

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Income Opportunities Fund

A sub-fund of Ninety One Funds Series i
managed by Ninety One Fund Managers UK Limited

Class A Accumulation shares in sterling
ISIN: GBO031074817

Objectives and investment policy

The Fund aims to provide income with the opportunity for capital growth (to grow the value of your investment) over at least 5 years.

The Fund invests in a broad range of assets around the world (including in developed and emerging markets). These assets include the shares of companies, bonds (or similar debt-based assets) of borrowers, listed property securities (such as real estate investment trusts) and other alternative assets (such as investment trusts in infrastructure). Investments may be held directly in the asset itself (excluding commodities and property) or indirectly (e.g., using derivatives, exchange traded products and/or in funds).

The Fund focuses on investing in assets that offer a reliable level of income (e.g. consistent dividend or interest payments), together with opportunities for capital growth, in many market conditions. Investment opportunities are identified using in-depth analysis and research on individual companies.

The Fund may invest up to 60% in the shares of global companies. These companies may be of any size and in any industry sector.

As a result of the investment policy above it is expected that the volatility (the pace or amount of change in its value) will be lower than 75% of that of shares of UK companies (measured using the FTSE All Share Index). This level of volatility is not guaranteed and there may be times when it is exceeded.

Bonds (or similar debt-based assets) may be in any currency, have any credit rating (or no credit rating) and may be issued by any borrower e.g. governments or companies.

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares of other funds (which may be managed by a Ninety One group company, or a third party) and derivatives.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used in order to achieve the Fund's investment objectives or with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The 45% MSCI World High Dividend Yield GBP Hedged + 55% Bloomberg Global Aggregate Total Return (TR) GBP Hedged Index is used for performance comparison and risk management. The Fund does not seek to replicate the index.

The IA Mixed Investment 20-60% Shares Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk
Potentially lower rewards

Higher risk
Potentially higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because the mix of assets the Fund invests in, tends to produce returns which fluctuate more than those of cash funds but less than those of funds which solely invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Government securities exposure: The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

Liquidity: There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than might be anticipated.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 30 September 2023. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	1.65%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

Past Performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 7 June 1993 and this share class on 2 March 1998.

- Class A Accumulation shares in sterling
- 45% MSCI World High Dividend Yield GBP Hedged + 55% Bloomberg Global Aggregate Total Return (TR) GBP Hedged (UK CPI +4% pre 04/07/2023, UK CPI pre 01/07/2019, 50% FTSE All-Share TR + 50% ICE BofAML Sterling Broad Market TR GBP pre 01/01/1993)
- IA Mixed Investment 20-60% Shares

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023

■ Index	0.7%	0.2%	1.6%	3.0%	2.1%	3.3%	4.6%	9.6%	14.9%	9.6%
■ Sector	4.8%	1.2%	10.4%	7.2%	-5.1%	12.1%	3.5%	6.3%	-9.6%	6.9%

On 04 October 2021, the Fund changed its name from Cautious Managed to Global Income Opportunities. There was also an investment objective and policy change, meaning that performance shown prior to this date was achieved under different circumstances. Prior to 03 July 2023 the Fund had a different investment objective which included a target benchmark of UK CPI+4%.

Practical Information

The Fund's depositary is State Street Trustees Limited. The latest published prices for shares in the Fund are available on www.ninetyone.com. Other share classes are available for this Fund as described in the Ninety One Funds Series omnibus prospectus. UK tax legislation may have an impact on your personal tax position.
