Asset Allocation

Investment Policy

A defensive asset allocation will provide exposure to a range of asset classes across any economic sector and geographic area in line with the following asset allocation.

Under normal circumstances, exposure to bonds (which may include government, corporate, sub-investment grade and inflation linked) will be more than 50% of the allocation. The minimum exposure will be 20% with no maximum limit.

The maximum exposure to shares will be 35%, with the average exposure expected to be more than 25%, under normal circumstances.

Exposure to cash will vary depending upon prevailing circumstances and although it would normally not exceed 20% of the total value of the Sub-fund, there may be times when the Investment Manager considers stock markets around the world to be overpriced or that a period of instability exists which presents unusual risks. In such cases or during such periods, a higher level of liquidity may be maintained and, if considered prudent, the exposure to cash or near cash instruments held would be increased. Unless market conditions were deemed unusually risky, the increased exposure and period would not be expected to exceed 30% and six months respectively.

The balance of exposure may include alternative investments, such as property or commodities, which are intended to improve the overall risk reward profile of the Sub-fund. Exposure to alternative investments will be limited to 20%.

To provide the above exposure, a minimum of 70% of the Sub-fund will be invested in active and/or passively managed collective investment schemes (which may include schemes operated by the ACD, associates or controllers of the ACD). The Sub-fund may also invest directly (maximum of 30%) in shares, bonds, cash, near cash instruments, investment trusts, real estate investment trusts (REITs) and structured products which may embed derivatives.

Performance

The IA (Investment Association) Mixed Investment 0% - 35% Shares Sector is used as the comparator. This is considered appropriate for investors to use when comparing performance as the sector is made up of funds with a similar asset allocation as defined by the IA. The sector is not constructed as an Index, therefore as funds enter or leave the sector composition can change, but it is considered that the sector remains a useful and relevant comparator for investors to assess performance within a relevant peer group.

Cumulative Performance	3 Months	6 Months	1 Year	3 Years	5 Years	10 Years

Source: Morningstar Direct as at 31 May 2024. Performance is bid to bid with income reinvested. Past Performance is no guarantee of future performance and investors may get back less than the original amount invested.

Important Information

Margetts Fund Management Ltd is authorised and regulated by the Financial Conduct Authority. Past Performance is no guarantee of future performance. The value of an investment and the income from it can fall as well as rise and investors may get back less than they invested. Quoted OCFs may include a subsidised AMC. Quoted yields are based on the previous 12 months distributions to investors and are not guaranteed. Future distributions may differ and will be subject to market factors. Risk factors should be taken into account and understood including (but not limited to) currency movements, market risk, liquidity risk, concentration risk, lack of certainty risk, inflation risk, performance risk, local market risk and credit risk. The information on this factsheet is intended to provide information only and should not be interpreted as advice. Margetts recommend that investors seek professional advice before making any investment to ensure that the product is suitable and can achieve their objectives. Investors should ensure that they have read and understood the Key Investor Information Document (KIID) and Supplementary Information Document (SID), which contain important information. A copy of these documents is available on the website or on request from Margetts Fund Management. Contact details are provided below. Margetts does not warrant that information will be error-free. There is no guarantee that the objective will be achieved, and capital is at risk.
