The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may get back significantly less than the original amount invested.

The Fund may experience the following risks:

Single sector risk: investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.

Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Listed Infrastructure Risk: the Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.
