well, and growth will probably outperform value once again.

The strategy is well positioned for the current environment, with its tilt towards quality and stability measures, but should also benefit from the longer term growth potential of its holdings.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Impact Opportunities Equity Fund

Market Review

The MSCI All Country World IMI Index returned 14.73%, in GBP terms, for the period. More broadly, global equity markets ended the year in positive territory in a stark reversal from 2022.

While markets rose, there was considerable volatility through the year, with the banking crisis in March and fears over the Chinese property market in the third quarter both sending markets lower. Nevertheless, 2023 ended strongly as the market increasingly priced in a shift in the US Federal Reserve's (Fed's) policy and a series of rate cuts in 2024, driven by the moderating inflation prints.

One of the most prominent features of markets in 2023 was the lack of market breadth, with indices being driven by a small number of mega-cap tech-focused stocks. The 'Magnificent Seven' were up 74% in 2023 while the broader market returned 12%.

With regards to sectors, Information Technology and Telecommunication Services were the best performing sectors, while Utilities and Consumer Staples lagged. Developed markets outperformed emerging markets, and large caps outperformed small caps. Growth outperformed value.

Investment Strategy

The Federated Hermes Impact Opportunities Fund is a high-conviction global equity strategy. Our approach is to find companies whose products and services address unmet needs in society. Such companies often have structural growth opportunities while also bringing wider benefits that address environmental and social challenges. Through careful stock selection, we aim to create a portfolio capable of generating attractive long-term financial returns alongside delivering clear, positive impacts on society and the planet.

Investors have become increasingly aware that incorporating sustainability and ESG factors into their stock selection will often help them to avoid companies that destroy shareholder value. Our Impact investing strategy goes beyond risk mitigation and invests in companies that are tackling the underserved needs of society and the environment, and as such are exposed to sources of enduring demand.

We take a thematic approach and seek to capture opportunities which are created by mega trends. Through assessing the UN Sustainable Development Goals' (SDGs') underlying targets, we have alighted on nine key impact themes which are investable.

The Fund's overall structure has remained broadly consistent over the period. The largest overweight positions remain in the Health Care and Industrials sectors, and there has been a notable increase in the Fund's exposure to Industrials. The sectors where the Fund is underweight have remained broadly consistent, although Information Technology and Consumer Discretionary have increased in weighting.

We initiated positions in Lenzing, Masimo, Advanced Drainage Systems and Rentokil. Lenzing is a manufacturer of wood-based cellulosic fibres, an alternative to man-made synthetic fibres, and helps combat the threat to biodiversity from cotton farming. Masimo is a global leader in pulse-oximetry, the measurement of oxygen in blood, which can be one of the most accurate indicators of an underlying condition of a patient. Advanced Drainage Systems is a manufacturer of plastic pipe, stormwater and on-site septic wastewater solutions and is the largest plastic recycling company in North America. Rentokil is the world's leading pest control and hygiene and wellbeing services company, and plays a critical role in protecting public health, food and property.

We closed our positions in Blackbaud, Orsted, Bright Horizons, Ballard Power and Carl Zeiss Meditec. Blackbaud was exited after receiving a takeover bid. We sold Orsted due to lower conviction in the management's strategy. Bright Horizons was closed after a period of strong share price performance. Ballard Power was closed after its capital markets day. We were left underwhelmed at the trajectory of orders over the next five years. Carl Zeiss Meditec had come under pressure from destocking that built up during the pandemic, particularly in China, while slowing demand in the US and increased competition created a difficult backdrop for the company.

The Fund continues to be actively managed, and, throughout the period, we trimmed positions that had performed particularly well and topped up other positions where we saw greater upside.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Impact Opportunities Equity Fund (continued)

Performance Review

The Fund returned 2.90% in 2023, in GBP terms, underperforming the benchmark by 10.31%. The extremely narrow market was particularly challenging for much of the year, although, after the Fed turned more dovish in Q4, the relative performance of the Fund improved, as the market broadened.

Sector allocation detracted from relative returns, with the Health Care overweight and underweights to Information Technology and Communication Services accounting for 5.6% of relative underperformance, far outweighing more modest contributions from being underweight Consumer Staples and having no exposure to Energy. Stock selection was the main driver of relative returns, however, driven mainly by Health Care, Industrials, Materials and Information Technology.

Novo-Nordisk, Kingspan and Ansys were the largest individual contributors in the period. Novo Nordisk has benefited from strong demand for its obesity drug, Wegovy, while studies found that the drug also reduced the risk of chronic kidney disease, heart attacks and strokes. Kingspan issued a positive trading update and increased guidance for H1 2023 and FY 2023. The company saw strong demand in energy efficiency and lower carbon products. Ansys reported better-than-expected earnings and guidance, driven by demand for simulation software. Its share price gained further after it emerged that Synopsis was in talks to acquire the company.

AbCellera, Tomra Systems and Qiagen were the largest detractors. AbCellera became detached from its fundamentals, trading in response to interest rate expectations. It also reported lower-than-expected revenues in Q3. However, the underlying partner programme remains strong, and we remain confident in the long-term potential of the company. Tomra Systems reported disappointing results, driven by poor margin management, weakness in its food division and slower recycling markets. In addition, France decided that it would try to achieve its recycling target without a deposit return system, which also hit sentiment. Qiagen's share price correlated with the downturn in the Life Sciences sector in Q3, despite its diagnostics exposure.

Outlook

The peak in rates looks to be behind us. The debate as we enter 2024 is the pace of cuts across developed markets from the Fed, the European Central Bank and the Bank of England. Rate cutting cycles are historically supportive for equity markets, and, with underlying consumer confidence and employment holding up, the macroeconomic backdrop looks favourable for the year ahead. After a challenging couple of years, the market environment for high-impact companies in 2024 looks increasingly compelling.

Over the longer-term, we believe the UN SDGs provide an enduring source of demand that should accelerate over the next few years. The recent UN SDG progress report highlighted a distinct lack of progress on the majority of the UN SDGs since their launch in 2016. This has increased focus on mobilising capital towards the achievement of the 2030 goals. The challenges are huge and require sweeping change and investment on a scale never seen before. However, just as the impact of crises is compounded when they are linked, so are solutions. When we take action to strengthen social protection systems, improve public services and invest in clean energy, we address the root causes of increasing inequality, environmental degradation and climate change. Our Fund seeks to identify the solutions and those companies that are solution providers, which should benefit from enduring sources of demand for their products that address these unmet needs, while at the same time helping people and the planet.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Unconstrained Credit Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis point (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Investment Strategy

Continued macro uncertainty coupled with an increase in idiosyncratic events meant we remained cautious over the year, staying high in quality, as we expected fundamentals to deteriorate given margins had come under pressure and refinancing risk remained a key concern, especially for the more highly leveraged/lower quality companies. Market volatility picked up meaningfully in March following US and European bank failures – with Credit Suisse taking centre stage in Europe, where we had exposure to AT1 bonds earlier in the year before the position was reduced into strength (taking partial profits) in February.

Against this backdrop, we remained constructive on sector, region and issuer selection – with particular focus on developed markets versus emerging markets, and capital structure positioning with the intention to pivot towards senior debt. Additionally, we undertook a pivot out of cyclical sectors into defensive sectors early in the period, which remained core to our search for new opportunities. As government yields continued to move higher up until October, we took the opportunity to slightly extend duration in the US around Q3. Low cash prices also became a major theme towards the end of year following months of market correction, creating investment opportunities in names we liked, and we participated in primary deals in the subordinated financials space.

Within the hedge overlay, we took opportunities to add protection in Q1, given the relatively attractive cost, as rates volatility remained elevated, especially relative to overall implied volatility. A short index position to the European subordinated financial index was in place for most of the year as the sector faced strong headwinds; we then reduced this position towards Q3, shifting our allocation towards the US.

Within structured credit, we took advantage of the market correction over Q1 and Q2 to reposition our collateralised loan obligation (CLO) allocation, selling some of its low-coupon holdings and redirecting to CLO primaries. In addition, the dislocation within the leveraged loan market, which supported the CLO prints, allowed the Fund to focus its allocation on primary BB tranches, which gave an overall higher carry and convexity.

Performance Review

The Federated Hermes Unconstrained Credit Fund (Class F, USD, Accumulating) returned 9.32% net in 2023, with a notable rebound in performance over Q4.

The portfolio faced major headwinds up until October, as rates volatility remained elevated, financials were impacted by idiosyncratic events and higher quality assets underperformed.

From a sectors perspective, the Fund's exposure to basic industry, telecoms and capital goods contributed the most to absolute returns, while its exposure to the Real Estate sector detracted the most. Our short index exposure detracted, largely as a result of spreads tightening significantly over Q4.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Unconstrained Credit Fund (continued)

Performance Review (continued)

From an issuers perspective, the Fund's allocation to Telecom Italia, Vodafone Ziggo and Virgin Media contributed the most, while our exposure to Credit Suisse and Country Gardens detracted.

From a ratings perspective, the Fund's exposure to BBBs and broad BB-rated issues added the most to performance, while single-B and below rated issuers detracted the most.

North America, Western Europe and the UK were the top regional contributors, while only Asian emerging markets detracted.

Outlook

Growth has been resilient in 2023 as the impact of higher policy rates was offset by a stronger service sector, supportive fiscal policy and an improving real wage picture. However, growth is expected to decline in developed market economies in 2024. Headline inflation has normalised quickly over the course of 2023 and is expected to continue towards target through 2024 as tight policy constrains activity, momentum in services continues to slow, unemployment slowly picks up and labour markets continue to loosen.

Corporate fundamentals are starting to deteriorate, with earnings being weaker, leverage levels increasing and the ability of companies to pay coupons decreasing. Default activity in the US high yield market, including distressed exchanges, increased in November by 28bps to 2.88% while recovery rates increased slightly to 35.7%, which is below the 25-year annual average of approximately 40%. In Europe the default rate also increased by 12bps to 2.47%, with the average recovery rate rebounding to 55% from a recent low of 35% in July.

Our near-term outlook favours exposure to high quality bonds with selective exposure to B/CCC rated credit, a focus on low-cash-price bonds and a reduction in overall spread duration. We continue to be positioned in defensive sectors, with a preference for Europe versus the US on relative value. Yields remain attractive and, as rates volatility continues to normalise, we would expect this part of the credit market to outperform. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations coupled with active engagement is critical to sustainable long-term performance.

**Hermes Investment Management Limited
February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Emerging Markets SMID Equity Fund

Market Review

Emerging markets (EM) posted positive gains in 2023, after two years of negative returns. The benchmark MSCI Emerging Markets SMID Net TR Index returned 18.6% in US dollar terms (11.9% in sterling terms), outperforming the broader MSCI Emerging Markets Index Net, which returned 9.83%, and developed markets (+14.7%).

Underwhelming reopening momentum in China dampened investor sentiment for EM. Much of EM SMID equities' annual index gain was recorded in the fourth quarter, driven by the prospect of rate cuts in the US. For much of the year, the US Federal Reserve's (Fed's) policy of higher-for-longer interest rates dampened risk appetite and the outlook for EM, as it strengthened the US dollar and US yields (which briefly peaked above 5% in October), making dollar-denominated debt more expensive and reducing capital inflows to EM. The fourth quarter saw a strong finish to 2023, EM SMID stocks posting their best quarter in the year (+9.0%), as slowing US inflation data supported a soft-landing scenario, sending US bond yields and the US dollar lower. Fed statements from November – effectively guiding the market for rate cuts at some point – unleashed an 'everything rally', which included lower quality, highly leveraged companies.

Crude oil prices declined c. 10% in 2023 amid geopolitical concerns, production cuts and global measures to rein fluctuations in prices. Gold rose 13.1%. EM Value finished the year up 14.2%, significantly ahead of EM Growth (+5.8%).

Latin America was the best performing region (31.7%), led by Peru (+106.4%), Mexico (36.6%), and Brazil (29.7%), against a backdrop of improving economic data and the prospect of further rate cuts in Brazil and Peru. EM Asia (17.7%) underperformed, led lower by China (-16.5%). Chinese equities retreated as indicators continued to point to a lacklustre economic recovery, with CPI in negative territory year-on-year, and problems in the property sector resurfaced. Taiwan (42.9%) and Korea (22.0%) posted robust returns, boosted by technology-related stocks and strong domestic inflows. India (40.0%) also outperformed, supported by some positive macroeconomic data, including better industrial production, positive flows (foreign and domestic) and a significant re-rating of small- and mid-cap companies. Emerging Europe, the Middle East, and Africa (15.6%) also underperformed. South Africa (6.4%) posted meagre gains, given elevated macroeconomic risks, including inflation, rate rises, currency weakness, and the impact power shortages had on the economy.

At a sector level, the period was marked by a wide dispersion in returns. Information Technology (+48.3%) and Financials (23.0%) finished at the top, while Communication Services (4.1%), Real Estate (4.2%) Consumer Staples (6.3%) and Health Care (9.7%) ended at the bottom. Consumer Discretionary underperformed as weakness of Chinese e-commerce providers weighed on returns.

Investment Strategy

In H2 2023, we reviewed several underperforming Chinese holdings, selling Hundsun Technology, as it was being negatively impacted by the property slowdown, and Silergy to reduce active risk. We bought H-World, China's second-largest hotel business, which has a history of strong growth and market-share gains. We opened a position in CIMC Enric, a Chinese manufacturer of gas and liquid tanks that should be a long-term beneficiary of increased natural gas penetration in China. We bought Tencent Music, China's dominant music streaming platform – in a streaming market that is still in its infancy, with very low spend per capita, even adjusted for relative incomes. We bought Fuyao Glass, a Chinese multinational specialising in the manufacture of automobile safety glass, that is benefitting from a global recovery in auto production volumes and rising glass content per vehicle.

Elsewhere, we bought TCI Express, an Indian express logistics company. We increased our exposure to Chile, adding Falabella, the third-largest multi-format retailer in Latin America, and to Brazil, through Rumo, the biggest independent rail logistics operator in Brazil. We sold Shoprite, which had performed well but now has reduced upside potential and increased downside risk from food deflation. We bought Park Systems, a leading Korean manufacturer of atomic force microscope systems used in the semiconductor industry.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Emerging Markets SMID Equity Fund (continued)

Performance Review

The Fund returned -0.19% in sterling terms, net of fees, underperforming its benchmark by 10.81%. Our overweight allocation to China, which underperformed, associated exposure to the renminbi, which depreciated, and stock selection detracted the majority from our relative terms. Stock selection in Brazil, India, Taiwan, Peru and Korea negatively impacted returns, partially offset by stronger selection in Mexico and Kuwait. Country allocation contributed, notably an overweight allocation to Peru, off-benchmark exposure to the US, avoiding Thailand, and underweight exposure to several underperforming markets including Indonesia, Qatar and the Philippines.

Va Tech Wabag, a global water and sewage treatment provider, contributed most to our relative return at the stock level, rising on strong operating performance and a healthy order book. Wiwynn, a Taiwanese producer of server equipment, surged as the market factored in the positive impact of artificial-intelligence-related (AI) earnings growth and increased spending from data-traffic growth. Accton Technology, a Taiwanese network equipment maker that produces switches and smart network interface cards (NICs), also surged due to strong earnings and higher demand as AI applications grow.

Centre Testing International, a Chinese testing, inspection and certification services provider, fell due to a drop in medical and drug testing, a result of China's anti-corruption probe in healthcare. The company is the leading third-party, one-stop testing provider in China, benefitting from multiple industry structural drivers, such as increasing outsourcing for testing globally, complex supply chains driving up testing demand, and growth in China's testing market size. Doosan Fuel Cell, a leading Korean provider of hydrogen fuel cell products, fell as hydrogen adoption was weaker than expected. While there is less visibility as to the adoption curve in the next one to two years, in the long run, hydrogen is key to de-carbonise mobility, refining, steel and other heavy-duty industries. China Overseas Property Land (COPH), a Chinese property management services company fell due to a proposed acquisition that was viewed by the market as over-priced. COPH since terminated the acquisition. While the prospect of the acquisition may have damaged investors' confidence in management, the growth prospects are still solid and remain intact.

Outlook

Several central banks in EM are shifting to a dovish stance, after a long period of hawkish monetary policy and interest rate increases. Chile, Brazil, Peru, and Poland have already begun the process by lowering their benchmark interest rates. China also lowered its interest rates to help its economy, which is struggling with low growth and property issues. The developed world is also likely to consider cutting interest rates as inflation is beginning to normalise.

Despite the relatively favourable macroeconomic and monetary-policy outlook, EM equities remain volatile, largely due to China's economic woes. The team is optimistic about the future, based on: several economies easing their monetary policies; India, Indonesia, and Mexico benefitting from structural economic drivers; a new technology cycle boosting companies in Taiwan and Korea; and China's economic overhaul improving the prospect of the new economy and path to sustainable economic growth.

The team continues to prioritise investments in good-quality companies which have the capacity to grow structurally, which have low levels of leverage and which trade at reasonable valuations. Companies which have these characteristics will be best placed to outperform in a world which may see higher-for-longer and more volatile interest rates, slower growth and more geopolitical uncertainty.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes SDG Engagement High Yield Credit Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis point (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Investment Strategy

Continued macro uncertainty coupled with an increase in idiosyncratic events meant we remained cautious over the year, staying high in quality, as we expected fundamentals to deteriorate given margins had come under pressure and refinancing risk remained a key concern, especially for the more highly leveraged/lower quality companies. Market volatility picked up meaningfully in March following US and European bank failures – with Credit Suisse taking centre stage in Europe, where we had exposure to AT1 bonds earlier in the year before the position was reduced into strength (taking partial profits) in February.

Against this backdrop, we remained constructive on sector, region and issuer selection – with particular focus on developed markets versus emerging markets, and capital structure positioning with the intention to pivot towards senior debt. Additionally, we undertook a pivot out of cyclical sectors into defensive sectors early in the period, which remained core to our search for new opportunities. As government yields continued to move higher up until October, we took the opportunity to slightly extend duration in the US around Q3. Low cash prices also became a major theme towards the end of year following months of market correction, creating investment opportunities in names we liked, and we participated in primary deals in the subordinated financials space.

Performance review

The Federated Hermes SDG Engagement High Yield Credit Fund (Class F, USD, Accumulating, net) returned 10.61% in 2023, with a notable rebound in performance over Q4, although underperforming its benchmark by 208bps. The portfolio faced major headwinds up until October 2023, as rates volatility remained elevated, financials were impacted by idiosyncratic events and higher quality assets underperformed.

From a sectors perspective, the Fund's overweight exposure to banking, basic industry and capital goods contributed the most to relative returns, while its underweight exposure to the Energy and Financials sectors, along with a lack of exposure to the leisure industry, detracted the most.

From an issuer's perspective, the Fund's overweight positioning in Liberty Global, Vodafoneziggo and Telefonica boosted its relative return the most, while its overweight positioning in Country Garden Holdings, together with an off-benchmark position in UBS and a lack of exposure to Petroleos Mexicanos, detracted the most.

From a ratings perspective, the Fund's overweight exposure to BBBs and broad BB-rated securities added the most to relative performance, while its underweight exposure to single-B rated issuers, and below, detracted the most.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes SDG Engagement High Yield Credit Fund (continued)

Performance review (continued)

From a regional perspective, the Fund's overweight positioning in Western Europe, as well as an underweight positioning in Africa and Pacific, were the top contributors to relative performance. In contrast, its overweight positioning in the Americas region, along with an underweight allocation to Asian emerging markets and a lack of exposure to the Middle East, detracted the most.

Outlook

Growth has been resilient in 2023 as the impact of higher policy rates was offset by a stronger service sector, supportive fiscal policy and an improving real wage picture. However, growth is expected to decline in developed market economies in 2024. Headline inflation has normalised quickly over the course of 2023 and is expected to continue towards target through 2024 as tight policy constrains activity, momentum in services continues to slow, unemployment slowly picks up and labour markets continue to loosen.

Corporate fundamentals are starting to deteriorate, with earnings being weaker, leverage levels increasing and the ability of companies to pay coupons decreasing. Default activity in the US high yield market, including distressed exchanges, increased in November by 28bps to 2.88% while recovery rates increased slightly to 35.7%, which is below the 25-year annual average of approximately 40%. In Europe the default rate also increased by 12bps to 2.47%, with the average recovery rate rebounding to 55% from a recent low of 35% in July.

Our near-term outlook favours exposure to high quality bonds with selective exposure to B/CCC rated credit, a focus on low-cash-price bonds and a reduction in overall spread duration. We continue to be positioned in defensive sectors, with a preference for Europe versus the US on relative value. Yields remain attractive and, as rates volatility continues to normalise, we would expect this part of the credit market to outperform. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations coupled with active engagement is critical to sustainable long-term performance.

**Hermes Investment Management Limited
February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes US High Yield Credit Fund

Market Review

The major factors influencing markets during the period under review were the economy and the trajectory of interest rates. From the start of the year, the economy proved resilient despite several indicators signalling potential weakness on the horizon. The labour market continued to show strength throughout the year, with solid job creation and low levels of unemployment. Corporate earnings, while off their peak, proved stronger than expected. The resilient economy forced the Federal Reserve (Fed) to continue to push short rates higher and signal that a regime of 'higher for longer' may be called for in the fight against inflation. As a result, the Fed raised interest rates four times over course of the year, and longer-term interest rates followed suit. However, driven by increasing conviction that the Fed's rate-hiking cycle had come to an end on the back of falling inflation, interest rates peaked in October and declined significantly in November and December. This was exacerbated by dovish Fed commentary at the last policy meeting of the year that suggested a pivot was drawing near, signalling three interest rate cuts in 2024. With no recession in 2023 and the market betting on a soft landing in 2024, risk assets rallied, and spreads ended the year tighter.

Within the high-yield market, major industry sectors that substantially outperformed the overall ICE BofA US High Yield Constrained Index (HUC0) included theatres & entertainment, recreation & travel and specialty retail. Major industry sectors that substantially underperformed the HUC0 during the reporting period included: forestry/paper, tech hardware & equipment, and air transportation. From a quality perspective, the CCC-rated sector led the way with a total return of 20.36%, followed by the B-rated sector at 13.96%. The BB-rated sector lagged with a return of 11.44%.

Investment Strategy

Securities are selected for addition to the portfolio that the team believes have attractive risk-return characteristics. The security selection process is divided into three steps: (i) a qualitative analysis of the issuer's business and product strength, its competitive position within its industry, and management expertise; (ii) a quantitative analysis of the issuer business profile based on financial models, which are created by the research team, focusing on the issuer's ability to generate free cash flow as well as the stability and predictability of that cash flow generation; and (iii) a relative analysis of the security value as compared to other securities in the investable universe.

Fundamental analysis is also used to assess the ESG characteristics of an issuer. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (how the company is managed to the benefit of debt and equity owners). The integration of ESG considerations into the research and investment process provides a valuable extension to the credit research and helps identify additional sources of potential risk that may not be uncovered by classic credit research.

Credit risk is minimised by investing in a diversified portfolio of securities. Securities are selected to maintain diversification across both companies and industries. A specific average maturity is not targeted as part of the investment process.

Performance Review

The Fund outperformed the ICE BofA US High Yield Constrained Index (HUC0) for the year. The Fund was positively impacted by security selection in the packaging, tech hardware & equipment, insurance brokerage, support services, and health services industry sectors. The Fund was also positively impacted by its overweight allocations to the outperforming diversified capital goods and energy exploration & production industry sectors. Specific high-yield issuers held by the portfolio that positively impacted performance relative to HUC0 index included: ARD Finance SA/Ardagh Packaging, NFP Corp., Minerva Merger Sub, Diamond B.V. and Mozart Debt Merger Sub.

Partially offsetting the positive drivers, the Fund was negatively impacted by security selection in the media content, specialty retail and forestry/paper industry sectors. The Fund was also negatively impacted by its underweight allocation to the outperforming recreation & travel industry sector and its overweight to the underperforming media content industry sector, and by its cash balances. Specific high-yield issuers held by the portfolio that negatively impacted performance relative to the HUC0 index included Enviva, iHeartCommunications, Rackspace Technology, Audacy, and Wesco Distribution. The Fund's total return for the period also reflects actual cash flows, transaction costs and other expenses which were not reflected in the total return of the HUC0 index.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes US High Yield Credit Fund (continued)

Outlook

The US economy continues to surprise to the upside, with the consensus now leaning towards a soft-landing (or no-landing) environment as we move into 2024. Credit spreads largely reflect this outlook as they have moved close to cycle lows. Over the past few years, the economy has certainly benefitted from monetary and fiscal policy stimulus of epic proportions, but those policies have mostly come to an end. All this is occurring in an environment where many historically accurate economic indicators are signalling caution. Tightening bank lending standards are not consistent with a soft landing. The yield curve remains inverted and the impact of prior hikes on the economy remains relevant. While the labour market remains strong today, leading indicators such as payroll revisions and household employment suggest the employment picture is softening. Either the economy is poised to weaken materially in the near future or the indicators will need to reverse. We do not believe the "all clear" has been sounded just yet and, with spreads close to historical lows, we see no reason to move to an overweight allocation to high yield at this time. However, we are closely monitoring high-yield issuers' earnings and free cash flow as well as overall economic conditions to ascertain whether a continued cautious outlook is warranted.

**Federated Investment Counseling
February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Sustainable Global Equity Fund

Market Review

The MSCI All Country World Net Index returned 15.31%, in sterling terms, over 2023. Global equity markets ended the year in positive territory in a stark reversal from 2022.

While markets rose, there was considerable volatility through the year, with the banking crisis in March and fears over the Chinese property market in the third quarter both sending markets lower. Nevertheless, 2023 ended strongly as the market started pricing in a shift in the Federal Reserve's policy and a series of rate cuts in 2024, driven by the moderating inflation prints.

One of the most prominent features of markets in 2023 was the lack of market breadth, with indices being driven by a small number of mega-cap, tech-focused stocks. The 'Magnificent Seven' were up by 74% in 2023.

Information Technology and Communication Services were the best performing sectors, while Utilities and Consumer Staples lagged. Developed markets outperformed emerging markets, and large caps outperformed small caps. Growth outperformed Value.

Investment Strategy

The Federated Hermes Sustainable Global Equity Fund is a high-conviction global equity strategy. It aims to generate attractive financial returns by investing in companies that help to create a more sustainable future. As a concentrated, high active-share fund that follows a 'best ideas' strategy, the Fund benefits from three key sources of alpha: (ESG) leaders, impactful companies and improvers.

We only invest in companies that make a difference. This is reflected in the strategy's holdings, which are all aligned with one or several of the UN's Sustainable Development Goals (SDGs). Essentially, sustainable investments should be companies with a business model creating value for society, with a positive or improving ESG profile, and whose activities have an overall positive impact through their products and services.

The Fund addresses four sustainable themes with each having a variety of investible sub-themes. Two of the overarching themes relate to the environment – Environmental Preservation and Efficient Production and Resource Usage – and two relate to society – Health and Wellbeing and Social Inclusion.

Over the period, we initiated five new positions: American Tower, HCA Healthcare, Datadog, LKQ and Rentokil. We also closed out seven positions: Verisk, Itron, Baxter International, Sunnova, Ocado, Prudential and Illumina.

American Tower is an industry -leading US Tower REIT with a well-diversified asset base, offering exposure to high-growth emerging markets alongside a stable domestic business. HCA Healthcare is the largest for-profit hospital operator in the US. We see an increasing opportunity for the company to grow its footprint amid the structural tailwinds of ageing demographics and increased pressure on public health systems. Datadog is a leading monitoring and security platform for cloud-based infrastructure and applications. It's products have a positive impact by driving efficiency, collaboration and innovation in enterprises. LKQ is a market leading distributor of alternative and salvaged auto parts. The rising complexity per part and greater utilisation of alternative parts are two strong growth drivers. Rentokil is the world's leading pest control and hygiene and wellbeing services company. The company enjoys structural growth tailwinds from shifting demographics, urbanisation and an evolving climate.

We closed positions in Verisk, Itron and Baxter International as our conviction in their investment cases had been waning. Higher interest rates represent a challenge for Sunnova, and, while we expect continued strong demand, it is less clear how that will flow through to profitability. We sold our small holding in Prudential, which has overlapping exposure with AIA, to consolidate our exposure to the insurance sector. While life insurance penetration in China represents an attractive long-term opportunity, the macroeconomic backdrop remains uncertain and is a key driver of new business trends. The sale of Illumina was due to increased competitive threats, poor capital allocation and lingering governance concerns.

Performance Review

The Fund returned 18.25% in 2023, outperforming the benchmark by 255bps. Stock selection was the primary driver of relative returns over the year. The largest contributions came from selection and overweight in Information Technology sector, stock selection in Consumer Staples and our zero-weight in Energy (a hard exclusion for this strategy). These positive effects outweighed the detractions from selection and underweight positioning in Consumer Discretionary, our zero-weight in Communication Services and being overweight in Health Care.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Sustainable Global Equity Fund (continued)

Performance Review (continued)

Nvidia, Microsoft and Adobe were the largest contributors to performance. Nvidia's shares rose strongly through the year, consistently producing results ahead of expectations. The company continues to capitalise on its position as the leading manufacturer of the chips required to power AI infrastructure. Microsoft shares climbed in 2023, as the company beat earnings expectations in its Azure cloud business and in anticipation of the attractive prospects AI offers for the business. Adobe also benefited from AI tailwinds on the back of their newly launched generative AI product features.

AIA Group, Deere & Co and Thermo Fisher were the largest detractors from performance. Despite reporting decent results, AIA Group fell amid the weak macro-economic backdrop in China. Deere & Co fell despite posting better-than-expected results in Q1, with the company demonstrating strong pricing power. Investors took profits following its robust performance in H2 of 2022 and growing fears over declining crop prices. Thermo Fisher declined alongside its life science peers on weaker biopharma demand and macro headwinds in China.

Outlook

While economic data has softened, it has been gradual, and importantly the employment picture remains relatively robust. Meanwhile, inflationary pressures continue to moderate, bringing forward market expectations for rate cuts in 2024. The probability of a prized 'soft landing' has been rising since the peak in bond yields in late October. Alongside these more positive signs, it is likely still too early to appreciate the full effects of monetary tightening from the past two years. Given the outlook, we believe the portfolio remains well positioned, with a clear bias to high-quality businesses with strong balance sheets, that are exposed to attractive end markets.

Federated Hermes Emerging Markets Debt Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis point (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Within emerging markets (EM), while returns were attractive in absolute terms (especially compared to calendar year 2022), we saw some dispersion between corporates, sovereigns and local currency bonds. The JPM CEMBI Broad Index underperformed the JPM GEMBI-GD Index by 192 basis points (bps) as macro headwinds continued to test companies' earnings and fundamentals. The JPM GBI-GD index (+10.04%) delivered one of its strongest calendar-year returns, outperforming both corporates and sovereigns for most of the year. All regions saw positive performance, with Latin America and Asia contributing the most to index returns.

Investment Strategy

Our positioning going into the year was underpinned by expectations of a soft-landing scenario, with inflation numbers having peaked, paving the way for a cycle of rate cuts in the US. This meant we remained neutral to slightly longer duration compared to the benchmark, looking for relative value across the curve in countries we liked. Our main overweight allocations remained concentrated in countries where we had strong convictions such as Oman, Angola, Columbia, Mexico and Brazil.

The Fund had a significant overweight allocation to corporates, which was a major headwind, especially during the first half of the year, as macro uncertainty took central stage and idiosyncratic events picked up. As sentiment shifted more positive in H2, we took the opportunity to take profits in some positions and shifted our allocation towards longer duration sovereigns.

Following the market rally over Q4 2023, we took the opportunity to re-position the portfolio, aligned with our 2024 outlook. From a regional perspective, we increased our frontier exposure in Sub Saharan Africa (SSA) by selling out of tight-spread Asian names in South Korea and Thailand. We also increased sovereign exposure in Turkey and long-end exposure in Romania, which was attractive on a relative-value basis.

Within Latam, we reduced our exposure to Mexico and Brazil on valuation grounds, as certain securities hit our profit-taking marks, and we recycled into cheaper names in Colombia. Within the Middle East and North Africa (MENA), we reduced exposure in securities trading at tight spreads, notably in Saudi Arabia and UAE. We remained underweight in our China exposure, due to the lack of fiscal and monetary stimulus, ongoing issues within the Real Estate sector and growth rates still on a downward adjustment pathway.

Performance Review

The Federated Hermes Emerging Markets Debt Fund (F USD Accumulating net) generated a return of 7.72% over 2023, underperforming its benchmark by 3.04%.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Emerging Markets Debt Fund (continued)

Performance Review (continued)

The Fund's underweight exposure to quasi-sovereign and sovereign bonds detracted the most, as these outperformed corporates for most of the year (we did see, however, a strong reversal of this trend towards Q4, with names such as Ecopetrol and Oleoducto Central experiencing a turnaround in performance following months of headwinds). Our lack of exposure to Pemex, on ESG grounds, also hindered performance as the issuer delivered strong returns and has a significant weight in the benchmark.

From a regional perspective, the Fund's underweight positioning in Asia as well as overweight positioning in Africa detracted the most from relative terms. We anticipated a strong recovery in our frontier positioning, due to cheaper cash prices and upside potential, but market sentiment continued to hamper performance, despite positive news from the IMF on debt restructuring programmes.

From a country perspective, our positioning in China detracted the most in relative terms, largely driven by underperformance from Country Gardens, as issues related to China's Real Estate sector remain unsolved. In addition, the Fund's underweight holding in Argentina detracted from returns as the country's performance was strongly boosted by enthusiasm surrounding elections and IMF news.

Our positioning in Turkey (with exposure across sovereigns, quasis and corporates) contributed positively to performance as we observed a turnaround in investor confidence. Market perception somewhat shifted due to both new government personnel (the recent appointment of a new finance minister and a new central bank governor) and growing confidence around their ability to implement reforms.

Finally, Oman was also a key contributor to performance over the year and has been a strong-conviction holding within the Fund (circa +1.4% overweight). Our positioning in the long end of the curve benefitted us the most from the positive news of the country being upgraded to BB+, as it continues to deleverage (its debt to GDP ratio having reduced by 20% over the year).

Outlook

Investors in emerging market debt (EMD) have been rewarded with a positive return profile in 2023, despite the rates volatility. Returns in local markets have been particularly strong as EM central banks were ahead of the curve as inflation peaked, allowing for some rate cuts in Asia and Latam. We continue to add selective EM high yield credits to the portfolio as and when we see pockets of value. Our central thesis remains unchanged:

- The macro backdrop is very much fixed income friendly: Slowing developed market (DM) growth and a US Treasury curve bull steepening will see clients look to move out the maturity and credit curve.
- EM central banks will continue to cut rates as inflation abates, thereby opening up the prospects to small allocations to EM local.
- Even though aggregate EM hard currency valuations do not look particularly attractive, high yield spreads are attractive, and implied default rates are excessive.
- EM yields are attractive versus global credit.
- Hydrocarbon prices, which underpin many EM economies, remain robust.

Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Biodiversity Equity Fund

Market Review

The MSCI All Country World IMI Net Index returned 14.73%, in GBP terms, for the period. The majority of the market's return was driven by macro factors, namely CPI, interest rate expectations and the potential for a global recession. In addition, last year saw market breadth at one of its lowest levels in history, with the 'Magnificent Seven' accounting for majority of the index returns.

Indeed, by the end of Q3, over 90% of the MSCI ACWI IMI return had been driven by the Information Technology, Communication Services and Consumer Discretionary sectors. We had significant underweights to these sectors, due to their lack of genuinely impactful companies aligning with the biodiversity theme.

Outside of the AI-generated excitement, investors remained cautious for much of the year as inflationary pressures proved to be more stubborn than anticipated, while hawkish central banks, fears of recession and geopolitical risks added to the uncertainty.

However, in Q4 we witnessed a sudden change in investor sentiment. A more dovish-sounding US Federal Reserve ("Fed") increased the likelihood that a soft-landing would be achieved, and reignited the belief that we had reached peak interest rates. This led to a surge in global equity markets, coupled with a notable increase in market breadth.

Investment Strategy

The Federated Hermes Biodiversity Equity Fund is a high-conviction global equity strategy. The Fund aims to achieve capital growth over a rolling five-year period by investing in companies that are helping to protect and restore biodiversity, or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of the following: land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, or deforestation.

We believe that companies that include biodiversity considerations within their business strategies and/or as part of their risk mitigation strategies should have better long-term risk adjusted profiles, given the huge systemic risk biodiversity loss poses to the world. With increasing awareness and regulation around biodiversity, companies providing solutions, or leading the way through their operations, to reduce harm and protect biodiversity should benefit from material tailwinds, such as increased spending by governing bodies and the private sector as the theme comes further into focus.

The Fund's overall structure has remained broadly consistent over 2023. The largest overweight positions remained in the Industrials and Materials sectors, while Information Technology, Financials and Consumer Discretionary were the largest underweight positions. We initiated 10 new positions in: Xylem, Thermo Fisher, SPIE, Advanced Drainage Systems, AXA, SOITEC, Clean Harbors, Cintas, Rentokil and RELX. We closed five positions in: Hain Celestial, Natura, Stora Enso, Signify and VF Corp.

Xylem's solutions address all stages of the water cycle from transport and testing to commercial, industrial and residential water usage. Its products aim to increase efficiency, treat wastewater and monitor water infrastructure to identify leaks.

Thermo Fisher is helping to protect biodiversity through solutions, such as genotyping technologies, used for conservation efforts, their enabling of vital life science research, or the suite of analytical instruments that enable us to measure and monitor the quality of our water and the impact that our industries have on the environment. Thermo has also stepped up its efforts to minimise its own impact on biodiversity, including the use of recyclable paper coolers for cold-chain products and the introduction of new design-for-sustainability criteria to reduce the impact of its downstream products.

SPIE is an engineering services company that provides maintenance and services to a range of activities associated with the green transition, including energy efficiency in buildings, industry decarbonisation, electrification and green energy.

