BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon FutureLegacy 3 Fund

INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00BQH86S85)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To achieve capital growth and potential for income over the long term (5 years or more) while being managed to a pre-defined level of risk. The Fund will aim to maintain a risk profile classification of 3 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

POLICY

The Fund will:

- invest in a portfolio of UK and international securities;
- typically, in normal market conditions, maintain an exposure to equities (through physical and derivative exposure) of between 10%-50% of the Fund's Net Asset Value (NAV) which in the Investment Manager's view is consistent with its risk profile;
- invest in companies and sovereign issuers that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria. The Investment Manager's sustainability criteria exclude companies that participate in certain activities and involve other general and company level ESG-related analysis of a company's activities. More information on the Investment Manager's sustainability criteria can be found in the Prospectus and on the ACD's website at www.bnymellonim.com/orl;
- follow a broad 'multi-asset' portfolio approach (e.g. company shares (i.e. equities) and similar investments, bonds and similar debt investments and cash);
- invest in bonds, issued by governments and companies, with high and low credit ratings (i.e. investment grade and/or sub-investment grade bonds as rated by Standard and Poor's or similar agencies);
- be actively managed typically by using forward-looking expectations of volatility. The Investment Manager uses its own internal risk model, whilst also considering external independent risk profiling methodologies. Based on a risk profile scale of 1 (lowest) to 10 (highest), the Fund will be targeting a risk profile of 3, but this is not guaranteed;
- This risk profile is not the same as the risk and reward category shown below. The risk profile of the Fund is currently assessed against the risk ratings scale provided by Dynamic Planner, but is subject to change at the ACD's discretion;

- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and
- limit investment in other collective investment schemes (including but not limited to another sub-fund or sub-funds of the Company) to 10% of the Fund's Net Asset Value (NAV) in aggregate.

The Fund may:

- invest more than 35% of its Net Asset Value (NAV) in government and public securities issued or guaranteed by a single state, local authority or public international body;
- invest up to 10% of its Net Asset Value (NAV) in contingent convertible securities (CoCo's);
- allocate up to 8.5% of its Net Asset Value (NAV) to alternative risk premia strategies. Such strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) through instruments such as structured notes, derivative instruments and collective investment schemes;
- invest in emerging markets; and
- invest significantly in cash and cash-like investments.

Benchmark: The Fund is actively managed without benchmark-related constraints. The Fund uses a composite index, comprising 15% SONIA GBP, 55% ICE BofAML Global Broad Index GBP Hedged and 30% MSCI ACWI GBP NR as a point of reference (comparator) against which the ACD invites Shareholders to compare the Fund's performance. The ACD considers the composite index to be an appropriate comparator because it includes a broad representation of the asset classes, sectors and geographical areas in which the Fund predominantly invests.

OTHER INFORMATION

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. As this Fund has less than 5 years performance data available, it is based on simulated volatility. It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its simulated historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Changes in Interest Rates & Inflation Risk: Investments in bonds/ money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") risk: The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

Volcker Rule Risk: The Bank of New York Mellon Corporation or one of its affiliates ("BNYM") has invested in the Fund. As a result of restrictions under the "Volcker Rule," which has been adopted by U.S. Regulators, BNYM must reduce its shareholding percentage so that it constitutes less than 25% of the Fund within, generally, three years of the Fund's establishment (which starts when the Fund's manager begins making investments for the Fund). Risks may include: BNYM may initially own a proportionately larger percentage of the Fund, and any mandatory reductions may increase Fund portfolio turnover rates, resulting in increased costs, expenses and taxes. Details of BNYM's investment in the Fund are available upon request.

CoCo's Risk: Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Sustainable Funds Risk: The Fund follows a sustainable investment approach, which may cause it to perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities. The Fund will not engage in stock lending activities and, therefore, may forego any additional returns that may be produced through such activities.

Investment in Infrastructure Companies Risk: The value of investments in Infrastructure Companies may be negatively impacted by changes in the regulatory, economic or political environment in which they operate.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Charges

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST

Entry charge	0.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

CHARGES TAKEN FROM THE FUND OVER A YEAR

Ongoing charge*	0.52%
-----------------	-------

CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS

Performance fee	None
-----------------	------

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the share class was launched within the reported period. The Fund's annual report for each financial year will include details on the exact charges made. This may vary from year to year.

Currently BNY Mellon Fund Managers Limited is temporarily partially absorbing (capping) some of the expenses incurred by the Fund which is reflected in the ongoing charge figure stated here. There is no guarantee that BNY Mellon Fund Managers Limited will continue to cap the Fund's expenses and therefore the Fund's ongoing charge could increase significantly.

*It should be noted that the ongoing charge figure shown includes ongoing charges in respect of other open-ended investment funds but excludes ongoing charges from closed-ended funds held. The ongoing charges from closed-ended funds held were 0.01% as at 31 December 2023.

More information about charges is available in the "Fees and Expenses" section of the Prospectus.
