

# M&G Index-Linked Bond Fund Sterling Class I – Accumulation shares

Monthly Fund Review as at 31 May 2024

For investment professionals only

## Fund description

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than that of the FTSE Actuaries UK Index-linked Gilts All Stocks Index over any five-year period. At least 70% of the fund is invested in inflation-linked bonds issued or guaranteed by the UK government. The fund can gain indirect exposure to inflation-linked bonds by investing in a combination of inflation-linked government bonds and derivatives. Investments are selected based on those which offer the "best value", combined with an assessment of macroeconomic, asset, sector and stock-level factors.

## The main risks associated with this fund

For any past performance shown, please note that past performance is not a guide to future performance.

The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

Further risk factors that apply to the fund can be found in the fund's Prospectus.

**Performance comparison:** The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has freedom in choosing which assets to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

## Things you should know

The fund may invest more than 35% in securities issued by any one or more of the governments listed in the fund prospectus. Such exposure may be combined with the use of derivatives in pursuit of the fund objective. It is currently envisaged that the fund's exposure to such securities may exceed 35% in the UK government, although these may vary subject only to those listed in the prospectus. The fund allows for the extensive use of derivatives.

Where a security has not been rated by Standard & Poor's, Fitch or Moody's, we may use M&G's internal credit rating. Based on a comparison of all available ratings for each security, the most conservative rating (S&P, Fitch, Moody's or M&G's internal rating) is taken into consideration. The ratings so identified are then expressed or converted into M&G's ratings format to obtain uniform information for all securities in the portfolio.

The value of investments will fluctuate, which will cause fund prices to fall as well as rise and investors may not get back the original amount invested. **For financial advisers only. Not for onward distribution. No other persons should rely on any information contained within.**