We exited Signify following its results which led to a spike in its share price. We felt the jump was unwarranted given the still-weak outlook. We also exited VF Corp ahead of its results due to the risk of further destocking and cut to guidance.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Biodiversity Equity Fund (continued)

Performance Review

The Fund returned 1.15% in GBP terms, underperforming the benchmark by 11.83%. The extremely narrow market was particularly challenging for much of the year, although, after the Fed turned more dovish in Q4, the relative performance of the Fund improved as the market broadened. Against this backdrop, our underweight to Information Technology had the most significant impact on relative returns. Being underweight in Communication Services and overweight in Materials also had a detrimental impact, outweighing contributions from our underweight holdings in Health Care and having no Energy exposure. Stock selection also detracted as contributions in Health Care and Materials were outweighed by detractors in Industrials, the Consumer sectors and Information Technology.

Kingspan, Trex and Clean Harbors were the largest individual contributors to performance. Kingspan issued a positive trading update and increased guidance for H1 2023 and FY 2023. The company saw strong demand in energy efficiency and lower carbon products. Trex reported better-than-expected earnings, highlighting a resilient consumer, while falling yields boosted sentiment towards building products names in Q4. Clean Harbors reported good results, driven by its environmental services division which had a strong waste backlog, and the business demonstrated resilience in a tepid environment.

Tomra, Sunnova and Deere & Co were the largest detractors from performance. Tomra Systems reported disappointing results, driven by poor margin management, weakness in its food division and slower recycling markets. In addition, France decided that it would try to achieve its recycling target without a deposit return system, which also hit sentiment. Sunnova Energy raised capital in order to fund its considerably higher-than-consensus growth plan which included a portion of equity that was issued at a discount. In addition, the company came under pressure from the higher rates cycle and the risk-off market environment. Deere & Co declined due to fears of a slowdown in the agriculture cycle, which culminated in a cut to its 2024 outlook.

Outlook

The peak in rates looks to be behind us. The debate, as we enter 2024, is over the pace of cuts across developed markets. Rate cutting cycles are historically supportive for equity markets, and, with underlying consumer confidence and employment holding up, the macro-economic backdrop looks favourable for the year ahead. After a challenging couple of years, the market environment in 2024 looks increasingly compelling.

Our Fund seeks quality businesses trading at attractive valuations that also have a sustainable competitive advantage through their positive action towards biodiversity. With increasing awareness and regulation around biodiversity, we believe companies that are leading the way and helping protect and replenish biodiversity through their operations, products or services should benefit from material tailwinds.

February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes China Equity Fund

Market Review

The benchmark MSCI China All Shares Net Total Return Index returned -16.52% over the period, in sterling terms. Chinese equities started 2023 on a strong footing thanks to China's reopening and expectations for easier monetary policy. However, China's markets were sharply lower in the second quarter as China's economic rebound started to cool while strong US economic data and sticky inflation forced investors to reassess interest-rate expectations.

Chinese equities continued falling as indicators increasingly pointed to a lacklustre economic recovery, with CPI in negative territory year-on-year and persistent problems in the property sector. The Central Economic Work Conference, which took place in December, brought no major positive policy surprise, and the spectre of further regulation of the gaming sector weighed on already beleaguered sentiment.

At the sector level, Energy and Financials performed best, while Real Estate and Industrials were the biggest laggards.

Investment Strategy

We bought Tencent, GF Securities, CIMC Enric, Uni-President China, China Yongda Automobile, Dada Nexus, Xiaomi and Foxconn Industrial Internet.

We sold ZTE, West China Cement, Cosco Shipping Ports, Co-creation Grass, Tsingtao Brewery, Dada Nexus, iQIYI, Brilliance China Automotive, Citic Securities and Yunnan Baiyao. We sold SharkNinja, following its spin-off from parent company, JS Global.

Performance Review

The Fund returned -13.00% in sterling terms, net of fees, during the period, outperforming the benchmark MSCI China All Shares Net Total Return Index by 422bps.

The top stock contributor was Foxconn Industrial Internet, a leading provider of intelligent manufacturing integration solutions, which rose on artificial-intelligence (AI) server supply-chain optimism, given its role as a key supplier for Nvidia. AAC Technologies, a Chinese manufacturer of smartphone acoustic components, contributed after rising on optimism about a cyclical demand recovery. The underweight allocation to Meituan, a large Chinese e-commerce company, contributed as the stock fell on broker downgrades and weak consumption.

Not holding PDD Holdings, a Chinese ecommerce company, detracted the most, as the stock outperformed after posting results that beat market expectations. JD.Com, a Chinese online e-commerce retailer, fell after announcing a multi-billion-dollar consumer discount campaign, highlighting heightened competition. Nine Dragons Paper, the largest producer of containerboard in China, fell amid a lacklustre recovery in domestic consumption for packaging and transporting consumer goods and industrial products; rising raw material costs also impacted profit margins.

Outlook

Concerns about an anaemic post-Covid-19 recovery, and geopolitical tensions, have kept Chinese equities depressed. We believe that risks are more than priced in and, given how cheap equities are, that they are positioned to outperform over any reasonable horizon, absent a sharp rise in geopolitical tensions with the United States.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Emerging Markets ex-China Equity Fund

Market Review

Emerging markets (EM) posted positive gains in 2023, after two years of negative returns. The benchmark MSCI Emerging Markets ex China Net TR Index returned 20.0% in US dollar terms (13.3% in sterling terms), outperforming the broader MSCI EM Index Net, which returned 9.83%, and developed markets (+14.7%).

For much of the year, the US Federal Reserve's (Fed's) policy of higher-for-longer interest rates dampened risk appetite and the outlook for EM, as it strengthened the US dollar and US yields (which briefly peaked above 5% in October), making dollar-denominated debt more expensive and reducing capital inflows to EM. The fourth quarter saw a strong finish to the year, EM ex China stocks posting their best quarter in the year (+13%), as slowing US inflation data supported a soft-landing scenario, sending US bond yields and the US dollar lower. Fed statements from November – effectively guiding the market for rate cuts at some point – unleashed an 'everything rally', which included lower quality, highly leveraged companies.

Crude oil prices declined c. 10% in 2023 amid geopolitical concerns, production cuts and global measures to rein in fluctuations in prices. Gold rose 13.1%. EM Value finished the year up 14.2%, significantly ahead of EM Growth (+5.8%).

Latin America was the best performing region (32.7%), led by Mexico (40.9%), Peru (+36.6%), and Brazil (32.7%), against a backdrop of improving economic data and the prospect of further rate cuts in Brazil and Peru. Emerging Asia ex China (21.2%) outperformed, led by Taiwan (30.5%) and Korea (23.1%), boosted by technology-related stocks and strong domestic inflows. India (20.8%) also outperformed, supported by some positive macroeconomic data, positive flows (foreign and domestic), significant re-rating of the small- and mid-cap companies, and a strong showing for the ruling Bharatiya Janata Party in key state elections in December. Thailand, the Philippines, Indonesia, and Malaysia underperformed. Emerging Europe, the Middle East, and Africa (8.2%) underperformed. South Africa (1.5%) posted meagre gains, given elevated macroeconomic risks, including inflation, rate rises, currency weakness, and the impact power shortages had on the economy. Middle East markets also underperformed. Hungary (50.9%), Greece (49.5%) and Poland (48.6%) were among the top-performing index markets as inflation eased, and Hungary and Poland cut rates. Turkey (-5.7%) underperformed despite a shift to more orthodox monetary policy, as inflation remained over 60%.

At a sector level, the period was marked by a wide dispersion in returns. Information Technology (+36.4%) and Energy (27.1%) finished at the top, while Materials (3.9%), Communication Services (6.1%) and Utilities (8.0%) ended at the bottom.

Investment Strategy

In H2 2023, we increased our exposure to Chile, adding Falabella, the third-largest multi-format retailer in Latin America, set to benefit from central bank easing, and Rumo, the biggest independent rail logistics operator in Brazil. We sold Kimberley-Clarke de Mexico after it had performed strongly, using the proceeds to add to Regional, and we exited Magazine Luiza, a Brazilian omni-channel retailer that continues to be impacted by high interest rates in Brazil. We sold Qatar National Bank, reallocating to Abu Dhabi Commercial Bank with better exposure to the Middle East growth story.

We opened a position in Salik, which manages Dubai's eight automatic toll gates on its road system, a major beneficiary of Dubai's population growth and increased tourism. We sold Shoprite after its strong performance, adding FirstRand, the largest financial services firm in Africa, which we expect to benefit from economic recovery and accelerating loan growth. We sold Dabur India to invest in PowerGrid, India's leading power transmission infrastructure provider. We sold Hanon Systems as its margins looked unlikely to expand.

Performance Review

The Fund returned 10.92% in sterling terms, net of fees, underperforming its benchmark by 2.07%. Stock selection in Brazil, Korea and India detracted the most from our relative returns, eclipsing gains from stronger selection in Taiwan, Indonesia, South Africa and Chile. Country allocation contributed positively, notably our overweight positions in Taiwan and Hungary, our off-benchmark exposure to the US and Japan, our lack of exposure to Thailand and Saudi Arabia, and our underweight allocation to South Africa.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Global Emerging Markets ex-China Equity Fund (continued)

Performance Review (continued)

Wiwynn, a Taiwanese producer of server equipment, surged as the market factored in the positive impact of artificial-intelligence-related (AI) earnings growth and increased spending from data-traffic growth. Accton Technology, a Taiwanese network equipment maker that produces switches and smart network interface cards (NICs), also surged due to strong earnings and higher demand as AI applications grow. Samsung Electronics rose thanks to gradual semiconductor demand recovery, driving higher dynamic random-access memory (DRAM) and NAND exports and higher average selling prices.

Doosan Fuel Cell, a leading Korean provider of hydrogen fuel cell products, fell as hydrogen adoption has been weaker than expected. While there is less visibility as to the adoption curve in the next one to two years, in the long run, hydrogen is key to de-carbonise mobility, refining, steel and other heavy-duty industries. Chailease, a non-bank leasing company that operates in Taiwan, mainland China and ASEAN, also detracted, due to narrower spreads, lower-than-expected loan growth, and worse asset quality, notably in mainland China, with higher delinquency. Its current valuation (P/E of 9) factors in most concerns, in our view. Hapvida, a Brazilian provider of low-cost health insurance, fell due to near-term financing concerns and concerns over the company's ability to comply with regulations in a scenario of higher rates for longer. The team exited the position.

Outlook

Several central banks in EM are shifting to a dovish stance, after a long period of hawkish monetary policy and interest rate increases. Chile, Brazil, Peru, and Poland have already begun the process by lowering their benchmark interest rates. China also lowered its interest rates to help its economy, which is struggling with low growth and property issues. The developed world is also likely to consider cutting interest rates as inflation is beginning to normalise.

Despite the relatively favourable macroeconomic and monetary-policy outlook, EM equities remain volatile, largely due to China's economic woes. The team is optimistic about the future, based on: several economies easing their monetary policies; India, Indonesia, and Mexico benefitting from structural economic drivers; a new technology cycle boosting companies in Taiwan and Korea; and China's economic overhaul improving the prospect of the new economy and path to sustainable economic growth.

The team continues to prioritise investments in good-quality companies which have the capacity to grow structurally, which have low levels of leverage and which trade at reasonable valuations. Companies which have these characteristics will be best placed to outperform in a world which may see higher-for-longer and more volatile interest rates, slower growth and more geopolitical uncertainty.

**Hermes Investment Management Limited
February 2024**

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Sustainable Global Investment Grade Credit Fund

Market Review

2023 was an eventful year for fixed income markets, with competing market drivers to navigate, from idiosyncratic events (SVB's collapse, Credit Suisse's acquisition by UBS) to more systemic moves (uncertainty around central bank policies). Interest rates volatility remained a key concern as investors priced in 'higher-for-longer' rates and bonds experienced a selloff over Q2 – briefly pushing the 10-year Treasury yield above 5% for the first time since the Great Financial Crisis (GFC). Geopolitical events remained in focus, with the Russia-Ukraine conflict a potential major tail risk and the attack in Israel in October triggering significant worries of a broader escalation to surrounding regions.

However, from late-October onwards, there was an astonishing turnaround in market performance as declining inflation, along with slowing but robust US economic data, led investors to grow increasingly optimistic over the prospect of interest rate cuts in 2024 and a 'soft landing' for the economy. Momentum gathered pace in December, particularly after the US Federal Reserve (Fed) signalled 75 basis points (bps) of rate cuts for 2024, which resulted in risk assets finishing the year on a high.

The Bloomberg Global Aggregate Bond index recorded one of its greatest ever monthly performances, with a +5.0% return in November, bringing its total return for the year to +5.7%. Pure credit indices also performed well following the end-of-year rally, with high yield outperforming investment grade, Euro high yield returning +12.1% versus +8.2% for Euro investment grade. Sovereign bonds also delivered strong returns, with US Treasuries ending the year up +4.1%, while Euro sovereign bonds were up +7.2%.

Investment Strategy

Continued macro uncertainty coupled with an increase in idiosyncratic events meant we remained cautious over the year. We expected fundamentals to deteriorate given margins had come under pressure, and refinancing risk remained a key concern, especially for the more highly leveraged/lower quality companies. Market volatility picked up meaningfully in March following US and European bank failures – with Credit Suisse taking centre stage in Europe.

Amid this backdrop, we remained constructive on sector, region and issuer selection – with particular focus on developed markets versus emerging markets. Additionally, we undertook a pivot out of cyclical sectors into defensive sectors early in the period, which remained core to our search for new opportunities. As government yields continued to move higher up until October, we took the opportunity to slightly extend duration in the US around Q3. Low cash prices also became a major theme towards the end of year following months of market correction, creating investment opportunities in names we liked, and we participated in primary deals in the subordinated financials space. With credit curves broadly flat, we have also been adjusting our positioning in issuers we like for this strategy.

Performance Review

The Federated Hermes Sustainable Investment Grade Fund (Class F, USD, Accumulating, net) returned 5.74% in 2023, underperforming its benchmark by 84bps.

From a sectors perspective, the Fund's overweight exposure to insurance, telecoms and basic industry contributed the most to relative returns, while its underweight exposure to financial services and utilities, as well as a lack of exposure to energy, detracted the most.

From an issuer's perspective, the Fund's overweight allocation to Dell Technologies, CaixaBank and ABN Amro Bank contributed the most to relative performance, while its lack of exposure to UBS, BoA and Goldman Sachs detracted the most.

From a ratings perspective, the Fund's overweight exposure to BBBs and broad BB-rated securities added the most to relative performance, while its underweight exposure to single-A rated issuers detracted the most.

From a regional perspective, the Fund's overweight allocation to Western Europe, the UK and North America were the top relative contributors, whereas its underweight exposure to Asia EM, along with a lack of exposure to the Middle East and Africa, detracted.

Federated Hermes Investment Funds Public Limited Company Investment Manager's Report (continued)

Federated Hermes Sustainable Global Investment Grade Credit Fund (continued)

Performance Review (continued)

Lastly, the Fund's sovereign exposure contributed positively over the period, with its US exposure contributing the most, followed by Europe. US performance was driven by the Fed's dot plot release in December which signalled 75bps of rate cuts over 2024, yet the market priced futures at a level approximating to 150bps worth of cuts. Conversely, the UK detracted from performance and failed to recoup the losses of the summer rates sell off – despite a very strong Q4 for gilts, driven by the decrease in inflation prints and growing market expectations of rate cuts over the coming year.

Outlook

Growth has been resilient in 2023 as the impact of higher policy rates was offset by a stronger service sector, supportive fiscal policy and an improving real wage picture. However, growth is expected to decline in developed market economies in 2024. Headline inflation has normalised quickly over the course of 2023 and is expected to continue towards target through 2024 as tight policy constrains activity, momentum in services continues to slow, unemployment slowly picks up and labour markets continue to loosen.

Corporate fundamentals are starting to deteriorate, with earnings being weaker, leverage levels increasing and the ability of companies to pay coupons decreasing. Default activity in the US high yield market, including distressed exchanges, increased in November by 28bps to 2.88% while recovery rates increased slightly to 35.7%, which is below the 25-year annual average of approximately 40%. In Europe the default rate also increased by 12bps to 2.47%, with the average recovery rate rebounding to 55% from a recent low of 35% in July.

Our near-term outlook favours exposure to high quality bonds with selective exposure to B/CCC rated credit, a focus on low-cash-price bonds and a reduction in overall spread duration. We continue to be positioned in defensive sectors, with a preference for Europe versus the US on relative value. Yields remain attractive and, as rates volatility continues to normalise, we would expect this part of the credit market to outperform. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations coupled with active engagement is critical to sustainable long-term performance.

**Federated Hermes Investment Funds Public Limited Company
Depositary's Report to the Shareholders
For the financial year ended 31 December 2023**

We, Northern Trust Fiduciary Services (Ireland) Limited, appointed Depositary to Federated Hermes Investment Funds Public Limited Company ("the Company") provide this report solely in favour of the shareholders of the Company for the year ended 31 December 2023 ("Annual Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, which implemented Directive 2009/65/EU into Irish Law ("the Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Company for this Annual Accounting Period and we hereby report thereon to the shareholders of the Company as follows;

We are of the opinion that the Company has been managed during the Annual Accounting period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

Report on the audit of the financial statements

Opinion on the financial statements of Federated Hermes Investment Funds plc (the 'company')

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2023 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Balance Sheet;
- the Income Statement;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Cash Flow Statement; and
- the related notes 1 to 20, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation are the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our approach

Key audit matters	The key audit matters that we identified in the current year were: <ul style="list-style-type: none"> • Valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss • Existence of Financial Assets and Liabilities at Fair Value Through Profit or Loss
Materiality	The materiality that we used in the current year was 1% of Average Net Assets determined in respect of each sub-fund.
Scoping	Our audit is a risk-based approach taking into account the structure of the company, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the company operates.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

Significant changes in our approach

No significant changes in our approach were made in the current year.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the company's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the company and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the annual accounts, for evidence of any discussions and/or decisions that could impact the company's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the annual accounts.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of Financial Assets and Liabilities at Fair Value Through Profit or Loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss of the company of \$15.7bn make up 99.3% of total net assets of \$15.8bn.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Balance Sheet and had the greatest effect on our overall audit strategy.

There is a risk that financial assets and liabilities at fair value through profit or loss are valued incorrectly, that inappropriate valuation methodologies are applied, and that the use of inappropriate assumptions as part of management's estimate reflects inappropriate bias which could result in the valuation being materially misstated.

Refer also to note 8 in the financial statements.

Continued on next page/

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

How the scope of our audit responded to the key audit matter

- We obtained the Northern Trust International Fund Administration Services (Ireland) Limited SOC 1 Report in order to gain an understanding of and evaluate the design, implementation and operating effectiveness of key controls over the valuation process for financial assets and liabilities at fair value through profit or loss.
- We considered the valuation basis used in light of the valuation policy as stipulated in the company's Prospectus documents and the requirements of IFRS.
- We independently valued the financial assets and liabilities by using independent market feeds. We compared the prices published by independent pricing sources to the investment portfolio.
- For OTC Derivatives, we agreed the valuations to independent counterparty confirmations and with the support of our valuations specialists we re-valued the derivatives on a sample basis.
- We ensured the relevant disclosures were included in the financial statements.

Existence of Financial Assets and Liabilities at Fair Value Through Profit or Loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss of the company of \$15.7bn make up 99.3% of total net assets of \$15.8bn.

There is a risk that investments recorded might not exist or might not be owned by the company. Investments are considered to be a key driver for the company's performance. Therefore, due to the significance of investments to the company's financial statements, we have determined this as a key audit matter.

Refer also to note 8 in the financial statements.

How the scope of our audit responded to the key audit matter

- We obtained direct confirmation of the investments of the company from the Depositary and Brokers at year-end. Any reconciling items between the confirmations and the company's investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We obtained the Northern Trust International Fund Administration Services (Ireland) Limited SOC 1 Report in order to gain an understanding of and evaluate the design, implementation and operating effectiveness of key controls over the existence for financial assets and liabilities at fair value through profit or loss

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Basis for determining materiality	1% of Average Net Assets of each Sub-Fund.
Rationale for the benchmark applied	We have considered the average net assets to be the critical component for determining materiality because the main objective of each sub-fund is to provide investors with a total return. We have considered quantitative and qualitative factors such as understanding the company and its environment, history of misstatements, complexity of the company, and reliability of the control environment.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole.

Performance materiality was set at 80% of materiality for the 2023 audit (2022: 80%). In determining performance materiality, we considered the following factors:

- our understanding of the company and the industry in which it operates;
- our risk assessment procedures;
- the quality of the control environment;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Directors that we would report to them all audit differences in excess of 5% of materiality (2022 : 5%) as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Our audit is a risk-based approach taking into account the structure of the company, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the company operates. The company was incorporated on 23 October 2008 under the laws of Ireland as an open-ended umbrella type investment company with variable capital and limited liability. The company is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities.

The company is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of Northern Trust International Fund Administration Services (Ireland) Limited, Georges Court, 54- 62 Townsend Street, Dublin 2, Ireland.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;

Continued on next page/

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

- any matters we identified having obtained and reviewed the company's documentation of their policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
 - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT and valuations regarding how and where fraud might occur in the annual accounts and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas:

- Revenue recognition with respect to net change in unrealised gains/(losses) on investments in securities.

In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the company operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the Irish Companies Act, Listing Rules and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we did not identify any key audit matters related to the potential risk of fraud or non-compliance with laws and regulations.

Our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland;
- in addressing the risk of fraud in revenue recognition, completing the procedures as set out in our Valuation of Financial Assets and Liabilities at Fair value Through Profit or Loss Key Audit Matter and completing an unrealised gain/loss reconciliation; and
- in addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FEDERATED HERMES INVESTMENT FUNDS PLC

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

The Listing Rules of the Euronext Dublin require us to review six specified elements of disclosures in the report to shareholders by the Board of Directors' remuneration committee. We have nothing to report in this regard.

Other matters which we are required to address

We were appointed by the Board of Directors in 2008 to audit the financial statements for the financial year ended 31 December 2008. The period of total uninterrupted engagement with the company meeting the definition of a public interest entity including previous renewals and reappointments of the firm is 3 years, covering the years ending 31 December 2021 to 31 December 2023.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the company in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023

1. Incorporation and Principal Activity

Federated Hermes Investment Funds Public Limited Company (the “Company”) was incorporated on 23 October 2008 under the laws of Ireland as an open-ended umbrella type investment company with variable capital and limited liability, having segregated liability between its sub-funds, in which different sub-funds may be created from time to time. The Company was authorised as an Undertaking for Collective Investment in Transferable Securities on 24 November 2008 by the Central Bank of Ireland in accordance with the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (“the UCITS Regulations”), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the “Central Bank UCITS Regulations”).

As at 31 December 2023 there were 24 sub-funds launched with the following share classes:

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information

Federated Hermes Global Emerging Markets Equity Fund - The investment objective of the sub-fund is to achieve long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets Index.

*Federated Hermes Global Equity Fund** - The investment objective of the sub-fund is to provide long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities. In addition, the sub-fund will invest at least 80% in equity securities that are component securities of the MSCI World Index or equity securities of companies listed in the countries referenced in this index. The MSCI World Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI World Index.

* Federated Hermes Global Equity Fund was closed to further subscription on 23 November 2023 and is in the process of being terminated.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

*Federated Hermes Sustainable European Equity Fund** - The investment objectives of the sub-fund are to: (i) achieve long-term capital growth over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark (MSCI Europe Index).

The sub-fund is an Article 9 fund for the purpose of regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity securities and/or equity related securities of, or relating to, companies in, or companies that derive a large proportion of their revenues from, the developed and emerging European market region. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this Fund is the MSCI Europe Index.

* Federated Hermes Sustainable European Equity Fund was closed to further subscription on 26 June 2023 and is in the process of being terminated.

Federated Hermes Global High Yield Credit Fund - The investment objective of the sub-fund is to generate a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch Global High Yield Constrained Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

*Federated Hermes Sustainable Europe ex-UK Equity Fund** - The investment objectives of the sub-fund are to: (i) achieve long-term capital growth over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark (MSCI Europe ex UK Index).

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity securities and equity-related securities of, or related to companies in, or companies that derive substantial revenues from, the developed and emerging European market region, but excluding the United Kingdom. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund the MSCI Europe ex-UK Index.

* Federated Hermes Sustainable Europe ex-UK Equity Fund was closed to further subscription on 26 June 2023 and is in the process of being terminated.

Federated Hermes US SMID Equity Fund - The investment objective of the sub-fund is to provide long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in equity and/ or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in the US, or companies that derive a large proportion of their income from US activities, and that the Investment Manager has identified as being, in its view, undervalued. These companies will be listed or traded on a Regulated Market worldwide (primarily in the US or Canada).

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the Russell 2500 Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Asia ex-Japan Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a portfolio of equity and equity-related securities of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from, the Asia ex-Japan region. These companies will be listed or traded on a Regulated Market worldwide.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country Asia ex-Japan Investable Market Index.

Federated Hermes Global Equity ESG Fund - The investment objective of the sub-fund is to achieve long-term capital appreciation by investing in worldwide equity securities with favourable environmental, social and governance ("ESG") characteristics.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities. In addition, the sub-fund will invest at least 80% in equity securities that are component securities of the MSCI All Country World Index or equity securities of companies listed in the countries referenced in the MSCI All Country World Index. The MSCI All Country World Index is a free float adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Multi-Strategy Credit Fund - The investment objective of the sub-fund is to generate a high level of income targeting a high proportion of high yield returns while exhibiting lower volatility relative to the global high yield market.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

Federated Hermes Global Small Cap Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small capitalisation companies domiciled in, or that derive a large proportion of their income from, developed markets. The sub-fund may (but is under no obligation to) invest in component securities of the MSCI World Small Cap Index or in securities of companies listed in the countries referenced in this index. The MSCI World Small Cap Index measures the performance of small capitalisation companies across developed markets.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI World Small Cap index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Absolute Return Credit Fund - The investment objective of the sub-fund is to target a positive investment return (absolute return) over a rolling 12 month period irrespective of market conditions, but there is no guarantee that this will be achieved and your capital is in fact at risk.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

Federated Hermes SDG Engagement Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation alongside positive societal impact.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in, or that derive their income from, developed and emerging markets. These companies will be listed and/or traded on a Regulated Market worldwide.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World SMID Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Impact Opportunities Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation by investing in companies which will benefit from meeting the world's environmental and social challenges.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted and/or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities.

Further information on the attainment of the sustainable investment objective of the sub-fund during the year ending 31 December 2023 can be found in the SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Investable Market Index.

Federated Hermes Unconstrained Credit Fund - The investment objective of the sub-fund is to generate capital growth and a high level of income over the long term.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund will manage and adapt its market exposures dependent on market conditions, and the view of where markets will move to in the short, medium and long term. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The Investment Manager may choose to reduce the market-related risks within the sub-fund by using FDIs to create a Synthetic Short Exposure to credit indices. In other market conditions, the Investment Manager can also seek to exploit divergent views on two companies in the same sector in a market-neutral way (creating neither a long or short exposure): it can either purchase the bond or use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. For example, this may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way, the Investment Manager would use FDIs to reduce market related risks with the sub-fund then benefitting from the increase or decrease in the value of the companies (as the case may be). The securities in which the sub-fund may invest will be selected on a global basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Emerging Markets SMID Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to small and mid-capitalisation companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide. The sub-fund will follow a long only equity strategy.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets SMID Cap Index.

Federated Hermes SDG Engagement High Yield Credit Fund - The investment objective of the sub-fund is to provide total return, through a combination of income and capital growth over a rolling period of any five years, whilst delivering positive societal impact.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Below Investment Grade debt securities on a global basis. The portfolio will be actively managed where all holdings within the sub-fund will have both an investment and an engagement thesis. Each holding will also be aligned with at least one of the United Nations Sustainable Development Goals (the "UN SDGs"). The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch Global High Yield Constrained Index.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes US High Yield Credit Fund - The investment objective of the sub-fund is to generate a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

The sub-fund promotes investment in issuers exhibiting the following characteristics: (i) reduced ESG risks, including GHG emissions, carbon footprint and carbon intensity, human capital management, board independence, etc. (as determined by reference to the Investment Manager's proprietary ESG scoring methodology); (ii) seeking to reduce their environmental / social impacts on the industry / region in which they operate as demonstrated through a willingness to engage on such issues; and (iii) limited to no revenue generated from excluded sectors.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch US High Yield Constrained Index.

Federated Hermes Sustainable Global Equity Fund - The investment objectives of the sub-fund are to: (i) achieve capital growth over a rolling five year period; and (ii) have a reduced environmental footprint compared to the Benchmark.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity and equity-related securities. These companies will be listed or traded on a Regulated Market worldwide.

Further information on the attainment of the sustainable investment objective of the sub-fund during the year ending 31 December 2023 can be found in the SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Climate Change High Yield Credit Fund - The investment objectives of the sub-fund are to (i) provide total return, (through a combination of income and capital growth) over a rolling period of any five years; and (ii) delivering a carbon footprint lower than the Benchmark through investment in debt securities of companies that are adapting their business models to reduce their environmental impact on Climate Change.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of Financial Derivative Instruments ("FDIs"). The securities in which the sub-fund may invest will be selected on a global basis by reference to the Investment Manager's proprietary Climate Change Impact ("CCI") scoring system that indicate how far the underlying company has reduced its carbon footprint in order to reduce the impact of climate change. The Investment Manager invests on a global basis, however investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries and will be capped at 20% of the sub-fund.

Further information on the attainment of the sustainable investment objective of the sub-fund during the year ending 31 December 2023 can be found in the SFDR annex to these financial statements.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the ICE Global High Yield Paris-Aligned Absolute Emissions USD Hedged Index.

Federated Hermes Emerging Markets Debt Fund - The investment objective of the Fund is to deliver capital growth and a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling five year period, by investing at least 80% in a diversified portfolio of foreign currency denominated debt securities issued by governments, government agencies and other quasi-governmental institutions issued in or by global emerging market countries, or issued by emerging market companies. Exposure to global emerging markets will be primarily obtained by the sub-fund through foreign currency sovereign and corporate bonds, but the Sub-fund may invest opportunistically into locally denominated debt securities to a maximum of 20%. The sub-fund may invest up to 100% into Below Investment Grade securities, however it will typically invest no more than 75% in such securities during periods of normal market activity. From time to time, the sub-fund may invest into debt securities issued by supranational institutions.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the JP Morgan EMBIGD Global Diversified.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Biodiversity Equity Fund - The investment objectives of the sub-fund are: (i) to achieve capital growth over a rolling five year period; and (ii) to invest in companies that are helping to protect and restore biodiversity or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, or deforestation.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation, climate change adaptation and the protection and restoration of biodiversity and ecosystems under the Taxonomy Regulation.

The sub-fund will seek to achieve its investment objectives by investing at least 80% in a diversified portfolio of equity and equity-related securities listed or traded on a Regulated Market worldwide. The sub-fund may invest up to 30% of its net assets in emerging markets.

Further information on the attainment of the sustainable investment objective of the sub-fund during the year ending 31 December 2023 can be found in the SFDR annex to these financial statements.

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Investable Market Index.

Federated Hermes China Equity Fund - The investment objectives of the sub-fund is to achieve capital growth over a rolling period of any five years.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Equity and Equity related of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from China or Hong Kong. These companies will be listed or traded on a Regulated Market worldwide. The Investment Manager will seek exposure to securities which it expects to rise in value (known as a long-only strategy).

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI China All Shares Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Emerging Markets ex-China Equity Fund - The investment objective of the sub-fund is to achieve capital growth over a rolling period of five years.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to companies in, or companies that derive a large proportion of their revenues from, global emerging markets, excluding China. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide.

Further information on the attainment of the environmental and/or social characteristics promoted by the sub-fund during the year ending 31 December 2023 can be found in SFDR annex to these financial statements.

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets ex-China Index.

Federated Hermes Sustainable Global Investment Grade Credit Fund (launched on 20 March 2023) - The investment objectives of the sub-fund are to: (i) generate a total return (through a combination of income and capital growth) over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation (EU) 2020/852.

The sub-fund will seek to achieve its investment objectives by investing at least 90% in a diversified portfolio of Investment Grade corporate debt securities (as referenced in the Categories of Investments section below). The sub-fund will manage and adapt its market exposures depending on market conditions and the view of where markets will move to in the short, medium and long term. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The Investment Manager may seek to exploit divergent views on two companies in the same sector in a market-neutral way (creating neither a long nor short exposure): it can either purchase the bond or use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. For example, this may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way, the Investment Manager would use FDIs to reduce market-related risks with the Fund then benefitting from the increase or decrease in the value of the companies (as the case may be). The securities in which the Fund may invest will be selected on a global basis. However, investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries.

Further information on the attainment of the sustainable investment objective of the sub-fund during the period ending 31 December 2023 can be found in the SFDR annex to these financial statements.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Global Corporate Index.

Please refer to the Prospectus and sub-funds Supplements for full information.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies

The material accounting policies applied in the preparation of these Financial Statements are set out below.

Basis of Preparation

The Financial Statements have been prepared in accordance with the Companies Act 2014, International Financial Reporting Standards (“IFRS”) as adopted by the European Union and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

These Financial Statements have been prepared on a going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss.

The preparation of Financial Statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the year. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. The main areas of estimation are discussed in this note under the heading “Financial assets and liabilities at fair value through profit or loss”.

(a) Standards and amendments to existing standards effective 1 January 2023

There are no new accounting standards or amendments issued and effective which had a material impact on the Financial Statements of the Company.

(b) New standards, amendments and interpretations effective after 1 January 2024 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2024, and have not been early adopted in preparing these Financial Statements. None of these are expected to have a material effect on the Financial Statements of the Company.

Foreign exchange translation

(a) Functional and presentation currency

Items included in the Company’s Financial Statements are measured using the currency of the primary economic environment in which it operates (“the functional currency”). The functional currency of the Federated Hermes Global High Yield Credit Fund is Euro, which reflects the fact that a large number of the investments in its portfolio are denominated in Euro. The functional currency of all other sub-funds is US Dollar which reflects the fact that a large number of the investments in their portfolios are denominated in US Dollar.

The Board has approved the presentation currency of the Company being changed from Sterling (“GBP£”) to US Dollar (US\$).

The change in presentation currency is accounted for retrospectively. Comparative figures for the year ended 31 December 2022 have been retranslated at the closing rates of GBP£ to US\$ currency rate of 1.0673 (2021: 1.1372 rate applied for opening) for the Statement of Financial Position and at average rate of 1.0537 for the Statement of Comprehensive Income. Issues and redemptions of redeemable participating share in foreign currencies are translated at average rates.

As a result, for the current year, all sub-funds denominated in Euro have been converted to US Dollar in the total columns. For the comparative year, the presentation currency of the Company is shown in Sterling and it is also restated in US Dollar. See total columns in Balance sheet.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency of each sub-fund using the exchange rates prevailing at the dates of the transactions. Assets and liabilities are translated into the functional currency of each sub-fund using exchange rates in effect at the Balance Sheet date.

2. Material Accounting Policies (continued)

Foreign exchange translation (continued)

(b) Transactions and balances (continued)

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Income Statement.

Translation differences on financial instruments held at fair value through profit or loss are reported as part of net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Income Statement.

(c) Foreign exchange adjustments on aggregation

The presentation currency of the Company changed from Sterling ("GBP£") to US Dollar ("US\$"). For the purpose of aggregating the Financial Statements of the sub-funds, current year values in the Euro denominated sub-funds in the Financial Statements have been translated to US Dollar at the average rate of exchange for the financial year on the Income Statement and at the financial year end rate on the Balance Sheet. Prior year values in the Euro denominated sub-funds in the Financial Statements have been translated to Sterling and are also restated in US Dollar at the average rate of exchange for the financial year on the Income Statement and at the financial year end rate on the Balance Sheet. The exchange adjustment arising from the difference between the average rate and the year end rate, in addition to the notional exchange adjustment arising from the translation of the opening net assets are shown in the Statement of Changes in Net Assets. The method of translation has no effect on the Net Asset Value per share attributable to the individual sub-funds.

The notional adjustment translation of the Cash Flow movements at the average rate opposed to the financial year end rate is shown in the Cash Flow Statement.

Financial assets and liabilities at fair value through profit or loss

(a) Classification

(i) Assets

In accordance with IFRS 9, the Company classifies its investments based on both the Company's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Company has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Company's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Company's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

(ii) Liabilities

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

As such, the Company classifies its entire investment portfolio as financial assets or liabilities at fair value through profit or loss.

2. Material Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(b) Recognition/derecognition

Purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred all risks and rewards of ownership. Gains and losses on the disposal of financial assets and liabilities are computed on a FIFO basis and are included in the Income Statement. Changes in unrealised gains and losses on financial assets and liabilities are recognised in the Income Statement.

(c) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the “financial assets or financial liabilities at fair value through profit or loss” category are presented in the Income Statement in the period in which they arise.

IFRS 13 Fair Value Measurement requires the sub-funds to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level I – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. The type of investments which would generally be included would include equities, american depositary receipts, REITS, warrants and derivatives listed on a securities exchange.
- Level II – Quoted prices in markets that are not considered to be active or financial instruments priced using inputs other than quoted prices and for which all significant inputs are observable, either directly or indirectly (including quoted prices for similar investments in active markets, interest rates and yield curves, credit risks, etc.). The type of investments which would generally be included in this category would include corporate bonds, government bonds, P-Notes, bank debt and certain over-the-counter derivatives.
- Level III – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable (including the Investment Manager’s own assumptions and assumptions used by the Board of Directors about what market participants would use in determining the fair value of investments). The type of investments which would generally be included in this category would include private or debt securities issued by private entities and investments priced by the Investment Manager. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

(d) Fair value estimation

IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities, warrants, floating rate notes, P-Notes, REITS, american depositary receipts, asset backed securities and bonds) is based on quoted market prices at the Balance Sheet date. The Company utilises the last traded market price for both financial assets and financial liabilities where the last traded price falls within the bid-ask spread. IFRS 13 allows the use of midmarket pricing or other pricing conventions (including last traded price) that are used by market participants as a practical expedient for the exit price. In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value. No investments have been valued in this way at year end.

2. Material Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(d) Fair value estimation (continued)

Derivatives

Derivative contracts ("derivatives") are either exchange-traded or over-the-counter ("OTC") contracts. Exchange-traded derivatives are standard contracts traded on a regulated exchange. OTC contracts are private contracts negotiated with counterparties. Derivatives are comprised of futures, forward currency contracts, credit default swaps, swaptions and warrants.

