| Underlying Yield | 2.54% |

Overview

The Fund's investment objective is to achieve a total return (combination of capital growth and income) over the medium term (3–5 years) by investing at least 80% in short-duration (1–10 years) index-linked bonds. The Fund's performance target is to outperform, after the deduction of charges, a composite benchmark of the 30% Bloomberg UK Government Inflation Linked Bond 1–10 year Total Return GBP Index, 70% Bloomberg World Government Inflation Linked Bond (ex UK) 1–10 year Total Return GBP Index (the "Index") over rolling 5-year periods. The Index is a good measure of the performance of index-linked UK government bonds and government bonds globally. The Index is considered an appropriate benchmark for the Fund's performance, as many of the Fund's potential investments will be included in either the Bloomberg UK Government Inflation Linked Bond 1–10 year Total Return GBP Index or the Bloomberg World Government Inflation Linked Bond (ex UK) 1–10 year Total Return GBP Index. In addition to the benchmark for the Fund's performance as noted above (the "Index"), the IA Global Inflation Linked Bond sector is considered an appropriate benchmark for performance comparison.

Yield Definitions

The distribution yield reflects the amounts that may be expected to be distributed over the next 12 months. The underlying yield reflects the annualised income net of expenses of the Fund as a percentage (calculated in accordance with the relevant accounting standards). Both these yields are calculated as a percentage of the mid-price of the Fund as at the date shown and are month end snap shots of the portfolio on that day and do not include any preliminary charges. Investors may be subject to tax on distributions. Reported yields reflect RLAM's current perception of market conventions around timing of bond cash flows.

Unrated Bonds

Unrated bonds are not rated by a credit rating agency. RLAM ascribes internal ratings for these bonds which will vary for each asset.

Important Information

This is a financial promotion and is not investment advice.

The Fund is a sub-fund of Royal London Bond Funds ICVC, an open-ended investment company with variable capital with segregated liability between sub-funds, incorporated in England and Wales under registered number IC000797. The Authorised Corporate Director (ACD) is Royal London Unit Trust Managers Limited, authorised and regulated by the Financial Conduct Authority, with firm reference number 144037. For more information on the fund or the risks of investing, please refer to the Prospectus or Key Investor Information Document (KIID), available via the relevant Fund Information page on www.rlam.com.

Issued by Royal London Asset Management Limited, 80 Fenchurch Street, London EC3M 4BY. Authorised and regulated by the Financial Conduct Authority, firm reference number 141665. A subsidiary of The Royal London Mutual Insurance Society Limited.

Please note that the impact of Futures is not considered as part of the overall fund Duration calculation; Fund level Duration is based on long only physical assets (incl cash).

Key Concepts to Understand

Bonds: Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return: A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period: A rolling 5-year period is any period of five years, no matter which day you start on.

Efficient Portfolio Management: A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Risks

Investment Risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit Risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk: Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Interest Rate Risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Government and Public Securities Risk: The Fund can invest more than 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EEA State, its local authorities, a third country or public international bodies of which one or more EEA States are members.

Charges from Capital Risk: Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.
