

Fund description

Investment objective and overview

The investment objective of the Fund is to provide income. The Fund also seeks to achieve capital appreciation. The Fund seeks to achieve this objective through investing at least two thirds of its assets in UK equities including ordinary shares and preference shares, without restrictions either by company, size or industry. The Fund may also invest in non-UK equities, fixed interest securities, convertible bonds, units of collective investment schemes, money market instruments, warrants, cash, near cash and deposits.

Opportunities

The Fund invests in a broadly diversified investment universe and seeks opportunities for returns wherever they exist. The objective is to identify the potential investments that, in the Investment manager's opinion, are attractive and could generate positive opportunities for investors.

A highly qualified and experienced management team actively manages the Fund on the basis of a fundamental valuation approach.

Risk factors

Capital at Risk: all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.

Equity: investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.

Investment Positions: Positions may increase in size relative to the size of the Fund. The risk is monitored by regularly adapting positions.

List Not Exhaustive: This list of risk factors is not exhaustive. Please refer to the relevant Fund's Prospectus.

Past performance is not an indicator of future performance and current or future trends. The performance values refer to the net asset value and are calculated without the commission and costs incurred on issue, redemption or swapping (e.g. transaction and custody costs of the investor). The fund does not include the security of capital which is characteristic of a deposit with a bank or building society. The indications are based on figures denominated in GBP. If this currency is different from the currency of the country in which the investor is resident, the return may increase or decrease as a result of currency fluctuations. Indices cannot be purchased directly.

Glossary

Ongoing charge: the ongoing charge is a measure of the annual expenses incurred by a fund and is expressed as a percentage. It allows an accurate comparison of the costs of funds from different companies to be made.

Risk rating: The summary risk indicator is a combination of a market risk measure and credit risk measure. The market risk measure is based on an annualized volatility measure, calculated over the last 5 years of history if available. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate. This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. The credit risk measure is assessing credit and concentration risk within the portfolio. The indicators are not guaranteed and may shift over time. The lowest category does not mean 'risk free'.