Derivatives are recorded at fair value. The sub-fund values exchange-traded derivative contracts at their official settlement price on the exchange where they are primarily traded. OTC derivatives are valued using market transactions and other market evidence whenever possible, including market based inputs to model, model calibration to market-clearing transactions, brokers or dealers quotations, or alternative pricing sources with reasonable levels of transparency.

Futures

Futures contracts are valued at the last reported settlement or closing price as supplied by the exchange on which the contracts are traded and are recorded on a trade date basis. Cash balances held with Morgan Stanley are used as collateral for the futures contracts and are identified as variation margin receivable and payable in the Balance Sheet. Variation margin is valued at face value plus accrued interest which approximates fair value.

Gains or losses from futures contracts are considered realised for accounting purposes on the trade date of the transaction closing or the open position.

Realised gains or losses are included in the Income Statement. Unrealised gains or losses, representing the difference between the future rate and contract rate of open futures positions, are included in the Balance Sheet and the movement in the financial year is included in the Income Statement.

Forward currency contracts

Forward currency contracts are valued at the forward rate and are marked to market on the valuation date. The change in value is included in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Income Statement. When the contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Warrants

Warrants are securities providing a return generated by a specified underlying equity or basket of equities. Investments in warrants are valued at the last reported trade price of the underlying security as of close of business at the reporting date. The resulting unrealised gains and losses for the financial year are included in the Balance Sheet and Income Statement. Realised gains and losses are included in the Income Statement.

Credit Default Swaps

Credit default swaps are OTC contracts in which the sub-fund pays or receives an interest flow in return for the counterparty accepting all or part of the risk of default or failure to pay off a reference entity on which the swap return is written. Where the sub-fund has bought protection the maximum potential loss is the value of the interest flows the sub-fund is contracted to pay until maturity of the contract. Where the sub-fund has sold protection the maximum potential loss is the nominal value of the protection sold. The credit default swaps are marked to market at each valuation point by a third party vendor and the change, if any, is recorded as a movement in unrealised gain or loss. Payments received or made as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

2. Material Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(d) Fair value estimation (continued)

Swaptions

Swaptions combine the features of two other financial instruments, namely an option and a swap. A swaption involves writing/purchasing options to enter into a swap. When a sub-fund writes/purchases a swaption, a premium is received/paid by the sub-fund and the swaption is initially recognised at the amount of the premium.

The swaption is subsequently "marked to market" to reflect the fair value of the swaption, which is reported within the financial assets/liabilities at fair value through profit or loss on the Balance Sheet and Portfolio Statement. The difference between the premium and the fair value reported on the Balance Sheet gives rise to an unrealised gain/loss which is reported in the Income Statement.

Asset Backed Securities

An asset-backed security is a security that is primarily serviced by the cash flows of a discrete pool of receivables or other financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period plus any rights or other assets designed to ensure the servicing or timely distribution of proceeds to the security holders. The investment characteristics of asset-backed securities are such that principal payments are made more frequently than traditional debt securities. The principal may be repaid at any time because the underlying asset loans or other assets generally may be repaid at any time. The sub-funds record these principal repayments as they arise and realise a gain or loss in the net gains/(losses) on financial assets/(liabilities) at fair value through profit or loss in the Income Statement in the period in which they occur. Asset Backed Securities are valued at fair value based on their quoted market price at the Balance Sheet date.

Contingent Convertible Bonds

A contingent convertible bond ("CoCo"), also known as an enhanced capital note ("ECN") is a fixed-income instrument that is convertible into equity if a pre-specified trigger event occurs. A CoCo bond is defined by two elements: a trigger activation and a loss-absorption mechanism. The trigger activation is the pre-specified event that causes the loss-absorption process. It can be either based on a mechanical rule or on supervisors' discretion. The loss-absorption mechanism consists either of conversion into a pre-specified amount of equity or of writing-down the nominal value of the CoCo bond. The trigger, which can be bank specific, systemic, or dual, has to be defined in a way ensuring automatic and inviolable conversion. A possibility of a dynamic sequence exists - conversion occurs at different pre-specified thresholds of the trigger event. Since the trigger can be subject to accounting or market manipulation, a commonly used measure has been the market's measure of bank's solvency. The design of the trigger and the conversion rate are critical in the instrument's effectiveness. CoCo Bonds are valued at fair value based on their quoted market price at the Balance Sheet date.

Income from investments

Bank and bond interest income and expense are recognised in the Income Statement using the effective interest rate method.

Dividends are credited to the Income Statement on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any withholding taxes, which is disclosed separately in the Income Statement, and net of any tax credits.

Cash and cash equivalents

Cash and cash equivalents are valued at their face value together with interest accrued, where applicable. Cash and cash equivalents comprise of cash balances and short term bank overdrafts and short-term highly liquid investments that are readily convertible to known amounts of cash.

2. Material Accounting Policies (continued)

Cash received as collateral for derivative positions

Broker cash received as collateral is recorded as an asset on the Balance Sheet as “Cash received as collateral for derivative positions” and a related liability to repay the collateral is disclosed within liabilities as “Cash due to counterparties for derivative positions”. Cash received as collateral is valued at face value plus accrued interest which approximates fair value.

Cash pledged as collateral for derivative positions

Cash pledged as collateral to brokers for derivative positions on the initiation of derivative trades and additional collateral posted on these trades are identified in the Balance Sheet as “Cash pledged as collateral for derivative positions”. Cash pledged as collateral for derivative positions is not included as a component of cash and cash equivalents in the Balance Sheet and is not available to the sub-funds on demand. Cash pledged as collateral is valued at face value plus accrued interest which approximates fair value.

Net assets attributable to holders of redeemable participating shares

International Accounting Standard 32 “Financial Instruments: Presentation” (“IAS 32”) requires entities that issue financial instruments to classify such instruments as liabilities or equity in accordance with the substance of the contractual arrangement and the definitions contained within IAS 32. In this regard, IAS 32 requires that financial instruments that give the holder the right to put the instrument back to the issuer for cash or another financial asset be classified as a liability of the issuer.

The redeemable participating shares issued by the Company provide the redeemable participating shareholders with the right to redeem their shares for cash equal to their proportionate share of the Net Asset Value of the Company. Within the context of IAS 32 and IFRS 7 ‘Financial Instruments: Disclosures’ (“IFRS 7”), the existence of the option for the redeemable participating shareholders to put the shares back to the Company in exchange for cash requires the Company to classify the redeemable participating shares as liabilities.

The liability to redeemable participating shareholders is presented on the Balance Sheet as “net assets attributable to holders of redeemable participating shares” and is determined based on the residual assets of the Company after deducting the Company’s other liabilities and management share capital.

Operating expenses

The Company is responsible for all normal operating expenses including audit fees, stamp and other duties and charges incurred on the acquisition and realisation of investments. Operating expenses are recognised on an accrual basis.

Income equalisation

Income equalisation is accrued income included in the price of shares purchased and redeemed during the accounting year. The subscription price of shares is deemed to include an equalisation payment calculated by reference to the accrued income of the relevant sub-fund and the distribution in respect of any share will include a payment of capital usually equal to the amount of such equalisation payment. The redemption price of each share will also include an equalisation payment in respect of the accrued income of the relevant sub-fund up to the date of redemption. As a result, equalisation may be positive or negative. Income equalisation is accounted for in the Income Statement.

Taxation

The sub-funds may incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

Dilution Adjustments

In the event of a sub-fund being in a Net Subscription or Net Redemption Position that exceeds a predetermined threshold on any Dealing Day, the Company may make a Dilution Adjustment to the Net Asset Value per Share of the relevant Share Classes to cover the Duties and Charges and Spreads, being the costs involved in rebalancing the Fund's portfolio in respect of the net issue of Shares on that Dealing Day. The level of the Dilution Adjustment is determined by the Company and is estimated based on historic information concerning the costs incurred in trading the relevant securities in the relevant markets. If a Fund levies a Dilution Adjustment which is insufficient to discharge all of the costs incurred in the purchase or sale of Investments, the difference will be paid out of the assets of a Fund, which will result in a reduction in the value of a Fund (and a corresponding reduction in the value of the holding of all Shareholders).

During the year ended 31 December 2023, swing pricing adjustments affected the net asset value per share of the following sub-funds, table overleaf shows the total adjustments applied for the year ended 31 December 2023 and 31 December 2022:

* Federated Hermes Global Equity Fund was closed to further subscription on 23 November 2023 and is in the process of being terminated.

** Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription on 26 June 2023 and are in the process of being terminated.

*** Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

These amounts are included within ‘Issue of redeemable participating shares for the year’ and ‘Redemption of redeemable participating shares for the year’ in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

Investment Management Fee Rebate

Where applicable, the investment manager, will pay a rebate to the sub-funds to cap all operating expenses (excluding management fees and share class hedging fees) at or below 20 basis points. The sub-funds accrue these rebates on a daily basis.

3. Cash and Cash Equivalents

Substantially all of the cash assets of the sub-funds are held with The Northern Trust Company (“TNTC”), which is a 100% indirect wholly owned subsidiary of Northern Trust Corporation which has a Standard & Poor’s credit rating of A+ and A1 from Moody’s.

Northern Trust Fiduciary Services (Ireland) Limited has appointed TNTC as its Global Sub-Custodian.

Federated Hermes Investment Funds Public Limited Company

* Federated Hermes Global Equity Fund was closed to further subscription on 23 November 2023 and is in the process of being terminated.

** Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription on 26 June 2023 and are in the process of being terminated.

*** Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

Please note that within the cash and cash equivalents balance there is a restricted cash amount of \$6,463,162 (31 December 2022: \$6,463,162) that is applied pro rata to each fund by reference to its individual liability and is set aside for a potential IRS liability for underpaid US Withholding tax, whereby the treaty rate of 15% was being claimed by the Fund instead of the standard rate of 30%, covering a period from January 2013 to March 2018. The Fund has not recorded a liability in the financial statements, as it is not probable that the Fund will have to settle the liability, as per the advice from the Fund's US tax advisors. The Fund has submitted a self-declaration and this is under consideration with the IRS at the date of this report. It is uncertain as to when the IRS will opine on the self-declaration as no set timelines are provided.

Federated Hermes Limited, the parent of Hermes Fund Managers Ireland Limited (the "Manager"), has agreed to absorb any potential US withholding tax liability on Federated Hermes Global Equity Fund. If no such liability is to be paid, Federated Hermes Limited can claim the restricted cash balance attributable to Federated Hermes Global Equity Fund. With the exception of Federated Hermes Global Equity Fund, the Fund retains the rights and ownership of the restricted cash held.

The standard US withholding rate of 30% has been applied since March 2018.

For a breakdown of the restricted cash by sub-fund, please refer to note 13.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

4. Cash Collateral for Derivative Positions

Where derivatives are held on a sub-fund, the sub-funds may pledge/receive collateral as required with the derivative counterparty. The collateral pledged and received at 31 December 2023 and 31 December 2022 is detailed in the following tables:

Administration fees of \$3,369,718 (2022: \$3,647,392*) were charged during the financial year and fees of \$521,537 (2022: \$763,272**) were payable at year end.

(c) Depositary and Sub-Custodian Fees

Northern Trust Fiduciary Services (Ireland) Limited acts as a Depositary of the Company. The Depositary is a Private Limited Company incorporated in Ireland on 5 July 1990 and is an indirect wholly-owned subsidiary of Northern Trust Corporation.

The Depositary is entitled to an annual fee (plus any applicable value added tax) of:

- 0.0099% of the Net Asset Value of the relevant sub-fund on the first £500,000,000;
- 0.00675% of the Net Asset Value of the relevant sub-fund on £500,000,000 to £700,000,000;
- 0.0054% of the Net Asset Value of the relevant sub-fund for any amounts in excess of £700,000,000.

In addition, the Depositary and any relevant Sub-Custodian shall be entitled to recover safekeeping and transaction charges as set out in the Depositary Agreement

Depositary fees of \$1,143,081 (2022: \$1,271,872*) were charged during the financial year and fees of \$170,854 (2022: \$271,930**) were payable at year end.

Sub-Custody fees of \$4,334,235 (2022: \$4,366,033*) were charged during the financial year and fees of \$768,230 (2022: \$1,049,508**) were payable at year end.

(d) Directors' Fees

The Company shall pay to the Directors such annual fees for acting as Directors of the Company as the Directors may from time to time agree, provided however that the annual fees of each Director shall not exceed €50,000 without the approval of the Board of Directors. Directors' fees will total not more than €110,000 on a per annum basis. No other remuneration will be payable by the Company to the Directors except for out-of-pocket expenses reasonably incurred by them. Gregory Dulski, Joseph Kagan and Sylvie McLaughlin do not receive Director's fees from the Company.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

5. Fees and Other Expenses (continued)

(d) Directors' Fees (continued)

Directors fees of \$1,408 (2022: \$45,091*) were charged during the financial year and fees of \$1,188 were payable at year end (2022: \$249**)

(e) Remuneration For Audit, Audit Related And Non Audit Work

Deloitte Ireland LLP, as statutory auditors, charged €173,609 plus VAT (2022: €160,875) in relation to the audit of the Company's Financial Statements and €10,300 plus VAT (2022: Nil) in relation to tax services. There were no other assurance or non-audit services provided by the statutory auditors during 2023 or 2022.

(f) Other Fees and Expenses

In addition, each sub-fund will pay the costs and expenses incurred in its operation, including, without limitation, stamp duties, taxes, the fees and expenses of the auditor, listing fees, legal expenses, the costs of printing and distributing reports, accounts and any Prospectus, any costs incurred as a result of a change in law or the introduction of any new law (including any costs incurred as a result of compliance with any applicable code, whether or not having the force of law).

All fees and expenses will be charged to the sub-fund in respect of which they were incurred, or where an expense is not considered by the Directors to be attributable to any one sub-fund, the expense will normally be allocated to classes of all sub-funds pro rata to the Net Asset Value of the relevant sub-funds. Details of each of the fees payable at the year end in respect of each sub-fund are disclosed in the Balance Sheet on pages 247 to 254. Details of each of the fees incurred at the year end in respect of each sub-fund are disclosed in the Income Statement on pages 262 to 268.

(g) Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. Transaction costs for the year of \$13,778,892 (2022: \$16,055,152*) are expensed in the Income Statement as part of the net fair value gain/loss on financial assets and liabilities at fair value through profit or loss. Only transaction costs which are separately identifiable are disclosed. These include identifiable brokerage charges and commissions, identifiable transaction related taxes and other market charges and separately identifiable transaction costs related to Financial Derivative Instruments.

* The presentation currency of the Company changed from Sterling to US Dollar. Comparative yearly figures for the Euro denominated sub-funds are converted to US Dollar in the restated company total column using the average exchange rate of 1.0537.

** Comparative year-end figures for the Euro denominated sub-funds are converted to US Dollar in the restated company total column using the year end exchange rate of 1.0673.

6. Related Party Disclosures

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

(a) Management

The Company has appointed Hermes Fund Managers Ireland Limited as manager (the "Manager"). The Manager has delegated the investment management of the Company to Hermes Investment Management Limited, who also acts as distributor of the Company, and to Federated Investment Counseling. Hermes Investment Management Limited is a wholly-owned subsidiary of Federated Hermes Limited which was wholly owned by Federated Hermes, Inc at the year-end date. Federated Investment Counseling is an indirect subsidiary of Federated Hermes, Inc.

Hermes Investment Management Limited is incorporated under the laws of England and Wales and was established on 1 February 1990. Federated Investment Counseling is a US domiciled company regulated by

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

7. Share Capital (continued)

Federated Hermes Sustainable Global Investment Grade Credit Fund may issue Class A, F, I, K, L, M, P, R, X and Z Shares, each of them Distributing or Accumulating shares with hedged or unhedged shares in all the currencies above. Hedged USD shares are not available for this sub-fund.

In addition to the above, all sub-funds may issue Class T Shares and Class T Hedged Shares, each of them Distributing or Accumulating shares, in Sterling, Euro and USD, except for the hedged class in the base currencies of the sub-funds.

Accumulating Share Classes are not intended to distribute dividends to Shareholders. The income and other profits will be accumulated and reinvested on behalf of Shareholders. Dividends, if paid, may be paid out of the net income of each sub-fund including interest and dividends earned by the sub-fund less expenses of the sub-fund.

Distributing Share Classes are intended to declare dividends on the Shares of the Distributing Classes of the sub-fund out of the net income of the sub-fund including interest and dividends earned by the sub-fund less expenses of the sub-fund.

The holders of Shares are entitled to one vote per whole Share and to such dividends as the Directors may from time to time declare.

* Federated Hermes SDG Engagement Equity Fund only.

The Company has the power to redeem the remaining holding of any Shareholder who redeems his/her Minimum Holding of Shares to below the Minimum Holding or its foreign currency equivalent.

Every Shareholder will have the right to require the Company to redeem his/her Shares in the sub-fund on any Dealing Day (save during any period when the calculation of the Net Asset Value is suspended in the circumstances set out in the Prospectus) on furnishing to the Administrator a redemption request. All redemption requests are dealt with on a forward pricing basis, i.e. by reference to the price for Shares calculated at the Valuation Point on the relevant Dealing Day. The request for redemption of Shares must be received before 9.30 am (Irish time) on the relevant Dealing Day.

All the Shares of the sub-fund may be redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the sub-fund, the Net Asset Value of the sub-fund falls below £250,000,000 for any period of time.

8. Financial Risk Management

Strategy in Using Financial Instruments

The sub-funds are exposed to a variety of financial risks in pursuing their stated investment objectives and policies. These risks are defined in IFRS 7 as including credit risk, liquidity risk and market risk (which in turn includes currency risk, interest rate risk and other price risk). The sub-funds take exposure to certain of these risks to generate investment returns on their portfolios, although these risks can also potentially result in a reduction in the sub-fund's net assets.

The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on the sub-funds' performance where it can do so while still managing the investments of the sub-funds in ways that are consistent with each sub-fund's investment objectives and policies.

The risks, and the measures adopted by the Company for managing these risks, are detailed below.

Market Price Risk

Market price risk is defined in IFRS 7 as the risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices.

The sub-funds' assets consist principally of bonds, equities, P-notes, american depositary receipts, REITS, floating rate notes, futures, forward currency contracts, credit default swaps, swaptions and asset backed securities.

The values of these instruments are determined by market forces and there is accordingly a risk that market prices can change in a way that is adverse to a sub-funds' performance.

The Company has adopted a number of investment restrictions which are set out in the individual sub-funds' Supplements to the Company's Prospectus and which limit the exposure of the sub-funds to adverse changes in the price of any individual financial asset.

In accordance with Company's policy, the Investment Manager monitors the sub-funds' positions on a regular basis and reports regularly to the Board of Directors. The Board reviews the information on each sub-funds' overall market exposure provided by the Investment Manager at its periodic meetings.

In addition, the Investment Manager manages the exposure of the portfolios to the risk of adverse changes in the general level of market prices through adhering to its formal risk management process, which includes the use of systems and technology to monitor overall market and position risk on a regular basis.

The maximum risk arising from an investment in a financial instrument is determined by the fair value of the financial instruments, or in the case of certain derivatives the nominal value of the underlying assets, except for short positions in derivatives and securities where the loss may potentially be unlimited.

As at 31 December 2023 and 31 December 2022 the overall market exposure for each sub-fund is as shown in the Portfolio Statements, other than for derivatives where the exposure could be greater.

At 31 December 2023 and 31 December 2022, market price risks defined by IFRS 7 applying to each sub-fund are affected by two main components: changes in market prices and currency exchange rates. The sub-funds which hold bonds will be affected by a third component, bond interest rates. IFRS 7 requires a sensitivity analysis showing how the Net Asset Values of the sub-funds would be affected by changes in each of these factors.

Market price and currency exchange rate movements primarily affect the fair values of equity securities and related instruments held on account for each sub-fund.

For details of market price risk sensitivity analysis please refer to market price and sensitivity analysis on pages 405 to 409.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. Financial Risk Management (continued)

Currency Risk

Currency risk is defined in IFRS 7 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The sub-funds are exposed to currency risk as the assets and liabilities of the sub-funds may be denominated in a currency other than the functional currency of the relevant sub-funds.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset. The Investment Manager may attempt to mitigate these risks through the use of financial derivative instruments.

In accordance with Company policy, the Investment Manager monitors the sub-funds' currency exposure on a regular basis and reports regularly to the Board of Directors.

At 31 December 2023, each sub-fund's currency exposure was as follows:

Monetary Assets are cash and time deposits, Hedging refers to currency contracts and Non-Monetary Assets are all other assets.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. Financial Risk Management (continued)

Interest Rate Risk

Interest rate risk is defined in IFRS 7 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The majority of the sub-funds' financial assets and liabilities are non-interest bearing and any excess cash and cash equivalents are invested at short term market interest rates. As a result, most of the sub-funds are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

The Federated Hermes Global High Yield Credit Fund, the Federated Hermes Multi-Strategy Credit Fund, the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund, the Federated Hermes SDG Engagement High Yield Credit Fund, the Federated Hermes US High Yield Credit Fund, the Federated Hermes Climate Change High Yield Credit Fund, Federated Hermes Emerging Markets Debt Fund and Federated Hermes Sustainable Global Investment Grade Credit Fund have/had interest-bearing financial assets and liabilities. As a result, the sub-funds are/were subject to the risk of potentially adverse movements in the prevailing levels of market interest rates. The Investment Manager may from time to time enter into contracts on behalf of the funds that seek to mitigate the effects of these movements.

In accordance with the sub-fund's policy, the Investment Manager monitors the sub-funds interest rate exposures on a regular basis and reports regularly to the Board of Directors, which reviews the information provided by the Investment Manager on significant exposures at its periodic meetings.

As at 31 December 2023, the sub-funds' interest rate exposures based on the maturity date were as follows:

Federated Hermes Global High Yield Credit Fund	Up to 1 year €	1-5 5 years €	Over 5 years €	Non interest bearing €	Total €

Credit Risk

Credit risk is defined in IFRS 7 as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Transactions in securities are generally settled or paid for on delivery, or cleared through the appropriate clearing system for the market on which the securities are traded. The risk of default is not considered to be material, as delivery of securities sold is only made once the Depositary has received confirmation of payment. Payment is also only made on a purchase once confirmation of delivery of the securities has been received by the Depositary. The trade will fail if either party fails to deliver the required confirmations.

At 31 December 2023 and 2022, none of the sub-funds' financial assets were past due or impaired.

Northern Trust Fiduciary Services (Ireland) Limited ("NTFSIL") is the appointed Depositary of the Fund, responsible for the safe-keeping of assets. NTFSIL has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both NTFSIL and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at year end date 31 December 2023, NTC had a long term credit rating from Standard & Poor's of (A+) (2022: A+).

TNTC (as global sub-custodian of NTFSIL) does not appoint external sub-custodians within the U.S., the U.K., Ireland, Canada, Belgium, France, Germany, Netherlands and Saudi Arabia. However, in all other markets, TNTC appoints local external sub-custodians.

NTFSIL, in the discharge of its depositary duties, verifies the Fund's ownership of Other Assets, (as defined under Other Assets in Art 22(5) of UCITS V Directive 2014/91/EU), by assessing whether the Fund holds the ownership based on information or documents provided by the Fund or where available, on external evidence.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Fund, clearly identifiable as belonging to the Fund, and distinct and separately from the proprietary assets of TNTC, NTFSIL and NTC.

In addition TNTC, as banker, holds cash of the Fund on deposit. Such cash is held on the Statement of Financial Position of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Fund will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. Financial Risk Management (continued)

Credit Risk (continued)

Where relevant please note the following currencies, Jordanian Dinar, Saudi Riyal, cash in the onshore China market (principally the currency of Chinese Yuan Renminbi, and any other currencies remitted into accounts in the onshore China market), are no longer held on the Balance Sheet of TNTC. For these off-book currencies, clients' cash exposure is directly to the relevant local sub-custodian / financial institution in the market.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Fund's rights with respect to its assets to be delayed.

The Investment Manager (or its delegate) manages risk by monitoring the credit quality and financial position of the Depository and such risk is further managed by the Depository monitoring the credit quality and financial positions of sub-custodian appointments.

To mitigate the risks the sub-funds are exposed to from the use of the counterparties, the Investment Manager employs appropriate procedures to ensure that the counterparties are reputable institutions and that the credit risk is acceptable to the Investment Manager. The sub-funds only transact with counterparties that are regulated entities subject to prudential supervision, or with credit-ratings assigned by international credit-rating agencies. In addition, the sub-funds' securities are maintained by the sub-custodian in segregated accounts. Cash is also held with the following brokers/counterparties (see note 4):

Goldman Sachs	(S&P: A+)	Morgan Stanley	(S&P: A-)
JP Morgan	(S&P: A+)	State Street	(S&P: AA-)
Merrill Lynch	(S&P: A-)	The Northern Trust Company	(S&P: AA-)

Cash held with brokers/counterparties may be subject to counterparty risk and may not be recoverable in the event of an insolvency of the broker/counterparty.

The Investment Manager monitors the credit quality and financial position of the Depository and reviews the SOC 1 of the Custodian. The Company is additionally exposed to credit risk arising from the counterparties used in OTC derivatives. This risk is mitigated by the Company only engaging with counterparties which meet the Central Bank's UCITS regulatory requirements and are approved by the Investment Manager and are continually monitored.

The Company has credit risk exposure to issuers of debt securities and P-Notes held as part of the Company's investment portfolio. The Company limits its exposure to individual issuers of debt securities and P-Notes in accordance with the investment restrictions set out in the Company's Prospectus. Impairment provisions are provided for any losses that have been incurred by the balance sheet date. There were no impairment provisions required as at 31 December 2023 (2022: None).

The Federated Hermes Global Emerging Markets Equity Fund, the Federated Hermes Global High Yield Credit Fund, the Federated Hermes Multi-Strategy Credit Fund, the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund, the Federated Hermes Global Emerging Markets SMID Equity Fund, the Federated Hermes SDG Engagement High Yield Credit Fund, the Federated Hermes US High Yield Credit Fund, the Federated Hermes Climate Change High Yield Credit Fund, the Federated Hermes Emerging Markets Debt Fund, the Federated Hermes Global Emerging Markets ex-China Equity Fund and the Federated Hermes Sustainable Global Investment Grade Credit Fund invest in debt securities and P-Notes at the financial year end date. As at 31 December 2023 and 31 December 2022, the exposure to credit risk on the Portfolio Statements to debt securities and P-Notes using ratings from S&P are shown as follows:

Liquidity Risk

Liquidity risk is defined in IFRS 7 specifically as the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The sub-funds are exposed to daily cash redemptions of redeemable participating shares. The sub-funds invest the majority of their assets in securities and other instruments that are traded on an active market and which are considered to be liquid, as under normal market conditions they can be readily disposed of in the event that cash needs to be raised to meet redemptions or to pay expenses.

In accordance with Company policy, the Investment Manager monitors the sub-funds' liquidity on a regular basis and reports regularly to the Board of Directors.

The maturities of the relevant financial assets and liabilities at fair value through profit or loss are set out in the individual sub-fund portfolio statements. All the sub-funds' other liabilities had maturities of up to one month after year end.

Fair value measurement

The following is a summary of the inputs used to value each sub-funds assets and liabilities carried at fair value as at 31 December 2023, as discussed in note 2.

Fund Name	Financial assets and liabilities at fair value through profit or loss

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. Financial Risk Management (continued)

Fair value measurement (continued)

Transfers between levels are deemed to occur at the beginning of the year.

No investments were transferred between Level I and Level II during the year ended 31 December 2023 (2022: Nil). The valuation techniques used by the Company are explained in the accounting policies in note 2. There were no changes in valuation technique during the financial year. At 31 December 2023 and 31 December 2022, there was one security on the Federated Hermes Absolute Return Credit Fund classified at level 3 which is marked at nil.

Sensitivity analysis

Some limitations of sensitivity analysis are:

- markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

The portfolios as at 31 December 2023 were stress tested using a risk based model by applying a 20% movement to their benchmark (100bps for interest rate risk) to determine the percentage change disclosed below:

	Change (%)	Net Asset Value resulting from stress test	Per Share
Federated Hermes Global Emerging Markets Equity Fund			
Market Price test: Change MSCI Emerging Markets Bmk by 20%	(20.60%)	\$3,052,521,710	\$2.14
Currency test: Change GBP/USD FX rate by 20%	22.34%	\$4,703,425,027	\$3.30
Federated Hermes Global High Yield Credit Fund			
Equities down 10%	(3.03%)	€139,513,431	€1.85
Lehman Default	(9.22%)	€130,602,639	€1.74
Interest Rates +100bps	(1.99%)	€141,009,437	€1.87
Federated Hermes US SMID Equity Fund			
Market Price test: Decrease Russell 2500 Bmk by 20%	(17.19%)	\$598,761,404	\$2.83
Currency test: Change GBP/USD FX rate by 20%	22.48%	\$885,616,544	\$4.18
Federated Hermes Asia ex-Japan Equity Fund			
Market Price test: Decrease MSCI AC Asia ex Japan IMI Bmk by 20%	(20.71%)	\$2,623,651,512	\$3.03

Methodology for Calculating Global Exposure and Leverage

The sub-funds are required by the Prospectus to calculate their exposure to derivatives on a daily basis using one of two alternate methods, the Commitment Approach or Value at Risk (VaR). The table overleaf details the approach each sub-fund takes.

Sub-Fund Name	Approach
Federated Hermes Global Emerging Markets Equity Fund	Commitment Approach
Federated Hermes Global Equity Fund*	Commitment Approach
Federated Hermes Sustainable European Equity Fund**	Commitment Approach
Federated Hermes Global High Yield Credit Fund	Commitment Approach
Federated Hermes Sustainable Europe ex-UK Equity Fund**	Commitment Approach
Federated Hermes US SMID Equity Fund	Commitment Approach
Federated Hermes Asia ex-Japan Equity Fund	Commitment Approach
Federated Hermes Global Equity ESG Fund	Commitment Approach
Federated Hermes Multi-Strategy Credit Fund	VaR
Federated Hermes Global Small Cap Equity Fund	Commitment Approach
Federated Hermes Absolute Return Credit Fund	VaR
Federated Hermes SDG Engagement Equity Fund	Commitment Approach
Federated Hermes Impact Opportunities Equity Fund	Commitment Approach
Federated Hermes Unconstrained Credit Fund	VaR
Federated Hermes Global Emerging Markets SMID Equity Fund	Commitment Approach
Federated Hermes SDG Engagement High Yield Credit Fund	Commitment Approach
Federated Hermes US High Yield Credit Fund	Commitment Approach

* Federated Hermes Global Equity Fund was closed to further subscription on 23 November 2023 and is in the process of being terminated.

** Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription on 26 June 2023 and are in the process of being terminated.

Methodology for Calculating Global Exposure and Leverage (continued)

Sub-Fund Name	Approach
Federated Hermes Sustainable Global Equity Fund	Commitment Approach
Federated Hermes Climate Change High Yield Credit Fund	Commitment Approach
Federated Hermes Emerging Markets Debt Fund	Commitment Approach
Federated Hermes Biodiversity Equity Fund	Commitment Approach
Federated Hermes China Equity Fund	Commitment Approach
Federated Hermes Global Emerging Markets ex-China Equity Fund	Commitment Approach
Federated Hermes Sustainable Global Investment Grade Credit Fund*	Commitment Approach

* Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

The commitment conversion methodology for standard derivatives is the market value of the equivalent position in the underlying asset. This may be replaced by the notional value or the price of the futures contract where this is more conservative. Please refer to the relevant portfolio statements for the notional value of the futures contracts.

VaR is a method of estimating potential loss due to market risk, rather than a statement of leverage, using a given confidence level, or probability, over a specific time period and assuming normal market conditions. The VaR is calculated using a Historical Simulation model carried out in accordance with regulatory guidelines.

Value at Risk (VaR)

The table below provides an analysis of the VaR measures and leverage levels* for the Federated Hermes Absolute Return Credit Fund, the Federated Hermes Unconstrained Credit Fund and the Federated Hermes Multi-Strategy Credit Fund which are the only sub-funds to use the VaR approach.

Fund Risk Characteristics	Federated Hermes Absolute Return Credit Fund		Federated Hermes Unconstrained Credit Fund		Federated Hermes Multi-Strategy Credit Fund	
	2023	2022	2023	2022	2023	2022
	VaR as at the year end	0.17%	2.28%	1.18%	3.03%	0.92%
Lowest leverage level employed during the year	191.50%	144.30%	175.20%	158.70%	168.80%	119.30%
Highest leverage level employed during the year	247.60%	221.20%	195.90%	186.50%	200.30%	130.40%
Average leverage level employed during the year	235.30%	168.50%	188.50%	169.00%	189.10%	125.40%
Lowest VaR utilised during the year**	0.17%	0.78%	1.18%	1.78%	0.92%	1.60%
Highest VaR utilised during the year**	2.12%	2.88%	3.00%	4.80%	2.72%	4.61%
Average VaR utilised during the year**	1.57%	1.88%	2.44%	3.50%	2.04%	3.37%

VaR Parameters

	Value
VaR approach	Absolute
Simulation	Monte Carlo
Confidence	99%
Reporting time	1 month
Historical window	250 days
Fund type	Absolute Return

8. Financial Risk Management (continued)

Value at Risk (VaR) (continued)

Some limitations of this VaR analysis are listed below:

- The models are based on historical data and cannot take account of the fact that the future market price movements, correlation between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- The market price information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of the probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen); and
- Future market conditions could vary significantly from those experienced in the past.

* The leverage has been calculated using the sum of the notionals of the derivatives used.

** The VaR utilised during the year is based on the 20% absolute VaR limit.

Offsetting Financial Assets and Liabilities

The sub-funds enter into derivative transactions under International Swaps and Derivatives Association (ISDA) master agreements.

In general, under ISDA master agreements the amounts owed by each counterparty on a single day in respect of a single transaction outstanding in the same currency are aggregated into a single net amount that is payable by one party to the other. In certain circumstances – e.g. when a credit event such as a default occurs, all outstanding transactions (or certain transactions, specified as “Affected Transactions”) under the agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of such transactions.

ISDA master agreements can be amended to allow for multi-transactional, cross currency or cross product netting.

The above agreements do not meet the criteria for offsetting in the Balance Sheet. This is because the Company does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the counterparty or other credit events.

Federated Hermes Investment Funds Public Limited Company

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

10. Soft Commission Arrangements

There were no soft commission arrangements affecting the Company during the financial year ended 31 December 2023 or 31 December 2022.

11. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of redeemable participating shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; and
- (b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

12. Net Asset Value Per Redeemable Participating Share

The Net Asset Value per redeemable participating share of each sub-fund of the Company is determined by dividing the value of the net assets of the sub-fund by the total number of redeemable participating shares in issue.

13. Contingent liabilities and outstanding commitments

Contingent liabilities at the balance sheet date related to restricted cash held to settle any potential US Withholding tax liability per sub-fund. These are detailed in the table below. Please see note 3 for additional information on these Contingent Liabilities.

17. Efficient Portfolio Management

The Company may, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments relating to transferable securities and money market instruments, provided that such techniques and instruments are used for efficient portfolio management purposes. Such techniques and instruments may also, on behalf of each sub-fund, include foreign exchange transactions which alter the currency characteristics of transferable securities held by the Company. The Company may also, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities.

The actual techniques employed by the relevant sub-funds are as follows:

- Northern Trust hedging across all portfolios
- Currency Hedging within the credit portfolios
- Rates hedging within the credit portfolios
- Market exposure management within the credit portfolios (Options on Index and Index positions)

Realised gains and losses on financial instruments used for efficient portfolio management are included in the Income Statement.

18. Significant Events During The Financial Year

On 17 February 2023, the Federated Hermes Absolute Return Credit Fund Supplement was updated to clarify the use of Climate Change Impact ("CCI") scores during the investment process.

On 17 February 2023, the Federated Hermes Biodiversity Equity Fund Supplement was updated with exclusion increased from 5% to 10% for companies that receive revenues from alcohol distribution.

On 23 February 2023, the Federated Hermes US High Yield Credit Fund Supplement was updated with the Sustainable Finance Disclosure Regulation ("SFDR") disclosures.

On 20 March 2023, the Federated Hermes Sustainable Global Investment Grade Credit Fund was launched.

On 21 March 2023, the Class Y USD Accumulating Share class and the Class Y JPY Accumulating Hedged Share class of the Federated Hermes SDG Engagement High Yield Credit Fund were listed on Euronext Dublin.

18. Significant Events During The Financial Year (continued)

On 19 April 2023, the Federated Hermes Emerging Markets Debt Fund Supplement was updated to reflect changes to the sustainability indicators and the policy on assessing companies for good governance, as outlined in the SFDR disclosures.

On 24 May 2023, all of the SFDR Annex II disclosures were updated to include new data points detailing each sub-funds' exposure to environmentally sustainable economic activities in the Gas and Nuclear sectors, as defined under the EU Taxonomy Regulation.

On 26 May 2023, Mr. Jordan Patel was appointed as the deputy fund manager on the Federated Hermes Biodiversity Equity Fund.

On 2 June 2023, Ms. Kathryn Glass and Mr. Thomas Scherr were appointed as co-portfolio managers on the Federated Hermes US High Yield Credit Fund.

On 20 June 2023, a notice was sent out to inform shareholders in the Federated Hermes Climate Change High Yield Credit Fund of our intention to hold an EGM on 13 July 2023 to propose changes to the investment objective and benchmark.

On 26 June 2023, the Federated Hermes Sustainable European Equity Fund and the Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription and are in the process of being terminated. Final redemption day was on 26 June 2023.

On 13 July 2023, the resolution to change the investment objective and benchmark of the Federated Hermes Climate Change High Yield Credit Fund was approved by shareholders. The effective date of the changes was 1 November 2023, following the approval of the Central Bank.

On 18 October 2023, the Federated Hermes US High Yield Fund was reclassified as an Article 8 Fund for the purposes of SFDR and Mr. Mitch Reznick was appointed as a co-portfolio manager.

On 23 November 2023, the Federated Hermes Global Equity Fund was closed to further subscription and is in the process of being terminated. Final redemption day was on 23 November 2023.

On 5 December 2023, the Board of Directors approved the merger of the Federated Hermes Multi-Strategy Credit Fund into the Federated Hermes Unconstrained Credit Fund. EGM of shareholders scheduled for March 2024 to consider proposal.

With the imposition of additional sanctions during 2023, the military action being undertaken by Russia in Ukraine may impact on securities related to companies domiciled in Russia and/or listed on exchanges located in Russia, including the Moscow Exchange ("Russian securities"). The Directors are monitoring developments related to this military action, including current and potential future interventions of foreign governments and economic sanctions against Russia. As at 31 December 2023, Federated Hermes Emerging Markets Debt Fund held one Russian security with the market value of USD 7,206 (USD 16,085 as at 31 December 2022) and Federated Hermes Absolute Return Credit Fund held one Russian security with nil market value (nil as at 31 December 2022). None of the other sub-funds have any direct exposure to Russian securities at 31 December 2023.

There have been no other significant events during the financial year which may have had an impact on the Financial Statements for the financial year ended 31 December 2023.

19. Subsequent Events

On 1 January 2024, Mr. Patrick Wall was appointed as an Independent Non-Executive Director of the Board, Mr. Ronan Walsh resigned from his role as Independent Non-Executive Director and Chairman of the Board and Mr. Michael Boyce was appointed as Chairman of the Board.

The Board has approved the presentation currency of the Company being changed from Sterling to US Dollar.

On 1 March 2024, the investors in the Federated Hermes Multi-Strategy Credit Fund approved the merger into Federated Hermes Unconstrained Credit Fund. The effective date of the merger will be on or around 23 May 2024, subject to the approval of the Central Bank.

Federated Hermes Investment Funds Public Limited Company
Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

19. Subsequent Events (continued)

Up to the date of approval of these Financial Statements there have been no other significant events affecting the Company subsequent to the financial year end, which would impact on the Financial Statements for the financial year ended 31 December 2023.

20. Approval Of Financial Statements

The Financial Statements were approved by the Board of Directors on 18 April 2024 for filing with the Central Bank of Ireland and circulation to shareholders.

Federated Hermes Investment Funds Public Limited Company Unaudited Manager Remuneration Disclosure

Hermes Fund Managers Ireland Limited (“HF MIL”) is the appointed management company of Federated Hermes Investment Funds Plc (the “Company”) and has established a remuneration policy (the “Remuneration Policy”) in such capacity in accordance with the UCITS V Directive (“UCITS V”) and related guidance, including, in particular, the European Securities and Markets Authority (“ESMA”) Guidelines on sound remuneration policies under UCITS V Directive (ESMA/2016/575) (the “UCITS ESMA Guidelines”).

Remuneration

The Remuneration Committee of HF MIL has established a Remuneration Philosophy and policy, the purpose of which is to ensure that the remuneration arrangements of the “Identified Staff” (Board of Directors, Designated Persons and control functions and risk takers) are

- (i) consistent with and promote sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profile, rules or instruments of incorporation of the UCITS managers or the Company; and
- (ii) consistent with HF MIL’s business strategy, objectives, values and interests and includes measures to avoid conflicts of interest.

HF MIL complies with the UCITS remuneration principles in a way and to the extent that is appropriate to the size, internal organisation, nature, scope and complexity of the Company’s activities.

HF MIL has appointed Hermes Investment Managers Limited (“HIML”), a UK domiciled company regulated by the UK Financial Conduct Authority, and Federated Investment Counseling (“FIC”), a US domiciled company regulated by the US Securities and Exchange Commission, to act as investment managers of certain sub-funds of the Company. HF MIL has not paid remuneration to staff of any delegate to whom investment management functions have been delegated by HF MIL. Instead, the Company pays HF MIL a management fee as referred to in Note 5 to these financial statements and out of this fee HF MIL discharges the fees of the investment manager.

HF MIL’s Remuneration Policy is reviewed annually as required under Regulation 24B(1)(b)(c) and (d) of the UCITS Regulations and remains appropriate having regard to the nature, scale and complexity of the manager and its activities.

Sustainable Wealth Creation

HF MIL is committed to its business purpose of Sustainable Wealth Creation that enriches investors, society and the environment and being at the forefront of and developing industry best practice. Part of this is ensuring that its Remuneration Policy incorporates consideration of stewardship and the integration of sustainability performance and risk in both HF MIL’s investment activities and its wider operations. The Remuneration Policy is intended:

- To incentivise senior management to drive HF MIL’s strategy and initiatives in line with HF MIL’s business purpose of sustainable wealth creation and ensure that through appropriate stewardship HF MIL’s strategy and initiatives are at the heart of all the firm’s key business and operational processes.
- To promote best practice integration of Investor Stewardship and ESG (Environmental, Social and Governance) factors including the delivery of sustainable outcomes in the investment process and decision making.
- To provide HF MIL’s employees with performance objectives relating to responsibility as appropriate for their role.
- To ensure that sustainability risks are considered as part of HF MIL’s risk reporting and performance against risk appetite.

All employees are assessed against responsibility related objectives and behaviours in their annual performance assessment which informs annual bonus outcomes. This is supported by the co-investment of deferred bonuses in funds to align employees to longer term investment performance after the bonus has been awarded.

Federated Hermes Investment Funds Public Limited Company
Unaudited Manager Remuneration Disclosure (continued)

Employee remuneration disclosure

The table below provides an overview of aggregate total remuneration paid by HF MIL to all employees that support the Company.

Please note that due to the roles of HF MIL's staff, this remuneration is also in respect of the provision of services to other companies in Federated Hermes as well as other funds/separately managed accounts managed by HF MIL.

Remuneration and headcount includes 2023 Leavers.

	Headcount	Total Remuneration (£'000s)
Employees of HF MIL	24	
Total remuneration of employees of HF MIL		2,925
<i>of which</i>		
<i>Fixed remuneration</i>		2,043
<i>Variable remuneration</i>		882

Consistent with ESMA's Guidelines on sound remuneration policies under the UCITS Directive the information disclosed above is in a way and to the extent that it is appropriate to the size, internal organisation and the nature, scope and complexity of its activities of HF MIL.

Federated Hermes Investment Funds Public Limited Company Unaudited Securities Financing Transaction Regulation Disclosures

The Securities Financing Transaction Regulation (Regulation (EU) 2015/2365) (“SFTR”) came into effect on 12 January 2016. The aim of the SFTR is to improve the transparency of securities financing transactions (“SFTs”) in the shadow banking sector, giving regulators access to detailed information to enable them to monitor risks in that sector on an ongoing basis.

The SFTR divides SFTs into four categories:

- Repurchase transactions;
- Securities or commodities lending or borrowing transactions;
- Buy-sell back or sell-buy back transactions; and
- Margin lending transactions, which is defined broadly to capture any extension of credit ‘in connection with the purchase, sale, carrying or trading of securities’.

For the avoidance of doubt, the Company does not currently employ repurchase/reverse repurchase agreements and securities lending for the purposes of efficient portfolio management.

No sub-fund employed SFTs at the year end date of 31 December 2023.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Global Emerging Markets Equity Fund*

Legal entity identifier: *549300A5XPYJ4HEZ5K02*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.27% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the

environmental and social impacts of the products/services that the company provides through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were used in the period as an investment to gain access to a single investments and did contribute to the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Environmental Indicators:	Fund
GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	283686.86
Carbon Footprint (Scope 1 & 2+3 : tCO2eq/USDmn)	73.35
Fossil Fuels (% involved)	0.27
Non-Renewable Energy Consumption (%)	85.51
Water intensity (m3/\$mn revenue)	912.62
Waste intensity (tonnes/\$mn revenue)	4.03
Social Indicators:	Fund
UNGC Principles/OECD Guidelines Violations (% involved)	5.73*
Board Gender Diversity (% female)	21.83
Employee Turnover	No data available
Engagement Activity:	
Engagement Activity as a % of AUM (%)	78
Engagement progress (%)	47

*We have one name that is flagged by our 3rd party provider as being in violation in principle 2 (human rights) under the UNGCs. However, based on our engagement and analysis, we disagree with this conclusion. Tencent’s approach to data privacy and content moderation is driven by the Chinese authorities and it most likely has limited room to manoeuvre. It discloses information when its instructed to do so by a court authority or if compelled by the law. Citizens also voluntarily sign up to the use of Tencent services and its approach to disclosures are captured under its terms and conditions and disclosed to its users.

Source: Sustainalytics, EOS and Trucost.

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “**2022 Report**”) and this periodic report for the period ending 31 December 2023 (the “**2023 Report**”):

- For all Principal Adverse Impact Indicators (“**PAIIs**”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

- For all PALLs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs.

2022 Yr End Environmental Indicators	Fund	Benchmark
GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	161,233.94	1,599,351.45
Carbon Footprint (Scope 1 & 2+3 : tCO2eq)	77.89	743.36
Fossil Fuels (% involved)	1.12	8.89
Non-Renewable Energy Consumption (%)	86.21	87.28
Water intensity (m3/\$mn revenue)	869.20	22,642.80
Waste intensity (tonnes/\$mn revenue)	3.9	26.1

2022 Yr End Social Indicators	Fund	Benchmark
UNGC Principles/OECD Guidelines Violations (% involved)	5.041	8.64
Board Gender Diversity (% female)	17.1	14.91
Employee Turnover	No data available	N/A

2022 Yr End Engagement Activity	
Engagement Activity as a % of AUM	77%
Engagement progress (%)	54%

Source: Sustainalytics, EOS, and Trucost.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- Providing products or services that had a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As noted above, while there was no commitment to make EU Taxonomy-aligned investments, the Fund did have exposure to climate change mitigation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of sustainable investments where companies may have caused significant harm through the products and services that they offered, and through their entire value chain, included:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if a company had any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future.*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the company was not considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s ESG assessment (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the assessment.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment, or identified the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country of listing
<i>Samsung Electronic</i>	<i>Information Technology</i>	<i>9.17</i>	<i>Korea</i>
<i>Taiwan Semiconductor</i>	<i>Information Technology</i>	<i>8.81</i>	<i>Taiwan</i>

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

Sector	Weight
Information Technology	28.33
Financials	24.45
Consumer Discretionary	14.73
Industrials	10.02
Communication Services	5.74
Materials	5.22
Health Care	4.07

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Sector	Weight
Consumer Staples	3.00
Utilities	1.58
Energy	1.34
Real Estate	0.85

Source: Federated Hermes as at 31 December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 1.66% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 12.63% of the Fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 3.46%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invested 4.93% in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund invested 23.02% in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 0.68% in cash at the end of the period. Derivatives were used in the period as an investment to gain access to single investments. However, none of these are classified under "other".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager invested in high quality and efficient companies trading at attractive valuations, in global emerging markets, where conditions were supportive of growth. In selecting investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristics through the following processes:

ESG Integration: The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducted an assessment of a company's ESG characteristics based on a both quantified ESG metrics and through a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors included, but were not limited to, specific environmental characteristics (such as a company's carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as Board gender diversity and employee turnover). The ESG assessment favoured companies with reduced ESG risks and which complied with the Investment Manager's policy on good governance practices. The Investment Manager was able to invest in companies with poor ESG factors where the company had shown a desire to improve their ESG behaviours.

Engagement: The Investment Manager leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager was able to undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurred through meetings with company boards and management and through the exercise of voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company was not receptive to engagement on sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.

Exclusions: The Investment Manager did not invest in companies involved in specified activities where those activities contributed to company revenues above prescribed revenue thresholds. Excluded activities included Controversial Weapons, weapons for retail use, tobacco, unconventional fossil fuels and companies evaluated to be in contravention of the principles of the UN Global Compact.

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Global High Yield Credit Fund*

Legal entity identifier: *549300YIBH6MUAAPW881*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.34 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in issuers exhibiting the following characteristics:

- *reduced ESG risks;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

The ICE BofA Global High Yield Constrained index was designated as a reference benchmark for the purpose of attaining the above characteristics.

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation .

While derivatives were used within the Fund to manage exposures, they were not used for the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund
GHG Emissions (Scope 1 & 2: tCO2eq)	30259.76
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	192.91
Exposure to Fossil Fuels (% involved)	1.85
Energy Production from Non-Renewables (%)	31.96
Water Emissions (t/USDmn)	0
Hazardous Waste Ratio (t/USDmn)	2.09

Social Indicators

Indicator	Fund
Violation of UNGC (%)	0
Board Gender Diversity (% female)	33.60
Controversial weapons (% involved)	0

Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	80
Engagement progress (%)	45

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

% invested in excluded sectors

0

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr end Environmental Indicators:

Indicator	Fund	Benchmark	% Fund covered	% Benchmark covered
GHG Emissions (Scope 1 & 2: tCO2eq)	22667.11	4909.81	38.29	31.98
Carbon Footprint (Scope 1 & 2: tCO2eq)	318.73	152.86	38.29	31.98
Exposure to Fossil Fuels (% involved)	1.79	19.08	58.23	51.69
Energy Production from Non-Renewables	40.89	37.05	21.86	15.66
Water Emissions (t/EURm)	1.01	0.58	2.44	1.08
Hazardous Waste Ratio (t/EURm)	4.65	82.62	18.64	13.64

2022 yr end Social Indicators

2022 yr end Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	84
Engagement progress (%)	43
% invested in excluded sectors	0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers. Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As mentioned above, while there was no commitment to make EU Taxonomy-aligned investments, however, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager’s assessment of sustainable investments included identifying where issuers may have caused significant harm through the products and services that they offered, but also through their entire value chain. The assessment included:

- (i) taking into account all PAIs and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if an issuer had any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any issuer which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer had in place limit the amount of harm or that the issuer was being engaged on that topic.

Where an issuer was deemed to do significant harm to any sustainable objective, the investment in the issuer was not to be considered a sustainable investment.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager took into account all mandatory PAIs and used those indicators which were deemed relevant to the Fund in the Investment Manager’s proprietary ESG scoring model (the “ESG Scoring Model” – see further detail below), in order to determine current and potential

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and did not invest in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enabled the Investment Manager to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager elected to either not continue with the investment or identified the issuer as a candidate for engagement. With the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>Ball Corp</i>	<i>Capital Goods</i>	<i>1.86%</i>	<i>United States</i>
<i>Crown European</i>	<i>Capital Goods</i>	<i>1.72%</i>	<i>United States</i>
<i>IQVIA Inc</i>	<i>Healthcare</i>	<i>1.67%</i>	<i>United States</i>
<i>SIG</i>	<i>Capital Goods</i>	<i>1.46%</i>	<i>Switzerland</i>
<i>Goodyear</i>	<i>Automotive</i>	<i>1.45%</i>	<i>United States</i>
<i>Telecom Italia</i>	<i>Telecommunications</i>	<i>1.40%</i>	<i>Italy</i>
<i>Ford</i>	<i>Automotive</i>	<i>1.40%</i>	<i>United States</i>
<i>Telenet</i>	<i>Media</i>	<i>1.37%</i>	<i>Belgium</i>
<i>Berry Global</i>	<i>Capital Goods</i>	<i>1.32%</i>	<i>United States</i>

<i>Cellnex</i>	<i>Technology & Electronics</i>	<i>1.16%</i>	<i>Spain</i>

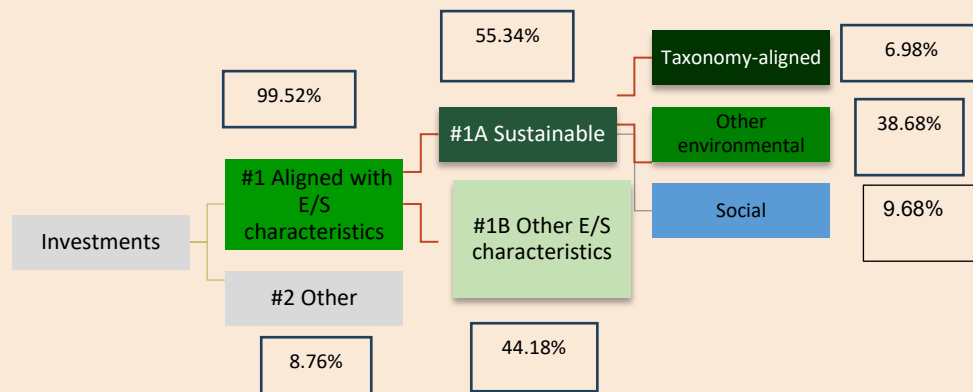

What was the proportion of sustainability-related investments?

- **What was the asset allocation?**

Source: Federated Hermes, as at end of December 2023. All exposures are expressed as a % of the AUM of the Fund. The total exposure doesn't equal to 100% as the Fund uses leverage. Please note that "Other" includes cash, sovereign and index exposures.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Investments were made in all Meryll Lynch (Level III) Sector groups: Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Leisure, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Weight
Automotive	7.56%
Banking	11.77%
Basic Industry	11.80%
Capital Goods	15.95%
Consumer Goods	1.61%
Energy	3.13%
Financial Services	3.36%
Healthcare	5.86%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sector	Weight
Insurance	1.76%
Leisure	0.00%
Media	4.02%
Real Estate	1.27%
Retail	5.30%
Services	2.17%
Technology & Electronics	4.69%
Telecommunications	12.13%
Transportation	0.70%
Utility	7.82%

Source: Federated Hermes as at 31st December 2023. Off benchmark sectors include: Cash, Index and Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum level of sustainable investments with an environmental objective aligned to the EU Taxonomy, 0.74 % of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 0.7% of the Fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 1.92%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.69% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

12.86% of the Fund was invested in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund held 8.76 % in “Other” at the end of the period. “Other” investments include cash, sovereign bonds and derivatives used for efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager used an active approach to seek risk-adjusted returns. This was achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings directed the team’s bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provided superior relative value. The Investment Manager further incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager achieved this by using its ESG Scoring Model to score a country or a company’s ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considered environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favoured issuers with low environmental and social risks and issuers which complied with the Investment Manager’s policy on good governance practices, outlined further below. As such, the Fund had a higher percentage of investments scoring 3 or lower. The Investment Manager could invest in issuers with a poor ESG score, where the issuer had shown a desire to improve its ESG behaviours. The Investment Manager did not invest in new issuers with an ESG score of 5 from the investment universe. These scores were not static and therefore could be downgraded. In circumstances where an issuer’s score was downgraded to a 5, the Investment Manager sought to disinvest.*

Engagement: *The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.*

Exclusions: *The Investment Manager did not invest in issuers involved in the production of Controversial Weapons.*

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

As above.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes US SMID Equity Fund*

Legal entity identifier: *5493000XIPS54YZE46T8*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.45% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Source: *Federated Hermes as at 31 December 2023.*

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- *Reduced ESG risks;*
- *A willingness to engage on any material ESG issues; and*
- *Limited to revenue generated from excluded sectors.*

No specific index was designated as a reference benchmark for the purpose of attaining the above characteristics.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs (for example SDG 6, clean water, and sanitation); or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the Climate Change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s environmental or social characteristics.

● How did the sustainability indicators perform?

Environmental Indicators:

Indicator	Metric	Fund
GHG Emissions	Total Scope 1+2 (tCO2eq)	22433.09
Carbon Footprint	Total Scope 1+2 (tCO2eq/USDm)	31.15
Exposure to Fossil Fuels	% involved	0
Energy Production from Non-Renewables	Non-Renewable Energy Production %	0
Water Intensity	m/\$mn revenue (direct)	1,641.10
Energy Consumption Intensity: Manufacturing	GWh/USDm	0.13
Energy Consumption Intensity: Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	GWh/USDm	0.12
Waste intensity	Tonnes/\$mn revenue (Landfill, Incinerated, Nuclear)	3.71

Social Indicators:

Indicator	Metric	Fund
Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises	(%)	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

Board Gender Diversity	(%)	33.53
Employee turnover (FY 2022)		23.1%

Sources: Sustainalytics, Trucost, Federated Hermes and Bloomberg

Engagement activity:

As a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS:

- Engagement as a % of AUM: 75%
- Engagement of objectives with progress: 26%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Metric	Fund	Benchmark
GHG Emissions	Total Scope 1+2 (tCO2eq)	10054.02	41944.76
Carbon Footprint	Total Scope 1+2 (tCO2eq/EURm)	23.72	95.16
Exposure to Fossil Fuels	% involved	0.00	5.59
Energy Production from Non-Renewables	Non-Renewable Energy Production %	0.00	23.32
Water Intensity	m/\$mn revenue (direct)	1.6k	7.1k
Energy Consumption Intensity: Manufacturing	GWh/EURm	0.14	1.59
Energy Consumption Intensity: Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	GWh/EURm	0.12	843.31
Waste intensity	Tonnes/\$mn revenue (Landfill, Incinerated, Nuclear)	3.1	7.0

2022 Yr End Social Indicators:

Indicator	Metric	Fund	Benchmark
Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises	(%)	0.00	0.13
Board Gender Diversity	(%)	32.10	28.58
Employee turnover (FY 2021)	(%)	22.74	21.29

Sources: Sustainalytics, Trucost, Federated Hermes and Bloomberg

2022 Yr End Engagement activity:

-
As a % of the AUM in the portfolio and as a % of progress made against the objective milestones set by the Investment Team and EOS:

- Engagement as a % of AUM: 86%
- Engagement of objectives with progress: 45%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs (for example SDG 6, clean water, and sanitation); or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g., Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As noted above, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- Taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary ESG scoring model (see further detail below) to identify if a company had any sustainability risks;
- Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- (iii) *Identification, through the use of third-party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future.*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector (for example, the Energy sector) that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the issuer was not considered a sustainable investment.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

All mandatory PALLs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s proprietary ESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager sought to identify any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors by evaluating the results from the ESG Scoring Model, as well as, the underlying principal adverse impacts on sustainability factors and other sustainability indicators used within the ESG Scoring Model.

The Investment Manager reviewed both the output and the inputs to the ESG Scoring Model to ensure that all relevant information was accurately captured, and that the portfolio was not exposed to any sustainability risks not otherwise identified by the outputs.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third-party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment or identified the company as a candidate for engagement to encourage companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 4.23% of the Fund's sustainable investments were EU Taxonomy-aligned during the reference period.

These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 3.10% of the Fund, weighted by revenue alignment, was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 1.26%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.83%.

What was the share of socially sustainable investments?

11.99%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The portfolio held 3.45% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager identified companies it believed would generate long-term capital appreciation. To achieve this, the Investment Manager identified high quality small and mid-capitalisation companies in US Markets, that traded at attractive valuations. In selecting the investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristic, through the following processes:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducted an assessment of the ESG characteristics of a company using its ESG Scoring Model which resulted in an ESG score being assigned to each company considered for investment. The score is measured on a scale of 0 to 30 and is comprised of a weighted combination of three distinct pillars: E & S factors, impact and governance. E&S factors include but were not limited to such metrics as carbon intensity (tonnes of scope 1 and 2 GHG per \$m revenue) along with employee turnover rates and accident rates and employee pay. Impact was measured by the proportion of revenue derived from positively impactful products and services, while governance factors included but were not limited to board independence, diversity and executive compensation and adherence with the Investment Manager’s policy on good governance practices, outlined further below. The aggregate weighted score needed to be at least 18 out of 30 to be immediately eligible for investment. The assessment resulted in promotion of companies with reduced sustainability risks. Where a company scored below the threshold they were only be considered for investment if they had shown a desire to improve their ESG practices and/or a willingness to engage on those identified lagging ESG practices.*

All investments in the portfolio went through the above process

Engagement: *The Investment Manager leveraged quantitative and qualitative engagement insights generated by its own research and from EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager could undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurred through meetings with company boards and management and through exercising voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. The engagement activity of the Fund was measured by the percentage of engagement progress (e.g., the percentage of engagement objectives which have achieved engagement objective milestones) and the effectiveness measured by monitoring changes over a rolling 3-year basis, in the specific sustainability indicators relevant to that engagement objective (for example a company’s carbon intensity). Where a company was not receptive to engagement on sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.*

Engagement stats as at December 2023

- **Engagement as a % of AUM: 76%**
- **% of AUM engaged by Theme**
 - **Governance: 17%**
 - **Social and Ethical: 50%**
 - **Strategy, Risk and Communication: 13%**

- **Environmental: 20%**
- **Engagement Objectives Progress by Theme**
 - **Strategy, Risk and Communication: 12%**
 - **Governance: 15%**
 - **Environmental: 38%**
 - **Social and Ethical: 35%**
- **Engagement Objectives Progress: 34%**

Engagement example: Equifax

This consumer credit reporting agency was the most engaged holding in the region during the period with eight engagement actions.

Our engagement focus with Equifax is centred on their ability to support greater access to credit among the c50m US consumers who are invisible to the credit rating agencies or currently unscorable. On this matter the company has made real progress. Three products geared towards expanding access to credit were launched in 2023. The company feels they are well placed to provide solutions which will address 20-30% of the current unscorable US consumer population.

Mortgage 36 – launched in early 2023 – provides alternative data alongside traditional credit data to mortgage lenders.

OneScore – is the first single score to combine traditional credit history with telecommunications, pay TV and utility payment data on over 191 million consumers, as well as Equifax’s specialty finance data on 80m consumers. The score is able to score 21% of the currently unscorable US population and move 15% of those currently subprime consumers to near prime or prime.

Insight Score for Auto – launched in November 2023. This product uses telecommunications, pay TV and utility history data alongside traditional credit history and should enable 16% of the currently unscorable to be scored.

During this year, we also had extensive engagement with the company on governance matters. Of concern was a \$25m one-off “compensatory” award granted to the CEO last year alongside 30-40% increases in pay for other senior executives. We conveyed our opposition and voted against the resolution at the company’s AGM. This resolution ultimately received opposition from a majority of shareholders. In further discussions with the company later in the year, we welcomed commitments from the board to not make further one-time equity awards and to provide additional disclosures in future. We also encouraged the board again to consider the merits of including a financial inclusion and employee engagement metric within the CEO’s annual bonus scorecard.

Exclusions: The Investment Manager did not invest in companies in specified activities where those activities contributed to company revenues above prescribed revenue thresholds (see below for further details information). Excluded activities include fossil fuels, controversial weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the UN Global Compact.

The Investment Manager excluded investments in companies involved in the following activities (based in information available to the Investment Manager on these companies);

- ***Companies that generated over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;***
- ***Companies that generated revenue from the production of Controversial Weapons (which includes anti-personnel mines, cluster munitions, depleted uranium, nuclear weapons, white phosphorous and chemical & biological weapons) and companies that generate over 5% of their revenues from production of conventional weapons;***

- *Companies that generated over 5% of their revenues from nuclear power;*
- *Companies that generated revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;*
- *Companies that generated over 5% of their revenues from gambling products;*
- *Companies that generated over 5% of their revenues from adult entertainment products;*
- *Companies that generated over 5% of their revenues from GMO crop production; or*
- *Companies that are in contravention of the principles of the UN Global Compact*

The Fund did not invest in any companies that violated or breached the exclusions list

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***
Not applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Asia ex-Japan Equity Fund*

Legal entity identifier: *549300052N1BDU0KK492*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- potential for improvement to ESG factors; and/or
- a willingness to engage on any material ESG issues; and/or
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental Indicators:	Fund
<i>GHG Emissions (Total Scope 1 + 2+3 (tCO2eq)</i>	1712060.87 tCO2eq
<i>Carbon Footprint (Scope 1 & 2+3 : tCO2eq/USDmn)</i>	523.51 tCO2eq/USDmn
Social Indicators:	
<i>Violation of UNGC principles 4 & 5</i>	0%
Engagement Activity :	
<i>Engagement Activity as a % of AUM:</i>	76%
<i>Engagement progress: (%)</i>	47%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators

<i>GHG Emissions (Total Scope 1 + 2+3 (tCO2eq)</i>	803,218.58
<i>Carbon Footprint (Scope 1 & 2+3 : tCO2eq)</i>	507.39

2022 Yr End Social Indicators

<i>Violation of UNGC principles 4 & 5</i>	0%
---	----

2022 yr end Engagement Activity

<i>Engagement Activity as a % of AUM</i>	72%
<i>Engagement progress</i>	51%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the assessment.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment, or identified the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country of listing</i>
<i>Samsung Electronic</i>	<i>Information Technology</i>	<i>8.92</i>	<i>Korea</i>
<i>Alibaba Group</i>	<i>Consumer Discretionary</i>	<i>4.55</i>	<i>China</i>
<i>Baidu</i>	<i>Communication Services</i>	<i>4.35</i>	<i>China</i>
<i>Samsung Fire & Marine</i>	<i>Financials</i>	<i>3.85</i>	<i>Korea</i>
<i>Swatch Group</i>	<i>Consumer Discretionary</i>	<i>3.39</i>	<i>Switzerland</i>
<i>Kb Financial</i>	<i>Financials</i>	<i>3.37</i>	<i>Korea</i>

<i>Haier Smart Home</i>	<i>Consumer Discretionary</i>	<i>1.8</i>	<i>China</i>

Source: Federated Hermes as at 31 December 2023

What was the proportion of sustainability-related investments?

- **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	% of Assets
Consumer Discretionary	24.76
Information Technology	20.84
Financials	15.51
Communication Services	9.47
Consumer Staples	7.41
Materials	6.5
Utilities	4.77
Industrials	4.6
Health Care	1.88
Energy	1.77
Real Estate	1.18

Source: Federated Hermes as at 31 December 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – the Fund did not make sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 1.31% in cash at the end of the period.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager followed a bottom-up stock selection process and a contrarian investment style that sought exposure to companies from emerging and developed markets in Asia excluding Japan that were attractively priced relative to their quality. In selecting investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Improvers: *The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. The assessment included quantitative analysis overlaid by qualitative assessment that incorporated any nuanced considerations obtained through engagement with the company. The ESG factors included, but were not limited to, specific environmental characteristics (such as a company’s carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as employee satisfaction and turnover). The ESG assessment sought to identify companies that might have had ESG deficiencies but which had shown the potential and/or desire to improve their ESG behaviours, through identified management goals, provided the companies could evidence good governance practices in accordance with the Investment Manager’s policy on good governance. This could be further supported via engagement with the company or where the company was subject to related advocacy with relevant government bodies and/or regulators.*

Engagement: *The Investment Manager leveraged quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with certain companies to address those risks. Engagement was conducted in the context of the company’s sector and regional policy, where corporate governance standards and social safeguards could differ to international expectations in developed markets. Engagement occurred through meetings with company boards and management and through the exercise of voting rights. The Investment Manager also engaged in advocacy with government, regulators and governance associations. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach will be implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company was not receptive to engagement on material ESG risks, or made insufficient progress in addressing them over time, it could have resulted in divestment of that company.*

Exclusions: The Investment Manager did not invest in companies involved in specified activities where those activities contributed to company revenues above prescribed revenue thresholds (Excluded activities included Controversial Weapons, conventional weapons, tobacco, thermal coal and adult entertainment.

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Global Equity ESG Fund*

Legal entity identifier: *549300T139RZTOV6TX05*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.42% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Source: *Federated Hermes as at 31 December 2023.*

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- *favourable or improving ESG characteristics;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

The MSCI All Country World index was designated as a reference benchmark for the purpose of attaining the above characteristics.

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs; or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s environmental or social characteristics.

● How did the sustainability indicators perform?

Environmental Indicators:

Indicator	Fund	Benchmark
GHG Emissions (Scope 1 & 2: tCO ₂ eq)	72,679.46	133,485.92
Carbon Footprint (Scope 1 & 2: tCO ₂ eq/USDmn)	31.09	57.11
Exposure to Fossil Fuels (% involved)	5.07	8.73
Energy Production from Non-Renewables (%) ¹	21.74	20.83
Water Emissions (t/USDmn) ²	0	0
Hazardous Waste Ratio (t/USDmn)	1.07	4.78

Social Indicators:

Indicator	Fund	Benchmark
Violation of UNGC (%)	0	1.38
Board Gender Diversity (% of female)	34.31	32.98
Controversial weapons (% involved)	0	1.82

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagement activity and % Investment in excluded sectors:

Indicator	Fund
Engagement Activity as a % of AUM*	88%
Engagement objectives progress** (%)	41%
% invested in excluded sectors	0%

*The percentage of asset under management within a fund that is engaged with.

** The percentage of engagement objectives where progress has been made

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

¹ Our approach, seeks companies with good or improving ESG characteristics, which we identify via our proprietary QESG Score. The Fund is tilted towards companies with a higher QESG Score and this is typically reflected in the how the Fund’s PAI metrics compare to the Index. However, the Fund has a marginally higher Energy Production from Renewable Energy than the benchmark.

² Data coverage of the Water emissions metric is very low for both the Fund and the benchmark.

2022 Yr End Environmental Indicators:

Indicator	Fund	Benchmark
GHG Emissions (Scope 1 & 2: tCO2eq)	59,954.33	103,035.66
Carbon Footprint (Scope 1 & 2: tCO2eq)	34.40	63.73
Exposure to Fossil Fuels (% involved)	6.02	10.08
Energy Production from Non-Renewables	21.37	19.80
Water Emissions (t/EURm)	0.70	1.03
Hazardous Waste Ratio (t/EURm)	0.72	19.38

2022 Yr End Social Indicators:

<i>Indicator</i>	<i>Fund</i>	<i>Benchmark</i>
<i>Violation of UNGC & OECD Guidelines for Multinational Enterprises</i>	<i>0.00</i>	<i>1.78</i>
<i>Board Gender Diversity</i>	<i>32.31</i>	<i>31.08</i>

2022 Yr End Engagement activity and % Investment in excluded sectors:

<i>Indicator</i>	<i>Fund</i>
<i>Engagement Activity as a % of AUM*</i>	<i>87</i>
<i>Engagement objectives progress**</i>	<i>46</i>
<i>% invested in excluded sectors</i>	<i>0</i>

**The percentage of asset under management within a fund that is engaged with.*

*** The percentage of engagement objectives where progress has been made*

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs (for example SDG 6, clean water and sanitation); or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigate impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;*

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.*

As noted above, while there was no commitment to make EU Taxonomy-aligned investments, the Fund did have exposure to climate change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- (i) Taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary QESG scoring model (the “QESG Scoring Model” – see further detail below) to identify if a company had any sustainability risks;
- (ii) Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) Identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future .

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector (for example, the Energy sector) that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the issuer was not considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s proprietary QESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies that were deemed to do significant harm.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager sought to identify any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors by evaluating the results from the QESG Scoring Model, as well as, the underlying principal adverse impacts on sustainability factors and other sustainability indicators used within the QESG Scoring Model.

The Investment Manager reviewed both the output and the inputs to the QESG Scoring Model to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the outputs.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment, or identified the company as a candidate for engagement to encourage companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>Microsoft</i>	<i>Information Technology</i>	<i>5.27</i>	<i>United States</i>
<i>Apple</i>	<i>Information Technology</i>	<i>3.90</i>	<i>United States</i>
<i>Amazon</i>	<i>Consumer Discretionary</i>	<i>2.76</i>	<i>United States</i>

<i>Abbott Labs</i>	<i>Health Care</i>	<i>1.62</i>	<i>United States</i>

What was the proportion of sustainability-related investments?

● What was the asset allocation?

#1 Aligned with E/S characteristics included the investments of the Fund used to attain the environmental or social characteristics promoted by the Fund.

#2 Other included the remaining investments of the Fund which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sector	Weight
Communication Services	7.06
Consumer Discretionary	11.73
Consumer Staples	5.61
Energy	2.66
Financials	14.64
Health Care	13.51
Industrials	10.61
Information Technology	24.60

Sector	Weight
Materials	3.67
Real Estate	3.91
Utilities	1.23

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 2.12% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 5.53% of the Fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 2.5%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund committed to a minimum of 15% in sustainable investments, but due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 6% of the investments underlying this Fund would be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

As of the end of December 2023, 6.3% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund committed to a minimum of 6% in sustainable investments with a social objective. As of the end of December 2023, 11.5 % of the Fund was invested in socially sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund held 0.8% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager used a disciplined bottom up stock selection process that incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following process:

Positive ESG Tilt: *The Investment Manager invested in companies with favourable or improving sustainability Indicators. To achieve this the Investment Manager utilised its QESG Scoring Model which considered environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). The QESG Scoring Model rated companies on a low to high scale of 0 to 100. The QESG Scoring Model captured companies with good sustainability indicators but also where improvements to the sustainability indicators could be made. The QESG score allowed the Investment Manager to individually assess the environmental, social and governance scores relative to the benchmark and also to assess this on an aggregated basis considering all three scores. The Investment Manager did not invest in companies whose QESG score was in the lowest 20%.*

All portfolio holdings have been through the above process and, therefore, all investment decisions have incorporated E & S characteristics during the period.

Engagement: *The Investment Manager leveraged quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with companies to address those risks. Engagement occurred through meetings with management and the exercise of voting rights. Engagement sought develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement, the four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. When a company was not receptive to engagement on sustainability risks, or made insufficient progress in addressing them over time, the company’s QESG score was lowered, which could result in divestment from that company.*

88% of the portfolio (as a proportion of AUM) has been engaged with and progress has been seen on 41% of the engagement objectives. The proportion of AUM engaged on environmental and social issues and objectives was:

Environmental: 72%

Social: 78%

Please note that because we often have a variety of engagement objectives, covering environmental, social and governance issues, the proportion of AUM engaged on E & S issues will differ from the overall engagement figure.

An example where EOS engaged to promote social and environmental characteristics was with Panasonic. In the meeting we highlighted the complexity of Panasonic group structure, in which the listed holding company has a portfolio management role and its 127 subsidiaries in various sector and countries has autonomy in the day-to-day management.

We also asked about the supply chain management, especially because many of Panasonic’s subsidiaries use conflict minerals or inputs that may have been produced using child or forced labour. The company explained that it did a human rights risk assessment at all its subsidiaries and, in 38 of them, identified 96 issues, which

are included in the sustainability report. We were encouraged by the improved disclosure, but asked that in subsequent reports the company explains how each of the issues identified were dealt with. The company also said that it counts with over 15,000 direct suppliers, most of them in Japan and China. It requires each one to make a human rights self-assessment, including how they manage their suppliers. We said that we expect a risk-based approach where riskier tier 1 suppliers, and their supply chain, would be monitored by Panasonic through unannounced site visits. The company acknowledged the importance of transparency in its supply chain management and said it will discuss internally how to improve disclosure.

Exclusions: The Investment Manager did not invest in companies involved in the production of Controversial Weapons or those that are deemed to be in breach of the UN Global Compact.

The Fund has not invested in any companies that violated or breached the exclusions list.

Additionally, as part of the investment strategy, the Investment Manager assessed the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager’s proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager assessed, among other things, a company’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company was considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) met any one of the following criteria:

- the company’s corporate governance was in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the company’s corporate governance was determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer;
- or the Investment Manager and/or EOS was engaging with the company to address enhancements to the company’s governance practices, as further detailed in the section of the fund supplement annex titled “What investment strategy does this financial product follow?”
- or, (ii) when viewed collectively, were determined by the Investment Manager to adequately meet the criteria set forth above.

A company was presumed not to be following good governance practices if there were abuses of power or severe controversies involving the relevant company, which were not mitigated through subsequent demonstrative actions.

Further information on the Investment Manager’s good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

How did this financial product perform compared to the reference benchmark?

● **How does the reference benchmark differ from a broad market index?**

The reference benchmark does not differ from a broad market index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The MSCI All Country World index is a broad market index that does not take into account any ESG or Sustainability criteria. The reference benchmark is therefore not continuously aligned with the sustainable investment objective of the Fund.

● **How did this financial product perform compared with the reference benchmark?**

The Fund did not invest in companies in the reference benchmark whose QESG Score was in the lowest 20%, thus tilting the Fund towards those investments with higher QESG Scores - companies

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

exhibiting favourable or improving ESG characteristics. This is reflected in the fund’s exposure to the PAIs, detailed earlier, which typically compare favourably to the benchmark.

● ***How did this financial product perform compared with the broad market index?***

See answer to the previous question.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Multi-Strategy Credit Fund*

Legal entity identifier: : 5493003YC2GCCKGNU693

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.74 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in issuers exhibiting the following characteristics:

- *reduced ESG risks;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

The objective of the sustainable investments of the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation ..

Derivatives were used within the Fund to manage exposures, they were not used for the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund
GHG Emissions (Scope 1 & 2: tCO2eq)	42074.90
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	202.38
Exposure to Fossil Fuels (% involved)	2.83
Energy Production from Non-Renewables (%)	39.21
Water Emissions (t/USDm)	0
Hazardous Waste Ratio (t/USDm)	1.94

Social Indicators:

Indicator	Fund
Violation of UNGC	0 %
Board Gender Diversity	34.10 %
Controversial weapons	0 %

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagement activity and % Investment in excluded sectors:

Indicator	Fund
Engagement Activity as a % of AUM	79
Engagement progress (%)	41
% invested in excluded sectors	0

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Fund	Benchmark	% Fund covered
GHG Emissions (Scope 1 & 2: tCO2eq)	35182.7		41.47
Carbon Footprint (Scope 1 & 2: tCO2eq)	360.80		41.47
Exposure to Fossil Fuels (% involved)	0.87		65.97
Energy Production from Non-Renewables	47.36		25.15
Water Emissions (t/EURm)	3.18		2.78
Hazardous Waste Ratio (t/EURm)	6.78		20.71

2022 Yr End Social Indicators

Indicator	Fund	Benchmark	% Fund covered
Violation of UNGC	0		66.87
Board Gender Diversity	34.63		53.84
Controversial weapons	0		66.87

2022 Yr End Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	85
Engagement progress	43
% invested in excluded sectors	0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers. Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As mentioned above, while there was no commitment to make EU Taxonomy-aligned investments, however, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager’s assessment of sustainable investments included identifying where issuers may have caused significant harm through the products and services that they offered, but also through their entire value chain. The assessment included:

- (i) taking into account all PAIs and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if an issuer had any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any issuer which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

practices the issuer had in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer was deemed to do significant harm to any sustainable objective, the investment in the issuer was not to be considered a sustainable investment.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager took into account all mandatory principal adverse impact indicators and used those indicators which were deemed relevant to the Fund in the Investment Manager’s proprietary ESG scoring model (the “ESG Scoring Model” – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and did not invest in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enabled the Investment Manager to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager elected to either not continue with the investment or identified the issuer as a candidate for engagement with the aim of reducing underperformance

which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>CELLNEX TELECOM SA</i>	<i>Technology & Electronics</i>	<i>1.59</i>	<i>Spain</i>

What was the proportion of sustainability-related investments?

- *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

Source: Federated Hermes, as at end of December 2023. All exposures are expressed as a % of the AUM of the Fund. The total exposure doesn't equal to 100% as the Fund uses leverage. Please note that “Other” includes

cash, sovereign and index exposures.

● In which economic sectors were the investments made?

Investments were made in the following Meryll Lynch (Level III) Sector groups: Agency, Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Market Weight
Agency	0.08%
Automotive	5.97%
Banking	12.08%
Basic Industry	12.80%
Capital Goods	11.41%
Consumer Goods	2.30%
Energy	3.61%
Financial Services	4.60%
Healthcare	7.03%
Insurance	2.98%
Media	2.99%
Real Estate	0.11%
Retail	3.83%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sector	Market Weight
Services	1.00%
Technology & Electronics	3.05%
Telecommunications	12.68%
Transportation	0.94%
Utility	5.03%

Source: Federated Hermes as at 31st December 2023. Off benchmark sectors include: ABS, Cash, CLO, Index and Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum level of sustainable investments with an environmental objective aligned to the EU Taxonomy, 1.18% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 0.51% (ex sovereigns based on turnover) of the Fund weighted by revenue alignment was invested in such activities during the reference period

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 1.19%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

20.20% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy. This is based on the investment team’s investment philosophy and the outcomes of strategic and tactical asset allocation decisions.

What was the share of socially sustainable investments?

11.94% of the Fund was invested in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 0.39% in “Other” at the end of the period. “Other” investments include cash, futures and derivatives used for efficient portfolio management purposes, as well as sovereign bonds.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager used an active approach to seek risk-adjusted returns. This was achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings directed the team’s bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provided superior relative value. The Investment Manager further incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager achieved this by using its ESG Scoring Model to score a country or a company’s ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considered environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favoured issuers with low environmental and social risks and issuers which complied with the Investment Manager’s policy on good governance practices, outlined further below. As such, the Fund had a higher percentage of investments scoring 3 or lower. The Investment Manager could invest in issuers with a poor ESG score, where the issuer had shown a desire to improve its ESG behaviours. The Investment Manager did not invest in new issuers with an ESG score of 5 from the investment universe. These scores were not static and therefore could be downgraded. In circumstances where an issuer’s score was downgraded to a 5, the Investment Manager sought to disinvest.

Engagement: The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.

Exclusions: The Investment Manager did not invest in issuers involved in the production of Controversial Weapons.

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**
Not applicable as the Fund did not use a reference benchmark
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable as the Fund did not use a reference benchmark
- **How did this financial product perform compared with the reference benchmark?**
Not applicable as the Fund did not use a reference benchmark

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

Not applicable as the Fund did not use a reference benchmark

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Global Small Cap Equity Fund*

Legal entity identifier: *549300Z154S624IFBU03*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.18% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Source: *Federated Hermes as at 31 December 2023.*

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- *Reduced ESG risks;*
- *A willingness to engage on any material ESG issues; and*
- *Limited to revenue generated from excluded sectors.*

No specific index was designated as a reference benchmark for the purpose of attaining the above characteristics.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs (for example SDG 6, clean water, and sanitation); or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the Climate Change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Environmental Indicators:

Indicator	Metric	Fund
GHG Emissions	Total Scope 1+2	5500.69
	(tCO ₂ eq)	
Carbon Footprint	Total Scope 1+2	51.82
	(tCO ₂ eq/USDm)	
Exposure to Fossil Fuels	% involved	1.49
Energy Production from Non-Renewables	Non-Renewable Energy Production	4.36
	%	
Energy Consumption Intensity (GWH/USDm)	Agriculture, Forestry & Fishing	0
	Construction	0
	Electricity, Gas, Steam and Air Conditioning Supply	0
	Manufacturing	0.26
	Mining & Quarrying	1.02
	Real Estate Activities	0.16
	Transportation & Storage	1.78
	Water Supply, Sewerage, Waste	0.45

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Engagement as a % of AUM: 79
- Engagement of objectives with progress: 33

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

- For all PALLs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Metric	Fund	Benchmark
GHG Emissions	Total Scope 1+2 (tCO2eq)	2182.07	5197.30
Carbon Footprint	Total Scope 1+2 (tCO2eq/EURm)	47.41	105.45
Exposure to Fossil Fuels	% involved	1.35	5.39
Energy Production from Non-Renewables	Non-Renewable Energy Production %	0.00	19.89
	Agriculture, Forestry & Fishing	-	4.70
	Construction	-	0.40
	Electricity, Gas, Steam and Air Conditioning Supply	-	6.80

2022 Yr End Social Indicators

Indicator	Metric	Fund	Benchmark
Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises	(%)	0.00	0.10

Board Gender Diversity	(%)	32.69	28.36
Employee turnover (FY 2021)	(%)	16.17	16.38

Sources: Sustainalytics, Trucost, Federated Hermes and Bloomberg

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs (for example SDG 6, clean water, and sanitation); or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g., Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As noted above, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- Taking into account all PAIs and other relevant ESG indicators through the Investment Manager’s proprietary ESG scoring model (see further detail below) to identify if a company had any sustainability risks;
- Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- Identification, through the use of third-party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector (for example, the Energy sector) that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the issuer was not considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s proprietary ESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager sought to identify any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors by evaluating the results from the ESG Scoring Model, as well as, the underlying principal adverse impacts on sustainability factors and other sustainability indicators used within the ESG Scoring Model.

The Investment Manager reviewed both the output and the inputs to the ESG Scoring Model to ensure that all relevant information was accurately captured, and that the portfolio was not exposed to any sustainability risks not otherwise identified by the outputs.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third-party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment or identified the company as a candidate for engagement to encourage companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

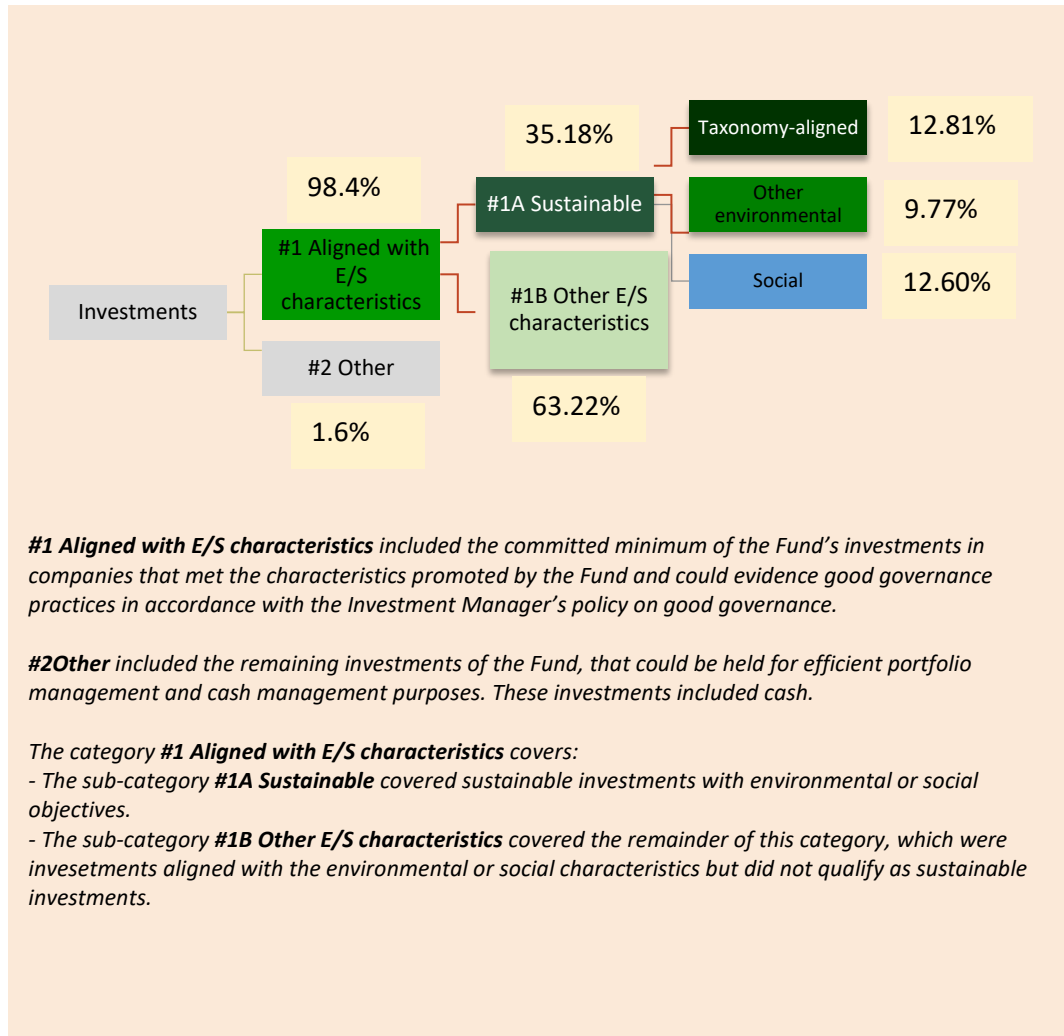

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>Altair Engineering</i>	<i>Information Technology</i>	<i>2.97</i>	<i>United States</i>
<i>Simpson Manufacturing</i>	<i>Industrials</i>	<i>2.95</i>	<i>United States</i>
<i>Brunswick</i>	<i>Consumer Discretionary</i>	<i>2.89</i>	<i>United States</i>

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Weight (%)
Communication Services	0.00
Consumer Discretionary	12.62
Consumer Staples	8.32
Energy	0.00
Financials	15.55

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sector	Weight (%)
Health Care	11.19
Industrials	22.42
Information Technology	10.93
Materials	11.83
Real Estate	5.51
Utilities	0.00

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 4.27% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 3.06% of the Fund, weighted by revenue alignment, was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 2.01%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.77%

What was the share of socially sustainable investments?

12.60%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 1.6% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager identified companies it believed would generate long-term capital appreciation. To achieve this, the Investment Manager identified high quality small and mid-capitalisation companies in US Markets, that traded at attractive valuations. In selecting the investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristic, through the following processes:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducted an assessment of the ESG characteristics of a company using its ESG Scoring Model which resulted in an ESG score being assigned to each company considered for investment. The score is measured on a scale of 0 to 30 and is comprised of a weighted combination of three distinct pillars: E & S factors, impact and governance. E&S factors include but were not limited to such metrics as carbon intensity (tonnes of scope 1 and 2 GHG per \$m revenue) along with employee turnover rates and accident rates and employee pay. Impact was measured by the proportion of revenue derived from positively impactful products and services, while governance factors included but were not limited to board independence, diversity and executive compensation and adherence with the Investment Manager’s policy on good governance practices, outlined further below. The aggregate weighted score needed to be at least 18 out of 30 to be immediately eligible for investment. The assessment resulted in promotion of companies with reduced sustainability risks. Where a company scored below the threshold they were only considered for investment if they had shown a desire to improve their ESG practices and/or a willingness to engage on those identified lagging ESG practices.*

All investments in the portfolio went through the above process

Engagement: *The Investment Manager leveraged quantitative and qualitative engagement insights generated by its own research and from EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager could undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurred through meetings with company boards and management and through exercising voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. The engagement activity of the Fund was measured by the percentage of engagement progress (e.g., the percentage of engagement objectives which have achieved engagement objective milestones) and the effectiveness measured by monitoring changes over a rolling 3-year basis, in the specific sustainability indicators relevant to that engagement objective (for example a company’s carbon intensity). Where a company was not receptive to engagement on sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.*

Engagement stats as at December 2023

- **Engagement as a % of AUM: 77.59%**
- **% of AUM engaged by Theme**
 - **Environmental: 28.26%**
 - **Social: 41.85%**
 - **Governance: 19.57%**

- **Strategy, Risk and Communication: 10.33%**
- **Engagement Objectives Progress by Theme**
 - **Environmental: 34.88%**
 - **Social: 30.23%**
 - **Governance: 25.58%**
 - **Strategy, Risk and Communication: 9.30%**
- **Engagement Objectives Progress : 37.39%**

Engagement example: Huhtamaki

During 2023 we had four engagement interactions with this Finnish consumer packaging companies.

Our engagement focus with Huhtamaki has for several years been focused primarily on the recyclability of their packaging propositions as well as touching on various other topics, spanning the pay and conditions of the workforce through to their operational emissions generation.

Having launched their sustainability strategy in 2020 which entailed several targets looking out to 2030 – including for carbon neutral production – it has been pleasing to observe the progress that has been made since. The company has delivered a 35% improvement in GHG intensity, 28% improvement in water intensity and 11% improvement in waste intensity over the period FY17-22.

The company is committed to designing all products to be recyclable, compostable or reusable by 2030. As of last year 72% of products met this criterion – up just 1pt yoy. Excitingly however, the company’s Smooth Molded Fiber technology saw big strides in 2023. Their fiber lids (for coffee cups) production is accelerating – they are producing 1bn units in 2023 and expect this to grow 10x by 2030.

Exclusions: *The Investment Manager did not invest in companies in specified activities where those activities contributed to company revenues above prescribed revenue thresholds (see below for further details information). Excluded activities include fossil fuels, controversial weapons, Conventional Weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the UN Global Compact.*

The Investment Manager excluded investments in companies involved in the following activities (based in information available to the Investment Manager on these companies);

- *Companies that generated over 5% of their revenues from the extraction or exploration of fossil fuels or from the use of fossil fuels for electricity generation;*
- *Companies that generated revenue from the production of Controversial Weapons (which includes anti-personnel mines, cluster munitions, depleted uranium, nuclear weapons, white phosphorous and chemical & biological weapons) and companies that generate over 5% of their revenues from production of conventional weapons;*
- *Companies that generated over 5% of their revenues from nuclear power;*
- *Companies that generated revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution;*
- *Companies that generated over 5% of their revenues from gambling products;*
- *Companies that generated over 5% of their revenues from adult entertainment products;*
- *Companies that generated over 5% of their revenues from GMO crop production; or*
- *Companies that are in contravention of the principles of the UN Global Compact*

The Fund has not invested in any companies that violated or breached the exclusions list

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Absolute Return Credit Fund* Legal entity identifier: *549300SL3ZGSZRKEVY73*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.78 % of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in issuers exhibiting the following characteristics:

- *reduced ESG risks;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics.

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the

environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation.

While derivatives were used within the Fund to manage exposures, they were not used for the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund
GHG Emissions (Scope 1 & 2: tCO2eq)	34564.55 tCO2eq
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	119.57 tCO2eq/USDmn
Exposure to Fossil Fuels (% involved)	1.61 %
Energy Production from Non-Renewables	30.49 %
Water Emissions (t/EURm)	0 t/EURm
Hazardous Waste Ratio (t/EURm)	1.24 t/EURm

Social Indicators

Indicator	Fund
Violation of UNGC	0 %
Board Gender Diversity	34.81 %
Controversial weapons	0 %

Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	78%
Engagement progress (%)	45%
% invested in excluded sectors	0%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Fund	% Fund covered
GHG Emissions (Scope 1 & 2: tCO2eq)	18002.19	45.3
Carbon Footprint (Scope 1 & 2: tCO2eq)	201.83	45.3
Exposure to Fossil Fuels (% involved)	1.91	71.43
Energy Production from Non-Renewables	21.65	31.52
Water Emissions (t/EURm)	0.53	3.00
Hazardous Waste Ratio (t/EURm)	2.78	24.88

2022 Yr End Social Indicators

Indicator	Fund	% Fund covered
Violation of UNGC	0	71.79
Board Gender Diversity	36.75	56.62
Controversial weapons	0	71.79

2022 Yr End Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	81
Engagement progress (%)	45
% invested in excluded sectors	0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers. Sustainable investments contributed via:

- Providing products or services that had a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As mentioned above, while there was no commitment to make EU Taxonomy-aligned investments, however, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager’s assessment of sustainable investments included identifying where issuers may have caused significant harm through the products and services that they offered, but also through their entire value chain. The assessment included:

- (i) taking into account all PALLs and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if an issuer had any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any issuer which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

practices the issuer had in place limit the amount of harm or that the issuer was being engaged on that topic.

Where an issuer was deemed to do significant harm to any sustainable objective, the investment in the issuer was not to be considered a sustainable investment.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager took into account all mandatory PAIs and used those indicators which were deemed relevant to the Fund in the Investment Manager’s proprietary ESG scoring model (the “ESG Scoring Model” – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and did not invest in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enabled the Investment Manager to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager elected to either not continue with the investment or identified the issuer as a candidate for engagement. With the aim of reducing

underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant principal adverse impact indicators are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>TELEFONICA EUROPE BV</i>	<i>Telecommunications</i>	<i>1.76</i>	<i>Spain</i>

What was the proportion of sustainability-related investments?

- *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

Source: Federated Hermes, as at end of December 2023. All exposures are expressed as a % of the AUM of the Fund. The total exposure doesn't equal to 100% as the Fund uses leverage. Please note that “Other” includes cash, sovereign and index exposures.

● In which economic sectors were the investments made?

Investments were made in all Meryll Lynch (Level III) Sector groups: Agency, Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Foreign Sovereign, Healthcare, Insurance, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Weight
Agency	0.33%
Automotive	7.27%
Banking	10.60%
Basic Industry	6.13%
Capital Goods	11.57%
Consumer Goods	1.90%
Energy	1.68%
Financial Services	3.93%
Foreign Sovereign	0.16%
Healthcare	5.96%
Insurance	4.04%
Media	2.37%
Real Estate	0.54%

Sector	Weight
Retail	7.70%
Services	1.27%
Technology & Electronics	5.90%
Telecommunications	16.87%
Transportation	0.77%
Utility	3.99%

Source: Federated Hermes as at 31st December 2023. Off benchmark sectors include: ABS, Cash, CLO, Index and Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum level of sustainable investments with an environmental objective aligned to the EU Taxonomy, 0.65% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 0.7% (ex sovereigns based on turnover) of the fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 1.19%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

17.93% of the Fund’s sustainable investments were invested in environmentally sustainable investments not aligned with the EU Taxonomy.

● **What was the share of socially sustainable investments?**

9.94% of the Fund’s sustainable investments were invested in socially sustainable investments.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund held –10.32% in “Other” at the end of the period. “Other” investments included cash, futures and derivatives used for efficient portfolio management purposes, as well as sovereign bonds.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager used an active approach to seek risk-adjusted returns. This was achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings directed the team’s bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provided superior relative value. The Investment Manager further incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager achieved this by using its ESG Scoring Model to score a country or a company’s ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considered environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favoured issuers with low environmental and social risks and issuers which complied with the Investment Manager’s policy on good governance practices, outlined further below. As such, the Fund had a higher percentage of investments scoring 3 or lower. The Investment Manager could invest in issuers with a poor ESG score, where the issuer had shown a desire to improve its ESG behaviours. The Investment Manager did not invest in new issuers with an ESG score of 5 from the investment universe. These scores were not static and therefore could be downgraded. In circumstances where an issuer’s score was downgraded to a 5, the Investment Manager sought to disinvest.

Engagement: The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.

Exclusions: The Investment Manager did not invest in issuers involved in the production of Controversial Weapons.

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**
Not applicable as the Fund did not use a reference benchmark
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable as the Fund did not use a reference benchmark
- **How did this financial product perform compared with the reference benchmark?**
Not applicable as the Fund did not use a reference benchmark
- **How did this financial product perform compared with the broad market index?**
Not applicable as the Fund did not use a reference benchmark

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes SDG Engagement Equity Fund*

Legal entity identifier: *213800QNC05K1J86UB22*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.54% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Source: *Federated Hermes as at 31 December 2023.*

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies that exhibited the following characteristics:

- *the potential to be receptive to, and benefit from, active corporate engagement that would be aligned and contributed to at least one or more of the United Nations’ Sustainable Development Goals (the “UN SDGs”); and*
- *limited to no revenue generated from excluded sectors*

No specific index was designated as a reference benchmark for the purpose of obtaining the above characteristics.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 UN SDGs; or (ii) contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The underlying investments in the Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s environmental or social characteristics

● **How did the sustainability indicators perform?**

The following sustainability indicators were used for the purpose of measuring the attainment of the environmental or social characteristics promoted by the Fund:

Environmental Indicators:

Indicator	Metric (Unit)	Fund
MWH renewable energy generated		56,825
Metric T CO2 avoided		14,274,908
M3 water saved		468,367,444
GHG Emissions (tCO2eq)	Scope 1	59566.85
	Scope 2	17899.06
	Scope 3	127588.35
	Total Scope 1+2	77465.91
	Total Scope 1+2+3	205054.25
Carbon Footprint (tCO2eq/USDm)	Total Scope 1+2	53.13
	Total Scope 1+2+3	140.63
GHG Intensity (tCO2eq/USDmn)	Total Scope 1+2	183.12
	Total Scope 1+2+3	349.69
Exposure to Fossil Fuels	(% involved)	0%
Energy Production from Non-Renewables	(%)	11.68
Energy Consumption Intensity (GWH/EURm)	Agriculture, Forestry & Fishing	0
	Construction	0.03

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

	Over 1 Year	Over 3 Years	Over 5 Years
Change in overall Glassdoor ratings for 3 years+ holdings	-1.7%	5.2%	11.6%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs.

2022 Yr End Environmental Indicators:

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments was either to: (i) further the attainment of one of the 17 UN SDGs (for example SDG 6, clean water, and sanitation); or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g., Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As noted above, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- (i) Taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary ESG scoring model (see further detail below) to identify if a company had any sustainability risks;
- (ii) Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) Identification, through the use of third-party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector (for example, the Energy sector) that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the issuer was not considered a sustainable investment.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s proprietary ESG Scoring Model (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager sought to identify any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors by evaluating the results from the ESG Scoring Model, as well as, the underlying principal adverse impacts on sustainability factors and other sustainability indicators used within the ESG Scoring Model.

The Investment Manager reviewed both the output and the inputs to the ESG Scoring Model to ensure that all relevant information was accurately captured, and that the portfolio was not exposed to any sustainability risks not otherwise identified by the outputs.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third-party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment or identified the company as a candidate for engagement to encourage companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

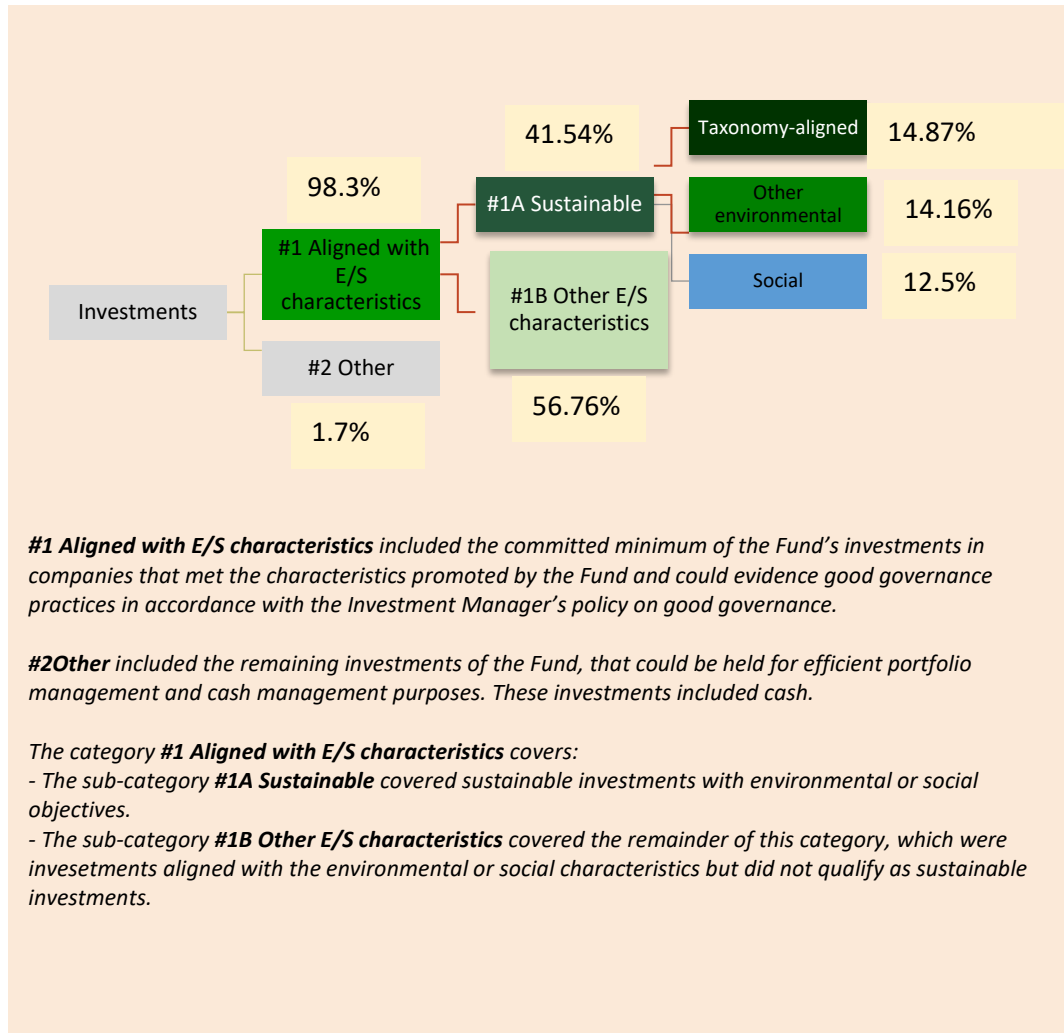

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>Brunswick</i>	<i>Consumer Discretionary</i>	<i>3.02</i>	<i>United States</i>

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Investments were made in the following GIC Sector groups: Communication Services, Consumer Discretionary, Consumer Staples, Financials, Health Care, Industrials, Information Technology, Materials, Real Estate and Utilities

Sector	Weight (%)
Communication Services	0.00
Consumer Discretionary	15.33
Consumer Staples	8.65
Financials	0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sector	Weight (%)
Health Care	11.86
Industrials	9.16
Information Technology	23.22
Materials	10.95
Real Estate	11.71
Utilities	5.58
Energy	1.80

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 3.79% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 2.61% of the Fund, weighted by revenue alignment, was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 1.43%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

14.16%.

What was the share of socially sustainable investments?

12.5%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 1.7% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager invested in companies that it believed would provide long term capital appreciation and that displayed the potential to be receptive to, and benefit from, active corporate engagement that was aligned to contribute to at least one of more of the UN SDGs. This was achieved by having regard to factors such as balance sheet quality, franchise value (i.e., brand strength and sustainability of the business model) and quality of management.

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducted an assessment of the ESG characteristics of a company using its ESG Scoring Model which resulted in an ESG score being assigned to each company considered for investment. The score was measured on a scale of 0 to 30 and was comprised of a weighted combination of three distinct pillars: E & S factors, impact and governance. E&S factors included but were not limited to such metrics as carbon intensity (tonnes of scope 1 and 2 GHG per \$m revenue) along with employee turnover rates and accident rates and employee pay. Impact was measured by the proportion of revenue derived from positively impactful products and services while governance factors included but were not limited to board independence, diversity and executive compensation and adherence with the Investment Manager’s policy on good governance practices, outlined further below. The aggregate weighted score needed to be at least 18 out of 30 to be immediately eligible for investment. The assessment resulted in promotion of companies with reduced sustainability risks. Where a company scored below the threshold they would only be considered for investment if they had shown a desire to improve their ESG practices and/or a willingness to engage on those identified lagging ESG practices.*

Engagement: *In addition to the fundamental financial indicator criteria, the engagement criteria that was used to identify such companies included, for example, an assessment of company management competence, integrity, vision, potential and willingness to enact the changes suggested by the Investment Manager following discussions between the Investment Manager and the company, in doing so enhancing the investees contribution to at least one or more of the UN SDGs. It was anticipated that by identifying solutions to meet specific UN SDGs, companies would be able to incrementally improve long-term financial returns and resilience by generating higher sales and better productivity by delivering, for example, improved health and educational outcomes for their employees and local community.*

Engagement activity included setting specific targets and timelines in relation to an engagement objective (these targets differed at an individual company level). As part of the thematic investment strategy of the Fund, UN SDG linked engagement objectives were identified for all investments. In addition, non-UN-SDG linked engagement also took place with companies to address sustainability and governance risks. The effectiveness of the engagement was measured by the change to the specific sustainability indicators related to that engagement.

Where a company made insufficient progress against the engagement objectives, it would have resulted in divestment from that company.

All portfolio holdings have been through the above process and, therefore, all portfolio holdings have undergone a sustainability analysis

Engagement details:

100% of the companies within the portfolio have been engaged with

37.11% of engagement objectives have had progress.

Engagement example: Techtronic Industries:

This Hong Kong listed power tools company was our most engaged holding during 2023 clocking up nine engagement actions. Indeed we were pleased to once again have the opportunity to go and visit their

innovation centre in Milwaukee where we spent the day with their concurrently long-serving management team.

Our engagement focus in the early years of the strategy was focused on their cobalt supply chain, however, the company responded positively and swiftly to establish a detailed and granular cobalt sourcing policy and process. As a result our focus pivoted towards their wider production processes and their ability to expand their remanufactured product offering.

This year the company was the subject of allegations of forced labour within its protective gloves supply chain which reached the attention of US congress in summer 2023. The company was able to confirm to us that both the company and its primary customer Home Depot investigated these allegations immediately. The company visited its supplier factories and tested the cotton in its products in order to identify the region of origination. Both the company and Home Depot reached the conclusion that the products which were the cause of the allegations were most likely counterfeit products. Nonetheless, the focus on this aspect of its supply chain has triggered the company to adopt a more prudent approach and it has in turn changed its supplier and shifted production out of China.

On the topic of product circularity, it is clear that their approach to enabling one battery to be used across multiple products in a range is avoiding unnecessary product obsolescence and waste generation. Nonetheless, with tens of millions of their products and batteries being sold our estimate (based on figures in their 2022 ARA) of 5-600k batteries recycled and products remanufactured per annum is a small percentage of that total. Positively, the vast majority of the battery packs on their tools is already recyclable and the company has confirmed that they expect the size of the remanufactured business to continue growing. Further engagement on this theme is expected through 2024 as the company also looks to establish targets for its scope 3 emissions.

Exclusions: *The Investment Manager did not make investment in companies involved in specific activities, where those activities contributed to company revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include, fossil fuels, electricity utilities not aligned with a 1.5-degree scenario, Controversial Weapons, conventional weapons, tobacco, gambling, and companies in contravention of the principles of the UN Global Compact.*

Exclusion details:

The Investment Manager did not invest in the following companies (based on information available to the Investment Manager on these companies:

- *companies that generated over 5% of their revenues from the extraction or exploration of fossil fuels.*
- *Electricity utility companies with a carbon intensity not aligned with a below 1.5 degrees scenario*
- *Companies that generated revenue from the production of Controversial Weapons (which includes anti-personnel mines, cluster munitions, depleted uranium, nuclear weapons, white phosphorus and chemical & biological weapons) and companies that generated over 5% of their revenues from production of conventional weapons*
- *Companies that generated revenues from the production of tobacco products and companies that receive over 5% of their revenues from tobacco distribution*
- *Companies that generated over 2% of their revenues from gambling products; and*
- *Companies that were in contravention of the principles of the UN Global Compact*

The Fund also complied with the exclusions set out by Febelfin.

The Fund has not invested in any companies that violate or breach the exclusions list

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Impact Opportunities Equity Fund*

Legal entity identifier: *213800KSESCSDJKBL382*

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 45.3%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 52.9%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

The figures above relate to the Fund as at 31 December 2023.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund was to invest in companies which would benefit from meeting the world’s environmental and social challenges.

The Fund targeted investment in global companies identified as contributing to one or more of nine environmental or social investment themes, which were aligned to the United Nations Sustainable Development Goals (UN SDGs):

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

- *Energy transition: Transforming the energy system to power a low-carbon economy*
- *Circular economy: Enhancing resource efficiency and waste reduction*
- *Water: Improving access to quality supply and preservation of the resource*
- *Health and wellbeing: Improving life expectancy and quality*
- *Education: Providing opportunities for all – irrespective of wealth, geographical location or ability*
- *Financial inclusion: Providing financial services to underserved populations*
- *Future mobility: Improving vehicle efficiency to increase low-carbon transportation*
- *Food security: Ensuring a sustainable food supply and productive farmlands for future generations*
- *Impact enablers: Providing crucial solutions and services to impactful companies directly involved in the various themes*

A reference benchmark was not used for the purposes of attaining the sustainable investment objective.

The Fund made sustainable investments in companies which contributed to the environmental objectives of Climate Change Mitigation and Climate Change Adaption as defined under the Taxonomy Regulation (EU) 2020/852. At the end of the period, the Fund had exposure to the Climate Change mitigation objective outlined by in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s sustainable investment objective.

● **How did the sustainability indicators perform?**

Please see below:

Environmental Indicators¹:

Indicator	Fund
Annualised Metric T CO2 emitted (Scope 1 & 2)	3,770
Metric T CO2 avoided	32,573
MW installed renewable capacity	27
MWH renewable energy generated,	39,222
M3 water used	102,615
M3 water saved	938,423
Metric T waste generated	794
Metric T waste recycled,	761
MT Food loss/waste avoided tons	23,062
Hectares forest or land restored or conserved	27

** The percentage of engagement objectives where progress has been made

% AUM contributing to the UN SDGs

98.2%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Fund
Annualised Metric T CO2 emitted (Scope 1 & 2)	4,746
Metric T CO2 avoided	38,058

96.2%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- (i) Taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager's sustainability assessment to identify if a company had any sustainability risks;*
- (ii) Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and*
- (iii) Identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future .*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the company was not considered a sustainable investment and so the Fund did not invest in such companies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager's sustainability assessment in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Fund to avoid investment in these companies.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified through a proprietary framework which considered the sustainability risks and opportunities for each company, and used the breadth and depth of the Investment Manager's engagement data to put this analysis in context.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified the company was identified as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

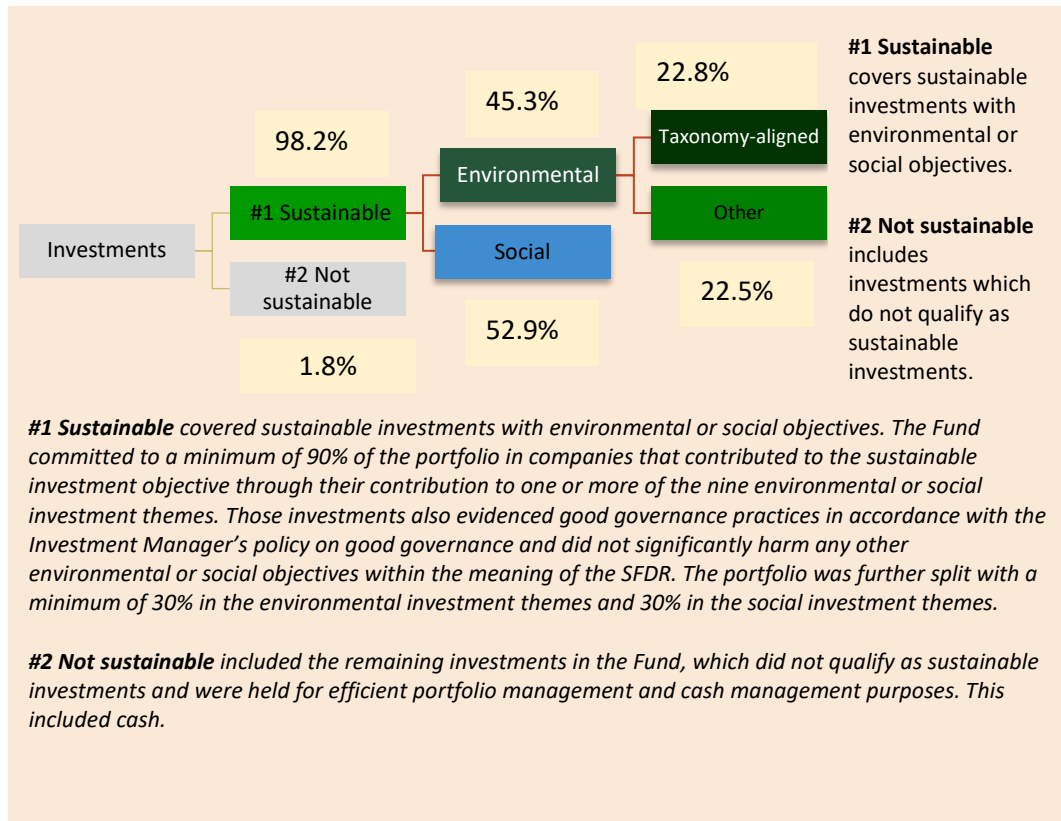

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>Novo Nordisk</i>	<i>Health Care</i>	<i>5.47</i>	<i>Denmark</i>

Materials	7.64
Real Estate	0.00
Utilities	0.77

Source: Federated Hermes as at 31 December 2022

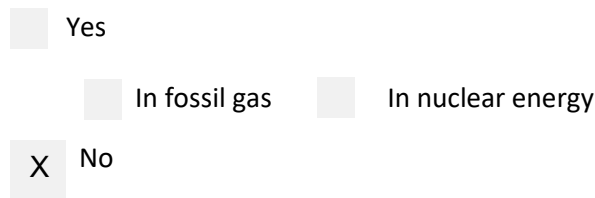

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund committed that a minimum of 2% of its investments would be aligned with the environmental objectives under the EU Taxonomy Regulation. At 31 December 2023, the proportion of Taxonomy-aligned investments was 5.44% of the Fund, weighted by revenue alignment. The figures below are the same regardless of whether we include or exclude sovereign bonds.

Please note that the current data we have covers climate change mitigation and not climate change adaptation. In addition, all of the data in the analysis is currently estimated. The main reason for this is that many companies had not reported on the EU Taxonomy. However, companies have now started to and early evidence suggests that the alignment figures have been underestimated.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund committed that a minimum of 1% of the Fund’s investments would be in transitional and enabling activities under the Taxonomy Regulation. As of 31 December 2023, the proportion of investments in Taxonomy-aligned transitional and enabling activities was 3.18% of the Fund, weighted by revenue alignment.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 5.2%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund committed to a minimum of 90% in sustainable investments, but due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund would be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

While the Fund invested 45.3% in environmentally sustainable investments, 22.5% was allocated to sustainable investments with an environmental objective that is not aligned with the EU taxonomy. The reduction of this allocation compared to 2022, is due to increased data coverage for sustainable investments with an environmental objective that is aligned with the EU taxonomy. The remaining 22.8% was allocated to companies that had any revenue alignment with the EU Taxonomy.

What was the share of socially sustainable investments?

We committed that a minimum of 30% of the Fund would be invested in sustainable investments with a social objective. As of the end of December 2023, 52.9% of the Fund was invested in socially sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund held 1.8% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The sustainable investment opportunity that the strategy addressed was the superior growth that can compound over time from identifying companies adopting innovative approaches to tackling issues facing society and whose growth is not solely driven by the normal economic cycle. In order to achieve the sustainable investment objective, the Fund targeted investment in global companies identified as contributing to one or

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

more of nine environmental or social investment themes, which are aligned to the United Nations Sustainable Development Goals (UN SDGs).

- *Energy transition: Transforming the energy system to power a low-carbon economy*
- *Circular economy: Enhancing resource efficiency and waste reduction*
- *Water: Improving access to quality supply and preservation of the resource*
- *Health and wellbeing: Improving life expectancy and quality*
- *Education: Providing opportunities for all – irrespective of wealth, geographical location or ability*
- *Financial inclusion: Providing financial services to underserved populations*
- *Future mobility: Improving vehicle efficiency to increase low-carbon transportation*
- *Food security: Ensuring a sustainable food supply and productive farmlands for future generations*
- *Impact enablers: Providing crucial solutions and services to impactful companies directly involved in the various themes*

The Investment Manager used a proprietary ‘Impact Database’ to analyse sustainable investments, and to determine which of the Fund’s themes (as mentioned above) an investment contributed to. The database drew on data from company, sector, and impact related industry reports. It provided theme specific KPI outputs including, but not limited to: number of new people with financial access (Financial Inclusion); -MWH renewable energy generated and Metric T CO2 avoided (Energy Efficiency) and M3 water saved (Water).

At a portfolio level, the Investment Manager could therefore measure what percentage of the Fund was contributing to each individual theme (and therefore SDG) to measure the attainment of the sustainable objectives.

The Investment Manager’s stock selection process comprised of three primary considerations:

- The Fundamentals of the business model: the Investment Manager sought to understand historic financial metrics and competitive dynamics and, in conjunction with the thematic framework, identify those who were capable of sustaining strong growth over the long-term. Alongside this, the Investment Manager sought to identify companies bringing value to society, rather than drawing from it.*
- ESG Metrics: the Investment Manager considered how well companies managed environmental, social and governance factors (including how companies limited their emissions, how they ensured product safety, how they managed diversity in the workforce and how their board was structured). When looking at the ESG profile of a company, consideration was given to key quantitative metrics such as corporate transparency, approach to materiality (being those ESG topics that could have meaningful financial consequences), and the effect of products and services on broader society.*
- Product Impact: involved a thematic analysis whereby the Investment Manager sought to understand the broader benefit or cost of each company. As well as looking at companies which “do no significant harm”, the Investment Manager also looked beyond this and, where appropriate, the portfolio actively targeted those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as (i) companies that avoided harm, (ii) companies that provided benefits to all stakeholders and (iii) companies that contributed to solutions. The belief is that following this thematic approach to idea generation and focus on companies which meet the ‘sustainable leader’ criteria facilitated the Fund’s goal to achieve superior long-term returns.*

All portfolio holdings have been through the above process and, therefore, all portfolio holdings have undergone a sustainability analysis.

Engagement: Where material ESG risks were identified, the Investment Manager worked either directly or with the in-house stewardship team, EOS to engage with companies to mitigate those risks and promote good practices. Engagement occurred through meetings with company boards & management and through exercising voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, specific targets and timelines were set in relation to that engagement, these targets differed at an individual company engagement level.

Where a company was not receptive to engagement on material ESG risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.

73% of the portfolio (as a proportion of AUM) has been engaged with and progress has been seen on 75% of engagement objectives. The proportion of AUM engaged on environmental and social issues and objectives is:

Environmental: 49%

Social:66%

Please note that because we often have a variety of engagement objectives, covering environmental, social and governance issues, the proportion of AUM engaged on E & S issues will differ from the overall engagement figure.

An example where EOS engaged to promote social and environmental characteristics was with Bank Rakyat Indonesia following the publication of its 2022 ESG report.

Scope 3 financed emissions are now disclosed, and a commitment was made to the Science Based Targets initiative (SBTi) in July 2023. This is a commitment to set near term and long-term targets in line with net zero by 2050 covering Scopes 1-3. The bank is working on its Scope 3 calculations and aims to submit targets for verification by SBTi in 2024. This is a very positive development and will put it in a leadership position for the region.

In addition, ESG loan requirements for the pulp and paper sector have been established and rolled out, following our previous engagements on this subject and includes Forest Stewardship Council certification.

Bank Rakyat continues to demonstrate leadership in the area of financial inclusion. It has started to track the ‘depth’ of financial inclusion as well as entry-level inclusion. The former is based on whether the customer has accessed a wider range of financial products, such as insurance and investment. It is also rolling out programmes around financial literacy and digital inclusion to complement its financial inclusion products. While welcoming this, we gave feedback that there is still a lack of clarity on its future strategy and ambition on financial inclusion and encouraged it to set targets as with climate. The bank asked us to share examples of good practice on this, which we will do.

We also sought an update on the bank’s cybersecurity activities, and what it is doing to strengthen this at the subsidiary level. It gave more colour on its programme, including the establishment of a central team to assess the security at the subsidiary level, to provide support and resources, and to monitor improvements. We welcomed these developments and will continue to monitor.

Exclusions: The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to company revenues above prescribed revenue thresholds. Excluded activities include fossil fuels, electricity utilities not aligned with a 2 degree scenario.

The Fund has not invested in any companies that violated or breached the exclusions list.

Additionally, as part of the investment strategy, the Investment Manager assessed the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager’s proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager assessed, among other things, a company’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company was considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) met any one of the following criteria:

- the company’s corporate governance was in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the company’s corporate governance was determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer;
- or the Investment Manager and/or EOS was engaging with the company to address enhancements to the company’s governance practices, as further detailed in the section of the fund supplement annex titled “What investment strategy does this financial product follow?”

- *or, (ii) when viewed collectively, were determined by the Investment Manager to adequately meet the criteria set forth above.*

A company was presumed not to be following good governance practices if there were abuses of power or severe controversies involving the relevant company, which were not mitigated through subsequent demonstrative actions.

Further information on the Investment Manager's good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

How did this financial product perform compared to the reference sustainable benchmark?

- ***How did the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Unconstrained Credit Fund*

Legal entity identifier: *213800HODS5PQAT7LD40*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.34% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in issuers exhibiting the following characteristics:

- *reduced ESG risks;*
- *a willingness to engage on any material ESG issues; and*
- *limited to no revenue generated from excluded sectors.*

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation .

While derivatives were used within the Fund to manage exposures, they were not used for the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund
GHG Emissions (Scope 1 & 2: tCO2eq)	202563.77
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	178.49
Exposure to Fossil Fuels (% involved)	2.65
Energy Production from Non-Renewables (%)	34.08
Water Emissions (t/USDm)	0
Hazardous Waste Ratio (t/USDm)	1.71

Social Indicators

Indicator	Fund
Violation of UNGC (%)	0
Board Gender Diversity (% female)	33.75
Controversial weapons (% involved)	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	78
Engagement progress (%)	43
% invested in excluded sectors	0

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Fund	% Fund covered
GHG Emissions (Scope 1 & 2: tCO2eq)	105999.56	41.47
Carbon Footprint (Scope 1 & 2: tCO2eq)	305.55	41.47
Exposure to Fossil Fuels (% involved)	2.75	65.97
Energy Production from Non-Renewables	37.62	25.15
Water Emissions (t/EURm)	0.67	2.78
Hazardous Waste Ratio (t/EURm)	3.48	20.71

2022 Yr End Social Indicators:

Indicator	Fund	% Fund covered
Violation of UNGC	0	66.87
Board Gender Diversity	34.20	53.84
Controversial weapons	0	66.87

2022 Yr end Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	83
Engagement progress (%)	44
% invested in excluded sectors	0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers. Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As mentioned above, while there was no commitment to make EU Taxonomy-aligned investments, however, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager’s assessment of sustainable investments included identifying where issuers may have caused significant harm through the products and services that they offered, but also through their entire value chain. The assessment included:

- (i) taking into account all PALLs and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if an issuer had any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any issuer which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer had in place limit the amount of harm or that the issuer was being engaged on that topic.

Where an issuer was deemed to do significant harm to any sustainable objective, the investment in the issuer was not to be considered a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- — How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager took into account all mandatory principal adverse impact indicators and used those indicators which were deemed relevant to the Fund in the Investment Manager’s proprietary ESG scoring model (the “ESG Scoring Model” – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

- — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and did not invest in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors by: (i) evaluating the results from the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impact and other sustainability indicators used as part of the ESG Scoring Model. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enabled the Investment Manager to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the ESG Scoring Model. The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager elected to either not continue with the investment or identified the issuer as a candidate for engagement with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
TELECOM ITALIA SPA	Telecommunications	1.20	Italy
CROWN EURO HOLDINGS SA	Telecommunications	1.08	United States
FORD MOTOR CREDIT CO LLC	Automotive	1.06	United States
VIRGIN MEDIA	Telecommunications	1.05	United Kingdom
IQVIA INC	Healthcare	1.03	United States
VODAFONE ZIGGO	Telecommunications	1.03	Netherlands
BALL CORP	Capital Goods	1.02	United States
KONINKLIJKE KPN NV	Telecommunications	0.98	Netherlands
MONDI FINANCE PLC	Basic Industry	0.93	Austria
TELEFONICA EUROPE BV	Telecommunications	0.91	Spain
ALLY FINANCIAL INC	Financial Services	0.90	United States
SILGAN HOLDINGS INC	Capital Goods	0.89	United States
ANGLO AMERICAN CAPITAL	Basic Industry	0.89	South Africa
SEALED AIR CORP	Capital Goods	0.89	United States
BERRY GLOBAL INC	Capital Goods	0.87	United States

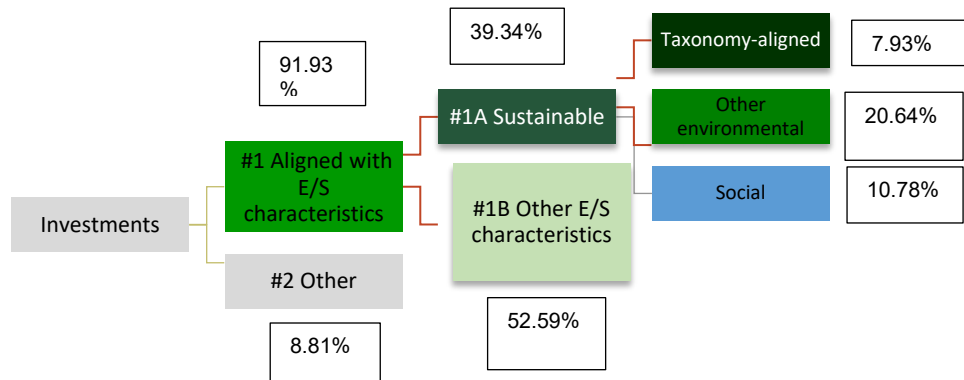

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

Source: Federated Hermes, as at end of December 2023. All exposures are expressed as a % of the AUM of the Fund. The total exposure doesn't equal to 100% as the Fund uses leverage. Please note that "Other" includes cash, index and sovereign exposures.

● **In which economic sectors were the investments made?**

Investments were made in the following Meryll Lynch (Level III) Sector groups: Agency, Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Weight
Agency	0.34%
Automotive	6.19%
Banking	11.44%
Basic Industry	12.07%
Capital Goods	10.44%
Consumer Goods	1.76%
Energy	2.81%
Financial Services	4.52%
Healthcare	6.04%
Insurance	3.69%
Media	2.49%
Real Estate	0.82%
Retail	4.67%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sector	Weight
Services	1.29%
Technology & Electronics	4.16%
Telecommunications	12.81%
Transportation	0.59%
Utility	5.81%

Source: Federated Hermes as at 31st December 2023. Off benchmark sectors include: ABS, Cash, CLO, Index and Sovereign.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum level of sustainable investments with an environmental objective aligned to the EU Taxonomy, 1.02% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 0.65% (ex sovereigns based on turnover) of the fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 2.03%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

20.64% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

10.78% of the Fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 8.81% in "Other" at the end of the period. "Other" investments included cash, futures and derivatives used for efficient portfolio management purposes, as well as sovereign bonds.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager used an active approach to seek risk-adjusted returns. This was achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings directed the team's bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provided superior relative value. The Investment Manager further incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager achieved this by using its ESG Scoring Model to score a country or a company's ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considered environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favoured issuers with low environmental and social risks and issuers which complied with the Investment Manager's policy on good governance practices, outlined further below. As such, the Fund had a higher percentage of investments scoring 3 or lower. The Investment Manager could invest in issuers with a poor ESG score, where the issuer had shown a desire to improve its ESG behaviours. The Investment Manager did not invest in new issuers with an ESG score of 5 from the investment universe. These scores were not static and therefore could be downgraded. In circumstances where an issuer's score was downgraded to a 5, the Investment Manager sought to disinvest.*

Engagement: *The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.*

Exclusions: *The Investment Manager did not invest in issuers involved in the production of Controversial Weapons.*

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**

Not applicable as the Fund did not use a reference benchmark

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable as the Fund did not use a reference benchmark

● **How did this financial product perform compared with the reference benchmark?**

Not applicable as the Fund did not use a reference benchmark

● **How did this financial product perform compared with the broad market index?**

Not applicable as the Fund did not use a reference benchmark

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Global Emerging Markets SMID Equity Fund*

Legal entity identifier: 213800GMQKIA91NSV588

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 35.44% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

The objective of the sustainable investments made by the Fund was either to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes

which mitigate impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were used in the period as an investment to gain access to a single investments and did contribute to the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Environmental Indicators:	Fund
GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	16749.09
Carbon Footprint (Scope 1 & 2+3 : tCO2eq/USDmn)	95.26
Fossil Fuels (% involved)	No data available
Non-Renewable Energy Consumption (%)	89.19
Water intensity (m3/\$mn revenue)	6,574.47
Waste intensity (tonnes/\$mn revenue)	5.43
Social Indicators:	Fund
UNGC Principles/OECD Guidelines Violations (% involved)	0
Board Gender Diversity (% female)	19.15
Employee Turnover	No data available
Engagement activity:	
Engagement Activity as a % of AUM	56%
Engagement progress (%)	58%

Source: Sustainalytics, EOS. Water and waste data from Trucost.

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

2022 Yr End Environmental Indicators	Fund	Benchmark
GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	11,270.06	61,138.30
Carbon Footprint (Scope 1 & 2+3 : tCO2eq)	189.74	807.85
Fossil Fuels (% involved)	0.00	6.11
Non-Renewable Energy Consumption (%)	86.32	84.88
Water intensity (m3/\$mn revenue)	51,855.12	17,342.29

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of one of the 17 UN SDGs; or (ii) positively contribute to reducing the environmental and social impacts of products sold through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As noted above, the Fund had exposure to the climate change mitigation objective outlined by the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of sustainable investments where companies may have caused significant harm through the products and services that they offered, and through their entire value chain, included:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if a company had any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future.*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the company was not considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s ESG assessment (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the assessment.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment, or identified the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country of listing

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

● **In which economic sectors were the investments made?**

Sector	% of Assets
Information Technology	23.98
Industrials	21.66
Financials	14.11
Consumer Discretionary	8.77
Health Care	7.94
Materials	7.42
Consumer Staples	4.05
Real Estate	3.11
Utilities	2.79
Energy	2.31
Communication Services	1.52

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 1.71% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 3.00% of the Fund weighted by revenue alignment (based on turnover) was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 2.38%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund invested 8.77% in sustainable investments with an environmental objective not aligned with the EU Taxonomy. This was based on the investment team’s investment strategy as described above.

What was the share of socially sustainable investments?

The Fund invested 20.97% in sustainable investments with a socially sustainable objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 2.31% in cash at the end of the period. Derivatives were used in the period as an investment to gain access to single investments. However, none of these are classified under “other”.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager invested in high quality and efficient small to mid-capitalisation companies trading at attractive valuations, in global emerging markets, where conditions were supportive of growth. In selecting investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristics through the following processes:

ESG Integration: The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducted an assessment of a company’s ESG characteristics based on a both quantified ESG metrics and through a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors included, but were not limited to, specific environmental characteristics (such as a company’s carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as Board gender diversity and employee turnover). The ESG assessment favoured companies with reduced ESG risks and which complied with the Investment Manager’s policy on good governance practices , outlined further below. The Investment Manager was able to invest in companies with poor ESG factors where the company had shown a desire to improve their ESG behaviours.

Engagement: The Investment Manager leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager was able to undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurred through meetings with company boards and management and through the exercise of voting rights. Engagement

sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company was not receptive to engagement on sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.

Exclusions: The Investment Manager did not invest in companies involved in specified activities where those activities contributed to company revenues above prescribed revenue thresholds. Excluded activities included Controversial Weapons, weapons for retail use, tobacco, unconventional fossil fuels and companies in evaluated to be in contravention of the principles of the UN Global Compact.

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes SDG Engagement High Yield Credit Fund*

Legal entity identifier: *213800P4WDHNNHYHR7H68*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.63 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in issuers exhibiting the following characteristics:

- the potential to be receptive to, and benefit from, active corporate engagement that will be aligned to contribute to at least one or more of the United Nations Sustainable Development Goals (the “UN SDGs”); and
- limited to no revenue generated from excluded sectors.

The ICE Bofa Global High Yield Constrained Index is used as a reference benchmark for the purpose of attaining the above characteristics.

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation .

While derivatives were used within the Fund to manage exposures, they were not used for the attainment of the Fund’s environmental or social characteristics.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund
GHG Emissions (Scope 1 & 2: tCO2eq)	224361.40
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	212.52
Exposure to Fossil Fuels (% involved)	4.62
Energy Production from Non- Renewables (%)	35.19
Water Emissions (t/USDm)	0
Hazardous Waste Ratio (t/USDm)	2.10

Social Indicators:

Indicator	Fund
Violation of UNGC (%)	0
Board Gender Diversity (% female)	35.15
Controversial weapons (% involved)	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

Engagement activity and % Investment in excluded sectors:

Indicator	Fund
Engagement Activity as a % of AUM	96
Engagement progress (%)	41
% invested in excluded sectors	0

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Fund	Benchmark	% Fund covered	% Benchmark covered
GHG Emissions (Scope 1 & 2: tCO2eq)	114586.55	20104.70	37.67	31.98
Carbon Footprint (Scope 1 & 2: tCO2eq)	449.17	152.86	37.67	31.98
Exposure to Fossil Fuels (% involved)	6.41	19.08	61.59	51.69
Energy Production from Non-Renewables	38.43	37.05	26.09	15.66
Water Emissions (t/EURm)	0.23	0.58	1.49	1.08
Hazardous Waste Ratio (t/EURm)	4.62	82.62	22.20	13.64

Indicator	Fund
Engagement Activity as a % of AUM	94
Engagement progress (%)	46
% invested in excluded sectors	0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the issuer provided through processes which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers. Sustainable investments contributed via:

- Providing products or services that have a goal of solving environmental or social challenges we face as a society;

AND/OR

- Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.

As mentioned above, while there was no commitment to make EU Taxonomy-aligned investments, however, based on available data, the Fund’s investments contributed to the environmental objective of climate change mitigation during the period, but it is possible that the Fund had exposure to other environmental objectives under the Taxonomy Regulation.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager’s assessment of sustainable investments included identifying where issuers may have caused significant harm through the products and services that they offered, but also through their entire value chain. The assessment included:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary ESG Scoring Model (as detailed below) to identify if an issuer had any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer was taking remedial action to prevent the event occurring in the future.

The Investment Manager also carried out a more detailed assessment of any issuer which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer had in place limit the amount of harm or that the issuer was being engaged on that topic.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Where an issuer was deemed to do significant harm to any sustainable objective, the investment in the issuer was not to considered a sustainable investment.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

*The Investment Manager took into account all mandatory principal adverse impact indicators and used those indicators which were deemed relevant to the Fund in the Investment Manager’s proprietary ESG scoring model (the “**ESG Scoring Model**” – see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.*

— — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and did not invest in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors. This was done by: (i) evaluating the results from both the SDG Scoring Model and the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impacts on sustainability factors and other sustainability indicators used as part of both the SDG and ESG Scoring Models. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enabled the Investment Manager to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager elected to either not continue with the investment or identified the issuer as a candidate for engagement. With the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>SIG</i>	<i>Capital Goods</i>	<i>1.66%</i>	<i>Switzerland</i>
<i>Telecom Italia</i>	<i>Telecommunications</i>	<i>1.51%</i>	<i>Italy</i>
<i>Virgin Media</i>	<i>Telecommunications</i>	<i>1.49%</i>	<i>United</i>
<i>Crown</i>	<i>Capital Goods</i>	<i>1.48%</i>	<i>United States</i>
<i>Ford</i>	<i>Automotive</i>	<i>1.47%</i>	<i>United States</i>

<i>Valeo</i>	<i>Automotive</i>	<i>1.04%</i>	<i>France</i>
<i>Nokia</i>	<i>Technology & Electronics</i>	<i>1.02%</i>	<i>Finland</i>

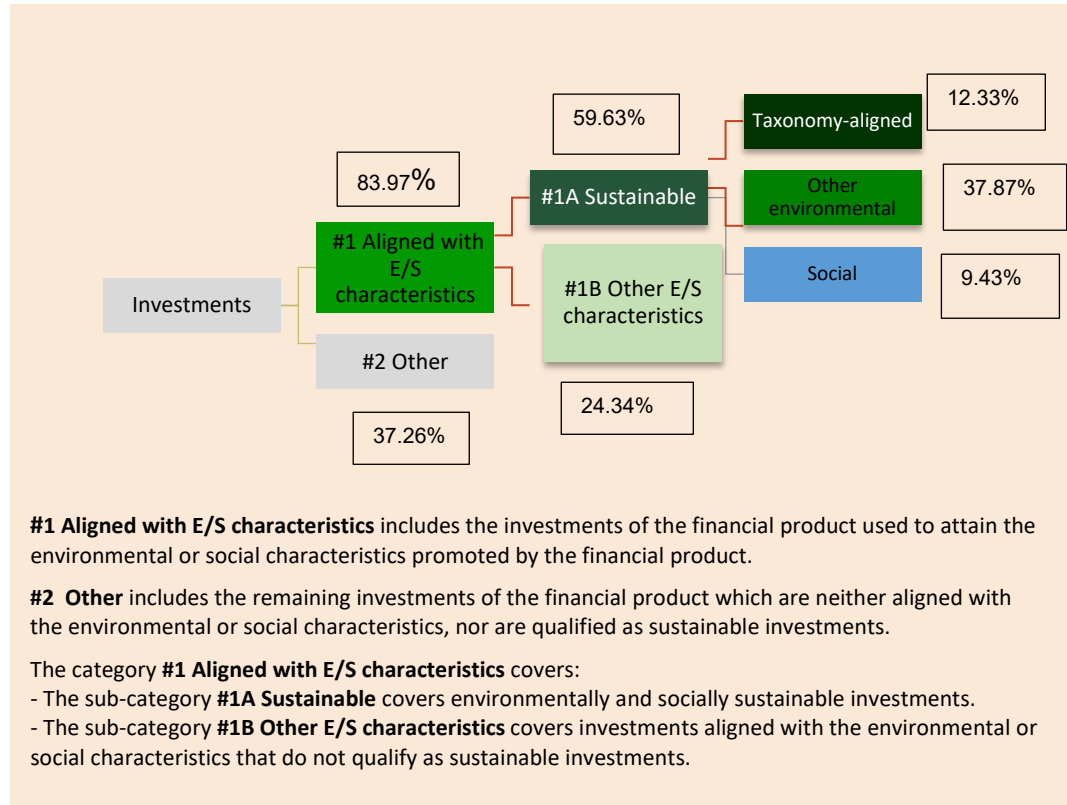

What was the proportion of sustainability-related investments?

- *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

Source: Federated Hermes, as at end of December 2023. All exposures are expressed as a % of the AUM of the Fund. The total exposure doesn't equal to 100% as the Fund uses leverage. Please note that “Other” includes cash, sovereign and index exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● In which economic sectors were the investments made?

Investments were made in all Meryll Lynch (Level III) Sector groups: Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Leisure, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Market Weight
Automotive	7.66%
Banking	10.74%
Basic Industry	11.10%
Capital Goods	12.09%
Consumer Goods	1.81%
Energy	2.68%
Financial Services	1.26%

Sector	Market Weight
Healthcare	5.45%
Insurance	1.40%
Leisure	0.00%
Media	1.81%
Real Estate	0.88%
Retail	2.70%
Services	1.56%
Technology & Electronics	5.60%
Telecommunications	10.63%
Transportation	0.00%
Utility	6.60%

Source: Federated Hermes as at 31st December 2023. Off benchmark sectors include: Cash, Index and Sovereign.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum level of sustainable investments with an environmental objective aligned to the EU Taxonomy, 1.94% of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No

X

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 0.38% of the Fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 2.79%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

40.01% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

● **What was the share of socially sustainable investments?**

18.88% of the Fund was invested in socially sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund held 37.26 % in “Other” at the end of the period. “Other” investments include cash, sovereign bonds and derivatives used for efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager used an active approach to seek risk-adjusted returns. This was achieved through top-down analysis, determining the risk appetite and the return prospects of different regions, sectors and asset classes. These findings directed the team’s bottom-up research, identifying issuers with attractive credit risks and determining which securities in their capital structures provided superior relative value. The Investment Manager further incorporated ESG factors aimed at the promotion of the environmental and social characteristics, through the following processes:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager achieved this by using its ESG Scoring Model to score a country or a company’s ESG behaviours, assigning an ESG score on a scale of 1 to 5. The ESG Scoring Model considered environmental and social characteristics including (but not limited to) the management of environmental risks (such as impact on climate change and natural resource use) and social risks (such as human & labour rights and human capital management). This ESG Scoring Model favoured issuers with low environmental and social risks and issuers which complied with the Investment Manager’s policy on good governance practices, outlined further below. As such, the Fund had a higher percentage of investments scoring 3 or lower. The Investment Manager could invest in issuers with a poor ESG score, where the issuer had shown a desire to improve its ESG behaviours. The Investment Manager did not invest in new issuers with an ESG score of 5 from the investment universe. These scores were not static and therefore could be downgraded. In circumstances where an issuer’s score was downgraded to a 5, the Investment Manager sought to disinvest.*

Engagement: *The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer..*

Exclusions: *The Investment Manager did not invest in issuers involved in the production of Controversial Weapons.*

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**

The reference benchmark does not differ from a broad market index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

The ICE Bofa Global High Yield Constrained Index is a broad market index that does not take into account any ESG or Sustainability criteria. The reference benchmark was therefore not continuously aligned with the environmental and social characteristics promoted by the Fund.

● **How did this financial product perform compared with the reference benchmark?**

The ICE Bofa Global High Yield Constrained Index was used as a reference for determining whether the Fund achieves favourable ESG characteristics. This was achieved via a comparison of the Fund’s PAls, below, relative to the benchmark, although please note that due to low coverage of the portfolio and the benchmark, we cannot draw objective conclusions from the data.

Indicator	Fund	Benchmark	% Fund covered	% Benchmark covered
GHG Emissions (Scope 1 & 2: tCO2eq)	114586.55	20104.70	37.67	31.98
Carbon Footprint (Scope 1 & 2: tCO2eq)	449.17	152.86	37.67	31.98
Exposure to Fossil Fuels (% involved)	6.41	19.08	61.59	51.69
Energy Production from Non- Renewables	38.43	37.05	26.09	15.66
Water Emissions (t/EURm)	0.23	0.58	1.49	1.08
Hazardous Waste Ratio (t/EURm)	4.62	82.62	22.20	13.64

- ***How did this financial product perform compared with the broad market index?***

See answer to the previous question.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes US High Yield Credit Fund*

Legal entity identifier: *213800HG5292EKBX3U90*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in issuers exhibiting the following characteristics:

- Carbon emissions reduction in line with SDG 13: Climate Action
- Positive career opportunities and compensation & benefits in line with SDG 8: Decent work and economic growth
- Positive Work/Life Balance in line with SDG 3: Good health and well-being
- Positive D&I in line with SDGs 5 and 10, Gender equality and Reduced inequalities

- Positive infrastructure build, in line with SDG 9: Industry, innovation and infrastructure

● **How did the sustainability indicators perform?**

Environmental Indicators:

Indicator	Fund	Benchmark
Total GHG emissions of the Fund (Scope 1, Scope 2 and Scope 3 measured using tCO2eq)	1017.66	1339.64
Carbon footprint of the Fund (measure as total Scope 1 and Scope 2 GHG emissions normalised by market value of portfolio, expressed in tCO2eq/\$m invested)	112.86	154.90
Carbon intensity of the Fund (measured as total Scope 1, Scope 2 GHG emissions normalised by \$m revenues per company, expressed in in tCO2eq/\$m revenue)	196.20	254.65

Social Indicators:

Indicator	Fund
Violation of UNGC and OECD Guidelines (%)	0

Engagement activity and % Investment in excluded sectors:

Indicator	Fund
Engagement Activity on Carbon Emissions or Climate Change as a % of AUM	26%
Engagement progress (%)	57%
% invested in excluded sectors	0

● **...and compared to previous periods?**

N/A – this Fund became an Article 8 fund in October 2023 and was an Article 6 fund prior to that. Therefore, no prior year information is available.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A. The Fund did not make any sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

N/A. The Fund did not make any sustainable investments.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

N/A. The Fund did not make any sustainable investments.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A. The Fund did not make any sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

N/A. The Fund did not consider principal adverse impacts on sustainability factors.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
FORD MOTOR CREDIT CO.	Automotive	2.453%	United States

What was the proportion of sustainability-related investments?

● What was the asset allocation?

● In which economic sectors were the investments made?

Investments were made in all Meryll Lynch (Level III) Sector groups: Automotive, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Leisure, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, and Utility.

Sector	Weight
Automotive	6.11%
Basic Industry	5.19%

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Sector	Weight
Capital Goods	9.72%
Consumer Goods	5.41%
Energy	5.09%
Financial Services	3.39%
Healthcare	6.88%
Insurance	7.44%
Leisure	5.85%
Media	9.70%
Real Estate	1.03%
Retail	4.32%
Services	9.83%
Technology & Electronics	13.33%
Telecommunications	2.32%
Utility	2.27%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Source: Federated Hermes as at 31st December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A. The Fund did not make any sustainable investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

N/A. The Fund did not make any EU Taxonomy aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A. The Fund did not make any EU Taxonomy aligned investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A. The Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

N/A. The Fund did not make any sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 2.12% in “Other” at the end of the period. “Other” investments include cash.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager utilized three actions to meet the environmental and/or social characteristics during the reference period:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager assigned an ESG Rating to individual securities based on a proprietary assessment of material ESG risks using a 1-10 scale, with 10 being the best. The Investment Manager determined these ratings based on research and due diligence, including a review of information that may be publicly available, company provided and/or from third party sources. The ESG Rating was determined by the Investment Manager's view of material risks including: environmental (e.g., temperature alignment, carbon intensity, water usage, waste reduction); social (e.g., human rights, employee rights, health/safety concerns, data privacy); governance (e.g., management effectiveness and board composition); and debtholder stewardship (e.g., alignment of debt interest with equity interests, dividend policies, and debt leverage policies). The Investment Manager divested of any securities with an ESG rating of 2 or lower.*

Engagement: *The Fund leveraged engagement insights generated by the SFI (Sustainable Fixed Income) and EOS engagement teams. Where sustainability risks were identified, the teams worked to engage with issuers to address those risks. Engagement occurred through meetings with management. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.*

Exclusions: *The Investment Manager did not invest in issuers involved in the production of Controversial Weapons.*

How did this financial product perform compared to the reference benchmark?

● **How does the reference benchmark differ from a broad market index?**

The reference benchmark was a broad market index (The Ice BofA High Yield Constrained Index).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The carbon emissions of the Fund were 75.97% of the scaled emissions of the benchmark. The carbon footprint of the Fund was 72.86% of benchmark. The carbon intensity of the Fund was 77.05% of benchmark.

● **How did this financial product perform compared with the reference benchmark?**

The Fund returned 14.36% vs 13.47% for the benchmark.

● **How did this financial product perform compared with the broad market index?**

The Fund returned 14.36% vs 13.47% for the broad market index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a,
of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Sustainable Global Equity Fund*

Legal entity identifier: *213800UPG8JP108WG561*

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 49.5%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 46.9%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

The figures above relate to the Fund as at 31 December 2023.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund was to have a reduced environmental footprint compared to the Benchmark.

The Investment Manager achieved the investment objective of the Fund by investing in companies within a thematic framework closely aligned with the UN Sustainable Development Goals based on the environmental and social objectives of:

- *Environmental Preservation*

- *Efficient Production and Resource Usage*
- *Health and Wellbeing*
- *Social Inclusion*

This focus, particularly in respect of the environmental preservation and efficient production and resource usage themes, has led the Fund to have a reduced environmental footprint compared to the Benchmark.

The MSCI All Country World Index was used as a reference benchmark for comparing the environmental footprint of the Fund to the Benchmark. The Benchmark was also used to compare the weighted average ESG rating of the Fund against the Benchmark once the lowest scoring 20% of companies had been eliminated.

The Fund made sustainable investments in companies which contributed to the environmental objectives of Climate Change Mitigation and Climate Change Adaption as defined under the Taxonomy Regulation (EU) 2020/852. At the end of the period, the Fund had exposure to the Climate Change mitigation objective outlined by the taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s sustainable investment objective.

● **How did the sustainability indicators perform?**

Please see below:

Metric	Fund	Benchmark
<i>Carbon footprint Scope 1, 2 & 3 (tonnes / \$m invested), (Market cap methodology)</i>	72.49	112.03
<i>Water footprint (Direct: m3 / \$m invested)</i>	85.28	1808.36
<i>Waste footprint (tonnes / \$m invested)</i>	4.26	12.23

Source: Federated Hermes, Trucost as at 31 December 2023.

Environmental Indicators:

Indicator	Fund
<i>GHG Emissions (Scope 1, 2 & 3), (tCO2eq) (EVIC Methodology)¹</i>	4020.92
<i>Carbon Footprint (Scope 1, 2 & 3) (tCO2eq/USDmn) (EVIC Methodology)¹</i>	72.49
<i>GHG Intensity (Scope 1, 2 & 3) (tCO2eq/USDmn) (EVIC Methodology)¹</i>	180.85
<i>Exposure to Fossil fuels²(%)</i>	0.97
<i>Energy Production from non-renewables³(%)</i>	18.09

Source: Sustainalytics PAI Report as at 31 December 2023

¹ We are currently utilising two separate data sources for carbon reporting in our factsheets and SFDR periodic reporting, hence you will see differences in the reported figures. This is due to the different methodologies used to estimate carbon emissions where reported data is not available, varying coverage of companies and different sources for financial data used in the calculation.

² The Fund’s exclusions are based on companies with a minimum of 5% exposure to fossil fuels. The regulatory reporting analysis provided by Sustainalytics shows companies with any exposure. For example, within the portfolio Weg is identified as having exposure to fossil fuels, although its exposure is minimal.

³ Within the guidelines, there is little scope for nuance. A good example of this is Lonza Group, which is shown as producing non-renewable energy. The company incinerates certain waste items into energy, which we see as a positive and highlights the company’s efficiency.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Social Indicators

*The percentage of asset under management within a fund that is engaged with.

** The percentage of engagement objectives where progress has been made

% AUM contributing to the UN SDGs

96.4%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

Employee turnover	14%
Lost time incident ratio (Total case incident rate per million hours worked)	136

Source: Net purpose as at 31 December 2022. The data shows the impact achieved from the capital employed.

2022 Yr End Engagement activity

Indicator	Fund
Engagement Activity as a % of AUM*	86
Engagement objectives progress**	55

Engagement activity covers the period since the inception of the fund on 21 March 2022.

*The percentage of asset under management within a fund that is engaged with.

** The percentage of engagement objectives where progress has been made

% AUM contributing to the UN SDGs

95.6%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- (i) Taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s sustainability assessment to identify if a company had any sustainability risks;*
- (ii) Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights; and*
- (iii) Identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future .*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the company was not considered a sustainable investment thereby ensuring the investments did not cause significant harm to any environmental or social objective.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager’s sustainability assessment in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Fund to avoid investment in these companies.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified through a proprietary framework which considered the sustainability risks and opportunities for each company, and used the breadth and depth of the Investment Manager’s engagement data to put this analysis in context.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified the company was identified as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>
<i>Microsoft</i>	<i>Information Technology</i>	<i>7.1</i>	<i>United States</i>
<i>Nvidia</i>	<i>Information Technology</i>	<i>4.1</i>	<i>United States</i>
<i>Novo Nordisk</i>	<i>Health Care</i>	<i>3.9</i>	<i>Denmark</i>
<i>Costco</i>	<i>Consumer Staples</i>	<i>3.9</i>	<i>United States</i>
<i>Mastercard</i>	<i>Financials</i>	<i>3.8</i>	<i>United States</i>

Utilities	0.00

Source: Federated Hermes as at 31 December 2023.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund committed that a minimum of 2% of its investments would be aligned with the environmental objectives under the EU Taxonomy Regulation. At 31 December 2023, the proportion of Taxonomy-aligned investments was 8.79% of the Fund weighted by revenue alignment.

The figures below are the same regardless of whether we include or exclude sovereign bonds.

Please note that the current data we have covers climate change mitigation and not climate change adaptation. In addition, all of the data in the analysis is currently estimated. The main reason being that many companies are yet to report on the EU Taxonomy. However, some have started to, but this has not yet been captured in the Sustainalytics analysis. As such, we believe the alignment figures are underestimated and expect the figure to increase markedly.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund committed that a minimum of 1% of the Fund's investments would be in transitional and enabling activities under the Taxonomy Regulation in the Fund Supplement. At the 31 December 2023, the proportion of investments in Taxonomy-aligned transitional and enabling activities was 8.66% of the Fund, weighted by revenue alignment.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 2.9%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Fund committed to a minimum of 90% in sustainable investments, but due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund would be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

While the Fund invested 49.5% in environmentally sustainable investments, 24.6% was allocated to sustainable investments with an environmental objective that is not aligned with the EU taxonomy. The reduction of this allocation compared to 2022, is due to increased data coverage for sustainable investments with an environmental objective that is aligned with the EU taxonomy. The remaining 24.9% was allocated to companies that had any revenue alignment with the EU Taxonomy.

What was the share of socially sustainable investments?

We committed that a minimum of 30% of the Fund would be invested in sustainable investments with a social objective. As of the end of December 2023, 46.9% of the Fund was invested in socially sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund held 3.6% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager sought to achieve a better environmental footprint compared to the benchmark, the MSCI All Country World Index, after the removal of the lowest 20% of securities within the benchmark from an ESG score perspective. The Investment Manager achieved this by investing in companies within a thematic framework closely aligned with the UN Sustainable Development Goals based on environmental and social objectives of:

- *environmental preservation*
- *efficient production and resource usage*
- *health and wellbeing*
- *social inclusion*

The Investment Manager invested in companies that could demonstrate a contribution to a more sustainable future, not just through the products and services that they offered, but also through their entire value chain. The Investment Manager conducted a sustainability assessment designed to identify companies as ‘impactful’, ‘leaders’ or ‘improvers’. The sustainability assessment was predicated on three primary considerations:

- The Fundamentals of the business model: the Investment Manager sought to understand historic financial metrics and competitive dynamics and, in conjunction with the thematic framework, identify those who were capable of sustaining strong growth over the long-term. Alongside this, the Investment Manager sought to identify companies which are bringing value to society, rather than drawing from it.*
- ESG Metrics: the Investment Manager considered how well companies managed environmental, social and governance factors (including how companies limited their emissions, how they ensured product safety, how they managed diversity in the workforce and how their board was structured). When looking at the ESG profile of a company, consideration was given to key quantitative metrics such as corporate transparency, approach to materiality (being those ESG topics that could have meaningful financial consequences), and the effect of products and services on broader society.*
- Product Impact: involved a thematic analysis whereby the Investment Manager sought to understand the broader benefit or cost of each company. As well as looking at companies which “do no significant harm”, the Investment Manager also looked beyond this and, where appropriate, the portfolio actively targeted those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as (i) companies that avoided harm, (ii) companies that provided benefits to all stakeholders and (iii) companies that contributed to solutions. The belief was that following this thematic approach to idea generation and focussing on companies which meet the ‘sustainable leader’ criteria facilitated the Fund’s goal to achieve superior long-term returns.*

All portfolio holdings have been through the above process and, therefore, all portfolio holdings have undergone a sustainability analysis.

Engagement: *Where material ESG risks were identified, the Investment Manager worked either directly or with the in-house stewardship team, EOS, to engage with companies to mitigate those risks and promote good practices. Engagement occurred through meetings with company boards & management and through exercising voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, specific targets and timelines were set in relation to that engagement, these targets differed at an individual company engagement level.*

Federated Hermes Investment Funds Public Limited Company Sustainable Finance Disclosure Regulation ("SFDR") - Unaudited

Where a company was not receptive to engagement on material ESG risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.

92.19% of the portfolio (as a proportion of AUM) has been engaged with and progress has been seen on 53.42% of engagement objectives. The proportion of AUM engaged on environmental and social issues and objectives is:

Environmental: 22.60%

Social: 38.94%

Governance: 25.48%

Strategy Risk and Communication: 12.98%

Please note that because we often have a variety of engagement objectives, covering environmental, social and governance issues, the proportion of AUM engaged on E & S issues will differ from the overall engagement figure.

An example where EOS engaged to promote social and environmental characteristics was with AIA.

The company invited us to present the perspective of investors and their representatives at its internal ESG conference, which is attended by internal stakeholders from a range of departments. We presented our expectations and perspective on how the company should address climate change, biodiversity loss, social inclusion, and responsible use of artificial intelligence.

We welcomed progress on climate change, including bringing forward the coal divestment timelines and submitting targets to the Science Based Targets initiative (SBTi). We encouraged the company to accelerate work on its net-zero roadmap to explain how it will meet its medium-term and long-term targets, as well as to upgrade the ambition of the Scope 3 target so it is aligned with 1.5 degrees. We also highlighted the importance of product innovation for climate solutions, integrating insights from the climate risk assessment into decision-making, and strengthening capabilities on the links between climate change and health.

We introduced the topic of biodiversity loss and focused on how it is directly relevant to health, and therefore health and life insurers. We outlined the significance of biodiversity loss and ecosystem collapse worldwide, and the resulting exposure to nature-related risks and opportunities that are relevant to the company's risk assessment, underwriting and investment allocation. We strongly encouraged the company to strengthen its focus on biodiversity and shared a set of recommendations, including building internal capacity, establishing effective governance, applying the Taskforce on Nature-related Financial Disclosures (TNFD) recommendations, using the insights to develop a strategy and targets focused on materiality, and leveraging the interconnections between climate change and nature.

We shared our views on why the insurance industry should devote more resources to social inclusion through the business development lens and said that the company has a potential to demonstrate leadership, given its existing initiatives in this space. We highlighted three G20 principles for financial inclusion that are highly relevant to insurers, namely innovation, protection and empowerment, to help guide the company's thinking when designing social inclusion strategies. This was complemented by our recommendations for it to develop an overarching business development and product strategy. This should take into account tailored considerations for the identified underserved populations, appropriately invest in insurance technology to increase access to its services, and disclose the impacts of the strategy.

We shared the history of our engagements on the business and wider societal impacts of artificial intelligence (AI). We explained the core principles of our expectations on digital rights and ethical use of AI for companies. We put forward the view that it is of paramount importance that the company establish a robust governance system, given increasing regulatory discussions globally and concerns over unintended biases, which could lead to lawsuits and reputational damage.

We ended by encouraging the company to disclose its Responsible Use of Artificial Intelligence Standard, accelerate training internally, and be proactive in industry advocacy and lobbying to stay abreast of shifting

regulatory and societal norms. We thanked the company for the opportunity to participate and our ongoing productive dialogue

Exclusions: *The Investment Manager will not invest in companies involved in specified activities where those activities contribute to company revenues above prescribed revenue thresholds. Excluded activities included fossil fuels, electricity utilities not aligned with a 2 degree scenario, Controversial weapons, conventional weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.*

The Fund has not invested in any companies that violated or breached the exclusions list.

Additionally, as part of the investment strategy, the Investment Manager assessed the corporate governance of a company by reference to its policy on good governance and through the use of the Investment Manager’s proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager assessed, among other things, a company’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company was considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) met any one of the following criteria:

- *the company’s corporate governance was in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company’s corporate governance was determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer;*
- *or the Investment Manager and/or EOS was engaging with the company to address enhancements to the company’s governance practices, as further detailed in the section of the fund supplement annex titled “What investment strategy does this financial product follow?”*
- *or, (ii) when viewed collectively, were determined by the Investment Manager to adequately meet the criteria set forth above.*

A company was presumed not to be following good governance practices if there were abuses of power or severe controversies involving the relevant company, which were not mitigated through subsequent demonstrative actions.

Further information on the Investment Manager’s good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

How did this financial product perform compared to the reference sustainable benchmark?

- **How did the reference benchmark differ from a broad market index?**

N/A - The MSCI All Country World Index is a broad market index

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The MSCI All Country World Index is a broad market index that does not take into account any sustainability criteria and is therefore not continuously aligned with the sustainable investment objective of the Fund. It was used as a comparator to evidence whether the Fund’s sustainable objective was being achieved relative to the relevant broad market index.

- **How did this financial product perform compared with the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

The MSCI All Country World Index was used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. The index was also used to compare the weighted average ESG rating of the Fund against the benchmark once the lowest scoring 20% of companies have been eliminated.

● **How did this financial product perform compared with the broad market index?**

Environmental footprint

Metric	Fund	Benchmark
Carbon footprint Scope 1, 2 & 3 (tonnes / \$m invested), (Market cap methodology)	115.4	213.9
Water footprint (Direct: m ³ / \$m invested)	149.2	6,271.5
Waste footprint (tonnes / \$m invested)	1.1	5.6

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Climate Change High Yield Credit Fund*

Legal entity identifier: 21380099JOAAZ5PNBG96

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 98.25%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: %**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 98.25% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund delivered a carbon footprint lower than the Benchmark (as indicated below) through investment in debt securities of companies that were adapting their business models to reduce their environmental impact on climate change.

The ICE BofA Global High Yield Constrained USD Hedged Index was used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. Please note that the coverage ratio of the Fund and benchmark is low hence doesn't capture all portfolio holdings.

The Fund made sustainable investments in issuers which contributed to the environmental objectives of Climate Change Mitigation and Climate Change Adaptation as defined under the Taxonomy Regulation (EU) 2020/852.

Derivatives are used within the fund to manage exposures, however were not used for the attainment of the Fund’s sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund	Benchmark
GHG Emissions (Scope 1 & 2: tCO2eq)	3939.21	9237.34
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	46.85	109.86
Exposure to Fossil Fuels (% involved)	0	3.36
Energy Production from Non- Renewables (%)	22.63	28.08
Water Emissions (t/USDm)	0	0
Hazardous Waste Ratio (t/USDm)	0.67	23.81

Social Indicators:

Indicator	Fund	Benchmark
Violation of UNGC (% involved)	0	0
Board Gender Diversity (% female)	37.49	29.32
Controversial weapons (% involved)	0	0.12

Engagement activity and % Investment in excluded sectors:

Indicator	Fund
Engagement Activity as a % of AUM	86
Engagement progress (%)	49
% invested in excluded sectors	0

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators:

Indicator	Fund	Benchmark	% Fund covered	% Benchmark covered
GHG Emissions (Scope 1 & 2: tCO2eq)	4459.33	2676.88	38.13	31.98
Carbon Footprint (Scope 1 & 2: tCO2eq)	141.21	153.11	38.13	31.98
Exposure to Fossil Fuels (% involved)	0.12	19.08	65.14	51.69
Energy Production from Non- Renewables	26.97	37.05	27.62	15.66
Water Emissions (t/USDm)	1.47	0.58	1.76	1.08
Hazardous Waste Ratio (t/USDm)	3.31	83	16.79	13.64

2022 Yr End Social Indicators

2022 Yr End Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	81
Engagement progress (%)	48
% invested in excluded sectors	0

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager used both a proprietary Climate Change Impact scoring model (the “CCI Scoring Model”) and a proprietary ESG scoring model (the “ESG Scoring Model”), as further detailed below, to identify issuers that were adapting their business models to reduce their environmental impact on climate change. The Investment Manager did not invest in securities that have a CCI score of 5 nor a ESG score of 5, as such a score indicated those issuers that had the greatest sustainability risks and that were most likely to cause significant harm to the sustainable investment objective of the Fund. This comprised of:

- (i) taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager’s proprietary CCI Scoring Model and ESG Scoring Model (as detailed below) to identify if an issuer had any sustainability risks;
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer was taking remedial action to prevent the event occurring in the future.

The Investment Manager carried out a more detailed assessment of any issuer which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer had in place limit the amount of harm or that the issuer was being engaged on that topic.

Where an issuer was deemed to do significant harm to any sustainable objective, the Investment Manager did not invest, thereby ensuring the investments did not cause significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager took into account all mandatory PAIs and used those indicators which are deemed relevant to the Fund in the Investment Manager’s proprietary CCI Scoring Model and ESG Scoring Model, see further detail below, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager sought to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and did not invest in these issuers.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors. This was done by: (i) evaluating the results from both the CCI Scoring Model and the ESG Scoring Model; and (ii) evaluating the underlying principal adverse impacts on sustainability factors and other sustainability indicators used as part of both the CCI and ESG Scoring Models. Evaluating both the results from and the underlying indicators used by the ESG Scoring Model enabled the Investment Manager to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager elected to either not continue with the investment or identified the issuer as a candidate for engagement. With the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023.

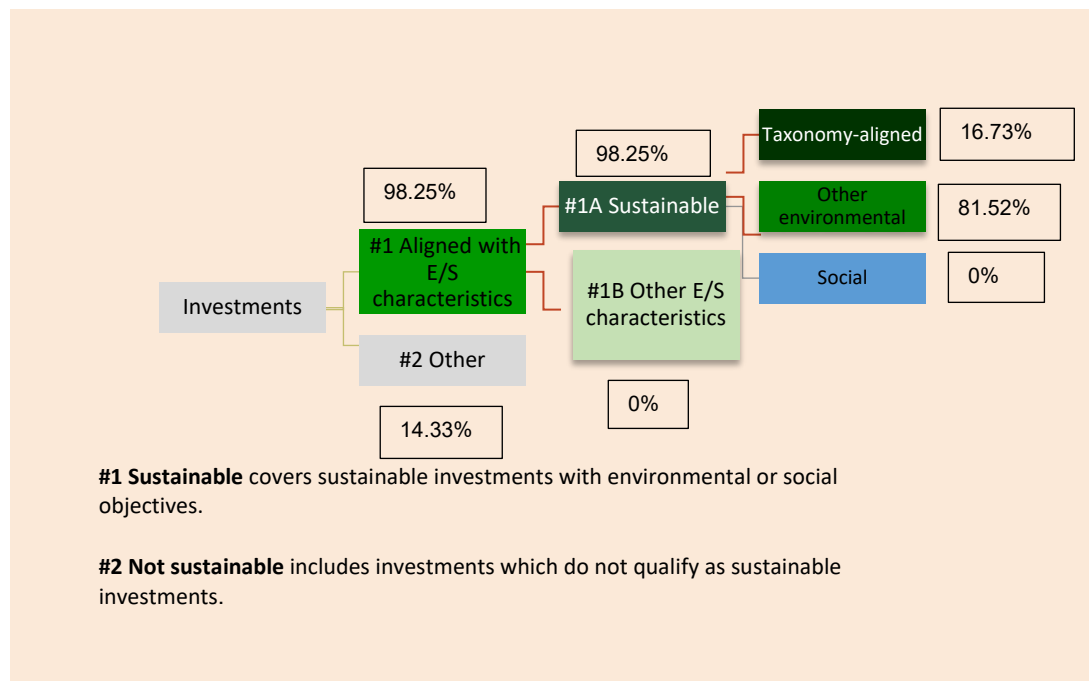

Largest investments	Sector	% Assets	Country
IQVIA Inc	Healthcare	1.94	United States
Virgin Media	Telecommunications	1.80	United Kingdom
Lorca Telecom	Telecommunications	1.70	Spain
Centene Corp	Healthcare	1.56	United States
Cellnex Telecom	Technology & Electronics	1.55	Spain
Rexel	Services	1.54	France
TerraForm Power	Utility	1.53	United States
Marks & Spencer	Retail	1.52	United Kingdom
Iron Mountain	Real Estate	1.37	United States
Telefonica	Telecommunications	1.35	Spain
Intesa Sanpaolo	Banking	1.35	Italy
Volvo	Automotive	1.33	Sweden
Telenet	Media	1.33	Belgium
Sunrise	Media	1.30	Netherlands
Levi Strauss	Retail	1.27	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

Source: Federated Hermes, as at end of December 2023. The total exposure doesn’t equal to 100% as the Fund uses leverage. Please note that “Other” includes cash, sovereign and index exposures.

● **In which economic sectors were the investments made?**

Investments were made in all Meryll Lynch (Level III) Sector groups: Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Leisure, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Weight
Automotive	7.43%
Banking	13.48%
Basic Industry	6.04%
Capital Goods	10.25%
Consumer Goods	1.53%
Energy	0.00%
Financial Services	1.44%
Healthcare	5.94%
Insurance	6.10%
Leisure	0.00%
Media	4.17%
Real Estate	1.37%
Retail	7.15%
Services	3.14%
Technology & Electronics	8.63%
Telecommunications	16.30%
Transportation	0.00%
Utility	5.27%

Source: Federated Hermes as at end of December 2023. Off benchmark sectors include: Cash, Index and Sovereign.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

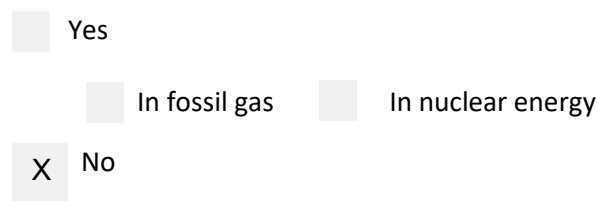

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

While the Fund committed to a minimum level of 1% sustainable investments with an environmental objective aligned to the EU Taxonomy, 2.30% (based on Turnover and ex sovereigns) of the Fund weighted by revenue alignment was EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 0.76% (ex sovereigns based on turnover) of the Fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 1.66%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

81.52% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

0% of the Fund was invested in socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund held 14.33% in “Other” at the end of the period. “Other” investments include cash, sovereign bonds and derivatives used for efficient portfolio management purposes.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund aimed to invest in a diversified portfolio of Below Investment Grade securities and credit default swaps while maintaining a lower carbon footprint than the ICE BofA Global High Yield Constrained USD Hedged Index (the “Benchmark”) by investing in issuers that are adapting their business models to reduce their environmental impact on climate change.

In order to achieve this, the Investment Manager used a proprietary CCI Scoring Model, which considered internal and external information gained from several sources such as engagement feedback, CDP (a not-for-profit provider of information that supports issuers to report and manage their environmental risks), S&P Global Trucost (a provider of environmental data on companies to support the assessment of risk relating to climate change), science-based targets, public sustainability disclosures and Transition Pathway Initiative (a not-for-profit provider of environmental information specifically relating to decarbonisation and carbon footprint reduction) amongst others. Along with the financial characteristics of each security, CCI metrics were considered both prior to investment as well as on an ongoing basis. Each underlying issuer on which the debt security was issued was given a CCI score on a scale of 1-5 (5 being the lowest score where, for example, there was no evidence that the issuer was trying to reduce its carbon emissions). CCI metrics were intended to measure both the progress of an issuer in reducing its carbon footprint as well as the impact that the reduction in its carbon footprint could have had on its sector or the global economy. The Investment Manager invested in issuers with a CCI score of 1-4 and excluded the issuers with a CCI score of 5 from the investment universe. The Investment Manager believed that the issuers with the greatest potential for a positive real world impact on climate change (e.g. CCI 1 & CCI 2) would have a greater likelihood of enhancing portfolio returns over the long term, that the increase in portfolio value would be at least in part due to their transition to a reduced carbon footprint. The Investment Manager used the CCI scores to support the identification and measure the progress of issuers as they adapted their business to reduce their carbon emissions and therefore reduced the

impact of climate change. If the issuers failed to deliver on the Investment Manager’s carbon transition expectations, this was reflected in their ongoing CCI score. The Investment Manager sought issuers who had the greatest ability and inclination to transition their business to one which had a lower carbon footprint and reduced the impact of climate change on the planet. The CCI scores influenced portfolio allocation however the Investment Manager did not target a specific average CCI score for the portfolio as these were be considered along with a number of portfolio metrics that determined the holdings and size at any given time. Such portfolio metrics considered by the Investment Manager were financial in nature and related to duration, credit rating, sector weighting in the portfolio, macroeconomic factors (such as inflation, unemployment rates and central bank interest rates in each relevant jurisdiction), contributions to other risk measures such as volatility, default risk and other return drivers such as an increase in value or expected income derived from the issue.

In addition to the analysis of individual issuers and the CCI metrics set out above, the Investment Manager also undertook an assessment of the ESG qualities of each issuer through a proprietary ESG Scoring Model. The Investment Manager’s approach to ESG integration in its investment analysis drew upon internal and external sources to assign an ESG score to each country and issuer in the portfolio. To generate these ESG scores, the Investment Manager used Federated Hermes’ proprietary scoring methodology to score a country or an issuer’s ESG behaviours, assigning the ESG score on a scale of 1 to 5. This ESG Scoring Model favoured issuers with low environmental and social risks and issuers with who complied with the policy to assess good governance practices good governance, outlined further below. The Investment Manager invested in issuers with an ESG score of 1-4. The Investment Manager did not invest in new issuers with an ESG score of 5 from the investment universe. These scores were not static and therefore could be downgraded. In circumstances where an issuer’s score was downgraded to a 5, the Investment Manager sought to disinvest.

Engagement: *The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.*

Exclusions: *The Investment Manager did not invest in companies involved in specified activities, where those activities contributed to issuer revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels including thermal coal, gas and oil, Controversial Weapons, conventional weapons, nuclear power, tobacco, cannabis, GMO crop production and companies in contravention of the principles of the UN Global Compact.*

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager’s proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- *the issuer’s corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the issuer’s corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or*

- the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer’s governance practices, as further detailed in the section of this annex titled “What investment strategy does this financial product follow?”

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager’s good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

How did this financial product perform compared to the reference sustainable benchmark?

- **How did the reference benchmark differ from a broad market index?**

The reference benchmark does not differ from a broad market index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The ICE BofA Global High Yield Constrained Index is a broad market index that does not take into account any ESG or Sustainability criteria. The reference benchmark is therefore not continuously aligned with the sustainable investment objective of the Fund.

- **How did this financial product perform compared with the reference benchmark?**

The Fund delivered a carbon footprint lower than the Benchmark* through investment in debt securities of companies that are adapting their business models to reduce their environmental impact on climate change. Please find below the carbon footprint of the fund and benchmark:

Indicator	Fund	Benchmark	% Fund covered**	% Benchmark covered**
Carbon Footprint (Scope 1 & 2: tCO2eq)	46.85	109.86	77	82

*The ICE BofA Global High Yield Constrained USD Hedged Index is used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. Please note that the coverage ratio of the fund and benchmark is low hence doesn’t capture all portfolio holdings.

** Unfortunately the low coverage ratios for the fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

- **How did this financial product perform compared with the broad market index?**

See answer to the previous question.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Emerging Markets Debt Fund* Legal entity identifier: 213800S31X2GZF162275

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___ % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund successfully promoted investment in issuers exhibiting the following characteristics:

1. *Reduced ESG risks;*

The Fund tended to have overweights to issuers with lower ESG risks and underweights to issuers with higher ESG risk. Overall ESG risk was managed based on a combination of qualitative and quantitative factors including environmental, social, and governance issues material to the industry and sovereign profile.

2. A willingness to engage on material ESG issues; and

An issuer’s willingness to engage on issues and integrate those results was measured as part of the qualitative assessment embedded in the Investment Manager’s overall ESG analysis. Where an issuer was selected for engagement, the Investment Manager sought to engage on material ESG practices.

3. Limited to no revenue generated from excluded activities.

The Fund did not invest in issuers that generated revenue from excluded activities, and monitored its existing holdings to ensure issuers did not generate revenue from excluded activities. To the extent that an issuer was subsequently determined to be engaged in excluded activities, the Fund acted to divest from such issuer.

No index was designated as a reference benchmark for the purpose of attaining the above characteristics.

The Fund’s investments in FDIs did not contribute to the attainment of the environmental and/or social characteristics promoted by the Fund.

The Fund did not make sustainable investments.

● **How did the sustainability indicators perform?**

The sustainability indicator(s) performed as follows:

Indicator	Fund
Environmental Indicators	
GHG Intensity of Investee Countries (ktonCO2eq/EURm)	0.49
GHG Emissions Scope 1 & 2 (Corporates) (TCO2eq)	931.59
Social Indicators	
Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises (% involved)	0%
Engagement	
Engagement Activity as a % of engageable AUM	22%
Engagement progress (%)	24%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost in 2023, with the exception of the GHG Intensity of Investee Countries figure which was unavailable from Trucost and therefore, continued to be sourced from Sustainalytics

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2022 Yr End Indicators	Fund
2022 Yr End Environmental Indicators	
<i>GHG Intensity of Investee Countries (ktonCO2eq/EURm)</i>	0.5
<i>GHG Emissions Scope 1 & 2 (Corporates) (TCO2eq)</i>	198.53
2022 Yr End Social Indicators	
<i>Violation of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises (% involved)</i>	0
2022 Yr End Engagement	
<i>Engagement Activity as a % of engageable AUM</i>	4%
<i>Engagement progress (%)</i>	50%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable – the Fund did not make sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable – the Fund did not make sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable – the Fund did not make sustainable investments.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable – the Fund did not make sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether issuers exhibited any principal adverse impacts on sustainability factors by evaluating each issuer based on a number of different factors, both qualitative and quantitative. Those factors were embedded in the Investment Manager’s proprietary ESG Scoring Model, for both corporate and sovereign issuers. Factors included in the analysis included, but were not limited to: Environmental Policy and Carbon Emissions, Human Rights and Access to Food and Water, Rule of Law and Political Stability.

The proprietary ESG Scoring Model enabled the Investment Manager to ensure that all relevant available information was accurately captured and that the portfolio was not exposed to excessive sustainability risks not otherwise identified. The Investment Manager used a range of other sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks were identified, the Investment Manager could elect not to continue with an investment, or select the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
US 10YR NOTE (CBT) Mar24	Sovereign	3.8	United States
US 5YR NOTE (CBT) Mar24	Sovereign	2.5	United States

Source: Federated Hermes as at 31 December 2023.

What was the proportion of sustainability-related investments?

- What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

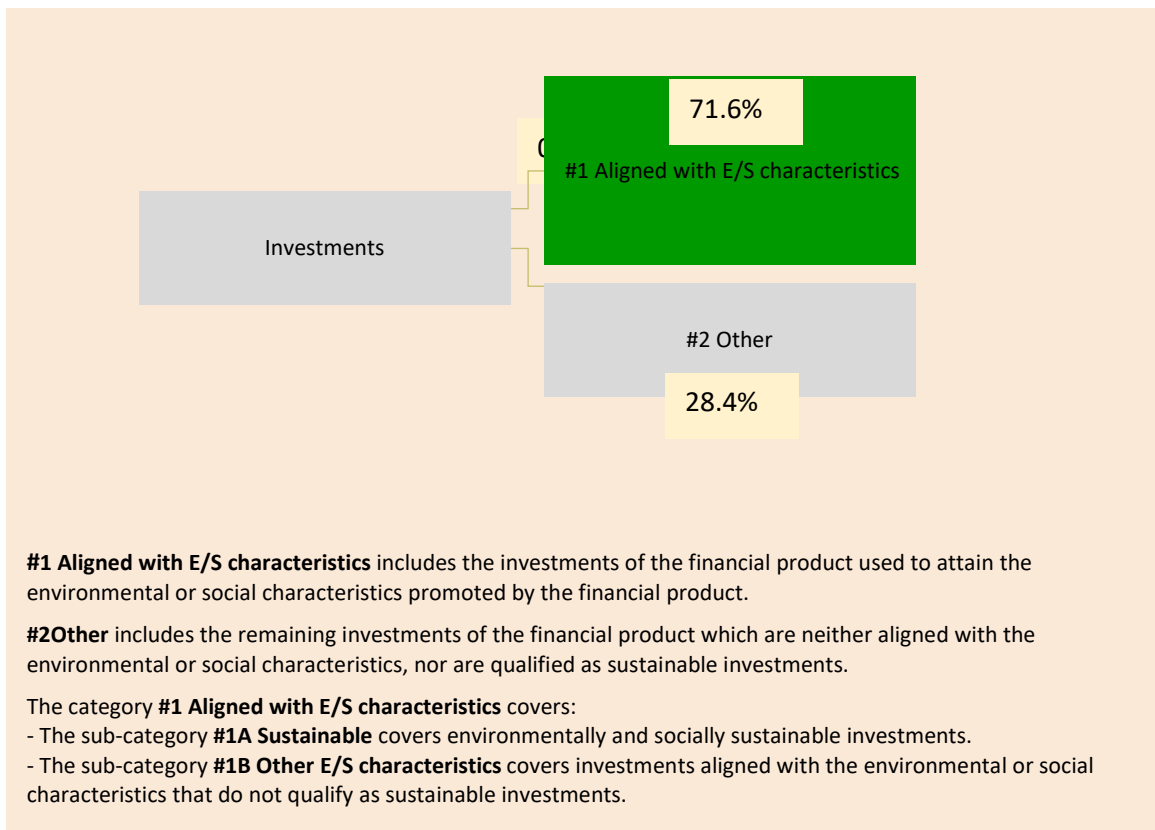

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Investments were made in the following economic sectors:

Sector	Percent of Portfolio
Sovereign	64.0%
Quasi-Sovereign	21.8%
Corp Oil & Gas	2.6%
Corp Telecommunications	2.1%
Corp Automotive	1.9%
Corp Food Products	1.3%

**Sectors composing less than 1% of the portfolio are not listed above.*

Source: Federated Hermes as at 31 December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable – the Fund did not make sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not Applicable

● **What was the share of socially sustainable investments?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were held for efficient portfolio management and cash management purposes and were not aligned with the environmental or social characteristics. These investments included 2.9% in cash. The remaining investment included in "#2 Other" include derivatives (currency forwards only, as of the end of the period) as well as certain securities which, based on our internal analysis, did not fully demonstrate all of the characteristics required to be considered aligned with E and S characteristics.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to invest in debt securities which the Investment Manager believed would generate a high level of total return (capital growth and income) across a broad range of geographic regions and industries across global emerging markets and which also had good or improving ESG scores based on the proprietary ESG Scoring Model.

ESG Evaluation: *The Investment Manager incorporated analysis that assessed the ESG characteristics of an issuer into its investment process. The Investment Manager achieved this by using its proprietary ESG Scoring Model to assess the ESG characteristics of the issuer, whether sovereign or corporate. Generally, the fund holds overweight positions to issuers that scored well based on the proprietary ESG Scoring Model versus an underweight position to issuers that scored poorly.*

Engagement: *The Fund leveraged quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where material ESG risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on material ESG risks, or made insufficient progress in addressing them over time, it resulted in divestment from that issuer.*

In addition, 22% of the portfolio (as a proportion of engageable AUM) has been engaged with and progress has been seen on 24% of the engagement objectives. The proportion of AUM engaged on environmental and social issues and objectives is:

Environmental: 22%

Social: 14%

All figures provided above were calculated with sovereigns excluded.

Exclusions: *The Investment Manager did not invest in issuers involved in the production of Controversial Weapons, issuers that generated more than 10% of their revenue from the mining or energy generation of thermal coal or issuers that were in contravention of the principles of the UN Global Compact.*

To the extent that an issuer is determined to no longer meet the exclusion criteria noted above, the fund acted accordingly and divested from such company.

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Biodiversity Equity Fund*

Legal entity identifier: *213800BON6MFU05BCK90*

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 77.7%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 18.2%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The figures above relate to the Fund as at 31 December 2023.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the Fund were to invest in companies that are helping to protect and restore biodiversity or were reducing the threat to biodiversity through their measurable contribution to reducing one or more of the following six themes:

- Land pollution
- Marine pollution and exploitation
- Unsustainable living
- Climate change
- Unsustainable farming

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- Deforestation

A reference benchmark was not used for the purposes of attaining the sustainable investment objective.

The Fund made sustainable investments in companies which contributed to the environmental objectives of climate change mitigation, climate change adaptation and the protection and restoration of biodiversity and ecosystems as defined under the Taxonomy Regulation (EU) 2020/852. At the end of the period, the Fund had exposure to the Climate Change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund’s sustainable investment objective.

● **How did the sustainability indicators perform?**

Please see below:

Environmental Indicators:

Indicator	Fund
Hectares forest or land restored or conserved*	4,136
# species preserved*	5
MW installed renewable capacity*	4

** The percentage of engagement objectives where progress has been made

% AUM contributing to the UN SDGs:

95.9%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicator	Fund
Hectares forest or land restored or conserved*	No data available for the reporting period
# species preserved*	No data available for the reporting period

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

MW installed renewable capacity*	No data available for the reporting period
MWH renewable energy generated*	No data available for the reporting period
Metric T CO2 avoided*	No data available for the reporting period
M3 water saved*	No data available for the reporting period
GHG Emissions (Scope 1 & 2) ¹	1,759.9
Carbon Footprint (Scope 1 & 2) ¹	57.2
GHG Intensity (Scope 1 & 2) ¹	101.5
Exposure to Fossil fuels ²	5.6
Energy Production from non-renewables ³	37.9
Metric T waste generated and recycled*	No data available for the reporting period
MT Food loss/waste avoided*	No data available for the reporting period

*Source: Please note that data was unavailable at the time of reporting because the fund launched in March 2022 and there is a one year lag to the data.

All other data in the table is sourced from Sustainalytics PAI Report as at 31 December 2022.

¹ We are currently utilising two different data sources for carbon reporting in our factsheets and SFDR periodic reporting, hence you will see differences in the reported figures. The main reasons for this difference is due to two different methodologies used by the data providers on estimating carbon emissions where reported data is not available, varying coverage of companies and different sources for financial data used in the calculation. It is also worth noting, we apportion owned emissions using the market cap methodology in the factsheets whereas we use EVIC (as prescribed by the regulator) in the regulatory reporting.

² The Fund’s exclusions are based on companies with a minimum of 5% revenue exposure to fossil fuels. The regulatory reporting analysis provided by Sustainalytics shows companies with any exposure. Within the portfolio, Tetra Tech is flagged as having exposure to fossil fuels, although the exposure relates to water and environmental efficiency.

³ Within the guidelines, there is little scope for nuance. Furthermore, the low coverage means that the data does not present an accurate view of the portfolio.

2022 Yr End Social Indicators

Indicator	Fund
Violation of UNGC & OECD Guidelines for Multi-national enterprises*	0.0
# people with access to nutritious food	No data available for the reporting period

Source: Federated Hermes / Net purpose as at 31 December 2021. There is a lag in data because the figures are based on company disclosures, which are updated on an annual basis after the reporting period.

2022 yr end Engagement activity

Indicator	Fund
Engagement Activity as a % of AUM*	63
Engagement objectives progress**	38

Engagement activity covers the period since the inception of the fund on 21 March 2022.

*The percentage of asset under management within a fund that is engaged with.

** The percentage of engagement objectives where progress has been made

2022 yr end % AUM contributing to the UN SDGs

95.4%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The assessment of sustainable investments to identify where companies may have caused significant harm included:

- (i) Taking into account all adverse impact indicators and other relevant ESG indicators through the Investment Manager's sustainability assessment to identify if a company had any sustainability risks;*
- (ii) Screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and*
- (iii) Identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future .*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the company was not considered a sustainable investment and so the Fund did not invest in such companies.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

All mandatory PAIs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager's sustainability assessment in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any companies which were in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Fund to avoid investment in these companies.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified through a proprietary framework which considered the sustainability risks and opportunities for each company, and used the breadth and depth of the Investment Manager's engagement data to put this analysis in context.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes ("EOS") and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified the company was identified as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country</i>

Real Estate	0
Utilities	0.74

Source: Federated Hermes as at 31 December 2023.

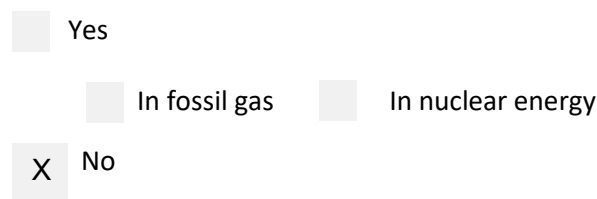

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund committed that a minimum of 2% of its investments would be aligned with the environmental objectives under the EU Taxonomy Regulation. At 31 December 2023, the proportion of Taxonomy-aligned investments was 8.76% of the Fund, weighted by revenue alignment. The figures below are the same regardless of whether we include or exclude sovereign bonds.

Please note that the current data we have covers climate change mitigation and not climate change adaptation. In addition, all of the data in the analysis is currently estimated. The main reason being that many companies are yet to report on the EU Taxonomy. However, some have started to, but this has not yet been captured in the Sustainalytics analysis. As such, we believe the alignment figures are underestimated and expect the figure to increase markedly.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

The Fund committed that a minimum of 1% of its investments would in transitional and enabling activities under the Taxonomy Regulation. At the 31 December 2023, the proportion of investments in Taxonomy-aligned transitional and enabling activities was 6.39% of the Fund, weighted by revenue alignment.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 9.1%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Fund committed to a minimum of 90% in sustainable investments, but due to the proposed dynamic allocation between environmentally and socially sustainable investments, respectively, a minimum of 30% of the investments underlying this Fund would be invested in sustainable investments with an environmental objective that is not aligned with the Taxonomy.

As of the end of December 2023, 40.0% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

● **What was the share of socially sustainable investments?**

We committed that a minimum of 10% of the Fund would be invested in sustainable investments with a social objective. As of the end of December 2023, 18.2% of the Fund was invested in socially sustainable investments

● **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The portfolio held 4.1% in cash at the end of the period. Although derivatives can be held for efficient portfolio management purposes, there were no investments in derivatives during the period and no other holdings are classified as “other”. As such, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The sustainable investment opportunity that the strategy addressed was the superior growth that can compound over time from identifying companies adopting innovative approaches to tackling issues facing society and whose growth is not solely driven by the normal economic cycle. In order to achieve the sustainable investment objective, the Fund targeted investment in global companies identified as contributing to one or more of six environmental or social investment themes, which are aligned to the United Nations Sustainable Development Goals (UN SDGs).

- *Land pollution*
- *Marine pollution and exploitation*
- *Unsustainable living*
- *Climate change*
- *Unsustainable farming*
- *Deforestation*

The Investment Manager used a proprietary ‘Impact Database’ to analyse sustainable investments and to determine which of the Fund’s themes (as mentioned above) an investment contributed to. The database drew on data from company, sector, and impact related industry reports. It provided theme specific KPI outputs including, but not limited to: MWH renewable energy generated and Metric T CO2 avoided (Energy Efficiency) and M3 water saved (Water).

At a portfolio level, the Investment Manager could therefore measure what percentage of the Fund was contributing to each individual theme (and therefore SDG) to measure the attainment of the sustainable objectives.

The Investment Manager’s stock selection process comprised of three primary considerations:

(i) The Fundamentals of the business model: the Investment Manager sought to understand historic financial metrics and competitive dynamics and, in conjunction with the thematic framework, identify those who were capable of sustaining strong growth over the long-term. Alongside this, the Investment Manager sought to identify companies bringing value to society, rather than drawing from it.

(ii) ESG Metrics: the Investment Manager considered how well companies managed environmental, social and governance factors (including how companies limited their emissions, how they ensured product safety, how they managed diversity in the workforce and how their board was structured). When looking at the ESG profile of a company, consideration was given to key quantitative metrics such as corporate transparency, approach to materiality (being those ESG topics that could have meaningful financial consequences), and the effect of products and services on broader society.

(iii) Product Impact: involved a thematic analysis whereby the Investment Manager sought to understand the broader benefit or cost of each company. As well as looking at companies which “do no significant harm”, the Investment Manager also looked beyond this and, where appropriate, the portfolio actively targeted those companies seeking help protect and restore biodiversity.

All portfolio holdings have been through the above process and, therefore, all portfolio holdings have undergone a sustainability analysis.

Engagement: Where material ESG risks were identified, the Investment Manager worked either directly or with the in-house stewardship team, EOS to engage with companies to mitigate those risks and promote good practices. Engagement occurred through meetings with company boards & management and through

exercising voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, specific targets and timelines were set in relation to that engagement, these targets differed at an individual company engagement level.

Where a company was not receptive to engagement on material ESG risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.

69% of the portfolio (as a proportion of AUM) has been engaged with and progress has been seen on 39% of engagement objectives. The proportion of AUM engaged on environmental and social issues and objectives was:

Environmental: 68%

Social: 64%

Please note that because we often have a variety of engagement objectives, covering environmental, social and governance issues, the proportion of AUM engaged on E & S issues will differ from the overall engagement figure.

An example of an engagement was a call on biodiversity with Novozymes. We met with the company to exchange views on the outcome of COP15, where both we and the company were active. We broadly agreed that the Global Biodiversity Framework that came out of COP15 covered many key areas, including phasing out subsidies that are harmful to biodiversity, addressing the impact of hazardous pesticides, and recognising the role of Indigenous people.

The company explained its focus on the sections about access and benefit sharing, and digital sequence information. We advocated for a clear role for private finance to be articulated and for biodiversity disclosure requirements for companies, both of which are reflected in the framework. The company explained that it is following biodiversity reporting requirements that are emerging from the EU, the Global Reporting Initiative and Carbon Disclosure Project.

We strongly encouraged the company to also review and prepare for disclosure in-line with the Task Force on Nature-related Financial Disclosure (TNFD). We were pleased to hear that the company has signed up to pilot the science-based target for nature programme and agreed to keep in touch on progress. We shared our views about how the company's products are already helping to address the five main drivers of biodiversity loss, and followed up in more detail in writing.

We encouraged it to expand the existing focus on carbon by applying a biodiversity lens to its business, including in strategy, and research and development. We asked for a biodiversity strategy to be developed and disclosed. We were pleased to hear that there will be a presentation about biodiversity to the senior leadership team soon. We encouraged it to keep thinking about the governance, resourcing and expertise required to effectively address biodiversity loss.

Subsequently, Ingrid Kukuljan, FHL's head of impact and sustainable investing, was invited to present to senior management about how the company could become a leader on biodiversity. She highlighted the risks of biodiversity loss to society and the economy. She outlined how the company could strengthen its existing sustainability strategy by increasing the focus on biodiversity. The second half of the presentation explained how the company could contribute to addressing each driver of biodiversity loss through existing and future products. The presentation was very well received by the company.

Exclusions: The Investment Manager will not invest in companies involved in specified activities, where those activities contribute to company revenues above prescribed revenue thresholds. Excluded activities include fossil fuels, electricity utilities not aligned with a 1.5 degree scenario, Controversial Weapons, conventional weapons, nuclear power, tobacco, gambling, adult entertainment, alcohol, GMO crop production and companies in contravention of the principles of the UN Global Compact.

The Fund has not invested in any companies that violated or breached the exclusions list.

Additionally, as part of the investment strategy, the Investment Manager assessed the corporate governance of a company by reference to its policy on good governance and through the use of the

Investment Manager’s proprietary corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager assessed, among other things, a company’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

A company was considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) met any one of the following criteria:

- *the company’s corporate governance was in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or*
- *the company’s corporate governance was determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer;*
- *or the Investment Manager and/or EOS was engaging with the company to address enhancements to the company’s governance practices, as further detailed in the section of the fund supplement annex titled “What investment strategy does this financial product follow?”*
- *or, (ii) when viewed collectively, were determined by the Investment Manager to adequately meet the criteria set forth above.*

A company was presumed not to be following good governance practices if there were abuses of power or severe controversies involving the relevant company, which were not mitigated through subsequent demonstrative actions.

Further information on the Investment Manager’s good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

How did this financial product perform compared to the reference sustainable benchmark?

- **How did the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes China Equity Fund*

Legal entity identifier: *213800KLE7HKNN6ZD806*

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- potential for improvement to ESG factors; and/or
- a willingness to engage on any material ESG issues; and/or
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics.

Derivatives were not used in the period and, as such, did not contribute to the attainment of the Fund's environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Environmental Indicators:	Fund
GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	2271.55 (tCO2eq)
Carbon Footprint (Scope 1 & 2+3 : (tCO2eq/USDmn))	466.05 (tCO2eq/USDmn)
Social Indicators:	
Violation of UNGC principles 4 & 5	0%
Engagement Activity:	
Engagement Activity as a % of AUM	57%
Engagement progress	42%

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators

GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	7,698.83
Carbon Footprint (Scope 1 & 2+3 : tCO2eq)	487.99

2022 Yr End Social Indicators

Violation of UNGC principles 4 & 5	0%
------------------------------------	----

2022 yr end Engagement Activity

Engagement Activity as a % of AUM	52%
Engagement progress	45%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the assessment.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment, or identified the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

<i>Largest investments</i>	<i>Sector</i>	<i>% Assets</i>	<i>Country of listing</i>

Source: Federated Hermes as at 31 December 2023

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	% of Assets
Consumer Discretionary	29.13
Industrials	15.74
Information Technology	14.83
Communication Services	12.45
Consumer Staples	7.59
Materials	5.1
Financials	4.15
Health Care	3.92
Energy	2.83
Utilities	2.25
Real Estate	0.00

Source: Federated Hermes as at 31 December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – the Fund did not make sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The portfolio held 2.03% in cash at the end of the period.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager followed a bottom-up stock selection process and a contrarian investment style that sought exposure to companies in China that were attractively priced relative to their quality. In selecting investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristics through the following processes:

ESG Improvers: The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. The assessment included quantitative analysis overlaid by qualitative assessment that incorporated any nuanced considerations obtained through engagement with the company. The ESG factors included, but were not limited to, specific environmental characteristics (such as a company’s carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as employee satisfaction and turnover). The ESG assessment sought to identify companies that might have had ESG deficiencies but which had shown the potential and/or desire to improve their ESG behaviours, through identified management goals, provided the companies could evidence good governance practices in accordance with the Investment Manager’s policy on good governance, as outlined below. This could be further supported via engagement with the company or where the company was subject to related advocacy with relevant government bodies and/or regulators.

Engagement: The Investment Manager leveraged quantitative and qualitative engagement insights generated by EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with certain companies to address those risks. Engagement was conducted in the context of the company’s sector and regional policy, where corporate governance standards and social safeguards could differ to international expectations in developed markets. Engagement occurred through meetings with company boards and management and through the exercise of voting rights. The Investment Manager also engaged in advocacy with government, regulators and governance associations. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company was not receptive to engagement on material ESG risks, or made insufficient progress in addressing them over time, it could have resulted in divestment of that company.

Exclusions: The Investment Manager did not invest in companies involved in specified activities where those activities contributed to company revenues above prescribed revenue thresholds . Excluded activities included Controversial Weapons, conventional weapons, tobacco, thermal coal and adult entertainment.

- **How did this financial product perform compared with the reference benchmark?**
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

Not applicable

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Global Emerging Markets ex-China Equity Fund*

Legal entity identifier: 213800YT6BJZ3GEQBL32

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32.54% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies exhibiting the following characteristics:

- reduced ESG risks;
- a willingness to engage on any material ESG issues; and
- limited to no revenue generated from excluded sectors.

No specific index has been designated as a reference benchmark for the purpose of attaining the above characteristics

The objective of the sustainable investments made by the Fund was either to: (i) further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or (ii) contribute to reducing the environmental and social impacts of the products/services that the company provides through processes

which mitigated impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

The investments underlying this Fund did not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852. However, while there was no commitment to make EU Taxonomy-aligned investments, the Fund had exposure to the climate change mitigation objective outlined in the EU Taxonomy. Data for the other objectives was unavailable at the time of reporting.

Derivatives were used in the period as an investment to gain access to a single investments and did contribute to the attainment of the Fund’s environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Environmental Indicators:	Fund
GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))	5947.51
Carbon Footprint (Scope 1 & 2+3 : tCO2eq/USDmn)	84.37
Fossil Fuels (% involved)	0.41
Non-Renewable Energy Consumption (%)	85.48
Water intensity (m3/\$mn revenue)	1021.71
Waste intensity (tonnes/\$mn revenue)	3.08

Social Indicators:	Fund
UNGC Principles/OECD Guidelines Violations (% involved)	0
Board Gender Diversity (% female)	20.04
Employee Turnover	No data available

Engagement Activity:	Fund
Engagement Activity as a % of AUM	74
Engagement progress (%)	55

Source: Sustainalytics, EOS. Water and waste data from Trucost.

● **...and compared to previous periods?**

Please note the following differences in the data sources and methodologies used to measure the performance of the sustainability indicators between the periodic report for the period ending 31 December 2022 (the “2022 Report”) and this periodic report for the period ending 31 December 2023 (the “2023 Report”):

- For all Principal Adverse Impact Indicators (“PAIIs”), we used the “issuer hierarchy” provided by Sustainalytics (SA) in the 2022 Report as the basis for measuring the performance. In the 2023 Report and going forward, we will use the Federated Hermes Limited “issuer hierarchy” which has increased the coverage across a number of sustainability indicators for the Fund’s holdings.
- For all PAIIs where financial data was needed to conduct any calculations, we used Sustainalytics data in the 2022 Report. In the 2023 Report and going forward, we will be using financial data from Factset.
- Sustainalytics Carbon Emissions data has been replaced with data from Trucost to ensure that the same data source is used across all reporting by Federated Hermes Limited.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

As a result of these differences in the data sources and methodologies, there may be a difference in data coverage in the 2023 Report compared to the 2022 Report resulting in slightly different outputs

2022 Yr End Environmental Indicators	Fund	Benchmark
<i>GHG Emissions (Total Scope 1 + 2+3 (tCO2eq))</i>	<i>2,472.59</i>	<i>20,036.17</i>
<i>Carbon Footprint (Scope 1 & 2+3 : tCO2eq)</i>	<i>116.19</i>	<i>806.51</i>
<i>Fossil Fuels (% involved)</i>	<i>1.17</i>	<i>11.23</i>

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments made by the Fund was either to further the attainment of at least one or more of the 17 United Nations Sustainable Development Goals; or to contribute to reducing the environmental and social impacts of the products/services that the company provides through processes which mitigate impacts to the environment or to stakeholders including employees, communities, supply chain employees or customers.

Sustainable investments contributed via:

- *Providing products or services that have a goal of solving environmental or social challenges we face as a society;*

AND/OR

- *Investing in reducing their environmental and social impacts and/or re-positioning their business to a more sustainable model. E.g. Investing in clean technology, divesting from fossil fuels to invest more in renewables, improving corporate practices.*

As noted above, while there was no commitment to make EU Taxonomy-aligned investments, the Fund did have exposure to climate change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of sustainable investments where companies may have caused significant harm through the products and services that they offered, and through their entire value chain, included:

- (i) taking into account all PALLs and other relevant ESG indicators through the Investment Manager's proprietary ESG Scoring Model (as detailed below) to identify if a company had any sustainability risks;*
- (ii) screening for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below; and*
- (iii) identification, through the use of third party data, of any severe controversies and that, at the time of investment, the company was taking remedial action to prevent the event occurring in the future.*

The Investment Manager also carried out a more detailed assessment of any company which operated in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the company had in place limited the amount of harm or that the company was being engaged on that topic.

Where a company was deemed to do significant harm to any sustainable objective, the investment in the company was not considered a sustainable investment.

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

All mandatory PALLs and those indicators which were deemed relevant to the Fund were taken into account in the Investment Manager's ESG assessment (see further detail below), in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in companies deemed to do significant harm.

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes. Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager identified any companies which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights). This enabled the Investment Manager to avoid investment in these companies.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considered whether companies exhibited any principal adverse impacts on sustainability factors. The consideration of the principal adverse impacts of sustainability factors was identified both through the quantitative inputs to the ESG assessment by the Investment Manager and through the Investment Manager’s qualitative review of the investee companies, to ensure that all relevant information was accurately captured and that the portfolio was not exposed to any sustainability risks not otherwise identified by the assessment.

The Investment Manager used a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”) and third party providers such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others.

Where sustainability risks were identified, the Investment Manager either elected not to continue with the investment, or identified the company as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging companies to act responsibly and improve sustainability.

The relevant PAIs on sustainability factors are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country of listing
<i>Samsung Electronic</i>	<i>Information Technology</i>	<i>9.99</i>	<i>Korea</i>
<i>Taiwan Semiconductor</i>	<i>Information Technology</i>	<i>9.62</i>	<i>Taiwan</i>
<i>Bk Rakyat</i>	<i>Financials</i>	<i>2.55</i>	<i>Indonesia</i>

Source: Federated Hermes as at 31 December 2023. All exposures are expressed as a % of the AUM of the fund.

What was the proportion of sustainability-related investments?

- **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

Sector	Weight
Information Technology	37.1
Financials	24.91
Industrials	9.57
Materials	6.84
Consumer Discretionary	6.13
Health Care	3.93
Consumer Staples	3.54
Energy	1.8
Utilities	1.57
Real Estate	1.14
Communication Services	0

Source: Federated Hermes as at 31 December 2023.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund did not commit to a minimum amount of sustainable investments with an environmental objective aligned with the EU Taxonomy, 2.54 % of the Fund’s sustainable investments were EU Taxonomy-aligned during the reference period.

These investments’ compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum amount of sustainable investments in transitional or enabling activities, 14.82% of the Fund weighted by revenue alignment was invested in such activities during the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments of the Fund weighted by revenue alignment that were aligned with the EU Taxonomy in the 2022 Report was 15.03%.

As a result of differences in the data sources and methodologies, metrics in the 2023 Report, compared to the 2022 Report are likely to have slightly different outputs

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

5.01% of the Fund’s proportion of sustainable investments was invested in environmentally sustainable investments not aligned with the EU Taxonomy.

● **What was the share of socially sustainable investments?**

21.8% of the Fund’s proportion of sustainable investments was invested in socially sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The portfolio held 3.5% in cash at the end of the period. Derivatives were used in the period as an investment to gain access to single investments. However, none of these are classified under "other".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager invested in high quality and efficient small to mid-capitalisation companies trading at attractive valuations, in global emerging markets, where conditions were supportive of growth. In selecting investments for the Fund, the Investment Manager incorporated ESG factors aimed at the promotion of the environmental and social characteristics through the following processes:

ESG Integration: *The Investment Manager incorporated analysis that assessed the ESG characteristics of a company into its investment process. To achieve this the Investment Manager conducted an assessment of a company's ESG characteristics based on a both quantified ESG metrics and through a qualitative review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The ESG factors included, but were not limited to, specific environmental characteristics (such as a company's carbon intensity (tonnes of scope 1 and 2 GHGe per \$m sales)) and social characteristics (such as Board gender diversity and employee turnover). The ESG assessment favoured companies with reduced ESG risks and which complied with the Investment Manager's policy on good governance practices. The Investment Manager was able to invest in companies with poor ESG factors where the company had shown a desire to improve their ESG behaviours.*

Engagement: *The Investment Manager leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager was able to undertake direct engagement with the company or work with EOS to engage with companies to address those risks. Engagement occurred through meetings with company boards and management and through the exercise of voting rights. Engagement sought to identify measurable objectives to deliver positive change within set time periods. Where there was engagement with a company, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the company; (ii) confirm that the company accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where a company was not receptive to engagement on sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that company.*

Exclusions: *The Investment Manager did not invest in companies involved in specified activities where those activities contributed to company revenues above prescribed revenue thresholds. Excluded activities included Controversial Weapons, weapons for retail use, tobacco, unconventional fossil fuels and companies evaluated to be in contravention of the principles of the UN Global Compact.*

How did this financial product perform compared to the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: *Federated Hermes Sustainable Global Investment Grade Credit Fund*

Legal entity identifier: *2138002IUNKYRRMCTS17*

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 60.55%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 35.77%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund delivered a overall lower environmental footprint than the Benchmark (as indicated below) through investment in debt securities of companies that are seeking to improve their effect on people and the planet through their products or services.

The ICE BofA Global Corporate Index was used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. Please note that the coverage ratio of the Fund and benchmark is low hence doesn't capture all portfolio holdings.

The Fund made sustainable investments in issuers which contributed to the environmental objectives of Climate Change Mitigation and Climate Change Adaption as defined under the Taxonomy Regulation (EU) 2020/852.

Derivatives are used within the Fund to manage exposures, however were not used for the attainment of the Fund’s sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

Unfortunately, the low coverage ratios, for both the environmental and social indicators, for the Fund means the data doesn’t reflect the full portfolio and hence we cannot draw objective conclusions from the data.

Environmental Indicators:

Indicator	Fund	Benchmark
GHG Emissions (Scope 1 & 2: tCO2eq)	3708.41	5900.02
Carbon Footprint (Scope 1 & 2: tCO2eq/USDmn)	47.87	76.16
Exposure to Fossil Fuels (% involved)	0	10.53
Energy Production from Non-Renewables (%)	18.93	35.57
Water Emissions (t/USDm)	0	0
Hazardous Waste Ratio (t/USDm)	0.64	1.34

Social Indicators:

Indicator	Fund	Benchmark
Violation of UNGC (%)	0	2.11
Board Gender Diversity (% female)	36.91	34.72
Controversial weapons (% involved)	0	1.33

Engagement activity and % Investment in excluded sectors

Indicator	Fund
Engagement Activity as a % of AUM	77
Engagement progress (%)	50
% invested in excluded sectors	0

● **...and compared to previous periods?**

N/A as the Fund inception date was 20th March 2023.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Once an issuer has passed the SL Score screen and fundamental credit analysis, but prior to being determined eligible for the portfolio, the Investment Manager carries out an ‘Do No Significant Harm’ (“DNSH”) test on all issuers in the portfolio. This process ensures the Investment Manager reviews each issuer individually for historic controversies and qualitatively assesses the issuer against all mandatory corporate principal adverse impact indicators. The DNSH test has been devised to:

- (i) take into account all adverse impact indicators and other relevant ESG indicators, to identify if an issuer has any sustainability risks;*
- (ii) screen for contraventions of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as detailed below;*
- (iii) identify, through the use of third party data, of any severe controversies and that, at the time of investment, the issuer is taking remedial action to prevent the event occurring in the future.*

The Investment Manager may carry out a more detailed assessment of any issuer which operates in an industry or sector that could be considered more harmful with a view to ensuring that either the practices the issuer has in place limit the amount of harm or that the issuer is being engaged on that topic.

Where an issuer is deemed to do significant harm to any sustainable objective, the Investment Manager will not invest, thereby ensuring the investments do not cause significant harm to any environmental or social investment objective.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager takes into account all PAIs indicators and uses those indicators which are deemed relevant to the Fund in the Investment Manager’s proprietary DNSH tests, in order to determine current and potential adverse impacts on sustainability factors and to avoid investment in issuers deemed to do significant harm.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Using a mix of qualitative and quantitative assessments based on available data, the Investment Manager seeks to identify any issuers which are in contravention of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (including the ILO Declaration Fundamental Principles and Rights at Work, the eight Fundamental conventions of the ILO and the International Bill of Human Rights) and does not invest in these issuers

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the investment strategy, the Investment Manager considers whether issuers exhibit any principal adverse impacts on sustainability factors. This is carried out through the DNSH test carried out on all issuers prior to investment, whereby each issuer is considered and assessed against all relevant mandatory principal impact indicators, as well as select voluntary or other adverse impact indicator, as relevant. This analysis enables the Investment Manager to ensure that all relevant information is accurately captured and that the portfolio is not exposed to any sustainability risks not otherwise identified by the outputs. The Investment Manager uses a range of sources to consider the principal adverse impacts on sustainability factors including proprietary analysis from EOS at Federated Hermes (“EOS”); third party providers, where available, such as ISS, CDP, MSCI, Sustainalytics and Trucost amongst others; and issuers’ own disclosures.

Where sustainability risks are identified, the Investment Manager may elect not to continue with the investment, or may identify the issuer as a candidate for engagement, with the aim of reducing underperformance which may arise from poor ESG behaviours whilst also encouraging issuers to act responsibly and improve sustainability.

The relevant PAIs are disclosed within the sustainability indicators detailed earlier.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Verizon	Telecommunications	1.11%	United States
HP	Technology & Electronics	1.09%	United States
Apple	Technology & Electronics	1.09%	United States
NXP	Technology & Electronics	1.02%	Netherlands
Gilead Sciences	Healthcare	1.02%	United States
ING	Banking	1.02%	Netherlands
HSBC	Banking	1.01%	United Kingdom
Allianz	Insurance	0.98%	Germany
ABN AMRO Bank	Banking	0.97%	Netherlands
Unilever	Consumer Goods	0.97%	United Kingdom
T-Mobile	Telecommunications	0.96%	United States
Cigna	Healthcare	0.95%	United States
Telefonica	Telecommunications	0.95%	Spain
Comcast	Media	0.91%	United States
Cisco	Technology & Electronics	0.90%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31 December 2023.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

Source: Federated Hermes, as at end of December 2023. The total exposure doesn't equal to 100% as the Fund uses leverage and these calculations are based on AUM. Please note that "Other" includes cash and sovereign exposures. *Please note that Other environmental includes index exposures due to exposure being elevated as at reporting date.

● **In which economic sectors were the investments made?**

Investments were made in all Meryll Lynch (Level III) Sector groups: Automotive, Banking, Basic Industry, Capital Goods, Consumer Goods, Energy, Financial Services, Healthcare, Insurance, Leisure, Media, Real Estate, Retail, Services, Technology & Electronics, Telecommunications, Transportation, Utility.

Sector	Fund Weight
Automotive	3.29%
Banking	11.46%
Basic Industry	4.60%
Capital Goods	3.66%
Consumer Goods	1.24%
Energy	0.35%
Financial Services	1.72%
Healthcare	7.35%
Insurance	9.09%

To comply with the EU Taxonomy, the criteria for **fossil gas** include

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sector	Fund Weight
Leisure	0.00%
Media	0.91%
Real Estate	0.24%
Retail	2.40%
Services	1.17%
Technology & Electronics	6.41%
Telecommunications	9.17%
Transportation	0.00%
Utility	3.63%

Source: Federated Hermes as at 31st December 2023. Off benchmark sectors include: Cash, Index and Sovereign.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund committed to a minimum level of 1% sustainable investments with an environmental objective aligned to the EU Taxonomy, 2.23 % of the Fund weighted by revenue alignment was EU Taxonomy-aligned during the reference period.

These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

While the Fund did not commit to a minimum level of sustainable investments in transitional or enabling activities, 2.23% of the Fund **weighted by revenue alignment** was invested in such activities during the reference period.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

N/A as the Fund inception date was 20th March 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

49.60% of the Fund was invested in environmentally sustainable investments, not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

35.77% of the Fund was invested in socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The portfolio held 62.60% in “Other” at the end of the period. “Other” investments include cash, sovereign bonds and derivatives used for efficient portfolio management purposes.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager will invest in a diversified portfolio of Investment Grade corporate bonds, as rated by Moody’s Investor Services, Standard & Poor’s or Fitch Ratings, and may use credit default Swaps. The Investment Manager intends to use an active approach to seek positive risk-adjusted returns through a thorough analysis of individual Investment Grade corporate issuers, which it believes are “sustainable leaders” (as defined below) and will generate positive returns. This fundamental, bottom-up analysis of individual issuers will be used to generate returns through anticipated price changes. The securities in which the Fund may invest will be selected on a global basis. However, investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries. The Investment Manager also seeks to achieve a better environmental footprint compared to the Benchmark.

The Investment Manager aims to achieve the sustainable objective by actively target those companies seeking to improve their effect on people and the planet through their products or services. This can be summarised as: (i) companies that avoid harm; (ii) companies that provide benefits to all stakeholders; and (iii) companies that contribute to solutions. The Fund will invest in issuers identified by the Investment Manager as “sustainable leaders”, in order to gain exposure to the growth and development of such companies, which can compound over time. Investing in “Sustainable leaders” utilises negative and positive screening techniques to identify and invest in issuers that together form a portfolio that is more sustainable than the Benchmark. The Fund negatively screens companies by excluding those engaged in, or that derive revenues from, specified activities. Positive screening is achieved using the Investment Manager’s SL Scoring Model, to concentrate investments in companies that demonstrate best-in-class sustainability characteristics, including high quality reporting, robust risk management practices and a low environmental footprint relative to peers. The SL Score is a ranked assessment of the sustainability leadership of issuers, which establishes ranking and momentum in sustainability, as well as recognition of and response to non-fundamental risks. The term momentum is used in this instance to capture progress, planning and leadership in the development and enhancement of sustainable practices.

The Investment Manager uses the SL Scoring Model to determine the investable universe and contribute towards portfolio construction. Issuers with a passable SL Score will then be assessed through fundamental credit analysis and portfolio metrics, before a further analysis of each issuer is carried out for their contribution towards environmental or social objectives, significant harm to those objectives and good governance.

The SL Score is calculated by way of a quantitative proprietary tool to assess an issuer’s environmental and social behaviours and to produce two scores (on a scale of 0 –100), one environmental and one social. The SL Score is designed to ensure that an issuer’s most impactful behaviours drive their score; as the materiality of environmental and social behaviours vary between sectors, environmental or social scores may be magnified to reflect the proportional significance of sustainability considerations that may otherwise be diluted. The Investment Manager then takes a weighted average of the two scores, which delivers a preliminary SL Score for an issuer. The preliminary SL Score is reviewed by credit and sustainability analysts and either confirmed or amended, as required.

The SL Score for an issuer can range from 1 to 5, where an SL Score of 1 indicates a sustainable leader with momentum and 5 indicates a sustainability failure. An issuer with an SL Score of 1 will typically exhibit high quality disclosures, good visibility of their sustainability trajectory and often advanced management of environmental and social risks. At the other end of the spectrum, an issuer with an SL Score of 5 would be characterised by low levels of intent or progress towards more sustainable practices, with poor disclosures and involvement in controversial activities. As detailed above, the SL Score is derived from the weighted average combination of the Investment Manager’s proprietary environmental and social scores, which rewards issuers displaying leadership and momentum in sustainable practices, but penalises laggards, poor disclosure and so-called controversial companies. At least 90% of issuers in the portfolio will have an assigned SL Score. Where

the Investment Manager is unable to calculate an issuer’s SL Score (for example, privately owned companies that do not publicly disclose enough data to calculate underlying environmental or social scores), it will revert to other methods of sustainability analysis to determine if an issue meets the criteria for a sustainable leader. This can include other proprietary sustainability scores such as the Investment Manager’s assessments on decarbonisation potential. The Investment Manager will not initiate a position in an issue that has been issued by a company with a SL Score of 4 or 5. Should a debt security issuer held by the Fund have their SL Score downgraded by the Investment Manager to a 4 or 5, this will result in the disposal of the security. The Investment Manager will not target a specific average SL Score for the Fund, as this will be considered along with a number of portfolio metrics that will determine the holdings and size at any given point. Such portfolio metrics considered by the Investment Manager are financial in nature and relate to duration, credit rating, sector weighting in the portfolio, macroeconomic factors, contributions to other risk measures such as volatility, default risk and other return drivers such as an increase in value or expected income derived from the issue.

In addition to the fundamental and sustainability analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance (“ESG”) qualities of the issuer. The Investment Manager’s approach to ESG integration in its investment analysis draws upon internal and external sources to assign an ESG score to each country and company in the portfolio. As a result of the consideration of ESG factors, the Fund’s weighted average ESG rating will be better than the weighted ESG rating of the Benchmark after eliminating the worst 20% of securities, ensuring the portfolio meets a stricter criteria than the Benchmark as a whole. The weighted average ESG ratings of the Fund and of the Benchmark are derived from multiplying each issuer’s ESG score by its portfolio/benchmark weighting, as applicable, and adding these together.

To generate these ESG scores, the Investment Manager uses Federated Hermes’ proprietary scoring methodology to score a country or a company’s ESG behaviours, assigning the ESG score on a scale of 1 to 5. This proprietary ESG score favours companies with lower ESG risks and companies with good governance, who are actively improving their focus on ESG issues. The Investment Manager may invest in companies with poor ESG scores where the company has shown a desire to improve their ESG behaviours and can demonstrate good corporate governance practices and/or a willingness to engage on issues if they arise. The Investment Manager will generally exclude the issuers with an ESG score of 5 from the investment universe, save for hedging and efficient portfolio management purposes. In constructing the portfolio, the Investment Manager will place greater emphasis on an issuer’s SL Score and fundamental credit analysis than its ESG Score.

Once an issuer has passed the screening and fundamental analysis assessments, it is put through three further, separate assessments for DNSH, Good Governance (both as described above) and Sustainable Investment (“SI”) to confirm its eligibility for investment. The SI assessment is a qualitative analysis that considers issuers’ contribution to the achievement of the SDGs. If the Investment Manager concludes an issuer to do no significant harm, exhibit good governance and constitute a sustainable investment, it becomes eligible for investment in the portfolio.

Engagement: The Fund leveraged quantitative and qualitative engagement insights generated by the Investment Manager and EOS through its range of active ownership services. Where sustainability risks were identified, the Investment Manager worked with EOS to engage with issuers to address those risks. Engagement occurred through meetings with management and exercising voting rights. Engagement sought to develop a plan to address the issue and deliver positive change within set time periods. Where there was engagement with an issuer, a four-step milestone approach was implemented to: (i) raise the issue at the appropriate level within the issuer; (ii) confirm that the issuer accepts that the issue must be addressed; (iii) develop a plan to address the issue; and (iv) implement the plan satisfactorily. Where an issuer was not receptive to engagement on any sustainability risks, or made insufficient progress in addressing them over time, it could have resulted in divestment from that issuer.

Exclusions: The Investment Manager did not invest in companies involved in specified activities, where those activities contributed to issuer revenues above prescribed revenue thresholds (see below for further detailed information). Excluded activities include fossil fuels including thermal coal, gas and oil, Controversial Weapons, conventional weapons, nuclear power, tobacco, cannabis, GMO crop production and companies in contravention of the principles of the UN Global Compact.

As part of the investment strategy, the Investment Manager assesses the corporate governance of an issuer by reference to its policy on good governance and through the use of the Investment Manager’s proprietary ESG Scoring Model, corporate governance tool and qualitative analysis, including insights from its own research and EOS. In considering good governance, the Investment Manager will assess, among other things, an issuer’s management structure, employee relations, staff remuneration and compliance with applicable tax rules.

An issuer is considered to be following good governance practices if the factors set forth above, and any other factors determined to be material by the Investment Manager, (i) meet any one of the following criteria:

- the issuer’s corporate governance is in line with the best practices as defined by EOS in the Responsible Ownership Principles and Regional Corporate Governance Principles documents; or
- the issuer’s corporate governance is determined to be in-line with peers both in industry and/or region, taking into account the size of the issuer and how that may affect the governance of the issuer in the long-term, or
- the Investment Manager and/or EOS is engaging with the issuer to address enhancements to the issuer’s governance practices, as further detailed in the section of this annex titled “What investment strategy does this financial product follow?”

or, (ii) when viewed collectively, are determined by the Investment Manager to adequately meet the criteria set forth above.

An issuer is presumed not to be following good governance practices if there have been abuses of power or severe controversies involving the relevant company, which have not been mitigated through subsequent demonstrative actions.

Further information on the Investment Manager’s good governance policy and the EOS Responsible Ownership Principles and Regional Corporate Governance Principles can be found at <http://www.hermes-investment.com/sustainability-related-disclosures>

How did this financial product perform compared to the reference sustainable benchmark?

- **How did the reference benchmark differ from a broad market index?**

The reference benchmark does not differ from a broad market index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The ICE BofA Global Corporate Index is a broad market index that does not take into account any ESG or Sustainability criteria. The reference benchmark is therefore not continuously aligned with the sustainable investment objective of the Fund.

- **How did this financial product perform compared with the reference benchmark?**

The Fund delivered a carbon footprint lower than the Benchmark* through investment in debt securities of companies that are adapting their business models to reduce their environmental impact on climate change. Please find below the carbon footprint of the fund and benchmark:

Indicator	Fund	Benchmark	% Fund covered**	% Benchmark covered**
-----------	------	-----------	------------------	-----------------------

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Federated Hermes Investment Funds Public Limited Company
Sustainable Finance Disclosure Regulation (“SFDR”) - Unaudited

<i>Carbon Footprint (Scope 1,2,&3: tCO2eq)</i>	<i>109.27</i>	<i>132.46</i>	<i>97.6</i>	<i>86.4</i>
<i>Water Footprint (Direct)</i>	<i>1639.09</i>	<i>3649.1</i>	<i>97.6</i>	<i>97.6</i>
<i>Waste Footprint (ex recycled#0)</i>	<i>2.72</i>	<i>523.1</i>	<i>97.6</i>	<i>86.4</i>

**The ICE BofA Global Corporate Index is used as a reference for comparing the environmental footprint of the Fund compared to the benchmark. Please note that the coverage ratio of the fund and benchmark is low hence doesn't capture all portfolio holdings.*

*** Unfortunately the low coverage ratios for the fund means the data doesn't reflect the full portfolio and hence we cannot draw objective conclusions from the data.*

● **How did this financial product perform compared with the broad market index?**

See answer to the previous question.
